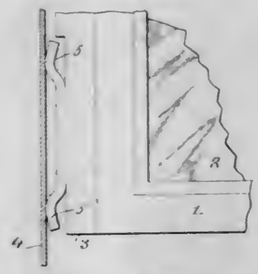
1. In a tumbler brushing machine, the combination with a brush unit and means to cause rotation thereof at high speed, of a hood embracing the brush unit and comprising an expansible cylindrical shell split along its bottom forming a slot, the shell being arranged coaxially of the unit, a flexible guard of contractile material stretched upon the front end of the shell, and means to hold the shell expanded after the guard is applied thereto, and whereby the guard is held in place.

1,502,642. METHOD OF MAKING MANGANESE STEEL. RICHARD D. JORDAN and JOHN H. HALL, High Bridge, N. J., assignors to Taylor-Wharton Iron and Steel Company, High Bridge, N. J., a Corporation of New Jersey. Filed June 5, 1922. Serial No. 566,141. 14 Claims. (Cl. 75—45.)



1. The method of making manganese steel in the electric furnace, which consists in establishing a charge including the necessary make-up of ferro-manganese and an agent capable under the influence of heat of establishing a substantially non-oxidizing environment, and rapidly melting the charge.

1,502,643. ADJUSTABLE ROTARY CIRCUIT CONTROLLER. RICHARD C. LEAKE, Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Aug. 12, 1921. Serial No. 491,779. 14 Claims. (Cl. 200—8.)

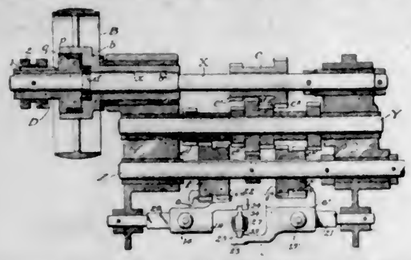
10. In an adjustable rotary circuit controller, the combination with a shaft and drum thereon, of means automatically tending to establish a locking connection between the drum and shaft in any one of a plurality of different positions.

1,502,644. SLIDABLE WINDOW SASH. HARRY E. CAMPBELL, New York, N. Y., assignor to Campbell Metal Window Corporation, Baltimore, Md., a Corporation of Maryland. Filed Nov. 30, 1921. Serial No. 518,758. 1 Claim. (Cl. 189—76.)

In a window of the type in which the jamb is provided with openings in its inner face, the combination of a jamb member adapted to stand behind the plane of the inner jamb wall, a sash having plates substantially the height of the sash adapted to extend into each jamb, slots near the edges of the plates and contact portions of the plates partially separated from the plates by such slots bent out to contact with said jamb member, said contact portions being of such thickness as to permit of bending by a manual operation to give a transverse adjustment to the sash, and at the same time to be stiff enough to form an elastic contact between the sash and the jamb member.

1,502,645. COMPOSITION FLOORS. FRANTS DJÖRUP, Chicago, Ill. Filed Dec. 23, 1921. Serial No. 524,493. 1 Claim. (Cl. 106—29.)

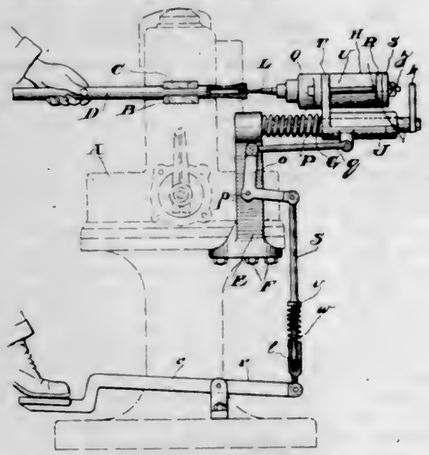
A composition flooring material or the like, consisting of calcined magnesite, sixty parts, kieselguhr, thirty parts, silica, five parts, flint, five parts, and magnesium chloride, sixty parts.



1,502,646. DYNAMITE CARTRIDGE. ERLING A. HEDIN, Upper Darby, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed June 9, 1923. Serial No. 644,497. 3 Claims. (Cl. 102—6.)

1923. Serial No. 644,497. 3 Claims. (Cl. 102—6.)

1. A dynamite cartridge comprising dynamite enclosed in carbonaceous coated paper containing an oxidation agent adapted to furnish oxygen for the complete combustion of the paper and coating without interfering with the appropriate combustion of the dynamite.



1,502,647. CHANGE GEAR. DAVID C. KLAUSMEYER, Cincinnati, Ohio, assignor to The Cincinnati Bickford Tool Company, Oakley, Cincinnati, Ohio, a Corporation of Ohio. Original application filed Aug. 25, 1920. Serial No. 406,009. Divided and this application filed Jan. 3, 1924. Serial No. 684,155. 4 Claims. (Cl. 74—38.)

1. A speed-change mechanism combining only five gears keyed to an intermediate shaft; two gears on a power shaft, the one being adapted to be engaged with one of said five gears, and the other with another of said five gears, four gears splined on a delivery shaft, two of said gears being engageable with two of the five gears on the intermediate shaft not engaged by either of the gears on the power shaft, and the

remaining two of the gears on the delivery shaft being respectively engageable with one or another of the remaining gears of the intermediate shaft; and hand-controlled means for effecting said engagement.

1,502,648. SHANK AND BIT PUNCH. WILLIAM A. SMITH, Detroit, Mich., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Original application filed Apr. 24, 1920. Serial No. 376,306. Patent No. 1,395,747, dated Nov. 1, 1921. Divided and this application filed Oct. 3, 1921. Serial No. 505,135. 1 Claim. (Cl. 76—5.)

In a machine for re-opening the bits and shanks of hollow drill steels and similar tools, the combination of means for holding the drill steel, punching mechanism in the form of a guide bar and a cylinder slidably mounted thereon, an anvil block having limited longitudinal movement in said cylinder, a pin removably held by said anvil block, a fluid actuated piston adapted to reciprocate in said cylinder for hammering the pin into the drill steel, a spring tending normally to hold said cylinder in a direction away from said steel, manually actuated levers for sliding the cylinder forwardly along said guide bar for forward feeding and for returning the cylinder to its initial position.

Patents Nos. 1,502,649 to 1,503,460.

THE OFFICIAL GAZETTE OF THE United States Patent Office.

Vol. 324—No. 5. TUESDAY, JULY 29, 1924. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $5.00 per annum; single numbers, 10 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Interference Notices.

U. S. PATENT OFFICE, *Washington, July 16, 1924.*

John H. Coyle, his assigns or legal representatives, take notice:

An interference has been declared by this Office between the application of the Medico-Dental Specialty Co., 238 Broadway, San Diego, Calif., for registration of a trade-mark and trade-mark registered July 22, 1902, No. 38,645, to John H. Coyle, Thomasville, Ga. The Office having been unable to secure service upon said Coyle, notice is hereby given that unless said Coyle, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, July 17, 1924.*

William P. Dunham, his assigns or legal representatives, take notice:

An interference having been declared by this Office between Kaufmann Bros. & Bondy, 33 East Seventeenth Street, New York, N. Y., for registration of a trade-mark and trade-mark registered January 21, 1919, No. 124,192, to William P. Dunham, 501 Fifth Avenue, New York, N. Y., and a notice of such declaration sent by registered mail to said William P. Dunham at the said address having been returned by the post-office authorities as undeliverable, notice is hereby given that unless said William P. Dunham, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, July 21, 1924.*

The Vim Medicine Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between J. P. Miller, Box 50, Port Gibson, Miss., for registration of a trade-mark and trade-mark registered February 28, 1905, No. 44,242, to The Vim Medicine Co., 510 National Union Building, Toledo, Ohio, and a notice of such declaration sent by registered mail to The Vim Medicine Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless The Vim Medicine Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. PATENT OFFICE, *Washington, July 21, 1924.*

American Chemical Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the Waverly Oil Works Company, Fifty-fourth Street and Allegheny Valley Railroad, Pittsburgh, Pa., for registration of a trade-mark and trade-mark registered August 6, 1895, No. 26,907, to the American Chemical Co., Minneapolis, Minn., and a notice of such declaration sent by registered mail to the American Chemical Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless the American Chemical Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

ADJUDICATED PATENTS.

(C. C. A. III.) The Desjauriers patents, for means for forming concrete ceiling and supporting columns, No. 942,169, claims 3 and 4 *Held* invalid; No. 944,543, claim 1 *Held* invalid; No. 1,143,107, claim 1 *Held* invalid. *Guardian Savings & Trust Co.* v. *George W. Johnson Column Form Co.*, 298 Fed. Rep. 251.

(Dist. Col.) The Rowley patent, No. 961,165, for artificial-limb suspender and back check, claims 2, 3, 6, 8, 9, 11, and 12 *Held* valid and infringed. *J. E. Hanger, Inc.*, v. *J. F. Rowley Co.*, 298 Fed. Rep. 350.

(D. C. Del.) The Feldt patent, No. 1,109,670, for method of preparing steel for painting, *Held* valid and infringed. *American Chemical Paint Co.* v. *C. R. Wilson Body Co.*, 298 Fed. Rep. 310.

Condition of Applications Under Examination at Close of Business July 18, 1924.

(Total number of applications awaiting action, excluding Trade-Mark Division, 60,752; Trade-Mark Division, 1,749. Oldest new case, Nov. 12, 1923; oldest amended, Nov 14, 1923. The dates given are 1923 except where * indicates 1924.)

DECISIONS IN PATENT AND TRADE-MARK CASES.

Supreme Court of the United States.

AMERICAN STEEL FOUNDRIES *v.* ROBERTSON, COMMISSIONER OF PATENTS, AND SIMPLEX ELECTRIC HEATING COMPANY.

Appeal from the District Court of the United States for the Northern District of Illinois.

Decided May 21, 1923.

1. TRADE-MARKS—BILL IN EQUITY UNDER SECTION 4915, REVISED STATUTES.

Under section 9 of the Trade-Mark Act, which provides that an applicant for registration of a trade-mark, if dissatisfied with the decision of the Commissioner of Patents, may appeal to the Court of Appeals of the District of Columbia, on complying with the conditions required in case of an appeal from the decision of the Commissioner by an applicant for a patent, and that "the same rules of practice and procedure shall govern in every stage of such proceedings, as far as the same may be applicable," a party whose application for registration of trade-mark has been rejected by the Commissioner and the court of appeals, has the remedy by bill in equity granted to unsuccessful applicants for patent by Revised Statutes, section 4915.

2. SAME—SAME—JURISDICTION OF COURT.

Held that the District Court for the Northern District of Illinois had jurisdiction of this suit, against the Commissioner of Patents and an intervening party, to determine the plaintiff's right to have a trade-mark registered.

APPEAL from a decree of the district court dismissing a bill for registration of trade-mark, for lack of jurisdiction.

Mr. George L. Wilkinson, with whom *Mr. Henry M. Huxley* was on the brief, for appellant.

Mr. Solicitor General Beck and *Mr. Assistant Attorney General Lovett* submitted the case without brief or argument on behalf of the Commissioner of Patents, appellee.

Mr. Nathan Hcard for Simplex Electric Heating Company, appellee.

Mr. Chief Justice TAFT delivered the opinion of the Court.

This is a direct appeal under section 238 of the Judicial Code from a decree of the District Court of the United States for the Northern District of Illinois dismissing a bill in equity. The district judge certifies that the motion to dismiss the bill was sustained solely for lack of jurisdiction.

The bill was filed by the appellant, the American Steel Foundries, against the Commissioner of Patents to secure an adjudication that the appellant is entitled to have its trade-mark "Simplex" registered and authorizing the Commissioner of Patents to register the same. The Commissioner appeared as defendant and by stipulation the Simplex Electric Heating Company was allowed to intervene as the real party in interest. The bill averred that the American Steel Foundries had duly filed an application in the Patent Office for the registration, that the Examiner of Trade-Marks had refused the application, that the Commissioner of Patents had affirmed this refusal, and that, on appeal, the Court of Appeals of the District of Columbia had affirmed the action of the Commissioner, that a petition for certiorari had been filed in this Court and granted, and that thereafter the cause was dismissed by this Court for lack of jurisdiction, on the ground that the decree of the court of appeals was not a final one.

The appellant then filed this bill under section 9 of the Trade-Mark Act of February 20, 1905, c. 592, 33 Stat. 724, and section 4915, Rev. Stats. The intervener based its motion to dismiss on the lack of jurisdiction "over the subject matter or alleged cause of action," and the motion was granted without opinion.

Section 9 of the Trade-Mark Act reads as follows:

Sec. 9. That if an applicant for registration of a trade-mark, or a party to an interference as to a trade-mark, or a party who has filed opposition to the registration of a trade-mark, or party to an application for the cancellation of the registration of a trade-mark, is dissatisfied with the decision of the Commissioner of Patents, he may appeal to the Court of Appeals of the District of Columbia, on complying with the conditions required in case of an appeal from the decision of the Commissioner by an applicant for a patent, or a party to an interference as to an invention, and the same rules of practice and procedure shall govern in every stage of such proceedings, as far as the same may be applicable.

Section 4915 of the Revised Statutes reads as follows:

Sec. 4915. [Patents obtainable by bill in equity.] Whenever a patent on application is refused, either by the Commissioner of Patents or by the Supreme Court of the District of Columbia upon appeal from the Commissioner, the applicant may have remedy by bill in equity; and the court having cognizance thereof, on notice to adverse parties and other due proceedings had, may adjudge that such applicant is entitled, according to law, to receive a patent for his invention, as specified in his claim, or for any part thereof, as the facts in the case may appear. And such adjudication, if it be in favor of the right of the applicant, shall authorize the Commissioner to issue such patent on the applicant filing in the Patent Office a copy of the adjudication, and otherwise complying with the requirements of law. In all cases, where there is no opposing party, a copy of the bill shall be served on the Commissioner; and all the expenses of the proceeding shall be paid by the applicant, whether the final decision is in his favor or not.

The question in this case is whether the closing words of section 9—

and the same rules of practice and procedure shall govern in every stage of such proceedings, as far as the same may be applicable,

are broad enough in their scope to include the "remedy by bill in equity" granted to unsuccessful applicants for a patent in section 4915.

In *Gandy* v. *Marble*, 122 U. S. 432; 39 O. G., 1423, an unsuccessful applicant for a patent who had carried his application by appeal to the Supreme Court of the District, which was dismissed on its merits January 30, 1880, on May 3, 1883, filed a bill in equity in the District Supreme Court under section 4915 against the Commissioner of Patents. That court dismissed the bill on the ground that the applicant had failed to prosecute his application within two years after the dismissal of his

appeal from the Commissioner by the Supreme Court of the District, basing it on section 4894 of the Revised Statutes, reading as follows:

Sec. 4894. All applications for patents shall be completed and prepared for examination within two years after the filing of the application, and in default thereof, or upon failure of the applicant to prosecute the same within two years after any action therein, of which notice shall have been given to the applicant, they shall be regarded as abandoned by the parties thereto, unless it be shown to the satisfaction of the Commissioner of Patents that such delay was unavoidable.

This section applies to proceedings in the Patent Office and before the Commissioner, and it was pressed upon this Court that it could not apply to such an independent proceeding as the bill in equity provided for in section 4915. But this Court held that section 4894 did apply. Mr. Justice Blatchford, speaking for the Court, admitted (p. 439), following *Butterworth* v. *Hoe*, 112 U. S. 50, 61; 27 O. G. 519, that the proceeding by bill in equity, under section 4915—

intends a suit according to the ordinary course of equity practice and procedure, and is not a technical appeal from the Patent Office, nor confined to the case as made in the record of that Office, but is prepared and heard upon all competent evidence adduced and upon the whole merits,

but continued—

yet the proceeding is, in fact and necessarily, a part of the application for the patent.

He summed up the conclusion of the Court as follows (p. 440):

The presumption of abandonment, under section 4894, unless it is shown that the delay in prosecuting the application for two years and more after the last prior action, of which notice was given to the applicant, was unavoidable, exists as fully in regard to that branch of the application involved in the remedy by bill in equity as in regard to any other part of the application, whether so much of it as is strictly within the Patent Office, or so much of it as consists of an appeal to the Supreme Court of the District of Columbia under section 4911. The decision of the court on a bill in equity becomes, equally with the judgment of the Supreme Court of the District of Columbia on a direct appeal under section 4911, the decision of the Patent Office, and is to govern the action of the Commissioner. It is, therefore, clearly a branch of the application for the patent, and to be governed by the rule as to laches and delay declared by section 4894 to be attendant upon the application.

[1] This view of the intimate relation of the bill in equity allowed in section 4915 to the application for a patent and the practice and procedure provided in due course thereof is of much assistance in giving proper scope to the words of section 9 of the Trade-Mark Act. After making provision for an appeal to the District Court of Appeals from a simple refusal of registration, and from decisions of the Patent Office in three different kinds of adversary proceedings therein in respect of such registration, on complying with the conditions required in case of an appeal from refusal of a patent or a decision in a patent interference proceeding, the words are—

and the same rules of practice and procedure shall govern in every stage of such proceedings, as far as the same may be applicable.

If the bill in equity of section 4915 is only a part of the proceeding for an application for a patent as held in *Gandy* v. *Marble*, it is no straining of the language to make these words include a bill in equity for the registration of a trade-mark. This Court has taken exactly this view in *Atkins & Co.* v. *Moore*, 212 U. S. 285; 142 O. G. 571. In that case it was held that a decision of the Court of Appeals of the District of Columbia affirming the decision of the Commissioner of Patents refusing registration of a trade-mark on an appeal under section 9 of the Trade-Mark Act was not a final judgment of the court of appeals which could be appealed to this Court, and in the argument to show that it was not, Chief Justice Fuller, who spoke for the Court, said (p. 291):

Under section 4914 of the Revised Statutes no opinion or decision of the court of appeals on appeal from the Commissioner precludes "any person interested from the right to contest the validity of such patent in any court wherein the same may be called in question," and by section 4915 a remedy by bill in equity is given where a patent is refused, and we regard these provisions as applicable in trade-mark cases under section 9 of the act of February 20, 1905.

This language is quoted with approval in the opinion of this Court in *Baldwin Co.* v. *Howard Co.*, 256 U. S. 35; 286 O. G. 865, in which it was held that there could be no review in this Court, by appeal or certiorari, of a decision of the District Court of Appeals in respect to the registration of a trade-mark under section 9 of the Trade-Mark Act.

It is pressed upon us, however, that this language in *Atkins & Co.* v. *Moore* and in *Baldwin Co.* v. *Howard Company*, was not necessary to the conclusion in those cases and is to be regarded as obiter dictum. It was used in arguendo and was the unanimous expression of the Court in both cases. It may be that the conclusion that the decision of the court of appeals was not final and appealable to this Court could have been reached without this argument; but, however, this may be, the construction put by the Court on section 9 is most persuasive and follows so clearly from the decision in *Gandy* v. *Marble*, that we find no reason to question its correctness.

An argument has been made to us against giving such an effect to section 9 based on the intrinsic differences between the nature of the patent right, and that in a trade mark. We do not regard such differences as important in interpreting section 9 when it is obvious from that section and the whole of the Trade-Mark Act that Congress intended to produce a parallelism in the mode of securing these two kinds of Government monopoly from the Patent Office.

[2] The decree of the district court is reversed and the case is remanded for further proceedings.

Court of Appeals of the District of Columbia.

POSTUM CEREAL CO., INC., *v.* CALIFORNIA FIG NUT CO.

No. 1,821. Decided Apr. 7, 1924.

TRADE-MARKS—ACT OF MARCH 19, 1920—JURISDICTION OF THE COURT OF APPEALS OF THE DISTRICT OF COLUMBIA.

The Trade-Mark Act of March 19, 1920, contains no provision for appeal to the Court of Appeals of the District of Columbia.

[For Commissioner's decision see 313 O. G. 454.]

Mr. E. S. Rogers for Postum Cereal Co., Inc.

Mr. A. E. Wallace for California Fig Nut Co.

Before SMYTH, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

ROBB, *J.:*

Appellee secured registration of the mark "Fig-Nuts" under the provisions of the Trade-Mark Act of March 19, 1920, 41 Stat. 533, and in this proceeding, based upon section 2 of that act, it is sought to cancel the registration. [See 313 O. G. 454.]

In *U. S. Compression Inner Tube Co.* v. *Climax Rubber Co.*, 53 App. D. C. 370; 290 Fed. 345; 312 O. G. 400, we ruled that the act in question contains no provision for appeal to this court, and hence that we are without jurisdiction to consider one.

It results that this appeal must be and is dismissed for want of jurisdiction.

Dismissed.

Court of Appeals of the District of Columbia.

DE FOREST *v.* MEISSNER, LANGMUIR, AND ARMSTRONG. LANGMUIR *v.* ARMSTRONG, MEISSNER, AND DE FOREST. MEISSNER *v.* DE FOREST, LANGMUIR, AND ARMSTRONG. DE FOREST *v.* MEISSNER AND LANGMUIR. DE FOREST *v.* LANGMUIR.

Nos. 1,638, 1,639, 1,640, 1,641, 1,642. Decided May 5, 1924.

INTERFERENCE—PRIORITY—CONCEPTION OF INVENTION—REDUCTION TO PRACTICE.

Where the work of De Forest culminated in a complete disclosure of the invention in August, 1912, before any of his rivals conceived the invention, and the facts relative to the activity of De Forest following his discovery conclusively answer the charge of lack of diligence up to the time he manufactured and sold the invention and filed his application, *Held* that it matters little whether the case be disposed of upon the theory that what was done in August, 1912, amounted to reduction to practice or merely conception of the invention.

Mr. C. M. Thomas, Mr. F. D. Thomas, Mr. S. E. Darby, Mr. S. E. Darby, jr., Mr. W. H. Davis, Mr. A. D. Lunt, Mr. H. E. Dunham, Mr. Melville Church, and *Mr. Willis H. Taylor, jr.*, for De Forest.

Mr. A. D. Lunt, Mr. H. E. Dunham, Mr. O. Knight, Mr. W. H. Davis, Mr. Thomas Ewing, and *Mr. Willis H. Taylor, jr.*, for Meissner.

Mr. A. D. Lunt and *Mr. H. E. Dunham* for Langmuir.

Mr. O. Knight, Mr. F. D. Thomas, Mr. S. E. Darby, jr., Mr. C. M. Thomas, Mr. S. E. Darby, Mr. W. H. Davis, Mr. Melville Church, and *Mr. Willis H. Taylor, jr.*, for Armstrong et al.

Before SMYTH, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

VAN ORSDEL, *J.:*

This interference [41,790] comes here on appeal by the parties Langmuir, De Forest, and Meissner, from the decision of the Commissioner of Patents awarding priority to Armstrong, also appeals by De Forest against Meissner and Langmuir jointly [41,224], and against Langmuir, individually [41,225], for the invention set forth in the following counts:

1. Means for producing sustained electrical oscillations comprising an oscillatory circuit having two electrodes in an exhausted receptacle and a second circuit coupled thereto having a conducting body interposed between said electrodes.

2. Means for producing sustained electrical oscillations comprising an oscillatory circuit having two electrodes, a second circuit coupled thereto having a conducting body interposed between said electrodes, and means for varying the frequency of the produced oscillations.

3. The method of producing electrical alternating currents which consists in causing current to flow in one of two coupled circuits and varying the flow of current in the first circuit by impressing the potential induced in the second circuit upon a conducting body interposed between two electrodes in the first circuit.

The invention set forth in each of the applications is concisely described in the opinion of the Commissioner as follows:

All the counts of all the issues involve the setting up of small current variations in one circuit, creating thereby corresponding variations in a second circuit, and feeding back these second circuit variations inductively into the first circuit to add their effect to the initial variations, which latter, thus reenforced, create and form greater variations in the second circuit, and these are, in turn, also inductively fed back to the first circuit to still further amplify the variations in such first circuit, and these still further amplify those in the second circuit, and so on. The energy of the variations of each circuit reacts upon and increases that in the other circuit until a maximum sustained alternating current is finally produced, whose frequency can be controlled by varying the electric constants of the associated circuits.

The whole case, as here presented, turns upon the question of priority to be determined solely as a question of fact. The Commissioner of Patents, affirming a decision by the Board of Examiners in Chief, awarded priority to the party Armstrong. It may be stated at the outset, that the voluminous record in this case is exceptionally free from contradiction or attempted impeachment of witnesses. Indeed, the whole record may be accepted as embracing a true statement of the facts involved in each case.

Especially are we impressed by the party Armstrong and his witnesses. We have no doubt but what he produced the invention at the time alleged, and did all the things attributed to him by the testimony, as set forth in this record. His earliest claim to a conception of this invention is October 1912, followed by a witnessed sketch on January 31, 1913. This date antedates any time claimed by or available to either the party Meissner or Langmuir. These parties, therefore, are eliminated from further consideration.

This narrows the case to De Forest and Armstrong. It is clearly shown that De Forest was developing the idea involved in this invention in the early part of 1912, and it is claimed that the work culminated in a complete disclosure of the invention in August of that year. If this claim is sustained De Forest must prevail.

Coming, therefore, to De Forest's case, the Examiner of Interferences found that in the experiment of August 6, 1912, the repeating circuit used as an amplifier of telephonic currents was modified by a connection between the plate-filament circuit and the grid-filament circuit. This resulted in the production of "a beautiful clear tone."

This, the witnesses have testified, was due to the audion generating oscillations or alternating current due to the feed-back action and was understood by them at the time of the experiment. This, it is believed, establishes the fact that De Forest had a conception of the invention at that time, August 6, 1912, and that it was disclosed to others.

The Board of Examiners in Chief after reviewing the testimony held that they were—

not fully satisfied that De Forest really had a conception of his invention in August 1912

The Assistant Commissioner reviewing the De Forest case, and the experiments made in August 1912, held that—

> It must be conceded this circuit diagram of August 6, 1912 shows such an arrangement, that if the constants were proper, sustained alternating currents of oscillations would be produced. It is believed, further, the making of the diagram and the production of the "beautiful clear tone" by the apparatus connected up according to such diagram have been fairly proved by the evidence, and that, therefore, such apparatus embodied the issue of this interference. The authenticity of the notebooks and diagrams and the proofs as to their dates, as well as the production of the beautiful clear tone at the time alleged, have not been seriously controverted. Clearly the production of the tone was accidental, but this is not of moment. Did De Forest understand what was done, that the tone was due to the feed-back coupling relation, and could he reproduce the tone at will? De Forest states that he understood what was taking place and both Logwood and Van Etten corroborate him, but he has introduced no record to support this oral testimony given many years afterwards.

He then holds that the failure of De Forest to proceed after August 6, 1912, with the feed-back circuit until after Armstrong had reduced to practice; entitled Armstrong to priority.

It will be observed that the Assistant Commissioner in effect holds that what De Forest did in August 1912, amounted to a reduction to practice, but that after reducing the invention to practice he abandoned it. In patent law abandonment after reduction to practice is a proposition somewhat difficult of demonstration. At best, however, abandonment under such circumstances is a matter of proof and not of assumption. We think De Forest's record will neither sustain the charge of abandonment nor lack of diligence. The Assistant Commissioner attempts to support his conclusion on the theory that while De Forest unquestionably made this important discovery he did not recognize how the effect was obtained nor did he possess knowledge of how to reproduce it, and that such knowledge, accompanied by simultaneous or subsequent utilization of it in a manner essential to carry out its intended function, is necessary to take the production or discovery out of the class of abandoned experiments.

De Forest was the inventor of the epoch-marking invention the audion which he patented both as an amplifier and as a detector. Prior to 1912 he had devoted much of his time to experiments on the audion and to the various uses to which it might be put. At the time he discovered the oscillating audion he was investigating telegraphone recording; the telephone two-way repeater, and the amplifier for wireless work. It appears from his notebook records that the first discovery of the feed-back circuit for producing oscillations occurred in connection with his work on the amplifier for wireless and telephone two-way repeater work. There is some testimony, principally from memory, by De Forest and his corroborating witnesses, Van Etten and Logwood, that prior to August 1912 the oscillating properties of the audion were discovered. It is unnecessary, however, to go behind the written records, of August 6, 1912. This record, with the accompanying drawing, which was made by Van Etten, who was working under the direction of De Forest, clearly shows a feed-back circuit. It also discloses that when connected up it produced oscillations evidenced by "a beautiful clear tone."

The notes and diagrams made by Van Etten on August 6, 1912, were not copied into the De Forest record book, but it was followed by more complete demonstrations on August 29, 1912 of which a full and complete record was made by Van Etten in the De Forest record book. The notes indicate that the circuit was tested for amplification with successful results. It is also noted, that reversing the connections to the secondary winding coil, all sorts of musical notes were produced in the Brandes phones, and that when the connections are reversed the musical notes, whistle, etc., disappear, and the ticks come through as before. There is no question, both from the disclosure and the testimony of the witnesses, that the circuit produced oscillations of audio frequencies, evidenced by the tones in the receiver, the pitch of which could be varied by small changes in the constants of the circuit. While some question is raised as to whether the oscillations were produced by coupling of the circuits of the audion or by means not covered by the issue, we think there can be no question from the evidence supporting the disclosure that the oscillations were produced by coupling of the audion circuits.

We think the drawings and notes made by Van Etten in August 1912, clearly disclose the invention as well as the results obtained. The notes trace from the diagram the successful results culminating in the production of the alternating currents. This is not the character of invention where one skilled in the art can draw a diagram and from mere observation theorize a result. No one could even guess how the audion would act in the circuit. It contained an undisclosed secret, an undiscovered phenomena, which could only be revealed through an actual test. We think the notes contained a complete record of the invention in issue as well as the results obtained. This marvelous invention was not such a thing as would likely be forgotten by those who witnessed its discovery. Nor does the testimony of the witnesses support either the conclusion that it was cast aside and forgotten, or that their understanding of it was too meager to permit of its reproduction.

Indeed, it is conceded, by the opposing parties, that the circuit arrangement, as shown in the record of August 6, 1912, is a feed-back circuit. It is further clearly shown that oscillations were produced and that the oscillations were produced because of the feed-back circuit. Van Etten testified that the purpose was—

> to demonstrate that the audion would amplify minute currents and would be useful primarily in wireless work.

He further testified that the experiment with the audion as an amplifier was deliberately made—

> with the expectation and intention of making the audion sing or produce various musical notes and alternating currents.

He also testified that the work was done under the general direction of De Forest, and "that he was acquainted with the progress of the work." Speaking of the notebook record Van Etten said:

> The write-up indicated that in the course of an experiment with the audion as an amplifier, I deliberately turned aside to determine what might be done with the equipment and circuit then available, to produce musical tones and alternating currents.

De Forest testifies that in August 1912—

> the first arrangement was used and disclosed for producing alternating currents suitable for the production of musical tone. The principles involved were discussed and explained; the circuits were clearly understood and recorded, and many observations were made covering the arrangements or changes whereby the pitch and quality of the musical notes thus produced could be controlled.

It is generally conceded, indeed as it must be, not only by the Examiner and Commissioner, but by the parties to this action, that the diagram made in August 1912, as well as the accompanying notes, not only disclosed the invention but disclosed it in a clear workable manner. So clearly was this fixed in the mind of De Forest that in October 1912 he returned to New York and there met the witness Stone at the Arts Club. He told Stone of his discovery. Stone procured a piece of paper on which De Forest reproduced the drawing showing the invention, as it appeared in the disclosure made in August. So perfectly did this demonstrate the invention, that Stone, years afterward, when testifying in this case, took a piece of paper and reproduced the drawing while on the witness stand, purely from his recollection of what he had seen in the Arts Club in New York.

In February 1913, De Forest returned to California, and on April 17th following, put into actual practice the oscillating audion. In May of the same year he returned to New York, and in June, filed an application for a patent for the amplifier and relay, in the hope of raising sufficient funds to commercialize the present invention. He succeeded in September 1913 in selling to the telephone company the invention for which he filed in June, and immediately wired Logwood in California to join him for the purpose of commercializing the oscillating audion invention. Logwood came to New York, and in October started work toward commercializing the invention. March 12, 1914, application was filed by De Forest and Logwood for the oscillating audion invention, and about the same time apparatus was manufactured and sold embodying the invention. The present application was filed by De Forest individually, September 23, 1915. The subject matter here in issue was the sole invention of De Forest, but it was disclosed in the original joint application of De Forest and Logwood. The facts relative to the activity of De Forest following the discovery of August 1912, are not only well proven, but they stand undisputed in this record, and we think completely negative any thought of abandonment. They likewise conclusively answer the charge of lack of diligence. If it be assumed that the disclosure of August 1912 amounted to nothing more than a conception of the invention.

In this view of the case, it matters little whether the case be disposed of upon the theory that what was done in August 1912 amounted to reduction to practice or merely conception of the invention. In either event De Forest must prevail. While we think the work then accomplished amounted to reduction to practice, the case can be as readily disposed of upon the ground that De Forest clearly had at that time a conception of the invention and made a disclosure of it to others, since there is nothing to show, under the circumstances disclosed in this record, that he was lacking in diligence.

Attention has been directed to our decision in the case of *De Forest* v. *Miller*, 50 App. D. C. 202; 285 O. G. 189, where it is urged that we passed upon the sufficiency of De Forest's disclosure of August 6, 1912. The issue in that case involved a system for producing musical sounds, whereby the pitch and intensity could be so controlled as to produce any note of the musical scale at will, thereby obtaining a musical instrument which produced beautiful clear and sweet musical notes. The claim was very different from the claim here in issue which calls for "means for producing sustained electrical oscillations." The development of the musical instrument did not occur until 1915 when the interference arose between the applications of De Forest and Miller. It was not denied by the Patent Office in that case, that the disclosure of De Forest of August 6, 1912 amounted to a conception of the invention, but assuming that to be true, it was properly held by the tribunals that there was a total lack of diligence on his part in developing the particular invention there in issue. Hence that case has no bearing upon the present litigation.

It is insisted, however, that the question of priority between De Forest and Armstrong was disposed of by the United States District Court for the Southern District of New York in *Armstrong* v. *De Forest Radio Telephone & Telegraph Co.*, 279 Fed. 445. That case involved an infringement, and the question of priority, so far as the present interference is concerned, was not there involved. The Armstrong patent there in suit involved a radio signaling system and every claim called for a radio signaling system, and in no respect contemplated the production of "sustained electrical oscillations." We are not here concerned with the question of whether the production of electrical oscillations be of radio or audio frequencies, or to what particular use they are put. So remote are the present issues from the claims before the New York court, that if De Forest had been accorded August 6, 1912 for reduction to practice in that case, it would not necessarily have anticipated the terms of the claims of the Armstrong patent. Hence the discussion of the New York court, as to what De Forest did in August 1912, is merely pursuasive.

The decisions of the Commissioner are reversed, and priority awarded De Forest.

This case was decided prior to the death of the late Chief Justice.

PATENT SUITS.

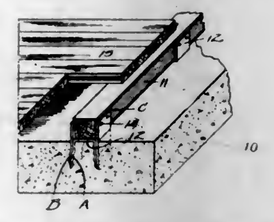
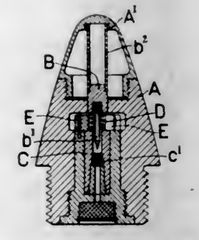
REISSUES

JULY 29, 1924.



15,880. OZONE GENERATOR. HARRY BUXTON HARTMAN, Scottdale, Pa., assignor to Electric Water Sterilizer & Ozone Company, Scottdale, Pa., a Corporation of Pennsylvania. Filed June 1, 1923. Serial No. 642,879. Original No. 1,436,251, dated Nov. 21, 1922, Serial No. 507,039, filed Oct. 11, 1921. 26 Claims. (Cl. 204—32.)

1. The combination with a casing having an air inlet and an ozone outlet, of an ozone generating unit consisting of a pair of dielectric members and intermediate electrode arranged in spaced relation and supported in said casing to provide a straight flow of air from said inlet to said generating unit and for providing a continued straight flow of the resultant ozone to said outlet.

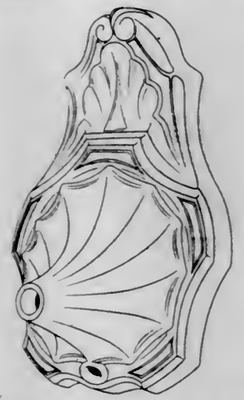


15,881. CONCRETE AND WOOD FLOOR CONSTRUCTION DEVICE. CLYDE W. PRICKETT, Winterset, Iowa. Filed Sept. 23, 1922. Serial No. 589,990. Original No. 1,381,740, dated June 14, 1921, Serial No. 421,020, filed Nov. 1, 1920. 6 Claims. (Cl. 72—101.)

4. A clip comprising a body portion adapted to rest upon the surface of a concrete bed, downwardly extending prongs for insertion into the concrete and oppositely

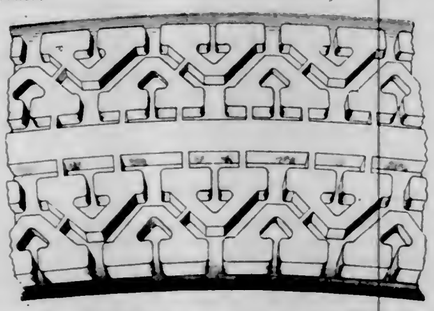
disposed, permanently attached extensions for embracing a sleeper.

15,882. PERCUSSION FUSE. VALENTIN SCHLÄFER, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Feb. 9, 1921. Serial No. 443,705. Original No. 1,366,499, dated Jan. 25, 1921, Serial No. 408,405, filed Sept. 4, 1920. 5 Claims. (Cl. 102—39.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



3. A fuse for projectiles comprising a body, a rammer, two firing parts, one of which is carried by the rammer, a compressible cap rigidly attached to said body and permanently covering said rammer, and a safety device having locking means normally extending between said firing parts for preventing accidental firing movement of the rammer and adapted to automatically release the rammer after firing; the rammer, when released from said locking means, being so easily movable in the direction of firing, that it remains in position during flight only when covered by said compressible cap against air pressure.

DESIGNS



JULY 29, 1924.

65,317. BASE FOR LAMPS OR THE LIKE. FRANK ADAMAC, Laurelton, N. Y., assignor to Rudolph Felix, New York, N. Y., doing business as The Ovalite Company. Filed May 16, 1924. Serial No. 9,628. Term of patent 3½ years.

The ornamental design for a phonograph cabinet as shown.

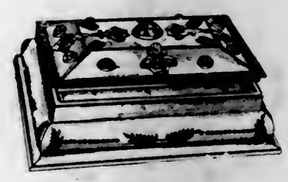
65,338. BOWL OR SIMILAR ARTICLE. GUSTAV A. HORN, Jeannette, Pa., assignor to Westmoreland Specialty Company, Grapeville, Pa., a Corporation of Pennsylvania. Filed May 8, 1924. Serial No. 9,524. Term of patent 3½ years.

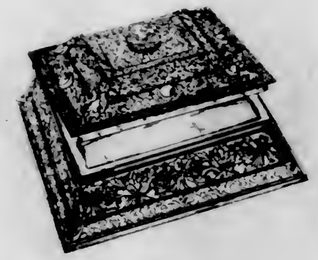
The ornamental design for a bowl or similar article, as shown.

65,339. DOLL STATUETTE. MARGUERITE HUGHES, Johnson City, Tenn. Filed Mar. 10, 1924. Serial No. 8,895. Term of patent 3½ years.



The ornamental design for a doll statuette, as shown.

65,340. CONFECTIONERY BOX. ALVIN P. JOHNSON, Swampscott, Mass. Filed May 21, 1924. Serial No. 9,676. Term of patent 14 years.

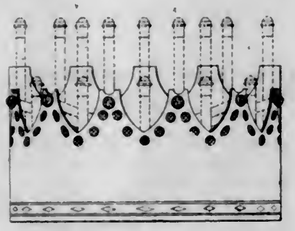


The ornamental design for a confectionery box as shown and described.

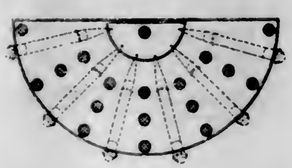
65,341. JEWELRY BOX. MAURICE J. KARPELES, Providence, R. I. Filed June 18, 1924. Serial No. 9,895. Term of patent 14 years.

The ornamental design for a jewelry box, as shown.

65,342. JEWELRY BOX. MAURICE J. KARPELES, Providence, R. I. Filed June 17, 1924. Serial No. 9,887. Term of patent 14 years.



The ornamental design for a jewelry box, as shown.



65,343. BADGE OR SIMILAR ARTICLE. LUCIUS L. KINNER, Ocean Park, Calif. Filed Mar. 1, 1923. Serial No. 5,336. Term of patent 14 years.

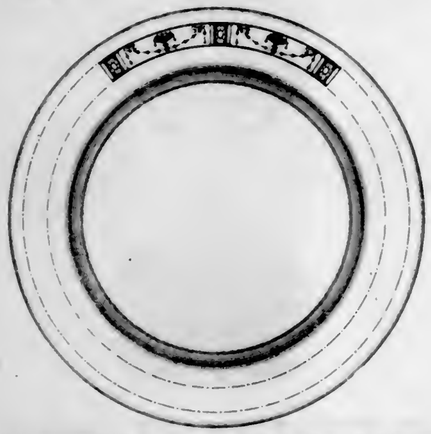
The ornamental design for a badge or similar article, as shown.

65,344. DISPLAY STAND FOR PENCILS. ERWIN C. KUBLER, Springfield, N. Y., assignor to American Lead Pencil Company, a Corporation of New York. Filed Nov. 27, 1922. Serial No. 4,407. Term of patent 3½ years.

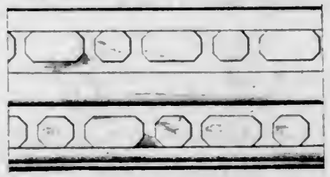
The ornamental design for a display stand for pencils, as shown.

65,345. RAG DOLL. ELSIE DINSMORE LANDFEAR, Jersey City, N. J. Filed May 24, 1924. Serial No. 9,703. Term of patent 3½ years.

The ornamental design for a rag doll as shown.



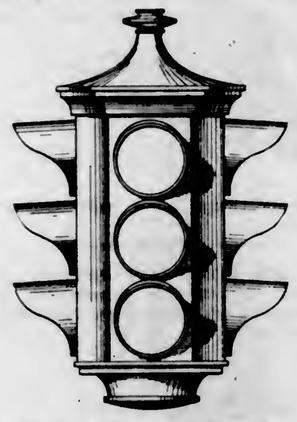
65,346. FINGER RING. LUCIEN E. LIVSEY, Brooklyn, N. Y., assignor to Barnett Esh, operating under the name of Kaspar & Esh, New York, N. Y. Filed May 27, 1924. Seral No. 9,715. Term of patent 3½ years.



The ornamental design for finger ring, as shown.

65,347. PLATE OR SIMILAR ARTICLE. RANDOLPH E. LUKENS, Syracuse, N. Y., assignor to Iroquois China Company, Syracuse, N. Y., a Corporation of New York. Filed May 13, 1924. Serial No. 9,579. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown.



65,348. NONSKID TIRE. HARRY MCCREARY, Indiana, Pa. Filed Feb. 20, 1923. Serial No. 5,228. Term of patent 3½ years.

The ornamental design for a non-skid tire, as shown.

65,349. TRAFFIC LIGHT. LOREN W. MCOMBER, Peoria, Ill. Filed Dec. 12, 1923. Serial No. 8,001. Term of patent 14 years.

The ornamental design for a traffic light, as shown.

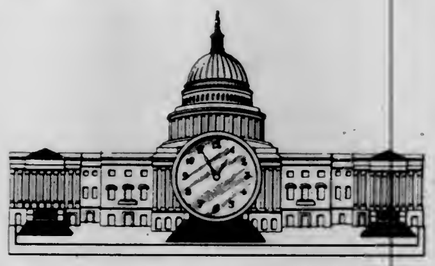
65,350. PLAYING CARD. HENRY READ, Denver, Colo., assignor to Barnwell S. Stuart, Denver, Colo. Filed Mar. 28, 1924. Serial No. 9,094. Term of patent 14 years.

The ornamental design for a playing card, as shown.

65,351. WATCHCASE. JAMES REICHENBERG, London, England. Filed May 28, 1924. Serial No. 9,732. Term of patent 7 years.

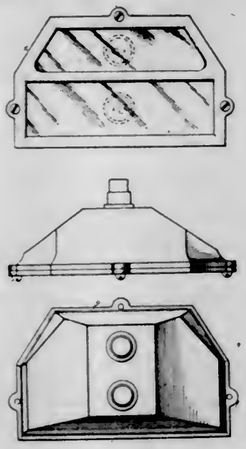
Front View.

Side View.



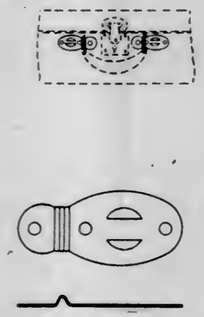
The ornamental design for a watchcase, as shown.

65,352. PENCIL. JESSE E. ROACH, Los Angeles, Calif. Filed Apr. 25, 1923. Serial No. 5,939. Term of patent 14 years.



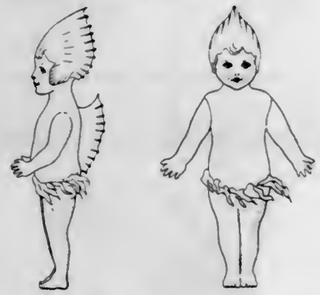
The ornamental design for a pencil as shown.

65,353. CLOCK CASE. MORRIS SALINGER, Brooklyn, N. Y., assignor, by mesne assignments, to Pauline Salinger, New York, N. Y. Filed Mar. 10, 1921. Serial No. 451,302. Term of patent 14 years.



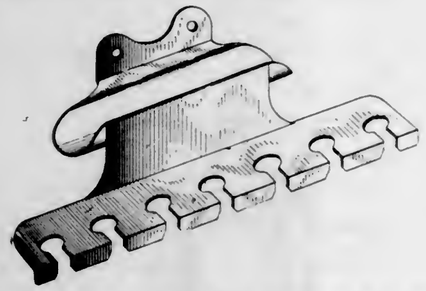
The ornamental design for a clock case as shown.

65,354. SIGNAL-LIGHT CASING. WALTER E. SHETTLEMORE, Chicago, Ill. Filed June 6, 1924. Serial No. 9,811. Term of patent 14 years.



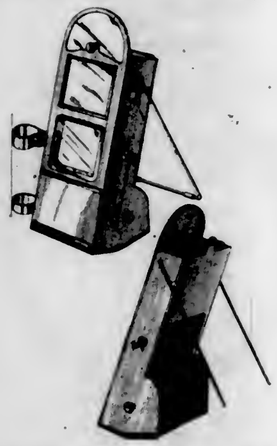
The ornamental design for a signal light casing, as shown.

65,355. ATTACHING PLATE FOR SUITCASES OR SIMILAR ARTICLES. MAURICE B. SHWAYDER, Denver, Colo. Filed May 27, 1921. Serial No. 473,151. Term of patent 7 years.



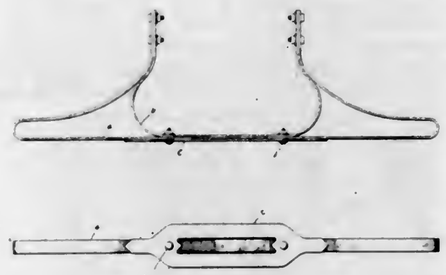
The ornamental design of an attaching plate for suitcases or similar articles as shown.

65,356. DOLL. MILDRED K. SMITH, Mount Vernon, N. Y., assignor of one-half to Lillian Wilhelm Robertson, Scottsdale, Ariz. Filed Apr. 11, 1923. Serial No. 5,779. Term of patent 14 years.



The ornamental design for doll, substantially as shown.

65,357. TOOTHBRUSH AND PASTE HOLDER. LOUIS G. STRNAD, Chicago, Ill. Filed May 21, 1924. Serial No. 9,672. Term of patent 14 years.

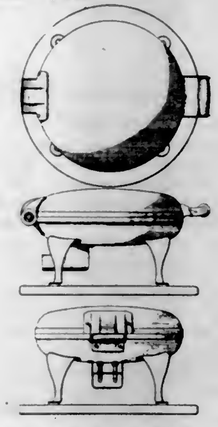


The ornamental design for a toothbrush and paste holder, as shown.

65,358. TELEPHONE ATTACHMENT CASING. GEORGE TOLK and ALVIN H. ROSENBAUM, Brooklyn, N. Y. Filed Jan. 18, 1924. Serial No. 8,342. Term of patent 3½ years.

The ornamental design for a telephone attachment casing as shown.

65,359. AUTOMOBILE BUMPER. FRANK TOMASEK, Chicago, Ill. Filed Aug. 18, 1922. Serial No. 3,437. Term of patent 14 years.



The ornamental design for an automobile bumper as shown and described.

65,360. LANTERN. ERNEST A. WALKER, Newark, N. J., assignor to The G. & G. Fixture Co., Newark, N. J., a Copartnership composed of William Goldberg and Abe Goldberg. Filed Mar. 19, 1924. Serial No. 8,998. Term of patent 7 years.

The ornamental design for a lantern, as shown.

65,361. WAFFLE IRON. GEORGE F. WELLS, San Francisco, Calif. Filed Feb. 27, 1922. Serial No. 921. Term of patent 7 years.

The ornamental design for a waffle iron, substantially as shown.

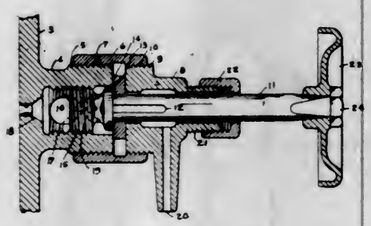
65,362. MONOGRAM MEDALLION RING. CHARLES T. WITTSTEIN and FRANCIS H. WITTSTEIN, Newark, N. J. Filed May 29, 1924. Serial No. 9,749. Term of patent 14 years.

The ornamental design for a monogram medallion ring, as shown.

65,363. COMBINATION WASHCLOTH AND DOLL. MABEL WYNN, Los Angeles, Calif. Filed Feb. 13, 1924. Serial No. 8,623. Term of patent 3½ years.

The ornamental design for a combination washcloth and doll, as shown.

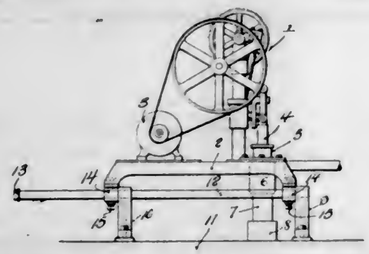
PATENTS



GRANTED JULY 29, 1924.

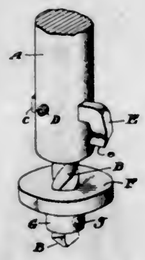
1,502,649. SPRING COVER FOR AUTOMOBILES. OSCAR F. ANDERSON, Somerville, Mass., assignor to Anderson Manufacturing Company, Everett, Mass., a Corporation of Massachusetts. Filed Nov. 17, 1923. Serial No. 675,305. 4 Claims. (Cl. 267—37.)

1. A cover for an automobile spring comprising a top section for covering the top of the spring, two side sections secured to the opposite edges of said top section and adapted to cover the opposite sides of the spring, said sections being made of relatively non-elastic sheet material and the joined longitudinal edges of said top and side sections being shaped to form a lateral enlargement in the cover to fit over the rebound clip of the spring, and fastening means for holding said cover on a spring.



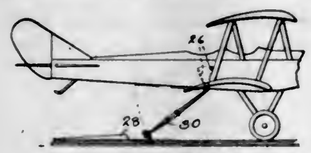
1,502,650. GAUGE COCK. WILLIAM OLIVER ASHE, Yonkers, N. Y., assignor to Nathan Manufacturing Company, New York, N. Y., a Corporation of New York. Original application filed June 16, 1921, Serial No. 477,872. Divided and this application filed Sept. 12, 1922. Serial No. 587,830. 7 Claims. (Cl. 251—22.)

4. In a gauge cock having a body and a spindle the combination of a service valve carried by the spindle and a seat for said valve on the inner side of the body, a tapered valve seat in a water column, and an emergency valve comprising a ball shaped member on the inner end of the spindle adapted to seat in said tapered valve seat in said water column.



1,502,651. MOUNTING FOR DEEP-WELL-PUMP HEADS. JOHN I. ASTROM, Fort Wayne, Ind., assignor to Fort Wayne Engineering & Mfg. Co., Fort Wayne, Ind. Filed Sept. 6, 1922. Serial No. 586,548. 2 Claims. (Cl. 103—218.)

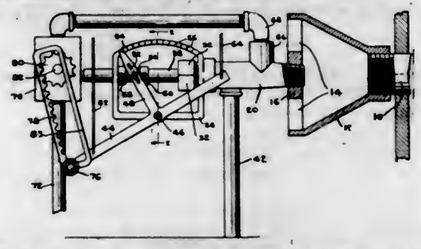
1. The combination of a mounting comprising stationary supporting members, a pair of parallel elongated slide ways carried thereby, a bed plate carried by said slide ways, a pump head rigidly attached to said bed plate, a water head having a flange adapted to overlap



said bed plate when such bed plate is in one position of adjustment, and means for temporarily rigidly locking said flange to said bed plate.

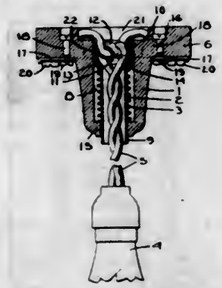
1,502,652. METAL-BORING TOOL. FLETCHER F. BABCOCK, Parsons, Kans. Filed Jan. 25, 1923. Serial No. 614,780. 1 Claim. (Cl. 77—69.)

A tool adapted to be used interchangeably for reaming a previously formed hole or for boring a hole and a groove surrounding the hole comprising a tool holder carrying a centrally arranged boring bit, an adjustable L-shaped cutter carried by the tool holder adapted to cut a groove around the bit, a removable pilot ring loosely mounted on the bit and a collar detachably connected with the bit below the ring and which is adjustable vertically thereon to hold the ring at the desired elevation.



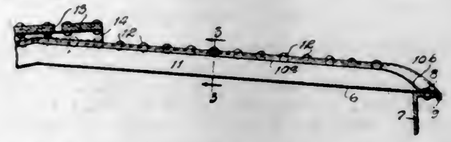
1,502,653. AIRCRAFT-ARRESTING DEVICE. ROBERT E. BASSLER, Brooklyn, N. Y. Filed Jan. 30, 1923. Serial No. 615,853. 22 Claims. (Cl. 244—2.)

22. In an apparatus of the character described, in combination, a platform provided with longitudinal slots, devices mounted in said slots, a portion of each device



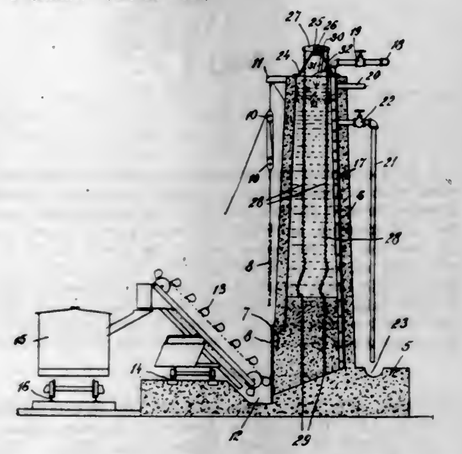
projecting from the slots to engage an aircraft on landing, said devices being normally free to move along said slot with the aircraft, and means for applying a friction force opposing the movement of said devices.

1,502,654. DEVICE FOR CONTROLLING THE FLOW OF GASES. THOMAS R. BLANCHARD, Minneapolis, Minn., assignor, by mesne assignments, to The Airgas Burner Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Dec. 20, 1923. Serial No. 681,754. 6 Claims. (Cl. 158—119.)



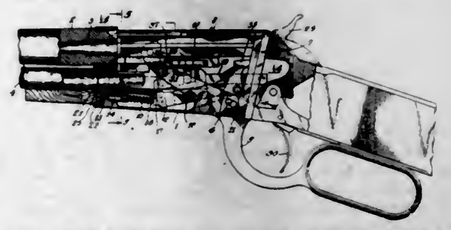
1. A device for controlling the flow of gases comprising a tubular member containing a chamber and a tapered bore leading from the front of said chamber, a gas supply pipe leading into said chamber, a tapered plunger valve in said bore, a frame member to which the rear end of said tubular member is secured, a rod to which said valve is attached in axial alinement therewith, said rod extending slidably through said frame member and through the rear end of said tubular member, a lever pivoted to said frame member, an arm extending from said lever and operatively connected to said rod, and operating cables attached to said lever.

1,502,655. CEILING ROSETTE. WRIGHT BOLTON, Jr., New Bedford, and NORMAN M. PAULL, Fairhaven, Mass. Filed Nov. 12, 1923. Serial No. 674,122. 1 Claim. (Cl. 240—90.)



In an electric light fixture, the combination with an electric lamp of a ceiling rosette comprising a depending apertured boss, a flange projecting inwardly from the wall of the aperture near the lower end of the boss forming a reduced orifice, an insulating sleeve within the aperture having an elongated shell formed of light material and of uniform diameter to permit its passing through said orifice and an enlarged head forming a part of the shell and adapted to fit and move within the aperture, said head having a chamber communicating with the interior of the shell and presenting a shoulder on its lower side, a coiled spring surrounding said shell and bearing at one end against the flange and at the other end against the shoulder resiliently to support the sleeve, and conducting wires for conveying electric current to the lamp, said wires being fastened to the lamp to support the lamp and twisted to form a knot of a size to lie and be retained within the chamber of the head whereby the lamp is resiliently supported by the wires.

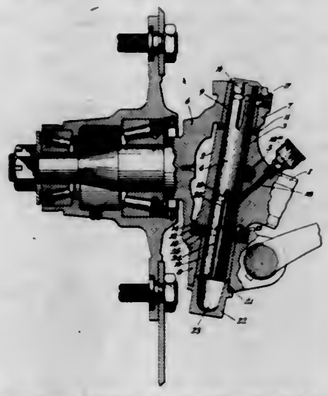
1,502,656. CAR ROOF. CHARLES DAVID BONSALL, Pittsburgh, Pa., assignor to P. H. Murphy Company, New Kensington, Pa., a Corporation of Pennsylvania. Filed Nov. 1, 1922. Serial No. 598,325. 8 Claims. (Cl. 108—54.)



6. A car roof comprising a plurality of roof sheets whose side marginal portions are connected by seams of substantially L-shaped section at the ridge and of substantially channel-shaped section adjacent to the eaves.

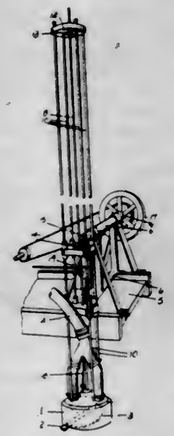
1,502,657. APPARATUS FOR TREATING PULPS. WALTER O. BORCHERDT, Austinville, Va., assignor to The New Jersey Zinc Company, New York, N. Y., a Corporation of New Jersey. Original application filed June 4, 1919, Serial No. 301,833. Divided and this application filed Jan. 27, 1923. Serial No. 615,245. 8 Claims. (Cl. 83—82.)

1. An apparatus for the treatment of pulps comprising a tank relatively deep as compared with its other dimensions, and adapted to contain a pulp, movable means longitudinally disposed within the tank and extending throughout substantially its entire depth for effecting a gentle disturbance throughout the entire depth of pulp in the tank, and means permitting the separate removal from the tank of the settled solid particles and the supernatant liquor.



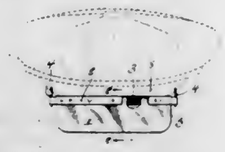
1,502,658. FIREARM. JOHN M. BROWNING, Ogden, Utah. Filed May 21, 1920. Serial No. 383,063. 17 Claims. (Cl. 42—17.)

1. In firearm adapted to be used with cartridges of different calibers, a receiver provided with a loading-opening through which the firearm is charged with cartridges, a loading-trap in said opening for maintain-



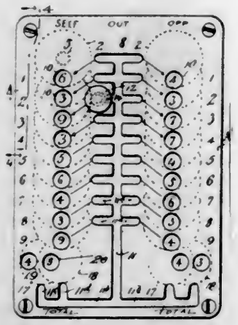
ing the loading-opening closed when the firearm is in operation, a stop for limiting rearward movement of a cartridge of one caliber when the action is locked, and an auxiliary stop for positively limiting the rearward movement of a cartridge of different caliber.

1,502,659. LUBRICATION OF AUTOMOTIVE VEHICLE KNUCKLES. GUSTAV W. CARLSON, Cleveland, Ohio, assignor to The Eaton Axle & Spring Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 11, 1923. Serial No. 679,907. 7 Claims. (Cl. 64—27.)



1. In a device of the character described, an axle provided with a steering knuckle pivot, a steering knuckle mounted on said pivot, a thrust washer between said axle and said knuckle, said knuckle being provided with an oil reservoir at the lower end of the pivot, means for supplying oil to the reservoir from a point above the level of said thrust washer, and means of communication between said reservoir and said thrust washer such that said thrust washer may be lubricated from said reservoir by splash when the oil level is below said thrust washer.

1,502,660. MACHINE FOR MINING OR RECOVERING MARL AND THE LIKE. JOSEPH F. CARNES, Ceresco, and JOSEPH F. HALDER, Battle Creek, Mich. Filed Oct. 8, 1921. Serial No. 506,431. 6 Claims. (Cl. 37—67.)

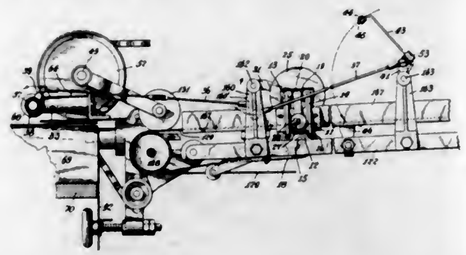


1. In a structure of the class described, the combination of a head provided with an impeller, an impeller shaft, a bed member, a supporting frame mounted on said bed member and provided with laterally projecting horizontally spaced plate-like brackets, bearing members in which said shaft is longitudinally slidable carried by said brackets, supporting rods on which said head is mounted, said brackets being provided with slide bearings for said rods, a spider connecting the upper ends of said supporting rods, said spider carrying a bearing in which the shaft is longitudinally slidable, a beveled driven gear mounted above the upper bracket and having splined driving engagement with said shaft, a jack shaft on said frame provided with a gear meshing with said gear on said impeller shaft, a pulley on said frame, and a cable connected to said head and arranged over said pulley whereby the head may be raised and lowered.

1,502,661. EYESHIELD. PAUL A. FIEBER, Baraboo, Wis. Filed Sept. 30, 1922. Serial No. 591,515. 2 Claims. (Cl. 2—10.)

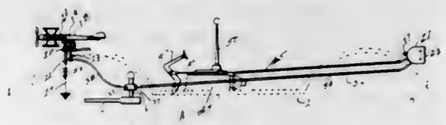
1. An eye-shield adapted to be attached to the visor of a cap comprising a transparent member having a reinforcing upper edge terminating in loops, and attaching clips adapted to grip the visor and having a vertical portion passing through said loops to form a hinged joint therewith, whereby said clips may be folded flat against said transparent member.

1,502,662. GAME-SCORE REGISTER. DE WITT FOX, New York, N. Y. Filed Jan. 6, 1923. Serial No. 610,991. 14 Claims. (Cl. 235—113.)



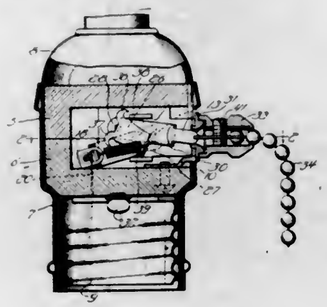
1. A register comprising a series of longitudinally disposed number indicators, a manually rotative member movable independently of said indicators, said indicators and member having cooperative means for actuating each of the former independently by the latter, and means to guide said member longitudinally along and laterally to said indicators.

1,502,663. FEED-INTERRUPTING MECHANISM FOR PAPER-FEEDING MACHINES. LEONARD JOSEPH FROHN, Lynbrook, N. Y. Filed Oct. 6, 1921. Serial No. 505,727. 25 Claims. (Cl. 271—47.)



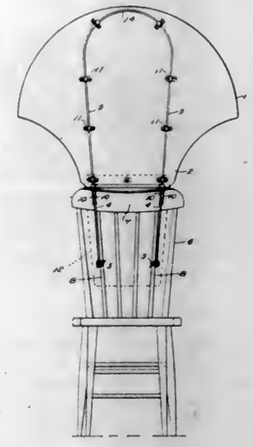
1. In a paper-feeder, a paper support, a suction feeding device to successively withdraw the top sheet only from the support, means for advancing the withdrawn

sheets, and means to cut off the suction from said feeding device and to check the delivery of sheets independ-



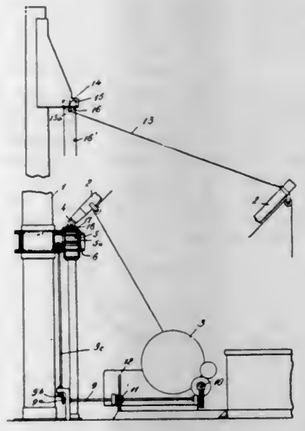
ently of the movement of said advancing means when two or more sheets are withdrawn and advanced in superposed or overlapping relationship.

1,502,664. DIRECTION SIGNAL. CHARLES A. FRUITT, Walla Walla, Wash. Filed June 2, 1923. Serial No. 642,905. 3 Claims. (Cl. 116—36.)



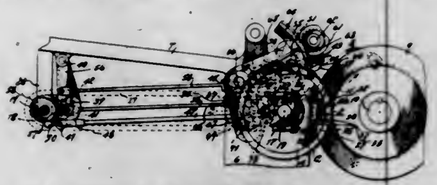
1. In a direction signal, a case, a reflector positioned in the back of said case, and provided with an illuminating means, a pair of indicating cylinders positioned parallel to each other, and rotatably mounted in said case, each of said cylinders being provided with a plurality of transparent indicating characters, and means for rotating each cylinder independent of the other.

1,502,665. SWITCH. DAVID D. GORDON, Chicago, Ill., assignor to McGill Manufacturing Company, Valparaiso, Ind., a Corporation of Indiana. Filed Sept. 19, 1919. Serial No. 324,821. 6 Claims. (Cl. 173—354.)



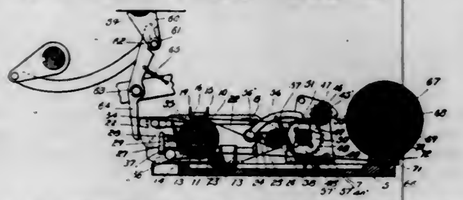
6. A switch mechanism including an oscillating contact member comprising a pair of arms having insulated forked pivotal ends and a connecting portion, a pivot stud, a contact member, means carrying said contact member extending through said connecting portion, and a spring connected with said means for operating the arm, holding the forked end and pivot stud in cooperative relation and yieldingly supporting said contact member.

1,502,666. SOUNDING BOARD. BARTHOLOMEW E. GRADY, Jr., Somerville, Mass. Filed Feb. 16, 1923. Serial No. 619,534. 3 Claims. (Cl. 181—0.5.)



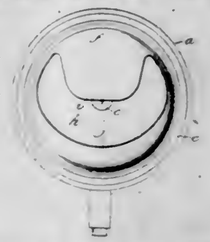
2. A sounding board having connected therewith means for fastening the sounding board on the top of a chair back in such manner that the sounding board is readily attachable to and detachable from the chair, and a panel having its upper end flexibly secured to the lower part of the front face of the sounding board, the panel being adapted to overlie the said fastening means and the front of the chair back.

1,502,667. DERRICK OR CRANE. ARTHUR GERALD GRAY, London, England. Filed Feb. 1, 1922. Serial No. 533,340. 12 Claims. (Cl. 212—66.)



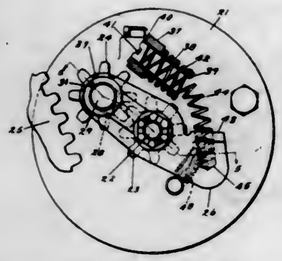
1. A derrick comprising a mast and a jib, a support for one end of said jib disposed adajacent the base of said mast, a support for the other end of said jib disposed adjacent the upper end of said mast, a winch and a crank and connecting rod mechanism interposed between one of said supports and said winch for imparting a translatory movement of varying velocity to said support with respect to said mast, substantially as and for the purpose set forth.

1,502,668. PRINTING PRESS AND OTHER LIKE MACHINE. CHARLES W. HARROLD, Cleveland, Ohio, assignor to The Harris Automatic Press Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 10, 1921. Serial No. 506,558. 18 Claims. (Cl. 271—53.)



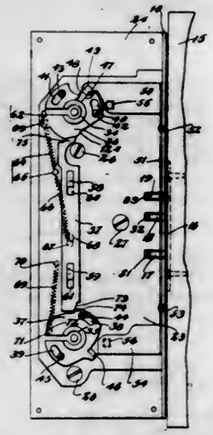
1. In a printing-press or like machine, separate sheet-feeding and positioning devices, means for separately actuating each of said devices from the press, and means for collectively varying the timing of said devices with relation to said press without shifting any of said actuating means.

1,502,669. PRINTER TABLE FOR REGISTERS OR LIKE MACHINES. BENJAMIN P. HAYES, Kansas City, Mo., assignor, by mesne assignments, to International Accounting Machine Co., New York, N. Y., a Corporation of Delaware. Filed Feb. 5, 1921. Serial No. 442,716. 4 Claims. (Cl. 242—55.)



2. In combination with a printing mechanism, a pair of independently rotatable rewind rollers, a pinion on each rewind roller, a friction gear wheel operably connected with each pinion, a slide bar, a pawl on the slide bar engaging one of the friction gear wheels, intermediate gearing connected with the other friction gear wheel, and a pawl on the slide bar operating the intermediate gearing whereby both of the rewind rollers are actuated upon reciprocation of the bar.

1,502,670. HEADLIGHT OF MOTOR CARS AND LIKE ROAD VEHICLES. GEORGE FREDERICK HILL, Middle Brighton, Victoria, Australia. Filed Feb. 2, 1924. Serial No. 690,138. 2 Claims. (Cl. 240—48.4.)

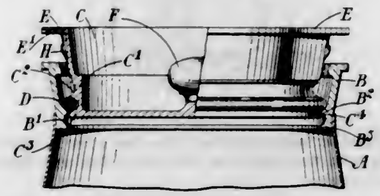


1. In head lamps of motor cars and the like having parabolic reflectors, a forwardly projecting hood extending over the lamp lens but having a crescent-shaped opening, the upper central edge of which passes through the axis of the lamp, and the lower edge is approximately midway between the upper edge and the bottom of the hood, these edges limiting the direct and reflected rays in front of the lamp, the opening extending rearwardly and upwardly at the sides and being cut away at the extremities to enable light from the lamp to directly illuminate the sides of the roadway.

1,502,671. ENGINE-STARTER GEARING. MAX L. HILLMER and LESLIE O. PARKER, Anderson, Ind., assignors to Remy Electric Company, Anderson, Ind., a Corporation of Indiana. Filed June 28, 1921. Serial No. 481,142. 8 Claims. (Cl. 74—7.)

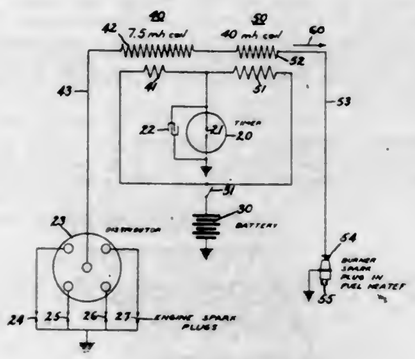
1. In automatic gearing for engine starters, the combination with an engine spur gear, a motor having a shaft and a pinion carried by said shaft; of an idle spur gear meshing with the pinion; and means for supporting said idle gear from said shaft and guiding said idle gear into mesh with said engine gear while permitting said idle gear to center itself with respect to said pinion and said engine gear.

1,502,672. COMBINATION LOCK. ADOLF HOFFMAN, Lackawanna, N. Y. Filed May 18, 1923. Serial No. 639,821. 7 Claims. (Cl. 70—74.)



2. A lock comprising a pair of sliding bolts and a locking hook between both bolts, means for operating and locking said hook independently of said sliding bolts, means for normally locking said sliding bolts against displacement, and a leaf spring carrying said locking means, a pair of rotatable key sockets, means for normally locking said sockets against movement, and means for releasing said last named locking means and sockets by a key for releasing the locking means to allow the operation of the lock by a key.

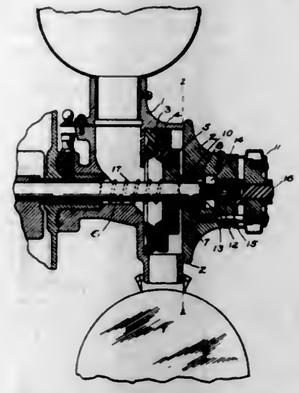
1,502,673. CLOSURE MEANS FOR MILK CHURNS. SIDNEY HOLE, Hassocks, England. Filed June 21, 1922. Serial No. 569,850. 4 Claims. (Cl. 220—46.)



1. In a milk churn of the character described, the combination of a body portion in the form of a can, a lid having a cylindrical wall adapted to enter with play into the mouth of the body portion, and having two parallel circumferential grooves separated by a rib, whereof the first groove is nearer to and the second groove is more remote from the entering-end of the lid,

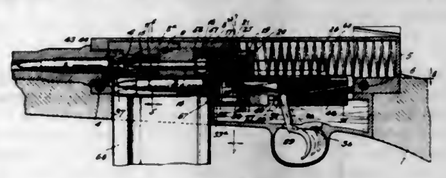
the said mouth of the can having an internal peripheral groove arranged to register with the said second groove when the lid is in its closed position, and an elastic closure ring seated in the first groove in the lid prior to applying the lid and movable over said rib into the second groove and adapted to enter, in the closed position of the lid, said internal groove, the said ring and grooves being of such dimensions that when the lid is

forced into its closed position, the ring will roll from the first groove in the lid into the second where it will engage said internal groove and serve to key the lid in its closed position, said lid further having below the first groove a flange of a diameter substantially larger than that of said rib, which flange serves to prevent displacement of the closure ring from off the bottom of the lid when the can is being opened and when the lid is off.



1,502,674. IGNITION SYSTEM. JOHN H. HUNT, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio, a Corporation of Ohio. Filed Nov. 18, 1920. Serial No. 424,836. 8 Claims. (Cl. 123—148.)

1. In an ignition system for internal-combustion engines, the combination with a current source and an ignition coil having a primary winding of relatively low inductance and a secondary winding; of a booster coil having a secondary winding in series with the secondary winding of said ignition coil, and a primary winding of relatvely high inductance; and engine operated make and break means for connecting the primary windings with the current source.



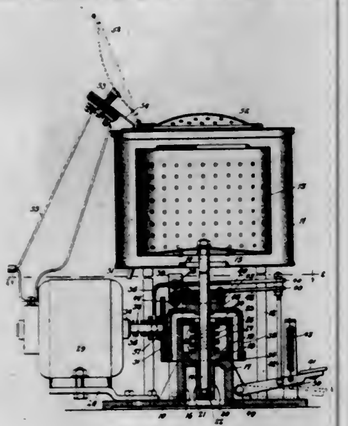
1,502,675. GRINDER FOR COFFEE AND THE LIKE. HERBERT L. JOHNSTON, Troy, Ohio, assignor to The Hobart Manufacturing Company, Troy, Ohio, a Corporation of Ohio. Filed Jan. 10, 1923. Serial No. 611,900. 5 Claims. (Cl. 287—53.)

1. In a machine of the character specified, a rotatable member, a driving shaft projecting beyond the member with a slot in the projecting portion, and means for releasably securing the rotatable member to the driving shaft, comprising a key of comparatively soft metal of disk shape, seated in the shaft slot, and in connection

with the rotatable member, whereby when sheared the disk may be readily accessible and can be turned to furnish a new key.

1,502,676. AUTOMATIC RIFLE. JOHN T. KEWISH, New York, N. Y. Filed Sept. 14, 1920. Serial No. 410,083. 36 Claims. (Cl. 42—3.)

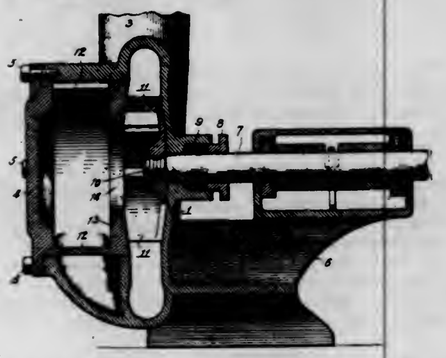
1. A gun of the class described comprising in combination, an automatically operable breech mechanism including a traversing weight carrying a bolt and firing pin which receives power by direct contact with the primer at the time of discharge.



29. In a gun of the class described, an actuator, a firing pin mounted on said actuator, a detaining means in the path of said pin, comprising a pair of members yieldingly pressed together, and trigger means whereby said members may be separated to release said pin.

32. In a gun in combination, a releasable block, a trigger mounted thereon, and means affording a fulcrum for said trigger said trigger having a finger portion which acts as a lever in releasing said block.

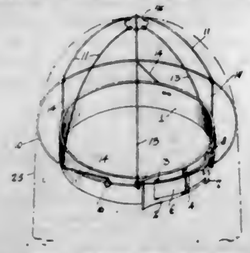
1,502,677. CENTRIFUGAL DRIER. HARRY C. LAW, Hastings upon Hudson, N. Y. Filed Mar. 26, 1921. Serial No. 456,001. 1 Claim. (Cl. 210—71.)



A machine of the class described comprising an upright shaft adapted to support a drum or tub thereon, a journal member rotatably receiving said shaft therein and provided with a thrust bearing support therefor, a housing, said housing and said journal member provided with a ball and socket joint for the support of the journal member, resilient means impinging upon the journal member and forcing it to seat upon the ball and socket joint provided therefor in said housing, an inverted cup-shaped member carried by said shaft extending over the said housing and protecting the same, the lower periphery of the inverted cup-shaped member acting as a horizontally disposed friction wheel, the upper extremity of said cup-shaped member provided with a conical braking surface, a shaft mounted at right angles

to the first-mentioned shaft, a friction wheel carried thereby, means for resiliently forcing the second friction wheel against the friction wheel of the first-mentioned shaft, a brake member adapted to engage the conical braking surface carried by the first-mentioned shaft, and means operably engaging said brake member and the

second-mentioned friction wheel and adapted to apply the brake member to the brake surface and simultaneously move the friction wheels apart, said means further adapted to release the brake member with respect to said brake surface and to simultaneously bring the said friction wheels together.

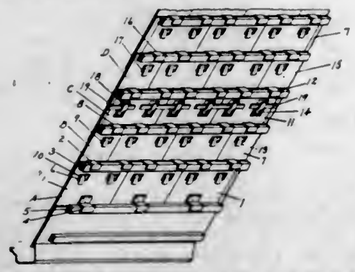


1,502,678. PUMP. HERBERT E. MERSELES, Bronxville, N. Y. Filed Jan. 22, 1921. Serial No. 439,094. 11 Claims. (Cl. 103—103.)

1. In a pump, a pump casing having an impeller chamber provided with a fluid inlet and a fluid outlet, said chamber being also provided with a removable wall, said wall having an opening which places said impeller chamber in communication with the fluid outlet, and supporting means for said removable wall secured to the pump casing, whereby said wall may be removed without disturbing the other pump parts.

1,502,679. PROTECTIVE HOOD. BUELL W. NUTT, Cleveland, Ohio, assignor to The Safety Equipment Service Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 23, 1921. Serial No. 471,575. 2 Claims. (Cl. 2—202.)

1. In a device of the character described, the combination of a rigid frame of substantially hemispherical shape, a split head band having its ends adjustably connected together, and supporting arms attached to said frame and extending to said head band and lying substantially tangent thereto, said arms being attached to

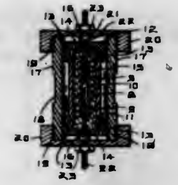


said band at points spaced from the split in said band to minimize movement of said arms during adjustment of said band.

1,502,680. MANIFOLDING DEVICE. WALTER E. OLIVER, Hoboken, N. J., assignor to Autographic Register Co., Hoboken, N. J., a Corporation of New Jersey. Filed Feb. 5, 1921. Serial No. 442,633. 8 Claims. (Cl. 282—16.)

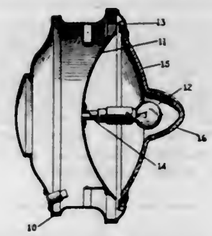
2. In mechanism for feeding a strip of fabric having a series of spaced holes arranged longitudinally thereof; in combination a writing bed; a pair of feed rollers for advancing the strip over the writing bed; means for separating said rolls to permit of strip adjustment and for gripping the strip after adjustment; and manually operated means for permitting the feed rolls to again grip the strip whereby it may be advanced over the writing bed.

1,502,681. SHINGLE CONSTRUCTION. JOHN POMMERSHEIM, East Pittsburgh, Pa. Filed Dec. 20, 1923. Serial No. 681,783. 6 Claims. (Cl. 108—17.)



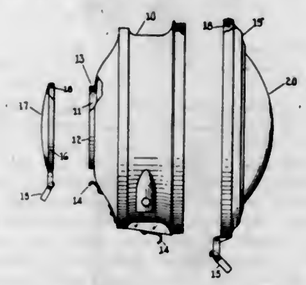
1. A metallic shingle having lath engaging hooks on the rear face thereof and provided with apertures for the reception of engaging means on another shingle, and resilient clips on the rear face of the shingle arranged to pass through apertures in a similar shingle and bear against the rear face thereof.

1,502,682. IGNITION DEVICE. JOHN H. REED, Maumee, Ohio, assignor of one-half to Albert Swartz, Toledo, Ohio. Filed Nov. 3, 1921. Serial No. 512,594. 3 Claims. (Cl. 123—148.)



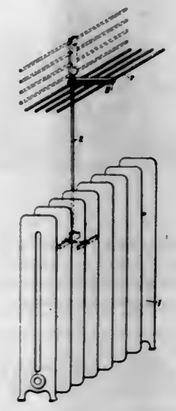
3. An ignition intensifier including a vacuum tube, a pair of leads extending from the tube and providing a spark gap within the tube, an insulation cylinder

housing the tube, insulation filler packing the tube in the cylinder with concentric terminally protruding conductor leads, conductor caps for the cylinder having central openings, said leads from the tube as protrud-



ing from the packing being short of protruding from said openings, and conductor providing sealing means for the openings anchoring said leads in conductor communication with said caps.

1,502,683. HEADLIGHT. WALTER D'ARCY RYAN, Schenectady, N. Y. Filed July 24, 1922. Serial No. 576,911. 1 Claim. (Cl. 240—48.4.)



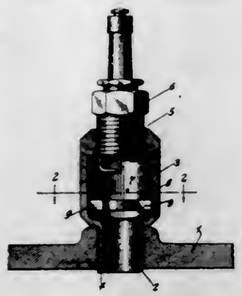
A headlight comprising a housing; a reflector mounted in the housing; a light source protruding beyond the housing; a glass front secured to the housing and bulging outwardly to inclose the light source, its central portion protruding outwardly from the plane of the outer surface; the positioning of the light source being such that it extends into the protruding portion of the lens, the upper surface of said protruding portion being provided with retracting means to redirect light rays impinging thereon, outwardly and downwardly.

1,502,684. HOUSING FOR HEADLIGHTS. WALTER D'ARCY RYAN, Schenectady, N. Y. Filed July 24, 1922. Serial No. 576,913. 2 Claims. (Cl. 240—41.)

1. A headlight housing comprising a body portion open at its rear and its front, and flanges surrounding each of said openings and an orifice in each flange; a closure door for each opening with a lug to engage the orifice in its respective flange; a lock lug on the body portion for each closure door; a lock lever pivotally mounted to an arm which is itself pivotally mounted to a lug on each of said doors, said lock levers being designed to engage their respective lock lugs and lock their respective closure doors to the body portion.

1,502,685. DRYING RACK. MORTON PETER SARFATY, New York, N. Y. Filed Jan. 6, 1922. Serial No. 527,447. 3 Claims. (Cl. 126—341.)

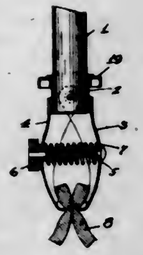
1. A radiator drying rack for use on radiators of the type employed in heating dwellings, comprising an upright supporting standard of a height less than the height of the radiator to which it is adapted to be attached, a member hingedly secured to the top portion of the supporting standard, a plurality of elements secured to said member and forming a drying rack, said drying rack being adapted to be maintained in a substantially horizontal position when in operative position and adapted to be swung about the hinge connection to be brought into an inoperative position in substantially the same vertical plane as the supporting standard, a clamp for securing the supporting standard to the rear coils of the radiator and means whereby the position of the clamp on the radiator coils may be adjusted so that the supporting standard and the rack may be lowered into a position of concealment behind the radiator.



1,502,686. MANUFACTURE OF PAPER AND OTHER FIBROUS COMPOSITIONS. PHILIP SCHIDROWITZ, London, England, assignor to Vultex Limited, St. Helier, Jersey, Channel Islands, a Jersey Company. Filed Sept. 25, 1923. Serial No. 664,767. 12 Claims. (Cl. 92—21.)

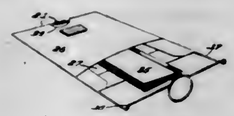
1. The process of manufacture of rubberized fibrous compositions which comprises compounding together unwoven fibrous material and aqueous vulcanized rubber and producing a deposit of the vulcanized rubber in situ upon the fibres of said material.

1,502,687. IGNITION DEVICE. MAX HANS SENDIG, St. Louis, Mo., assignor of one-third to Rudolf Emil Sendig and one-third to Charles Max Kruger, both of St. Louis, Mo. Filed Mar. 13, 1922. Serial No. 543,305. 2 Claims. (Cl. 123—169.)



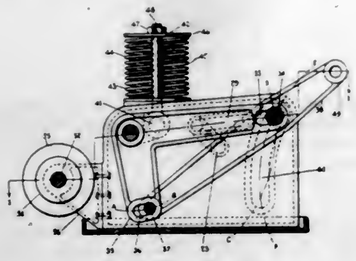
1. A device of the character described, comprising a tubular portion adapted to be secured into the usual spark plug opening of an engine cylinder, a casing in connection with and opening into said tubular portion and being of relatively much greater diameter than said tubular portion, a baffle plate supported within the casing relatively a short distance away from the open-

ing into said tubular portion and having a diameter approximately equal to the diameter of said tubular portion, and a spark plug screwed into the end of said



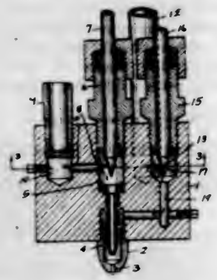
casing opposite from said tubular portion, and supporting a pair of spark points a greater distance from said baffle plate than the distance between said baffle plate and the opening into said tubular portion.

1,502,688. MOP. WILLIAM SEVERNS, Chicago, Ill. Filed July 15, 1922. Serial No. 575,322. 2 Claims. (Cl. 15—120.)



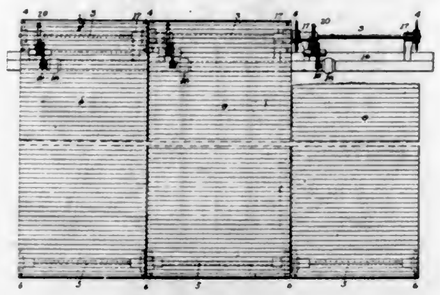
1. In a mop, a handle, a bushing secured on the lower end of said handle, a pair of clamping members pivoted to the lower end of said handle upon said bushing, a screw element on one of said members, an elongated nut extending through the other member and engaging said element, and a spring surrounding said nut and screw element and confined between said clamping members.

1,502,689. METHOD AND MEANS OF MERCHANDISING PIECE GOODS. EDWARD SEYFARTH, Dixon, Ill. Filed Dec. 31, 1921. Serial No. 526,434. 4 Claims. (Cl. 206—50.)



1. A label holder comprising a wire frame shaped to provide a label-carrying portion and longitudinal sides, the former of which is adapted to peripherally engage a label, and the latter to be inserted in the end of a bolt of piece goods for supporting said label-carrying portion in a display position, and a sample pocket body consisting of a top and a bottom portion having marginal edges folded over said sides for securing the body portion and said frame together, said body providing a pocket for the reception of samples.

1,502,690. OIL-WELL PUMPER. FREDERICK H. SIBLEY, Reno, Nev., assignor to Maximum Power Co., Wilmington, Del., a Corporation of Delaware. Filed Aug. 5, 1922. Serial No. 579,867. 6 Claims. (Cl. 74—14.)



1. In an oil pumper a gear driven shaft, a crank on said shaft carrying a crank pin, a pair of bell cranks, a gudgeon pin about whose center said bell cranks oscillate, there being a slot in the arm of one of the bell cranks in which the crank pin slides, a pump beam, a pin in one end thereof which slides in a slot in the lower end of the bell cranks, a pin in the beam which passes through a slot formed in the end of the upper arm of the bell cranks, a pair of main brackets having arcuate slots therein in which said last named pin slides.

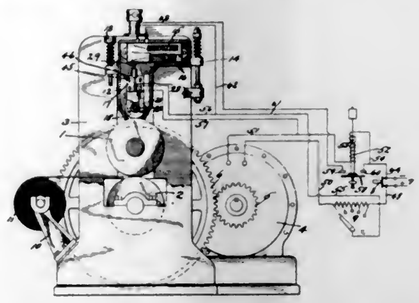
1,502,691. OIL BURNER. LOUIE F. SMITH, South Houston, Tex., assignor of one-half to George D. Collins, Houston, Tex., and three-eighths to James A. Henson, and one-eighth to Myron Collins, both of Harris County, Tex. Filed Dec. 30, 1922. Serial No. 609,969. 3 Claims. (Cl. 158—75.)

1. An oil burner including a discharge nozzle through which fuel is discharged into a combustion chamber; a blast nozzle within said discharge nozzle and spaced therefrom forming a chamber around said blast nozzle; fuel and steam lines entering said respective nozzles, and through which fuel and steam under pressure are supplied thereto; valve seats in said respective lines; valves arranged to cooperate with said seats, and controlling the passage of fuel and steam, respectively, therethrough; a member connecting said valves rigidly together; an actuating rod fastened to said connecting member, a casing having an internal chamber; a flexible diaphragm spanning said chamber and fastened to said actuating rod; a yieldable member on one side of said diaphragm, and arranged to operate against said actuating rod to normally hold said valves open; and a fluid pressure line entering said chamber on the other side of said diaphragm.

1,502,692. LEER CONVEYER. WALTER R. STERRETT, Carnegie, Pa., assignor to H. L. Dixon Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 2, 1921. Serial No. 466,192. 3 Claims. (Cl. 198—76.)

1. In combination, a leer, a plurality of separate conveyers extending through the leer from end to end and arranged in parallel relation, and means for driving the different conveyers at different speeds, substantially as described.

1,502,693. REWIRABLE METAL SCREEN. FREDERICK A. STICKLE, Cincinnati, Ohio, assignor, by mesne assignments, to The Lunkenheimer Company, Cincinnati, Ohio, a Corporation of Ohio. Filed July 25, 1921. Serial No. 487,512. 5 Claims. (Cl. 156—14.)



2. A rewirable screen frame, comprising frame pieces of nontubular construction formed into a plurality of channels, one channel facing inwardly of the completed screen for use in mounting the wire, one channel facing outwardly, and another channel facing inwardly at the edge of the frame, corner irons adapted to fit the two channels other than that for the wire, said frame pieces being mitred at the corners and set together, and the irons securely mounted and fixed in the corners.

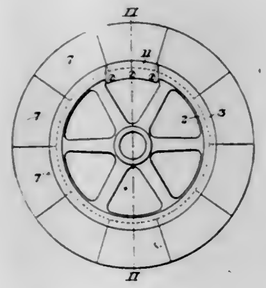
1,502,694. TRANSPARENCY AND PROCESS OF MAKING THE SAME. AARON P. STORRS, Owego, N. Y., assignor to Storrs Mica Company, Owego, N. Y., a Corporation of New York. Filed July 6, 1922. Serial No. 573,182. 9 Claims. (Cl. 41—21.)

1. The process of making a light transmitting body from a natural light transmitting product having unsymmetrical discolorations, which comprises separating the natural product into sheets, each of said sheets being approximately identical, reversing the sheets whereby the discoloration will appear in different portions of the sheets, and superposing one sheet over another to form a laminated structure showing the discolorations of all of the sheets in a more or less symmetrical design.

1,502,695. INDICATOR FOR MILLS. AUGUST SUNDH, Hastings upon Hudson, N. Y., and WILLIAM WESTERMAN, Detroit, Mich. Filed Oct. 8, 1920. Serial No. 415,512. 10 Claims. (Cl. 33—141.)

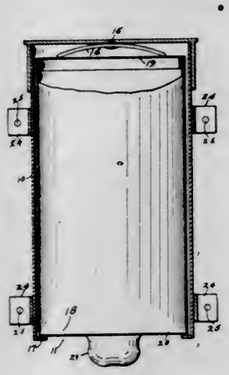
1. In combination, a mill, means for indicating the amount of material passed through said mill, an electric motor for driving the mill, a clutch for connecting the mill to the indicator, and means whereby said clutch is electrically connected to said motor to be controlled by the current passing through said motor.

7. In combination with a mill, an indicator for indicating the travel of a moving part of said mill, an indicator for indicating the amount of material passed through said mill, a magnetizable member permanently operatively connected to the first-named indicator and operatively connected to said mill to cause the first-mentioned indicator to function, and an electrically operated clutch for connecting the second-named indicator to the mill to cause the second-named indicator to function.



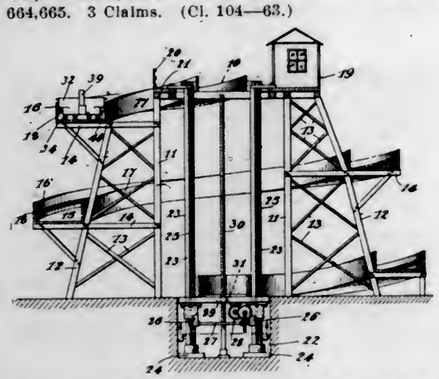
1,502,696. WASH-PIPE VALVE. ALEXANDER THOMSON, Sourlake, Tex. Filed Aug. 3, 1922, Serial No. 579,432. Renewed Feb. 23, 1924. 8 Claims. (Cl. 166—20.)

1. The combination with a set pipe, of a seat within said pipe a wash pipe within the set pipe, a cage like valve on the upper end of the wash pipe, said valve being



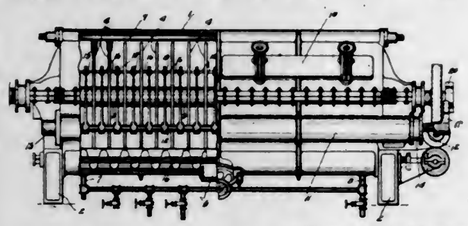
provided with a port in the side thereof, and a restricted water passageway, extending lengthwise therethrough, and an external projection on said valve adapted to rest on said seat.

1,502,697. SECTIONAL GRINDING WHEEL. FRANK J. TONE, Niagara Falls, N. Y., assignor to The Carborundum Company, Niagara Falls, N. Y., a Corporation of Pennsylvania. Filed Feb. 23, 1922. Serial No. 538,823. 8 Claims. (Cl. 51—207.)



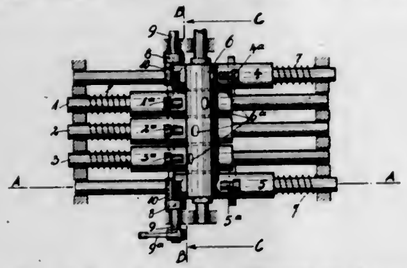
1. A grinding wheel including a supporting drum, segmental blocks of grinding material arranged in a plurality of circumferential rows, and means common to adjacent rows and extending circumferentially of the drum for retaining the segments thereon.

1,502,698. POWDER DISPENSER. EDWIN H. TOOLEY, Oshawa, Ontario; Canada, assignor to A. L. Honeker, Wallace, Idaho. Filed Apr. 21, 1921. Serial No. 463,157. 2 Claims. (Cl. 221—61.)



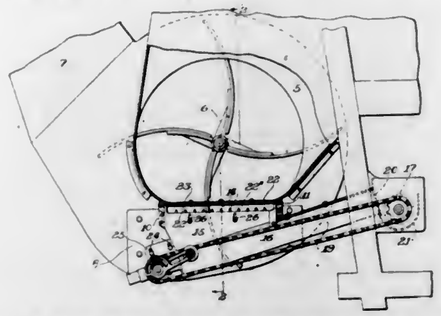
2. A powder dispenser comprising a container slidably mounted in a guide, an externally projecting perforated head to the container, a spring within the guide bearing against one end of the container, the same being the end opposite the end having the perforated head, an inwardly extending flange on the guide for engaging the end of the container having the perforated head, and means for securing the guide in a rigid position, whereby, by a manual thrust upon the said externally projecting perforated head, the said container is forced against said spring and when released, the spring forces the container against said flange and the impact forces a portion of the contents of the container out through the said perforated head.

1,502,699. AMUSEMENT RAILWAY. HENRY J. TRAUBEL, Cresskill, N. J. Filed Sept. 25, 1923. Serial No. 664,665. 3 Claims. (Cl. 104—63.)



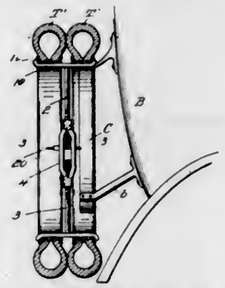
1. The combination with a gravity railway and a car adapted to travel thereon and having swiveled wheels, of an elevator adapted to carry said car, and means connected to the car to cause the latter to rotate when raised by the elevator.

1,502,700. CAKE CUTTER FOR FILTER PRESSES. HENRY A. VALLEZ, Bay City, Mich. Filed Sept. 30, 1921. Serial No. 504,461. 4 Claims. (Cl. 210—193.)



1. In a device of the class described, a casing horizontally disposed, filter elements rotatably mounted therein and spaced from each other, a longitudinally extending shaft adjacent said filter elements, and means mounted on the shaft adapted when actuated to remove the cake formed on the face of the filter elements.

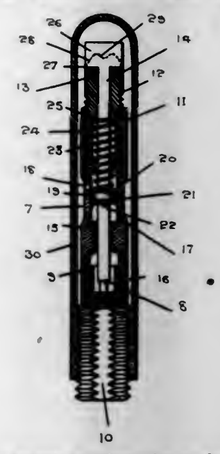
1,502,701. CHANGE-SPEED GEAR. GRAF ALFRED VON SODEN-FRAUNHOFEN, Friedrichshafen, Germany, assignor, by mesne assignments, to Zahnradfabrik Gesellschaft, Friedrichshafen, Germany. Filed Jan. 25, 1922. Serial No. 531,810. 6 Claims. (Cl. 74—39.)



1. In a change speed gear in combination, a plurality of sliding wheels, striker rods in operative connection with said wheels, means for moving said rods into and out of operative position and a common locking member for all said rods, the locking motion of part of said rods being effected in a direction opposite to that of the other rods.

1,502,702. GRAIN-SAVING DEVICE FOR THRASHING MACHINES. LOUIS H. WAGNER, Indianapolis, Ind., assignor to The Indiana Manufacturing Company, Indianapolis, Ind., a Corporation of West Virginia. Filed Oct. 20, 1923. Serial No. 669,721. 4 Claims. (Cl. 130—17.)

1. A grain saving device for thrashing machines comprising an attaching plate embodying an air retainer adapted to be secured to a fan drum, a hopper, grain tapping grates above said hopper, a conveyer adjustably secured to said plate, and means for actuating said conveyer.

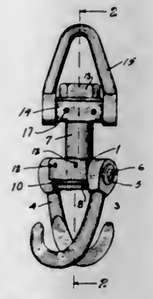


1,502,703. AUXILIARY TIRE CARRIER. JOSEPH M. WALLING, Houston, Tex. Filed Sept. 13, 1921. Serial No. 500,320. 2 Claims. (Cl. 224—29.)

1. A tire carrier comprising a pair of oppositely extending tire engaging members each of a length to span transversely the inner faces of the rims of a pair of opposed tires and having out-turned terminal portions overlapping the opposed rims for connecting them to a fixed support in opposed relation, each of said members provided centrally with a polygonal-shaped opening, a pair of spaced lengthwise aligning oppositely movable rods for clamping said members against the rims, each of said rods having a reduced polygonal-shaped outer terminal portion engaging in one of said openings and further having its inner terminal portion peripherally threaded, a revolvable shifting element for and common to said rods for synchronously shifting them, said element having its ends mounted on and threadedly engaging with the threaded terminal portions of the rods, thereby providing for the shifting of the rods when said element is revolved.

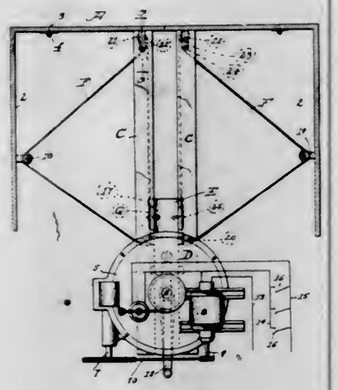
1,502,704. SAFETY TIRE VALVE. HIRAM N. WILSON, Omaha, Nebr., assignor to Henry M. Wilson, Omaha, Nebr. Filed Apr. 12, 1923. Serial No. 631,537. 3 Claims. (Cl. 152—11.5.)

1. A safety-tire valve including a barrel for attachment to a valve stem of a tire, a rod slidably mounted in said barrel for holding open a valve member in said stem, said barrel having an air escape port, a valve member in the barrel movable outwardly for the escape of air through said port, spring means for resisting the outward movement of the secondnamed valve member and for moving said secondnamed valve member inwardly, a stop carried by said rod for the contact of the secondnamed valve member when moved inwardly



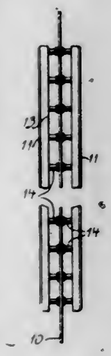
by said spring means so that the spring means yieldingly moves said rod inwardly to open the firstnamed valve member, and means for holding said rod in outwardly retracted position when slid outwardly away from the firstnamed valve member with the secondnamed valve member moved outwardly by said stop against said spring means.

1,502,705. METHOD OF DIE ROLLING. WILLIAM P. WITHEROW, Pittsburgh, Pa., assignor to Witherow Steel Company, Neville Island, Pa., a Corporation of Pennsylvania. Filed Sept. 9, 1922. Serial No. 587,080. 4 Claims. (Cl. 80—60.)



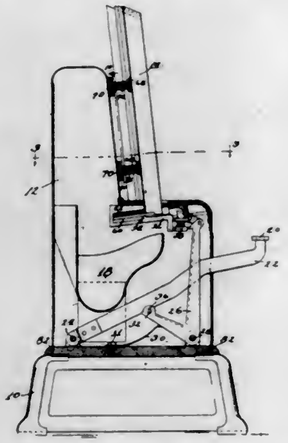
1. The method of die-rolling blanks of predetermined length from leaders, comprising the step of passing a heated leader at a given temperature through a die-roll pass, and then die-rolling similar blanks from successive leaders by delivering such leaders to the die-rolls at a reduced temperature if longer blanks are desired.

1,502,706. HOOK. SAMUEL A. AGGERS, Denver, Colo. Filed May 31, 1923. Serial No. 642,537. 1 Claim. (Cl. 24—242.)



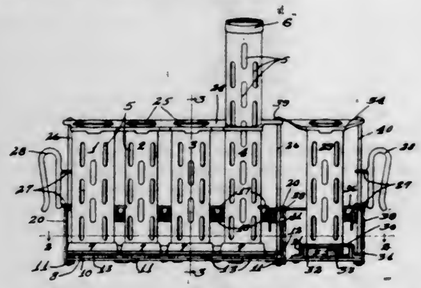
A hook comprising, in combination, a ring-shaped yoke piece having a circular central opening; a cylindrical stem in said opening and rotatably connected thereto; a pair of outwardly projecting lugs on opposite sides of said yoke; a hook pivotally connected to each stud, said hooks being substantially identical and reversely arranged whereby they will cooperate to form with the yoke piece an enclosed space adapted to receive the device to which it is connected.

1,502,707. INWARDLY-OPERATING DOOR-CONTROL MECHANISM. HARRY G. AINSWORTH, Kentland, Ind. Filed July 17, 1922. Serial No. 575,518. 4 Claims. (Cl. 268—9.)



1. The combination with a fixed support having a door opening, a door hinged thereto to open inwardly and a substantially horizontal guide way secured to the support above the door and extending inwardly therefrom, of a pair of aligned sheaves positioned below one of the beams, one sheave being secured to the said support near the door opening and the other to said beam at a considerable distance from the door opening, a cable bracket secured to the door near its top and aligned with said sheaves when the door is closed, a sheave located on a fixed support in the same plane with but out of line with said aligned sheaves and located at a distance from the door, an element movable in the guide way, an endless cable trained over said sheaves and operatively attached to the cable bracket and to said movable element, and means for actuating said movable element to open or close the door, said means including an electrically operated power unit.

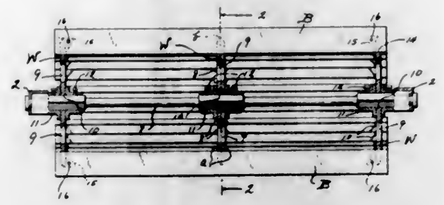
1,502,708. ELECTRODE. WILLIAM G. ALLAN, Toronto, Ontario, Canada, assignor to The Toronto Power Company, Limited, Toronto, Canada, a Corporation of Ontario, Canada. Filed Feb. 3, 1920. Serial No. 355,989. Renewed July 18, 1922. Serial No. 575,811. 29 Claims. (Cl. 204—4.)



1. The combination with a compressed body of multiply material having holes therein, of supporting means therefor, and devices securing said body to said supporting means, such devices comprising parts expanded in said holes.

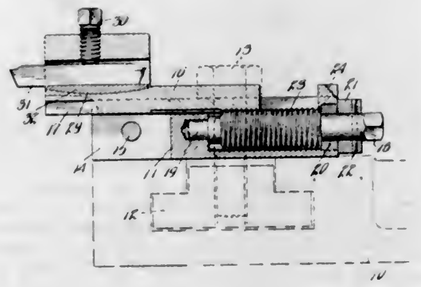
1,502,709. CHANGE MAKER. ALBERT BECK, Chicago, Ill., assignor to McGill Metal Products Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 7, 1921. Serial No. 435,603. 9 Claims. (Cl. 133—5.)

1. A change maker comprising a coin tube, a spring controlled bell crank, means for operating the same, a projection on said bell crank, a coin retaining member formed on said projection for coaction with the tube, an arm pivoted on the bell crank, a coin ejecting lug integrally formed on said arm, and a spring between said projection and said arm for holding the ejecting lug in an ejecting position.



1,502,710. CHANGE CARRIER. ALBERT BECK, Chicago, Ill., assignor to McGill Metal Products Company, a Corporation of Illinois. Filed July 20, 1921. Serial No. 486,106. 7 Claims. (Cl. 133—5.)

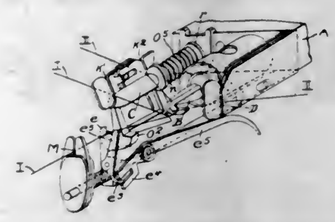
1. A change maker comprising a frame, coin tubes supported thereon, coin ejecting mechanisms on said frame for discharging coins from said tubes, bolt members removably engaged in said frame, and hooks rotatably and slidably engaged on said bolt members to permit the change maker to be supported in a position for use.



2. The combination with a main portable change maker, of an auxiliary change maker, bolts removably engaged on said main change maker, hooks adjustably engaged on said bolts for supporting the main change maker in position for use, apertured lugs formed on said auxiliary change maker, a bolt removably engaged on said auxiliary change maker, one of said main change maker bolts adapted to be removed and the hook removed therefrom and placed upon said auxiliary change maker bolt, said removed main change maker bolt adapted to engage said apertured lugs to hold the auxiliary change maker removably attached to said main change maker.

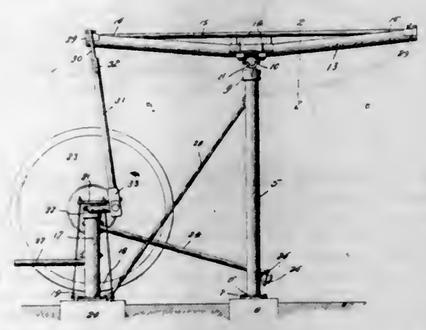
1,502,711. GROUNDWORKING MEMBER. JAMES G. CAGLE, Marion, Ill. Original application filed Mar. 22, 1922, Serial No. 545,724. Divided and this application filed Aug. 25, 1923. Serial No. 659,337. 1 Claim. (Cl. 97—215.)

A device of the class described comprising an axle, said axle adjacent its ends at its central portion being angular in cross section, wheels mounted upon said angular portions of the axle, collars slidably mounted on each of said angular portions at opposite sides of the wheel thereon, means carried by the collars and engaging the axle for holding the collars in contact with said wheel, blades substantially radially disposed with respect to the axle and engaged with the peripheral portions of the wheels, the intermediate wheel comprising two over-lying sections, each of said sections being radially divided into two parts with the straight edges of the parts of one section being angularly related to the straight edges of the parts of the second section, and removable means disposed through the over-lying sections of the wheel and arranged at opposite sides of the straight edges of the parts of the sections.



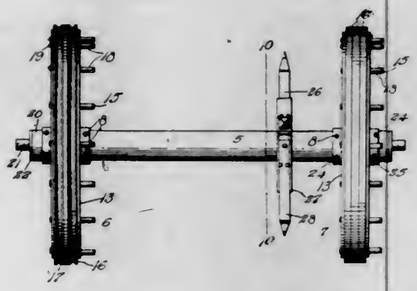
1,502,712. MULTIPLE-PURPOSE TOOL HOLDER. LODGE Y. CHARD, Newcastle, Ind. Filed Apr. 4, 1923. Serial No. 629,930. 12 Claims. (Cl. 82—24.)

1. In a lathe, a tool holder comprising a laterally adjustable base and a tool carrier in dovetailed engagement with said base and adjustable longitudinally thereof, means for clamping the same in adjusted position, intersecting diagonal tool-receiving openings at the forward end of the tool slide, and means at the intersection of said openings for clamping a tool in either opening, substantially as set forth.



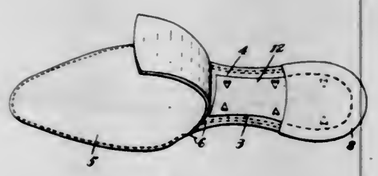
12. In a lathe a laterally adjustable tool holder comprising a base and a longitudinally adjustable tool carrier, said carrier having a tool receiving opening with an arcuate slot in its face, a filler block in said slot for adjusting the angle of the tool, and means for clamping the tool in position in said opening, a guide on said tool carrier, a guideway on said base for cooperation with said guide said guideway having one end slotted for a portion of its length, means for clamping said guide and guideway in predetermined position, segmental threads on said tool carrier, and a threaded shaft swiveled in the base and in engagement with said segmental threads for moving the tool carrier and tool toward and away from the work, substantially as set forth.

1,502,713. KNOT-TYING APPARATUS. JOHN WILLIAM COOK, Manchester, and THOMAS COLLINS, Hale, near Manchester, England, assignors to Cook & Co. Manchester Limited, Manchester, England, a Company organized under the laws of the United Kingdom of Great Britain. Filed Sept. 18, 1919. Serial No. 324,541. 10 Claims. (Cl. 289—3.)



9. In a weaver's knotter, the combination with a rotary knotting-bill and a rotary drawing-off member, of spindles carrying the said bill and drawing-off member respectively, a helical pinion on each of the said spindles, quadrants each having helical teeth adapted to gear with and to transmit rotary motion to the spindles, and means adapted to lock the said quadrants positively together during a portion of the motion of the bill-operating quadrant.

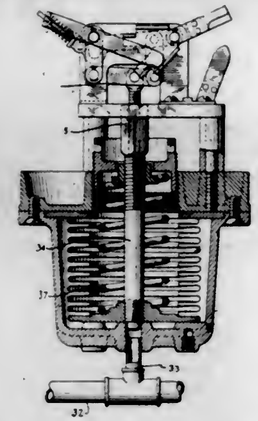
1,502,714. PUMPING RIG. JAMES A. CRUMLEY, Charleston, W. Va., assignor of one-third to Elvyn L. Keller, Charleston, W. Va. Filed June 27, 1923. Serial No. 647,960. 4 Claims. (Cl. 74—14.)



1. In a pumping rig for oil wells, the combination with the horizontal sill at the lower portion of a derrick, of a flanged base fixed at one side of and below said sill, a post mounted in said base, a saddle box fixed upon the upper end of said post and including spaced clamps having a shaft fixed therein and extending therebetween, a saddle journaled upon said shaft, a walking beam, U-shaped bolts engaging the walking beam and the saddle for clamping the latter together, a pair of spaced relatively short posts mounted adjacent the first named post, in spaced relation, and having bearing caps on the upper end thereof, a crank shaft rotatable in said bearing caps, a pitman connected to the crank of said shaft and having a stirrup thereon, and a pair of cooperating stirrup boxes upon the end of the walking beam above the second named posts for reception of the stirrup of said pitman adapted to connect the crank shaft with the walking beam.

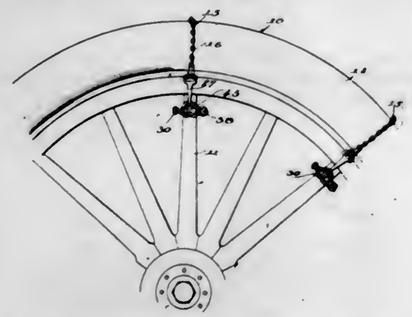
1,502,715. BULL WHEEL AND MOUNTING THEREFOR. JAMES A. CRUMLEY, Charleston, W. Va., assignor of one-third to Elvyn L. Keller, Charleston, W. Va. Filed Sept. 20, 1923. Serial No. 663,934. 9 Claims. (Cl. 242—117.)

1. In a bull wheel, a pipe section having gudgeons secured in the ends thereof, split hubs detachably bolted upon the ends of said pipe section, said hubs being provided with pairs of spaced parallel circumferential annular flanges, discs disposed upon the end portions of the hubs and detachably and rigidly secured against the outer surfaces of said annular flanges, and cants bolted between the outer margins of said discs.



1,502,716. SHOE. JOHN JOSEPH DALY, Newton Center, Mass. Filed Aug. 17, 1923. Serial No. 657,988. 7 Claims. (Cl. 36—17.)

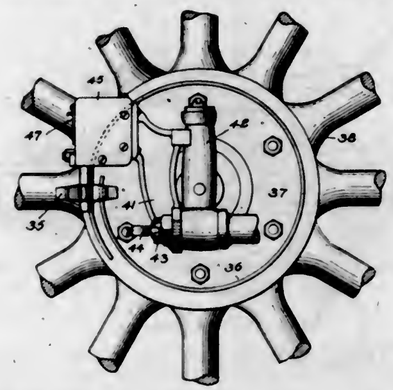
6. In a shoe, an outer sole and an intermediate sole secured to the upper by independent lines of stitching, said outer sole having a slot thereacross adjacent the breast of the heel and terminating inside of the lines of stitching to permit said sole to be readily severed from the intermediate soles, and a blade deflecting element interposed between the outer and intermediate soles and underlying said slot, and comprising a metallic plate having attaching prongs adapted to be driven into one of said soles.



1,502,717. ELECTRIC SWITCH. JAMES H. DENNEDY, Detroit, Mich. Filed June 29, 1922. Serial No. 571,681. 10 Claims. (Cl. 200—67.)

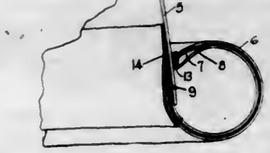
1. In an electric switch, a base of insulating material, a pair of spring contacts mounted on the base, a pair of frame members mounted on the base, a pair of contact members pivotally mounted at one end of the frame members and adapted to engage the spring contacts, the said contact members being each provided with outturned flanges arranged in substantially V shaped form, a U shaped actuator member pivoted at the opposite end of the frame member, the legs of the U shaped actuator extending between the flanges of the respective contact member, a pair of outturned lugs on each contact member, the legs of the U shaped actuator during movement from one position to the other being adapted to first engage the respective lug intermediate the end and the

pivot point of the respective leg and then engage the flange near the pivot point of the contact member, and means for actuating the said actuator.



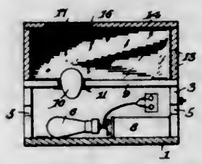
1,502,718. ANTISLIPPING DEVICE. JOHN J. EHMEN, Clayton, Ill., assignor of one-third to John J. Emminga, Golden, Ill. Filed Feb. 17, 1923. Serial No. 619,733. 3 Claims. (Cl. 152—14.)

1. In an anti-slipping device of the character described, a chain, means for securing the chain to a spoke including a spoke connector comprising a pair of clamping sections, each section being made up of a single piece of wire looped to form upper and lower arms, the portions of said sections adjacent the bights of the loops being offset to provide seats and the terminals of the wire making up each loop being formed to provide apertured ears, a hinge pin coacting with the apertured ears for pivotally connecting the sections together, a bolt and nut coacting with the seats for moving the sections into clamping engagement with the spoke, and a chain engaging loop carried by each of said clamping sections.



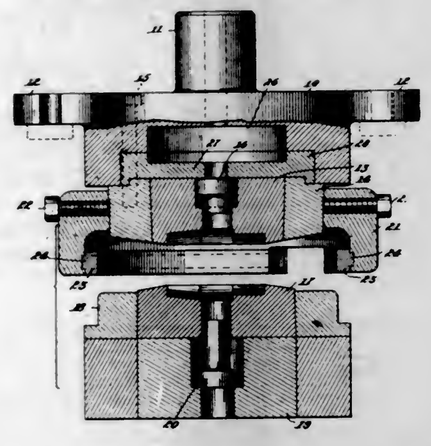
1,502,719. ODOMETER. WILLIAM EISENSCHMID, Etna, Pa., assignor to Pittsburgh Taximeter Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Nov. 15, 1921. Serial No. 515,312. 1 Claim. (Cl. 235—91.)

In a device of the character described, counters mounted in a bracket adapted to be secured to a steering knuckle adjacent a vehicle wheel, a worm for driving said counters, a ratchet on the worm shaft, a pawl pivoted to said bracket for operating said ratchet and having a cam surface, a star wheel engaging said cam surface and means driven by the vehicle wheel for driving



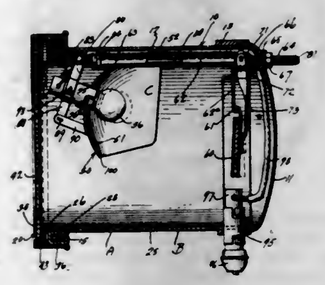
said star wheel for advancing said counters the same definite amount irrespective of the direction of rotation of the vehicle wheel.

1,502,720. HAT. ROBERT FINKELSTEIN, Brooklyn, N. Y., assignor to Hirschberg & Company, New York, N. Y., a Corporation of New York. Filed Feb. 21, 1924. Serial No. 694,242. 3 Claims. (Cl. 2—175.)



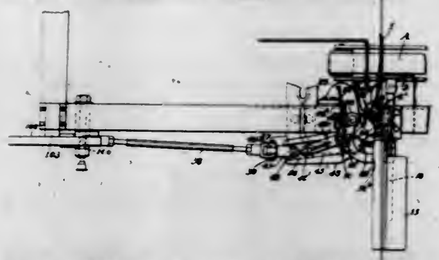
1. A hat having an unblocked brim of tubular formation comprising a plurality of exposed layers of material and a concealed layer of stiffening material, one of said exposed layers being narrower than the other of said exposed layers to cause all of said layers to assume and retain a tubular formation.

1,502,721. EGG TESTER. THOMAS GRAVES, Memphis, Tenn. Filed Oct. 7, 1921. Serial No. 506,049. 2 Claims. (Cl. 99—6.)



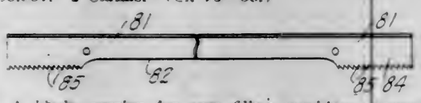
1. An egg tester of the class described comprising an illuminated compartment including a base panel, a pair of side panels, one side panel hinged to each longitudinal side edge of the base panel, four end plates one fixed perpendicularly at each end of each side panel so as to form end panels for the compartment, a pair of top plates one fixed perpendicularly to the free longitudinal edge of each side panel to form a top panel, said top panel provided with an opening; and a darkened compartment including side panels hinged to the top plates of the illuminated compartment, end panels fixed to one side panel of the darkened compartment and a hinged cover panel provided with an opening and engaged on one side panel of the darkened compartment.

1,502,722. DIE-GUIDING MEANS FOR FORGING PRESSES. CHARLES A. HILL, Port Huron, Mich., assignor to Adolph Mueller, trustee, Decatur, Ill. Filed Jan. 3, 1922. Serial No. 526,692. 25 Claims. (Cl. 78—60.)



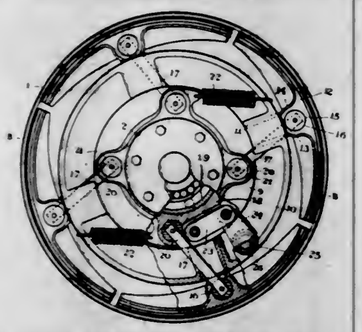
1. In apparatus of the class described, the combination of relatively movable dies, a carrier on one of said dies, a guide member removably mounted on said carrier, and a member on the opposing die adapted to engage said guide member.

1,502,723. ANTIGLARE HEADLIGHT. WILLIAM H. HOLLANDER, FREDERICK W. HOLLANDER, and GUS HOLLANDER, Port Arthur, Tex. Filed May 31, 1923. Serial No. 642,620. 6 Claims. (Cl. 240—41.)



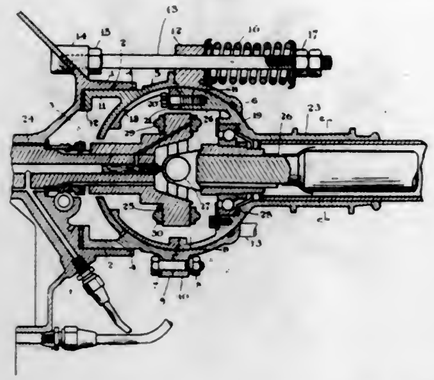
1. A headlight comprising a casing, a forward reflector within the casing, a lamp reciprocably mounted within the forward reflector so that the rays of light therefrom may not pass directly through the casing, a shaft rotatable upon the casing having a screw threaded end, a nut upon said screw threaded end, a rocker arm carried by said reflector and by said nut engaging said lamp whereby upon rotation of the shaft the nut may be fed thereaolong for moving said lamp inwardly and outwardly with respect to said reflector, and reflecting means to the rear within said casing adapted to receive rays of light from said lamp thereagainst for reflection from the casing indirectly.

1,502,724. PACKAGE STOP MECHANISM. STANLEY R. HOWARD, East Milton, Mass., assignor, by mesne assignments, to State Street Trust Company, trustee, a Corporation of Massachusetts. Filed Oct. 5, 1921. Serial No. 505,632. 18 Claims. (Cl. 93—2.)



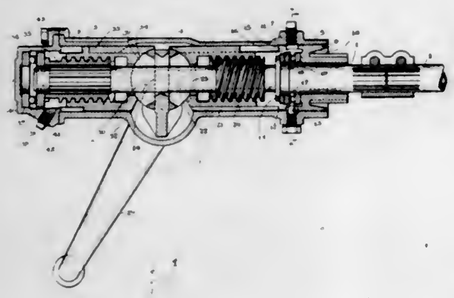
1. In combination, a toggle, an actuating member therefor, a pivoted guide for the toggle joint alignable with said actuating member, and means for releasably holding said guide in alignment with said actuating member.

1,502,725. ATTACHMENT FOR SAW FILING AND SETTING MACHINES. FRANK JOSEPH KEPPELER, Milwaukee, Wis. Filed Aug. 6, 1923. Serial No. 655,937. 2 Claims. (Cl. 76—35.)



2. A blade carrier for saw filing machines, comprising a thin, narrow strip of metal curved inwardly along one edge and having teeth cut at one end thereof adapted to register with the teeth of the saw; and means for securing the saw blade thereto.

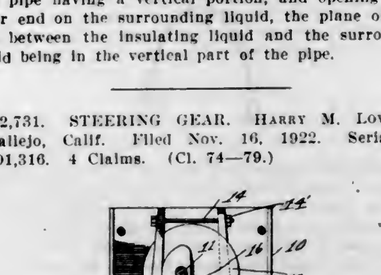
1,502,726. VEHICLE BRAKE. ALPHONSE JOSEPH LAVOIE, Montreal, Quebec, Canada. Filed Nov. 30, 1921. Serial No. 518,747. 1 Claim. (Cl. 188—78.)



In a vehicle brake, the combination with a rotating axle and housing therefor and a wheel mounted thereon, of a brake drum rigidly secured to the wheel hub, and rotating therewith, a frame fixedly secured to said housing and forming a closure for the inner side of said drum and having a crank pin bearing, an operating ring rotatably mounted on said housing and having lugs and journal orifices brake shoes adapted to engage said drum and having inner central extension operating in radial slideways from said frame and journal orifices in said extension, rollers in said journal orifices in said lugs and extensions and having pivot pins extending therefrom, connecting bars pivotally mounted on said pins from said ring to said shoes, a crank pin mounted in said crank pin bearing, a link joining the crank of said pins to said operating ring and spring from said frame to said operating ring and normally maintaining said shoes in an inoperative position.

1,502,727. TRANSMISSION JOINT AND SHOCK ABSORBER. ALPHONSE JOSEPH LAVOIE, Montreal, Quebec, Canada. Filed Jan. 4, 1922. Serial No. 526,956. 5 Claims. (Cl. 64—89.)

1. In a device of the class described, a ball casing and a socket therefor, a compression member holding said casing to said socket, a ball member in said casing and a torsion tube forming the connecting piece from said ball member.

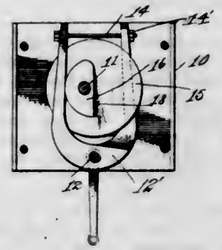


1,502,728. STEERING MECHANISM. ALPHONSE JOSEPH LAVOIE, Montreal, Quebec, Canada. Filed Jan. 21, 1922. Serial No. 530,878. Renewed June 3, 1924. 6 Claims. (Cl. 74—79.)

1. In a steering mechanism, a housing permanently capped at one end and forming a case adapted to receive the operating parts from the open end, shaft bearings in said cap, a shaft journalled in said shaft bearings and having a shoulder towards the outer end of said case, shaft bearings having one member supported on said shoulder, a fixed screw and a sliding screw on said shaft, upper and lower nuts driven by said screws, a crank lever suitably operated by and between the ends of said nuts, and an adjusting nut screwed into said case at the outer end and engaging the other member of the outer bearings and suitably locked.

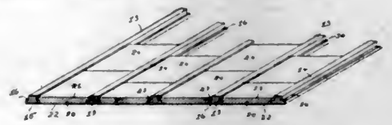
1,502,729. METHOD OF ASSEMBLING RADIATOR CAPS. ALOYSIUS C. LIPPERT, Kenosha, Wis., and JOHN A. SINKO, Chicago, Ill., assignors to Advance Products Corporation, Chicago, Ill., a Corporation of Illinois. Original application filed Aug. 3, 1923, Serial No. 655,406. Divided and this application filed Oct. 17, 1923. Serial No. 669,020. 4 Claims. (Cl. 29—84.)

1. A method of assembling radiator caps formed with an inner and outer collar, which consists in positioning the inner collar within an outer grooved collar, positioning an expansible die within the inner collar, and



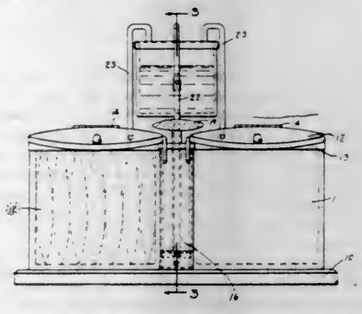
exerting expanding pressure upon said die to project portions of the inner collar into the groove of said outer collar.

1,502,730. MEANS FOR LUBRICATING AND COOLING A SUBMERGED AND INSULATED ELECTRIC MOTOR. RENÉ LONGUE, Pantin, France. Filed Mar. 7, 1921. Serial No. 450,361. 4 Claims. (Cl. 172—36.)



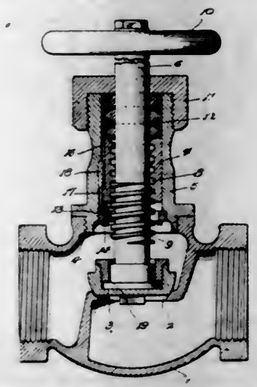
1. In a submersible electric motor, a casing adapted to contain a motor and filled with an insulating liquid, a surrounding liquid a conducting pipe terminating at one of its ends at the upper part of the casing, the said pipe having a vertical portion, and opening at its other end on the surrounding liquid, the plane of junction between the insulating liquid and the surrounding liquid being in the vertical part of the pipe.

1,502,731. STEERING GEAR. HARRY M. LOVELACE, Vallejo, Calif. Filed Nov. 16, 1922. Serial No. 601,316. 4 Claims. (Cl. 74—79.)



1. A steering gear including a driving shaft, a driven shaft, a yoke fixed on the driven shaft and having its arms offset in parallel planes, a disk carried by the drive shaft and rotatable in a plane between the planes of the arms, and means on the disk engaging the arms for rocking movement of the yoke.

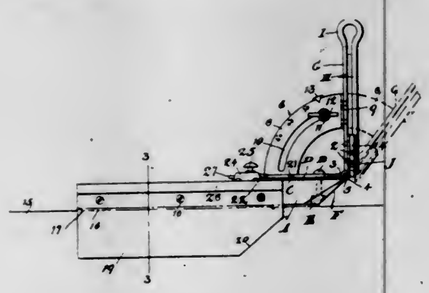
1,502,732. WALL AND CEILING STRUCTURE. TIMOTHY LYDON, Baltimore, Md. Filed Jan. 19, 1922. Serial No. 530,325. 2 Claims. (Cl. 72—19.)



2. The combination with spaced apart supporting means, of flanged rails secured to said supporting means and extending crosswise of the latter, separate slabs each having side flanges which engage and are sustained by the rail-flanges and said slabs also having an underlapping flange at one end and an overlapping flange at the opposite end whereby the adjacent ends of the several slabs may be lapped and supported at the end one by the other.

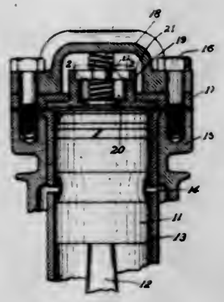
1,502,733. HUMIDOR. ALBERT R. MCCOMB, Indianapolis, Ind. Filed June 29, 1923. Serial No. 648,480. 7 Claims. (Cl. 131—30.)

1. In a device of the class described a substantially air-tight compartment having a closure therefor, a liquid containing vessel, and means controlled by the movement of said closure for causing air to pass through the liquid in said vessel into said compartment.



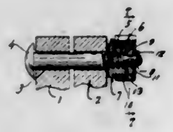
1,502,734. VALVE. TREVILLIE OWEN MARTIN, Jackson, Tenn., assignor of one-half to William T. Young, Indianapolis, Ind., and one-half to William H. Timmons, Jackson, Tenn. Filed June 22, 1923. Serial No. 647,067. 2 Claims. (Cl. 251—50.)

1. In a cut-off valve, the combination of a bonnet, a floating nut therein, packing supported by the nut, a stop collar at the lower end of the bonnet, means to



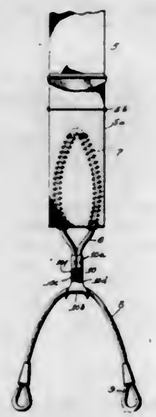
limit upward movement of the nut, and a valve stem passing axially through the nut and the bonnet and operatively engaged with the nut.

1,502,735. CARPENTER'S MITER. JAMES MATHIESON, Toronto, Ontario, Canada, assignor of one-half to Robert Morton Hilditch, Toronto, Ontario, Canada. Filed Aug. 5, 1922. Serial No. 579,812. 1 Claim. (Cl. 143—88.)



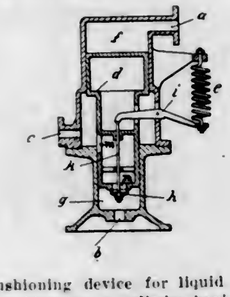
A tool of the class described comprising a body-portion adapted to be placed upon the wooden member to be cut; a quadrant horizontally pivoted to one end of said body-portion; a saw-guide; a pair of plates associated with said saw guide and between which a saw blade is designed to operate, the inner of said plates having a hinge connection with the forward edge of said quadrant; a vertically-disposed segmental plate or quadrant associated with said saw guide to permit said guide to be moved into any angular position out of the vertical; means co-acting with said segmental plate or quadrant and said body-portion to permit the former to function, and a plate provided at its upper portion with an inverted U-shaped channel laterally carried by said body-portion and extending longitudinally thereof and depending therebelow.

1,502,736. VALVE MECHANISM. WILLIAM D. MERCER, Detroit, Mich., assignor to Kelvinator Corporation, Detroit, Mich., a Corporation of Delaware. Filed Apr. 11, 1923. Serial No. 631,483. 4 Claims. (Cl. 252—146.)



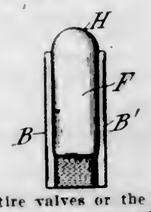
1. Valve mechanism comprising a valve housing, a valve mounting movably supported therein, biased toward valve closing position, and provided centrally with a tubular guide, a valve, having its stem mounted in said guide and arranged to form with said guide a chamber cushioning the movement of said valve in at least one direction, biased to closed position, forming with said mounting means to limit the opening movement of said valve relative to said mounting, and having its stem provided with grooves adapted to collect and retain liquid to increasingly seal said cushioning chamber.

1,502,737. AUTOMATIC BOLT ADJUSTMENT FOR BEARINGS. GUSTAVE L. MILLER, Geneseo, Ill. Filed Dec. 22, 1921. Serial No. 524,095. 3 Claims. (Cl 85—32.)



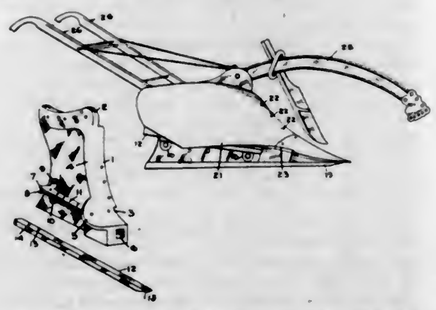
1. A device of the class described, comprising a bolt having a threaded portion near one of its ends, and a squared extension beyond the same, provided with notches in its corners; a nut operable on said thread; a collar capable of being positioned on the squared end of said bolt, in engagement with the notches therein; and a coiled spring uniting said nut and collar.

1,502,738. SUSPENDER CONSTRUCTION. OLLIE E. MOTT, Adrian, Mich. Filed Mar. 7, 1921. Serial No. 450,184. 1 Claim. (Cl. 241—19.)



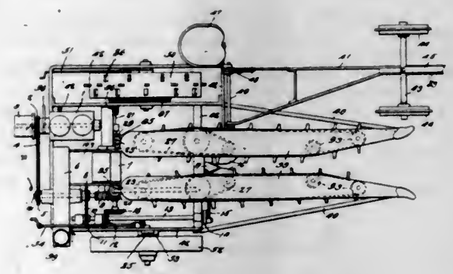
In suspender construction, wherein the webbing carries a pocket to receive a loop portion with its ends projected from the pocket and with the loop portion movable relative to a wall of the pocket in use to vary the projected length of the ends of the loop portion, a buttoning element, and means for operatively and detachably connecting the loop portion and the buttoning element, said means comprising a rigid one-piece member having a portion formed to receive and embracingly clamp the projecting ends of the loop portion to place them in secured permanently-positioned parallel relation in the direction of loop projection, said member carrying a face for supporting the buttoning element, said face being positioned to locate the buttoning element portion which contacts therewith to lie in the plane of such secured ends of the loop portion, whereby the strains of use will maintain the ends of the loop portion in the general plane of such loop portion and free from material transverse movement out of such plane and permit freedom of movement of the loop portion relative to the wall of the pocket through which it extends.

1,502,739. CUSHIONING DEVICE FOR LIQUID CONVEYED UNDER PRESSURE. FRIEDRICH MÜNZINGER, Berlin, Germany, assignor to the Firm Allgemeine Elektricitäts-Gesellschaft, Berlin, Germany. Filed Sept. 3, 1921. Serial No. 498,525. 4 Claims. (Cl. 137—53.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



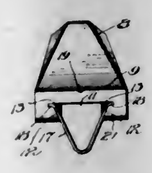
1. In a cushioning device for liquid conveyed under pressure in combination, a cylinder having an inlet near either end, a piston movable in said cylinder and permanently separating said inlets and an overflow in the cylinder wall capable of being covered and uncovered by said piston and of being set in communication with only one of said inlets.

1,502,740. DUST CAP FOR TIRE VALVES. EUGENE V. MYERS, East Orange, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y., a Corporation of New York. Filed Apr. 12, 1919. Serial No. 289,659. 1 Claim. (Cl. 152—12.)



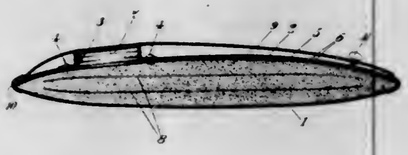
A dust cap for tire valves or the like formed from a single sheet metal blank by a series of bending operations, said cap having a closed end free from projections of any kind and a body portion having a plurality of outwardly directed longitudinally extending ribs formed by the overlapping and interengagement of the longitudinal edges of the blank, and the cap having means for connection to a tire valve or the like.

1,502,741. PLOWSHARE. DAVID ALEXANDER NICOL, Huntingdon, Quebec, Canada. Filed June 8, 1923. Serial No. 644,149. 1 Claim. (Cl. 97—125.)



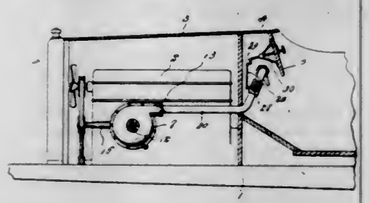
A plowshare comprising a landside plate having a reduced upper end and a reduced lower end and a pierced boss at the lower front end forming a feather base; said plate tapering in longitudinal section from rear to front, a slotted feather secured to said base, a mould board, a running plate tapered in thickness from rear to front and removably secured to said reduced lower end, parallel brackets secured to the inner surface of said landside plate and inclined longitudinally and forming a bar slide in longitudinal alignment with said pierced lug and a digging bar adjustably secured in said slide and pierced bag.

1,502,742. ENSILAGE CUTTER. EDWARD OSCAR O'DELL, Aroya, Colo. Filed Aug. 3, 1921. Serial No. 489,519. 4 Claims. (Cl. 56—16.)



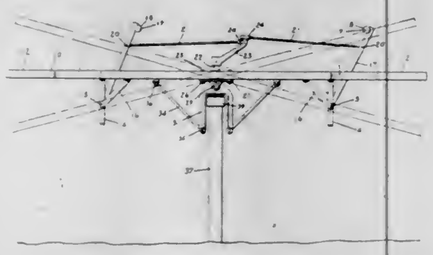
1. In a device of the class described, a frame; guides carried by the frame; first shafts journaled in the guides; gathering chains traversing the guides and driven by the first shafts; a horizontal shaft journaled on the frame and disposed transversely thereof; beveled pinions connecting the horizontal shaft with the first shafts; a ground wheel journaled on the frame; means for connecting the ground wheel with the horizontal shaft; a third shaft journaled on the frame and disposed parallel to the line of advance; beveled pinions connecting the third shaft with the horizontal shaft; a cutter cooperating with the guides; means for connecting the cutter operatively with the main shaft; an ensilage cutter on the frame and located to the rear of the guides, the ensilage cutter including a shaft; an engine on the frame; means for connecting the engine with the shaft of the ensilage cutter; means for connecting the shaft of the ensilage cutter with the third shaft; feed rolls journaled on the frame and located between the gathering chains and the ensilage cutter; and means for driving one of the rolls from the shaft of the ensilage cutter.

1,502,743. CUTTING TOOL. CLARENCE PAGE, Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 27, 1921. Serial No. 525,129. 25 Claims. (Cl. 30—9.)



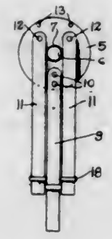
1. In a device of the class described, the combination of a holder, having grooves, and a cutting element having edges retained in said grooves by the resiliency of the cutting element and its intermediate portion suspended out of contact with the holder.

1,502,744. COMPOSITION FOR CHEMICAL HEATERS. OSCAR L. PERRAULT, Albany, N. Y., assignor to Constant Heat Pack Corporation, Albany, N. Y., a Corporation of New York. Filed June 30, 1922. Serial No. 571,981. 8 Claims. (Cl. 44—3.)



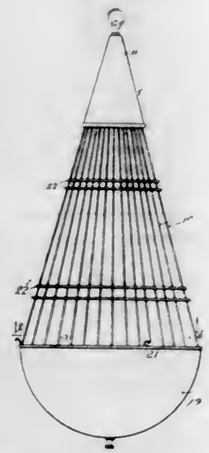
1. A composition for chemical heaters comprising iron, ammonium chlorid, and a reagent adapted to counteract the giving off of ammonia gas by chemical reaction between the iron and ammonium chlorid.

1,502,745. COOLING APPARATUS FOR MOTOR VEHICLES. GEORGE W. PRICE, Leaksville, N. C. Filed Aug. 28, 1922. Serial No. 584,623. 2 Claims. (Cl. 98—23.)



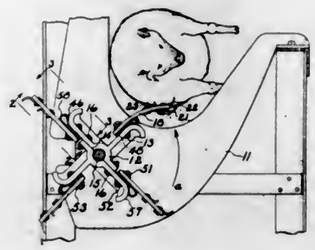
1. In an occupant cooling apparatus for motor vehicles, the combination with a transverse distributing nozzle arranged in an elevated horizontal position directly beneath the cowl of the vehicle, an air pipe leading to said nozzle, an air blower connected to said air pipe, driving connections between said blower and the engine of the vehicle, means whereby said nozzle may be rotated from the driver's seat to direct the air in the desired direction, a valve in said air pipe whereby the supply of air to the nozzle may be controlled or cut off, and means on the instrument board of the vehicle for operating said valve.

1,502,746. TEETERING ROUNDABOUT. HAROLD C. ROEMPKE, Indianapolis, Ind. Filed Feb. 24, 1922. Serial No. 538,858. 5 Claims. (Cl. 46—27.)



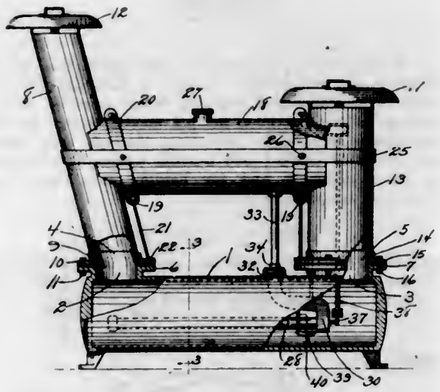
1. A teetering roundabout comprising a board having a slot intermediate its ends, a stationary pivot extending through said slot for rotatably supporting the board, a second pivot for teeteringly supporting said board upon an axis at right angles to said first pivot and rotatably supported by said first pivot, and a reversible board rotating construction associated with the stationary pivot, including a pair of handles each pivotally supported near each end of the board, and an eccentric connected to both handles and to the stationary pivot.

1,502,747. FOLDABLE TURNTABLE FOR TALKING MACHINES. SOLOMON SACHS, New York, N. Y. Filed Feb. 26, 1924. Serial No. 695,279. 1 Claim. (Cl. 274—39.)



1. A turn table comprising a disk member, an arm fixedly connected to said disk member, and a plurality of arms pivotally mounted on said disk member and adapted to move in a plane parallel thereto, said movable arms being adapted to fold parallel to and against said fixed arm.

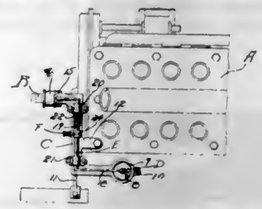
1,502,748. BIRD CAGE. WILLIAM FREDERICK SCHLEICH, New York, N. Y., assignor to Schleich Studios, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 2, 1922. Serial No. 604,481. 1 Claim. (Cl. 119—17.)



A bird cage construction, comprising a conical shield, an opaque hemispherical shield, bars radiating from said conical shield and extending into said hemispherical shield, said bars being attached to said conical shield, and terminating in set-off portions within said hemispherical shield, receptacles on said off-set portions, and means for holding said hemispherical shield releasably over the said off-set portions.

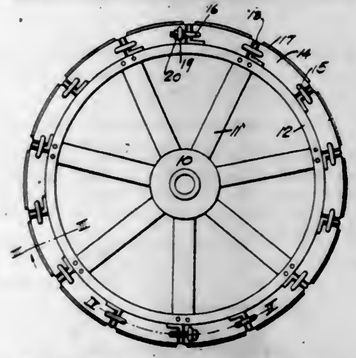
1,502,749. SCRAPING MEANS FOR CARCASS-DEHAIRING MACHINES. OSCAR C. SCHMIDT, Cincinnati, Ohio, assignor to The Cincinnati Butchers' Supply Company, Cincinnati, Ohio, a Corporation of Ohio. Filed May 14, 1923. Serial No. 638,729. 8 Claims. (Cl. 17—18.)

1. A carcass scraper comprising a support, a resilient arm thereon provided with a slit at its outer end to form a plurality of supplemental arms side by side at said outer end, scraper-blades on said respective supplemental arms, and a scraper-blade at the base of said slit.



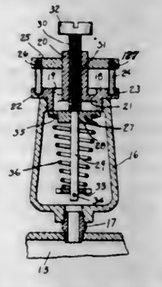
1,502,750. HEATER. GEORGE R. SECREST, McRae, Mont., assignor of one-half to John H. Kifer, Hardin, Mont. Filed Feb. 1, 1924. Serial No. 690,022. 5 Claims. (Cl. 126—360.)

1. A device of the class described including a body tank, a burner in the body tank, a pair of collars rising from the ends of the body tank communicating therewith, a draft pipe engaged with one collar, a casing engaged with the other collar, each collar provided with a flange, rings engageable with the flanges for holding the pipe and the casing in place, a supply tank disposed between the pipe and the casing, a pair of straps about the supply tank, rods depending from said straps and terminating in arcuate feet resting on the rings and bolted to the flanges of the collars and means within the casing for controlling the burner.



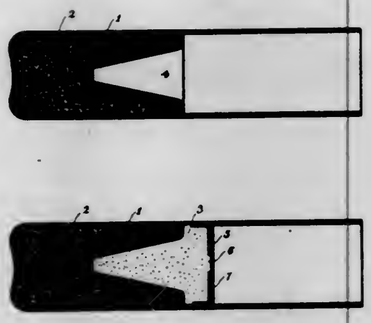
1,502,751. AIR COMPRESSOR FOR MOTOR VEHICLES. WALTER A. SHALLENBERG, Salem, Ohio. Filed Apr. 28, 1923. Serial No. 635,325. 3 Claims. (Cl. 230—27.)

1. In an air compressor, the combination with a cylinder and piston, of an operating cam, operating means connecting said cam with said piston comprising a reciprocating rod, a plurality of levers, a connecting shaft between said levers, support for the operating means



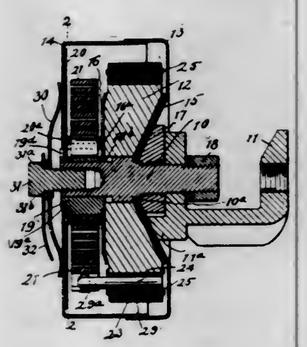
having bearings for said shaft, and a spring coiled about the connecting shaft with one of its ends rigidly held thereby and the other engaging the support.

1,502,752. TRACTOR-WHEEL TREAD. EMMETT THOMAS CRAIG and CLARENCE FREDRICK SILLS, Memphis, Tenn. Filed Jan. 13, 1922. Serial No. 529,084. 6 Claims. (Cl. 301—39.)



3. In a vehicle wheel, the combination with the rim thereof and transverse flanges projecting from said rim, of a temporary tread member comprising two series of sections adapted to be detachably engaged directly with said rim and disposed between said flanges, each series comprising metal retainers, resilient treads secured by and projecting beyond said metal retainers, U bolts hinging said retainers together, and L shaped bolts detachably connecting the end retainers of the two series.

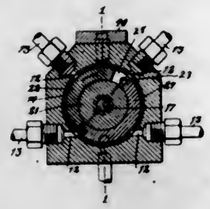
1,502,753. RELIEF VALVE FOR INTERNAL-COMBUSTION ENGINES. LEONARD SLIGER, Indianapolis, Ind. Filed Apr. 12, 1923. Serial No. 631,648. 4 Claims. (Cl. 277—65.)



1. An air relief valve for an internal combustion engine, including a valve body in communication with the engine intake, and having an opening therein, a valve normally closing said opening and subject to the suction of the engine, and a cap for closing said opening, and seatable by said suction.

1,502,754. DETONATING OR BLASTING CAP. JOHN B. SMITH, East Alton, Ill., assignor to Western Cartridge Company, East Alton, Ill., a Corporation of Delaware. Filed Feb. 10, 1923. Serial No. 618,243. 21 Claims. (Cl. 52—4.)

1. A detonating or blasting cap containing as a combined charge a sensitive explosive mixed with a less sensitive aromatic nitro-compound.

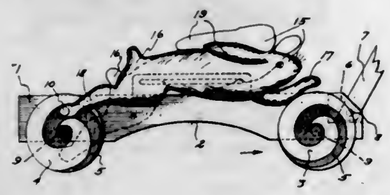


1,502,755. REBOUND CONTROLLER. JACOB R. SNYDER, Cleveland, Ohio, assignor to The Star Rebound Controller Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 3, 1922. Serial No. 548,923. 29 Claims. (Cl. 267—10.)

1. A rebound controller for relatively movable bodies, said controller adapted to be supported on one of the latter and comprising a drum rotatable in opposite directions, a belt wound on the drum and adapted to be connected to the other body and serving to rotate the drum in one direction and to unwind from the drum as the bodies recede from each other, a spring associated with the drum and serving to rotate the drum in the opposite direction and to cause the belt to be wound onto the drum when the bodies approach each other, and friction means engaging the drum and imposing a predetermined uniform frictional resistance to rotation of the drum in both directions.

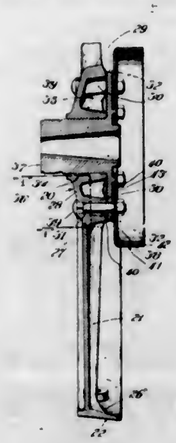
1,502,756. COMBINED PUMP AND DISTRIBUTOR. ARTHUR W. THOMPSON, Ottawa, Ontario, Canada. Filed Apr. 14, 1922. Serial No. 552,744. 25 Claims. (Cl. 103—129.)

1. A pump including a pair of rotatable relatively movable members cooperating to form a chamber of varying capacity, driving means for one of said members, yielding connections between said members tending to maintain the chamber at one limit of capacity and means for overcoming the action of said yielding means and



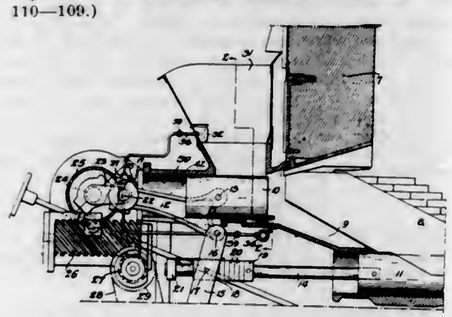
effecting a relative movement of said members and a change in the capacity of said chamber at a predetermined point in the revolution of said members.

1,502,757. LOOSE-LEAF CHECK BOOK AND FLEXIBLE BINDER THEREFOR. ABRAHAM VAN NOSTRAND, Sea Cliff, N. Y. Filed June 2, 1923. Serial No. 642,885. 4 Claims. (Cl. 129—23.)



1. In a loose leaf check book, the combination with a plurality of independent leaves, a backing for said leaves, said leaves and backing being provided with a plurality of perforations, flexible elastic means in said perforations and keys projecting through said means near the ends thereof and bearing against the backing for quick assembly and for holding said leaves and backing in assembled position.

1,502,758. FIGURE WHEEL TOY. JOSEPH VILLANI, Brooklyn, N. Y. Filed Oct. 3, 1922. Serial No. 592,001. 1 Claim. (Cl. 46—45.)

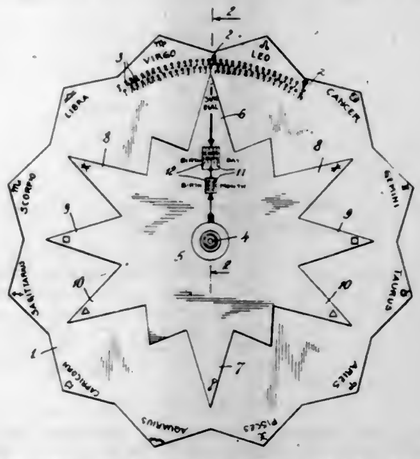


A figure wheel toy comprising a longitudinal body, front and rear wheels supporting said body, a plate rigidly secured to said body intermediate its length, side walls on said body formed by bending said plate parallel to its longitudinal edges, horizontal slots in said side walls, a crank pin in each rear wheel positioned diametrically opposite each other, animal figures, pins projecting from the rear face of said figure, said pins being located intermediate the length of said figures, the pins being slidably secured in the slots of the side walls, the hind legs of said figures being secured to the crank pins of the rear wheels, said rear wheels when rotated being adapted to tilt both ends of the figures alternately.

1,502,759. METAL WHEEL. CHARLES E. WADE, Detroit, Mich., assignor to Jefferson Forge Products Company, Detroit, Mich., a Corporation of Michigan. Filed Oct. 7, 1921. Serial No. 506,032. 8 Claims. (Cl. 301—65.)

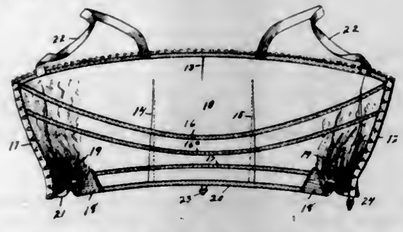
5. In a forged wheel, a unitary structure comprising spokes and a center-body into which the roots of said spokes merge, said center-body providing a disk portion, a collar portion, and laterally projecting strengthening posts on the disk portion terminating at the inner plane of the center-structure.

1,502,760. JET AGITATOR FOR FUEL-FEEDING DEVICES. JOHN A. BARNARD, Philadelphia, Pa. Filed Sept. 13, 1920. Serial No. 410,079. 17 Claims. (Cl. 110—109.)



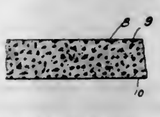
11. In a nozzle for use in breaking down arches of fuel in lines of fuel flow, an upwardly directed nozzle located in the line of flow of the fuel and a protecting cover for the said nozzle extending diagonally upwardly and outwardly further into the line of flow from the orifice of said nozzle, in combination with walls forming a gravity fuel passage for the fuel flow.

16. The method of breaking up arches of fuel in a gravity feeding system for a plunger conveyor which consists in directing a fluid jet upon the arch at intervals and timing the intervals to correspond with retracted positions of the plunger.



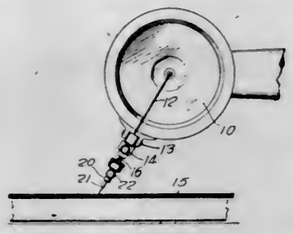
1,502,761. ASTROLOGICAL CHART. BELLE BART, New York, N. Y. Filed Dec. 22, 1922. Serial No. 608,400. 4 Claims. (Cl. 35—3.)

1. Apparatus for casting horoscopes comprising a chart representing the zodiac bearing characters denoting the several signs thereof, said chart bearing additional characters denoting the days of the months which latter characters are so arranged that the one designating the approximate day in which the sun enters any sign is substantially in radial alignment with the beginning of that sign, a plurality of markers each representing a planet and adapted to be placed in the signs



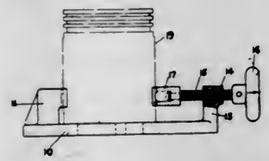
of the zodiac, and a revoluble member provided with a series of indicators constituting a system of angles of which one indicator forms the base and the others are spaced substantially 60, 90, 120, and 180 degrees therefrom.

1,502,762. BRASSIÈRE. SAMUEL BARUCH, New York, N. Y. Filed Oct. 16, 1922. Serial No. 594,930. 4 Claims. (Cl. 2—42.)



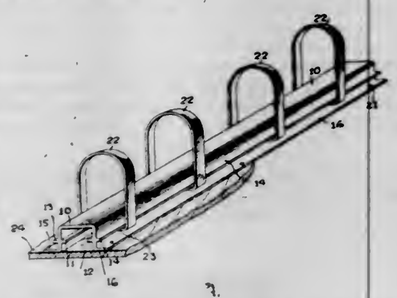
1. A brassière including a fabric body portion of substantially inelastic material having a pair of reinforcing strips extending transversely across the front in vertically spaced relationship, the upper strip being disposed above the waist line but below the bust, and thence upwardly and rearwardly to the center line of the back, and the lower strip substantially following the waist line and terminating at the hips, and elastic means for holding said second mentioned strip substantially taut and maintaining any fullness of the body portion at the back.

1,502,763. PENCIL AND PROCESS OF MAKING THE SAME. LUCIAN W. BUGBEE, Indianapolis, Ind. Filed Jan. 18, 1924. Serial No. 687,032. 6 Claims. (Cl. 18—47.5.)



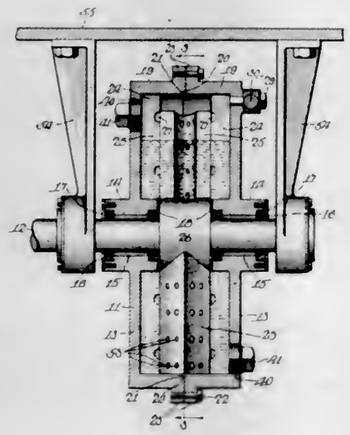
1. The process of making a pencil, which process includes forming a lead of clay and carbonaceous material intermixed, second in heating said lead so as to oxidize the carbonaceous material and leave a lead formed of hard honeycombed clay, and afterwards filling said lead with colored pigment.

1,502,764. TONE MODIFIERS FOR PHONOGRAPHS. EDWIN COULSON CLARK, Canton, and ARTHUR T. BROWER, Cleveland, Ohio. Filed Nov. 20, 1922. Serial No. 602,045. 3 Claims. (Cl. 274—37.)



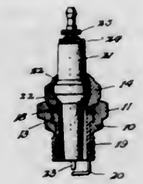
3. A tone modifier for phonographs, comprising a socket member embodying a stylus socket and a chamber filled with compressible cushioning material, a spindle extending into the chamber and having a head embedded in cushioning material, and a closure for the chamber adapted to exert varying degrees of compression on the cushioning material.

1,502,765. METHOD OF FITTING PISTONS. MARTIN B. COVERT, Indianapolis, Ind. Filed Apr. 30, 1923. Serial No. 635,480. 7 Claims. (Cl. 29—156.5.)



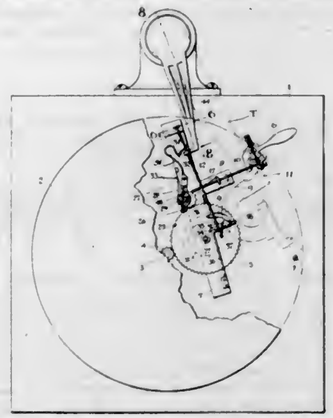
1. The method of fitting a piston to a cylinder which comprises forming diametrically disposed slots through the piston between the head and skirt, and applying force to the piston skirt along a diameter thereof to lengthen the diameter at substantially right angles thereto.

1,502,766. INSERT FOR CONCRETE CONSTRUCTION. JAMES F. CURLEY, Yonkers, N. Y., assignor to Concrete Steel Company, New York, N. Y., a Corporation of Delaware. Filed Feb. 5, 1921. Serial No. 442,670. 2 Claims. (Cl. 72—105.)



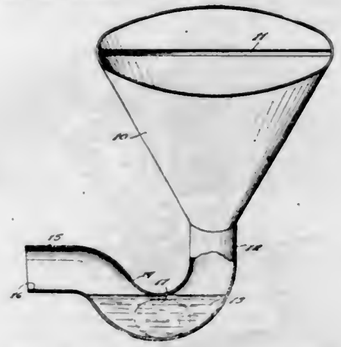
1. An insert for concrete construction of the character described comprising a channel having parallel side walls with opposed ledges projecting respectively outwardly and inwardly from each side wall in a plane spaced from the top and bottom of said channel, the inwardly projecting ledges being arranged to receive and retain a bolt head and being recessed at opposite points to permit the insertion and removal of a bolt head, and the outwardly projecting ledges being arranged to be anchored in the concrete; and a flange parallel to the opposed ledges projecting from the outer edge of each side wall and arranged to be secured against a form, substantially as described.

1,502,767. POWER TRANSMITTER. WILLIAM DAVIS, Chicago, Ill. Filed Nov. 15, 1922. Serial No. 601,028. 5 Claims. (Cl. 188—162.)



1. In a mechanism of the class described, the combination with a driven shaft, of a wheel mounted on said shaft to rotate therewith, a plurality of paddles fixed to said wheel and extended therefrom, a container surrounding said wheel and its paddles and mounted on said shaft for independent oscillatory movement, said container having on at least one side of the paddle wheel within its cavity a plurality of radially disposed webs, a spring actuated sliding valve mounted on one of the walls of the container for inward and outward movement with respect thereto for co-operation with said paddles, and semi-fluid material partially filling said container.

1,502,768. SPARK PLUG. ADOLFO DE CLAIRMONT, Toledo, Ohio. Filed Mar. 29, 1923. Serial No. 628,516. 3 Claims. (Cl. 123—109.)

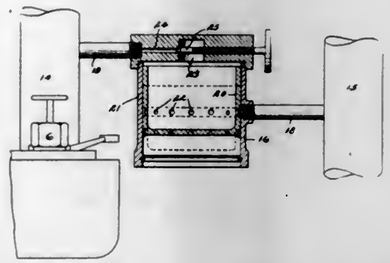


1. A spark plug including a shell, a bushing thereon having a vent passage through its wall normally covered by the shell, the bushing being provided with a depending skirt slidably fitting within the lower end portion of the shell for centering and guiding the bushing, an electrode carried by said skirt, and an electrode insulatingly supported by said bushing to cooperate with said first mentioned electrode forming a spark gap therebetween, the bushing being adjustable upon the shell to uncover said passage without disturbing the gap.

1,502,769. NONSET STOP FOR PHONOGRAPHS. JAMES E. FELTNER, Hancock, Md., assignor, by mesne assignments, to Columbia Phonograph Company, Inc., a Corporation of New York. Filed May 25, 1920. Serial No. 384,087. 38 Claims. (Cl. 192—118.)

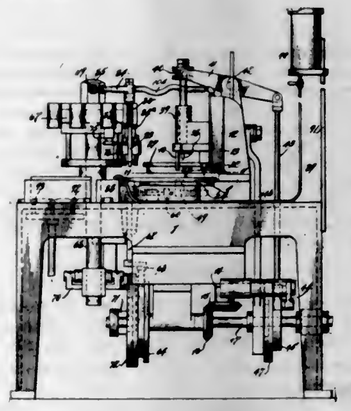
1. A phonograph stop, including step-by-step moving safety means adapted to prevent stopping of the turntable through cessation of movement of the tone-arm during a predetermined period.

1,502,770. EGG SEPARATOR. HENRY CHARLES FRENIER, Troy, N. Y. Filed May 14, 1924. Serial No. 713,316. 5 Claims. (Cl. 146—2.)



1. A device of the class described comprising a funnel, a neck at the narrow end thereof, said neck having a pocket formed therein, and a nozzle formed at its free end arranged above said pocket.

1,502,771. BELT BUCKLE. NICKETAS C. GOVIS, Seattle, Wash. Filed Oct. 11, 1922. Serial No. 593,754. 6 Claims. (Cl. 24—180.)

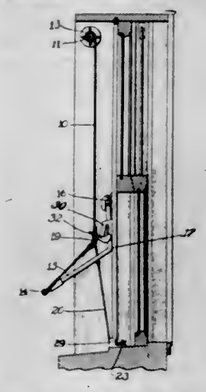


1. A belt buckle embodying a clasp member; a gripping member pivotally mounted upon said clasp member, said gripping member having a projecting thimble; means to releasably secure said gripping member to one end portion of a belt; and a recess in said clasp wherein said thimble may be projected, and releasably secured.

1,502,772. APPARATUS FOR IMPROVING AND INCREASING THE USEFUL RESULTS OBTAINABLE FROM GASOLINE OR OTHER FUEL IN INTERNAL-COMBUSTION ENGINES AND THE LIKE. FREDERICK GRINHAM, St. Louis, Mo., assignor of one-third to Oliver J. Savin, one-sixth to John C. Stiles, and one-sixth to Hugh K. Wagner, all of St. Louis, Mo. Filed Mar. 7, 1921. Serial No. 450,284. 2 Claims. (Cl. 123—119.)

1. In combination, an intake manifold, an exhaust manifold, means affording communication between the intake and exhaust manifolds, a needle valve controlling the passage of fluid through said means, and means controlled by and communicating with the intake manifold for closing communication between said manifolds upon increase of pressure in the intake manifold.

1,502,773. SPOUT-SOLDERING MACHINE. CHARLES GUERITEY, Passaic, N. J., assignor to Passaic Metal Ware Co., Passaic, N. J., a Corporation of New Jersey. Filed Aug. 16, 1922. Serial No. 582,132. 16 Claims. (Cl. 113—59.)

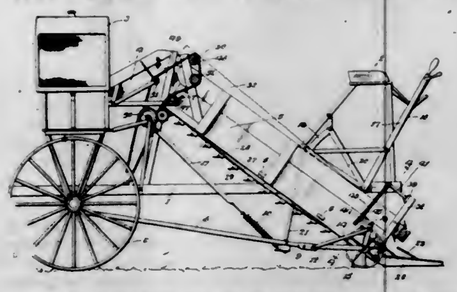


2. The combination of means to support caps, means to puncture the caps, means to support spouts, means to insert the spouts in the punctured caps and means to remove the caps and spouts from the last named means and dip them successively in flux and molten solder.

1,502,774. AWNING. DAVID H. HARNLY, Chicago, Ill. Filed Oct. 6, 1921. Serial No. 505,725. 21 Claims. (Cl. 156—44.)

8. In an awning, in combination, a spring roller secured in a window frame, an awning canvas carried by said roller, a swinging ball-shaped frame, having its arms bent in vertical planes intermediate their ends, to the cross bar of which the lower end of the awning canvas

is attached, a transverse stiffening rib applied to the awning at a distance from said lower end, the ends of said rib projecting beyond the canvas, fixtures secured to said

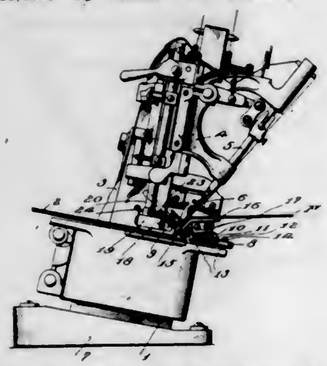


window frame, comprising hooks for engaging said projecting ends and an arm hinged below each of said hooks for lifting said rib clear of said hooks.

1,502,775. SEALING DEVICE FOR RECEPTACLES SUCH AS BOTTLES. WALTER H. HILDICK, East Orange, and HARRY SEMLEAR, Jr., Ridgewood, N. J. Filed May 23, 1923. Serial No. 640,837. 1 Claim. (Cl. 215—73.)

A sealing device comprising a cork adapted to seal a receptacle, said cork having a narrow opening therein, an exposed paper disc adapted to close the said opening and located at the top of the cork, the said disc being adapted to be automatically ruptured when the gas pressure in the said receptacle exceeds a predetermined limit so as to permit the free escape of the gas in the said receptacle, the said opening in the cork being so narrow that any substantial escape of liquid therethrough is prevented by the capillary force exerted by the liquid in the said opening.

1,502,776. VINE PICK-UP. RAYMOND F. HOLSER and JOSEPH V. LOPEZ, Santa Maria, Calif. Filed Jan. 28, 1922. Serial No. 532,398. 2 Claims. (Cl. 198—233.)

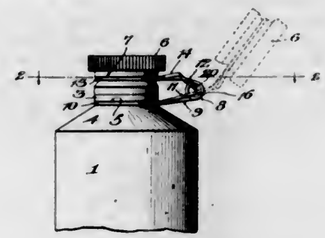


1. In an apparatus for the purpose set forth, the combination of a downwardly and forwardly inclined frame, upper and lower endless conveyers disposed within said frame, the upper conveyer being carried by side bars pivotally hung at their upper ends within the upper end of the frame, a rock shaft mounted upon the frame over the lower end of the upper conveyer, cranks extending rearwardly from said rock shaft, hangers pivoted to and depending from said cranks and secured to said pivoted bars, and adjusting links pivoted at their upper ends to the said cranks and depending therefrom and having their lower portions adjustably secured upon the outer sides of the frame.

1,502,777. DUSTGUARD. FRED HUFNAGEL, St. Louis, Mo. Filed June 4, 1921. Serial No. 475,175. 2 Claims. (Cl. 123—90.)

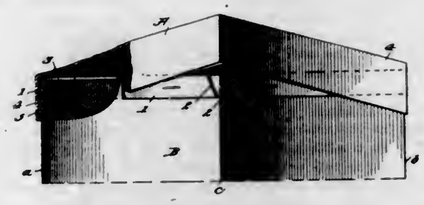
1. A dustproof box for internal combustion engines comprising a plurality of plates suitably fastened together, said plates consisting of a top plate, a pair of side plates, rear and front plates, the said top plate provided with a flange overlapping the side plates and rear and front plates, said side plates being held in assembled position by angle members and interfitting means engageable with said rear plates, said front plates comprising upper and lower members, said lower member provided with an opening, and a movable plate adapted adjustably to close said opening, and means for securing said lower plates in position.

1,502,778. CONCEALED-STITCH BINDING MACHINE. CHARLES ROBERT HUGHES, Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 28, 1921. Serial No. 448,424. 12 Claims. (Cl. 112—2.)



8. In a sewing machine, the combiation of a work support, a feeding mechanism, a needle arranged to reciprocate in a line at an obtuse angle to the work support, a folder for receiving and folding and reversing a binding strip and having means for infolding the upper edge portion of the binding strip about the path of the needle and for directing the inturned portion of the strip across the path of the needle, a support for said folder, and means for attaching said support to the work support of the machine whereby said folder may be adjusted forward and back and laterally for centering the needle in the means for folding the upper edge portion of the binding strip.

1,502,779. COLLAPSIBLE TUBE. WILLIAM C. HUNTOON, East Greenwich, R. I. Filed July 19, 1923. Serial No. 652,549. 2 Claims. (Cl. 221—60.)

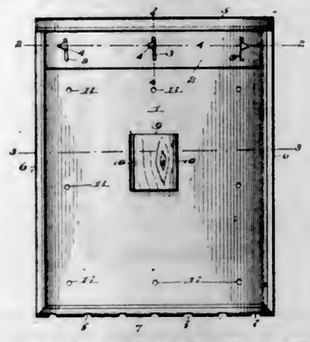


1. In combination with the threaded neck of a collapsible tube having a peripheral groove, a cap threaded over the neck and having a circular peripheral groove, a

single piece of spring wire having a series of coils between its ends, one end of the wire being extended outwardly tangentially to and at the lower arc of the coils and formed into a loop which is engaged in the groove of the neck, said end of the wire being then extended toward the coils and having its free extremity turned at an angle and projecting into one end of the coils, the op-

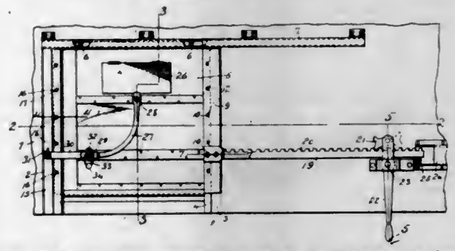
posite end of the wire being extended outwardly to form an arm tangential to and at the upper arc of the coils and formed into a loop which is loosely received in the groove of the cap and being then extended toward the coils to form a second arm which crosses the first arm and which has its free extremity turned at an angle and projecting into the opposite end of the coils.

1,502,780. BOX. JOSEPH G. HUYE, New Orleans, La. Filed Apr. 25, 1921. Serial No. 464,277. 3 Claims. (Cl. 229—45.)



1. A box comprising a body section and a bottom section, the body section being provided with a locking flange adjacent its bottom edge on its exterior face, said locking flange extending around all sides and all but one of the corners of said body section and being cut away at one corner of said body section, and the bottom section being formed with a lip to snugly receive the lower portion of the body section, said lip being provided with a locking flange adapted to engage said locking flange on the body section.

1,502,781. FISHING HOOK. WILLIAM J. JAMISON, Chicago, Ill. Filed Aug. 8, 1923. Serial No. 656,347. 3 Claims. (Cl. 43—27.)

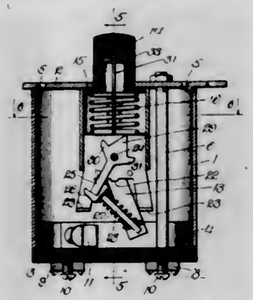


1. A barbless fish hook having a shank and a returned bent end provided with an inwardly directed offset in the plane of the hook, said offset having bevelled sides.

1,502,782. ADVERTISING-CARD HOLDER. RICHARD A. JOHNSTON, New York, N. Y., assignor to Barron G. Collier, Inc., New York, N. Y. Filed Dec. 17, 1923. Serial No. 681,205. 4 Claims. (Cl. 40—64.)

3. In a frame for holding advertising cards, a back plate having means for holding the outer edges of a card carried thereon, a top plate adjustably carried thereon having card-engaging means on its upper edge, and a wooden block removably secured on said back plate intermediate of its vertical and horizontal edges.

1,502,783. CAR-DOOR MECHANISM. CHARLES M. KEMPER, Kansas City, Mo. Filed Apr. 7, 1922. Serial No. 553,418. 2 Claims. (Cl. 20—22.)

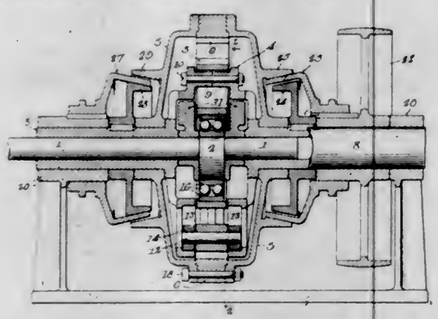


1. In a car door mechanism, a car body having a door jamb, two vertical plates, fixed spacing rings between said plates, the inner plate being attached to said jamb, bolts extending through said plates and respectively through said rings for attaching said plates to said jamb, and a door slidable on said body and having a vertical edge portion adapted to enter and fit snugly between said plates, said edge portion having notches adapted to respectively receive said rings when the door is closed, substantially as set forth.

,502,784. BASEBALL COVER. BERT KENNEDY, Gloversville, N. Y. Filed Oct. 18, 1923. Serial No. 669,346. 2 Claims. (Cl. 46—4.)

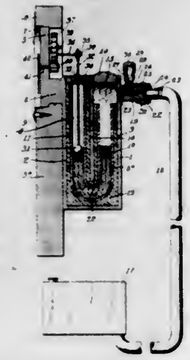
1. A cover for baseballs comprising two strips of material of similar form to exactly cover the surface of a sphere with the abutting edges of the strips adapted to be sewed, the portions of the strips at the edges being skived to form bevelled edges.

1,502,785. PUSHBUTTON SWITCH. THOMAS J. KERWIN, Chicago, Ill., assignor to Edmunds & Jones Corporation, a Corporation of New York. Filed Dec. 2, 1921. Serial No. 519,543. 8 Claims. (Cl. 200—168.)



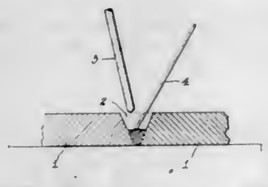
4. A mechanism carrier for a switch in which a pivoted lever is actuated by a slidably mounted push-button, comprising a tubular push-button guide having an integral extension formed for limiting the movement of the said lever in both directions, the push-button guide being laterally contracted to afford an interior abutment for the button retracting spring, the push button guide being laterally contracted to afford an interior abutment for the button retracting spring and having its other end equipped with arms for securing the carrier to the switch casing.

1,502,786. VALVE FOR ATOMIZER BULBS OR THE LIKE. HENRY P. KRAFT, Ridgewood, N. J. Filed Oct. 20, 1921. Serial No. 509,069. 4 Claims. (Cl. 251—127.)



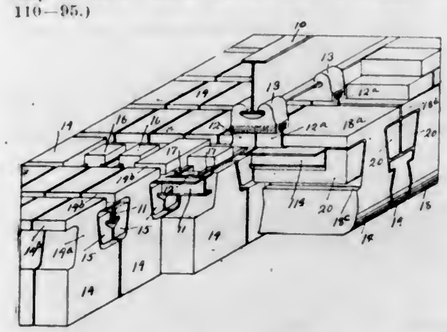
1. A combination of an atomizer bulb or the like and a valve comprising a casing substantially entirely enclosed within the bulb and having a tapered seat, a check valve having a tapered packing adapted to engage said seat and means for holding the valve within the casing.

1,502,787. CHANGE-SPEED GEARING. ALFRED LAUKHUFF, Shorewood, Wis. Filed Mar. 30, 1922. Serial No. 547,997. 6 Claims. (Cl. 74—34.)



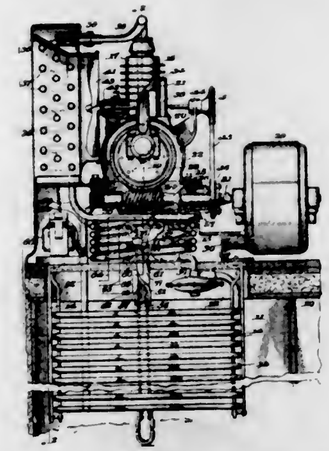
1. In change-speed gearing the combination of a shaft provided with an eccentric, a gyratory gear mounted on the eccentric, an internal gear supported concentrically with said shaft in mesh with the gyratory gear, a guide member composed of sections supported on opposite sides of the gyratory gear concentrically with said shaft and rigidly connected with each other by bolts passing through spacing lugs within openings in and clear of the gyratory gear, and guide pins fastened in one member and extending freely into circular guide openings in the other.

1,502,788. GASOLINE GAUGE. HARRY G. LEE, Boston, Mass., assignor of one-third to Louis D. Covich and two-thirds to David Finklestein, both of Boston, Mass. Filed Mar. 1, 1922. Serial No. 540,284. 2 Claims. (Cl. 73—82.)



1. A gasoline gauge, including a body consisting of a casting provided at its top with front and rear openings and having an intervening wall or portion terminating short of the lower end of the body and forming two communicating chambers, a mercury tube of U-shape arranged in the said chambers and having its bend or connecting portion located below the said wall, plastic material surrounding the mercury tube and securing the same in position in the said openings, closure plugs secured in the said openings one of the plugs being provided with a slot, a float operating in the front opening and having a rod extending through the slot of the closure plug, a head or member having a pivoted indicating hand or pointer, gearing for transmitting motion from the float to the indicating hand or pointer and for increasing the said motion for causing the hand or pointer to move a greater distance than the float, and a suction or vacuum pipe connecting the gauge with a gasoline tank.

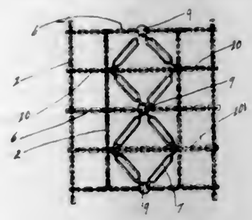
1,502,789. ARC WELDING. JOHN C. LINCOLN, Cleveland, Ohio, assignor to The Lincoln Electric Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 22, 1922. Serial No. 562,650. 4 Claims. (Cl. 219—10.)



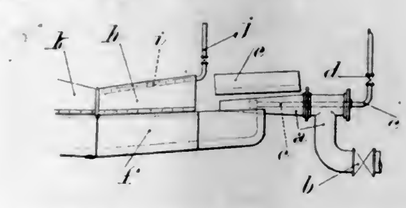
1. In a method of electrically welding together parts composed of a ferrous metal, which consists in striking an electric arc between a suitable electrode and the juxtaposed edges of the parts to be united, and fusing copper by the heat produced in such arc until the space between the parts is filled with such last mentioned metal.

1,502,790. FURNACE ARCH. MICHAEL LIPTAK, St. Paul, Minn., assignor to Liptak Fire Brick Arch Co., Minneapolis, Minn., a Corporation of Minnesota. Filed May 31, 1919. Serial No. 301,024. 9 Claims. (Cl. 110—95.)

1. A fire arch comprising laterally spaced beams, main blocks hung from said beams and forming the under fire exposed surface of the arch, said main blocks having channeled sides, and supplemental blocks located in the channeled side of said main blocks and hung from and protecting the lower portions of said beams independent of said main blocks.



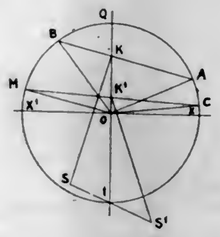
1,502,791. REFRIGERATING APPARATUS. CHARLES L. MCCUEN, Detroit, Mich., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio, a Corporation of Delaware. Filed Oct. 9, 1918. Serial No. 257,437. 11 Claims. (Cl. 62—116.)



9. In a refrigerating apparatus, in combination, a two-cylinder compressor having a worm wheel and cranks at the sides of the worm wheel, a worm and driving shaft arranged beneath the worm wheel, a fan shaft parallel to the driving shaft above the worm wheel, a motor connected to the driving shaft, and driving connections from the driving to the fan shaft.

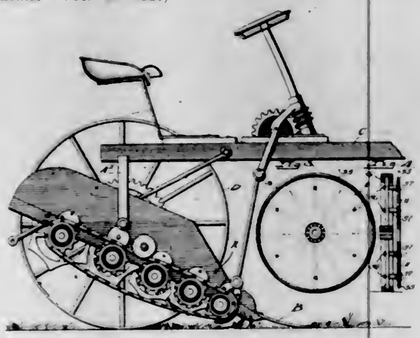
1,502,792. TIRE CHAIN. SPANISH MCGEE, Shinnston, W. Va. Filed July 17, 1923. Serial No. 652,075. 2 Claims. (Cl. 152—14.)

1. A tire chain comprising main side chains, transverse chains spanning the side chains, and diamond-shaped tread members consisting of separable links having eyes, and eyes engaging the eyes of the links defining adjacent corners of the tread members and engaged with the transverse chains, and spreader chains connecting the side corners of the tread members with the main side chains.



1,502,793. PROCESS FOR REDUCING FUSED SLAG TO GRANULAR FORM. MARTIAL MAGUET, Maxeville, France. Filed Mar. 15, 1920. Serial No. 366,015. 2 Claims. (Cl. 83—91.)

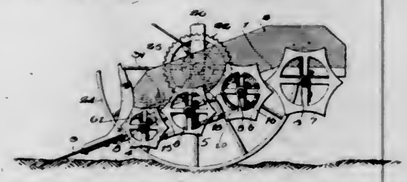
1. Process for granulating by water the highly heated basic calcareous and sulphurous slag from blast furnaces consisting in dividing the jet of slag as it issues from the furnace into small drops by means of an air blast under low pressure equivalent to 20 to 30 centimetres of water whereby the temperature of the slag is initially lowered to about 1300° C. and it loses part of its fluidity without solidifying the said drops being then precipitated direct into water which hardens these drops in fusion and causes them to burst into an infinite number of small vitreous fragments constituting a pozuolanic sand suitable for employment in the manufacture of slag cement.



1,502,794. APPARATUS FOR AUTOMATICALLY SOLVING SPHERICAL TRIANGLES. LUCIEN JOSEPH LOUIS MOUREN, Asnieres, France. Filed Aug. 2, 1920. Serial No. 400,825. 4 Claims. (Cl. 235—61.)

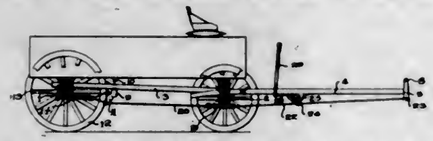
1. In an apparatus for automatically resolving a spherical triangle, three elements of which are known, the system comprising in combination: four movable pivots tending to be maintained at the same distance R from the general axis of the apparatus; a slide connecting two of these pivots, another slide connecting the two

others, a pivot fixed at the same distance R from the general axis, a rod rotating about said fixed pivot and having at each side of said pivot a length equal to $\frac{R}{2}$, a guide placed in the plane perpendicular to the general axis which contains the fixed pivot and along the line which joins the fixed pivot to the general axis, and two rods having a length equal to $\frac{3}{2}$ R and one of their ends connected to the ends of the above mentioned rod, the other end of one of these rods being adapted to move at the same time in the first mentioned slide and in the guide, and the other end of the other of these rods being adapted to move at the same time in the second mentioned slide and in the guide.



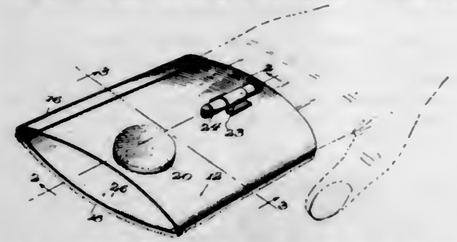
1,502,795. PEANUT DIGGER. JAMES E. PARKER, Norfolk, Va. Filed June 1, 1920. Serial No. 383,596. 7 Claims. (Cl. 55—51.)

1. A peanut digger comprising a chassis, axles secured at the front and rear of the chassis, drive wheels mounted on the rear axle, spaced apart steering wheels mounted on the front axle, cutting discs secured to one side of the steering wheels and of less diameter than said wheels, said discs operable to effect a cutting of the vines within and above the soil, a conveyor at the rear of said discs, and a digging plowpoint mounted to function between said discs and conveyor, said digging point being adapted to penetrate the soil to extricate and elevate the vines to said conveyor.



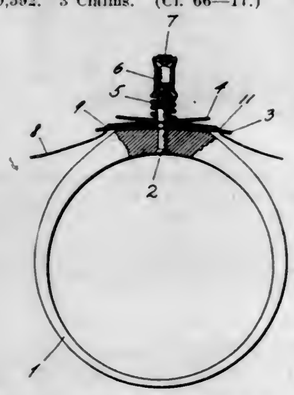
6. The combination in a peanut digger, of a wheel, a circular element having a peripheral cutting edge and being of a diameter less than that of the wheel, and a plurality of spacers for holding the circular element a predetermined distance from the side of the wheel.

1,502,796. CONVEYER FOR PEANUT DIGGERS. JAMES EDWARD PARKER, Norfolk, Va. Original application filed June 1, 1922, Serial No. 383,596. Divided and this application filed July 13, 1922. Serial No. 574,774. 4 Claims. (Cl. 130—32.)



1. In a peanut digger, parallel side rails forming part of a digging frame, bearings carried by said rails in transverse alinement but successively spaced farther apart toward the discharge end of the digger, a shaft journalled in each of the alining bearings, a series of star wheels on each shaft, the wheels of each series being of the same diameter but the wheels of succeeding series being larger than those of the series preceding to afford an overlapping arrangement and avoid spaces between the peripheries of the star wheels, means disposed longitudinally of each of the shafts and associated with the star weels to prevent the vines from wrapping around the shafts, and means for adjusting each of the star wheels independently to enable any desired disposition of the star wheels over the area of the conveyer.

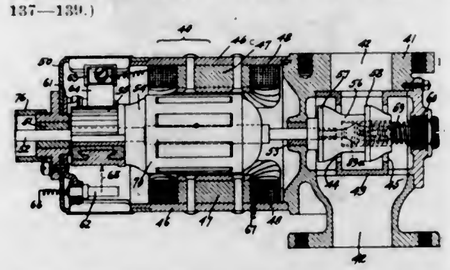
1,502,797. AUTOMATIC WAGON BRAKE. WILLIAM HENRY PERRY, Burdett, Alberta, Canada. Filed Feb. 10, 1923. Serial No. 618,364. 2 Claims. (Cl. 188—115.)



1. In an automatic wagon brake, the combination with the brake actuating rod, of a bracket having an upwardly extending stud thereon, of a link pivotally connected to the rod and straddling the bracket, said link normally held in place on the forward side of the stud and manually operable means for throwing the link to the rear side of the stud.

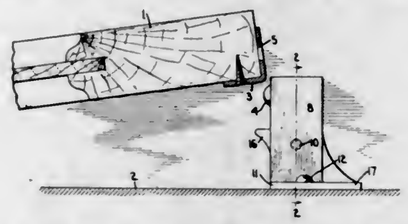
1,502,798. CLEANING DEVICE. FRANK I. PHOENIX and ALFRED H. BEHRMAN, Reedsburg, Wis. Filed Jan. 27, 1923. Serial No. 615,371. 4 Claims. (Cl. 15—227.)

1. A cleaning article comprising a pair of connected sides forming an open ended body and provided with end flaps turned into the pocket and secured along their side edges to the inner surface of the sides to form finger-receiving pockets, said flaps being gradually increased in width toward their ends whereby the finger-receiving pockets are gradually enlarged toward their inlet ends.



1,502,799. FINGER RING FOR CROCHETING. HELEN R. REES, Portland, Oreg. Filed July 10, 1923. Serial No. 650,592. 3 Claims. (Cl. 66—17.)

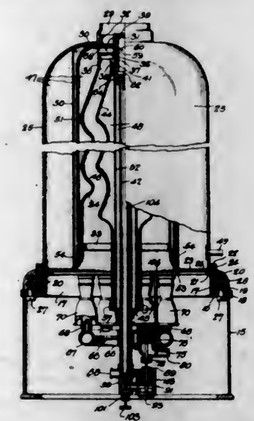
3. In a finger ring for crocheting, the combination of a ring, a stud, an ornamental nut on the stud, thread guiding means between ring and nut, said thread guiding



means comprising two convex disks of different diameters, the larger of said disks having oppositely located holes near the periphery, and a compression spring between the disks and the nut.

1,502,800. ELECTRIC THROTTLE GOVERNOR. JAMES B. REPLOGLE, Detroit, Mich., assignor to The Remy Electric Company, a Corporation of Indiana. Filed Nov. 11, 1918. Serial No. 262,010. 16 Claims. (Cl. 137—139.)

1. In a valve controlling mechanism, the combination with a port member; of a rotatable and axially movable shaft; a valve supported by said shaft; and means for moving the shaft endwise to place the valve in various throttling positions and for continuously rotating the shaft, the degree of throttling of said port being unaffected by valve rotation.

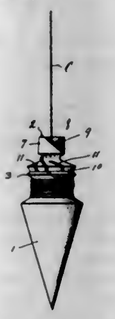


1,502,801. DOOR AND WINDOW CATCH. WALTER G. SCHERER, Cleveland, Ohio. Filed July 30, 1921. Serial No. 488,523. 4 Claims. (Cl. 292—73.)

1. In a device of the character described, the combination, with a hollow, two-part body split along a median line and having a base adapted for attachment to a supporting surface, each part having therein a semi-cylindrical cavity one end of which opens through a wall of such part at a distance from the base, said cavities co-operating to form a recess whose axis is parallel to the base of a spring pressed member located in said recess and movable in a direction substantially parallel thereto, said member having a round nose projecting from said body adapted for engagement with a cooperating movable member.

1,502,802. WATER HEATER. JONATHAN P. SMYTHE, Washington, D. C. Filed Oct. 27, 1919. Serial No. 333,767. 5 Claims. (Cl. 236—23.)

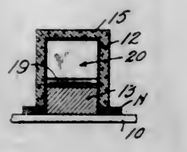
1. In a water heater, the combination with a water chamber, a burner or burners for heating water therein, a spring-closed valve for admitting gas to said burner or burners, an outflow tube communicating with said chamber, a normally seated piston valve for preventing outflow of water from said outflow tube, a thermal rod in said outflaw tube, a piston, a cylinder having a chamber in which said piston is movable and which chamber is in communication with the normally closed outflow passage from the heater and which passage opens into said piston chamber at opposite sides of said piston, by suitable ports, so that said piston is normally balanced as to fluid pressure, connections between said gas admission valve and said piston whereby said valve may be opened by said piston when said piston-valve is unseated by expansion of said thermal rod when the fluid pressure at one side of said piston is diminished and the gas admission valve



is opened, said piston valve, which closes the dicharge passage from said outflow tube, being arranged to close the communicating port to one side of said piston so that the latter will move to permit the said gas admission valve to be closed by its spring when the temperature of the water rises above a desired point.

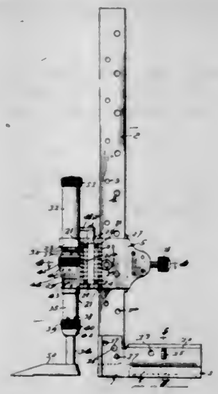
1,502,803. MOLD. KENNETH L. WEBER, Augusta, Ga., assignor of one-third to Charles Weber, Cincinnati, Ohio. Filed Oct. 23, 1922. Serial No. 596,180. 2 Claims. (Cl. 18—15.)

1. In a mold, a receptacle, a layer of mercury or quick-silver thereon, an open frame on said mercury or quick-silver and a layer of chemically treated gelatin solution on said mercury within said frame.



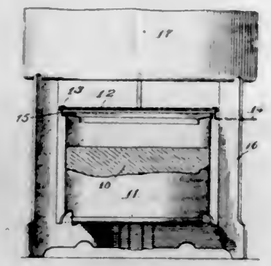
1,502,804. PLUMB BOB. WILLIAM W. WINDHAM, Olympia, Wash. Filed Nov. 3, 1923. Serial No. 672,578. 2 Claims. (Cl. 33—216.)

1. As a new article of manufacture, a plumb bob comprising a body provided with an outstanding post, an outstanding flange carried by the post in spaced relation with respect to the body, the outer end portion



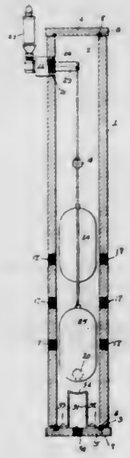
of the post being provided with an eye, there being an open slot in the peripheral surface of the post in communication with said eye, a line being insertible into the eye through the slot, the outer face of the flange being provided with a series of circumferentially spaced grooves, the grooves of the flange extending to a point substantially tangential to the adjacent portion of the post.

1,502,805. DEVICE FOR FORMING HOLLOW ARTICLES OF PLASTIC MATERIAL. JAMES T. WISNER, New York, N. Y. Filed May 8, 1923. Serial No. 637,414. 5 Claims. (Cl. 25—120.)



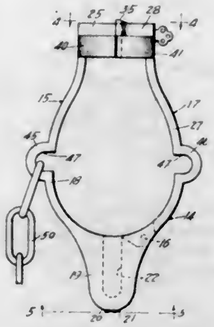
4. In apparatus for forming hollow articles of plastic material, a filler block and a sheet metal shell fitting the external surface of the block and adapted to form the inner surface of the article, a stripper plate provided with a groove to receive and hold the edges of the shell to hold the shell in position in the molded article, said shell having transversely extending strut members attached at their ends to the opposite side walls of the shell, said filler block being provided with slots to receive said rods, and said stripper plate being provided with an opening to provide for removal therethrough of the filler block without removal of the shell.

1,502,806. MICROMETER GAUGE. ALBERT R. BERG, Rochester, N. Y. Filed Oct. 19, 1921. Serial No. 508,661. 12 Claims. (Cl. 33—165.)



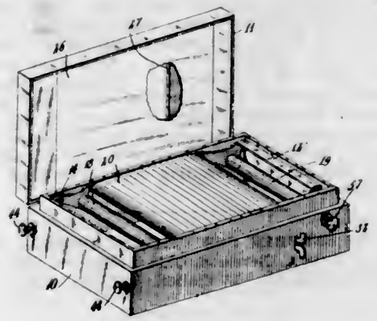
1. In a measuring gauge for the purpose indicated, a base having a blade, a carriage operatively adjustable on the blade and provided with two sets of graduations which progress in opposite directions, a micrometer screw operatively mounted on the carriage parallel to the blade, a gauge implement carried by one end of the micrometer screw for cooperation with the base for making measurements, and means carried by the micrometer screw and arranged between the latter and the blade for cooperating with the graduations on the carriage to indicate various measurements.

1,502,807. CATALYTIC HEATING METHOD AND APPARATUS. CHRISTIAN BERGER, New York, N. Y. Filed May 8, 1922. Serial No. 559,201. 10 Claims. (Cl. 158—113.)



3. A heating apparatus using vaporizable fuel and comprising a wide mouth vessel containing the body of fuel in combination with a catalytic element located at the vessel mouth in position to radiate heat directly to the surface of the body of fuel and induce vaporization of the same and adapted to bring about flameless combustion of vapor from such fuel.

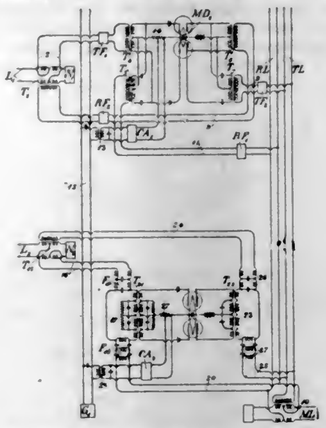
1,502,808. WATER COLUMN. JOHN ROWLAND BROWN, Cleveland, Ohio, assignor to The Reliance Gauge Column Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 25, 1920. Serial No. 412,784. 3 Claims. Claims. (Cl. 137—102.)



1. A water column adapted to withstand high pressure, comprising a wholly straight cylindrical body portion of tenacious metal, an extension edge at the inner circumference of each of the ends of said body portion, circular end plates of tenacious metal, of substantially the diameter of the body, secured to said body portion, and grooves in said plates to receive said extension edges.

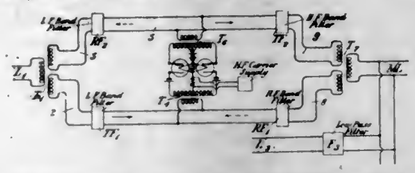
1,502,809. AUTO LOCK. CORNELIUS J. CONNORS, Los Angeles, Calif. Filed Dec. 26, 1919. Serial No. 347,512. 3 Claims. (Cl. 70—90.)

1. An automobile lock of the character described, embodying a body and an arm hingedly secured together and adapted to encircle a tire and felly, means for locking the body and arm in their encircling relation, the body having a ground engaging projection at one end, and the body and arm having a trough-like projection at the side extending outwardly at the side of the encircled tire with the trough facing the tire; the projection forming a ground engaging part to engage the ground if the whole device is rotated around the tire and felly and the trough being adapted for reception of a locking chain or the like.



1,502,810. MULTIGRAPHING MACHINE. PIETRO DI COSSIMO, West Pittsburgh, Pa. Filed May 7, 1923. Serial No. 637,166. 6 Claims. (Cl. 101—126.)

1. A device of the class described comprising a box, a cover therfor adapted to receive an impression sheet, a frame hinged in said box to swing vertically, and a backing plate and paper holding rollers carried by said frame.

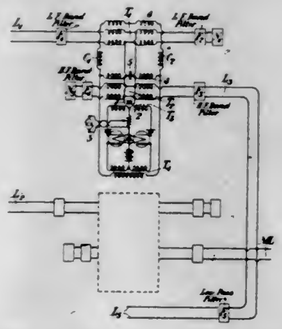


1,502,811. HIGH-FREQUENCY MULTIPLEX SIGNALING SYSTEM. LLOYD ESPENSCHIED, Hollis, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 30, 1919. Serial No. 327,500. 13 Claims. (Cl. 178—44.)

2. In a signaling system, the combination with two transmission circuits of a four-wire connecting circuit having a translating circuit connected across the two wire branches of the said four-wire circuit, and con-

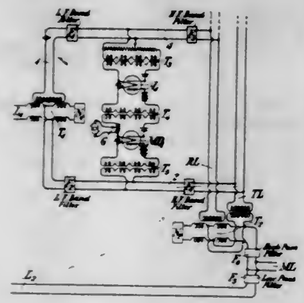
tuning means to modulate and demodulate currents impressed thereon.

1,502,812. HIGH-FREQUENCY MULTIPLEX SIGNALING SYSTEM. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Original application filed Sept. 30, 1919, Serial No. 327,500. Divided and this application filed Apr. 16, 1921. Serial No. 461,964. 9 Claims. (Cl. 179—15.)



1. In a signaling system the combination with a high-frequency transmission circuit of low frequency signaling circuits, four-wire connecting circuits individual to the said signaling circuits adapted to connect the said transmission circuit with each signaling circuit, each four-wire circuit having a translating circuit connected therewith, one of said translating circuits having means to generate oscillations of carrier frequency and the other translating circuit connected with the corresponding four-wire circuit at the opposite end of the said transmission circuit having means to amplify oscillations of the carrier frequency transmitted over the said transmission circuit from the said first translating circuit.

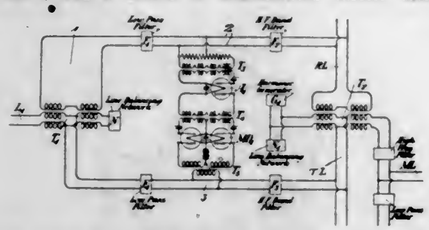
1,502,813. HIGH-FREQUENCY MULTIPLEX SIGNALING SYSTEM. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Original application filed Sept. 30, 1919, Serial No. 327,500. Divided and this application filed Apr. 16, 1921. Serial No. 461,965. 18 Claims. (Cl. 250—9.)



12. In a radio signaling system, the combination with a balanced antenna circuit of a four-wire circuit comprising a modulating-demodulating circuit, and an amplifying circuit for the amplification of currents after modulation and demodulation.

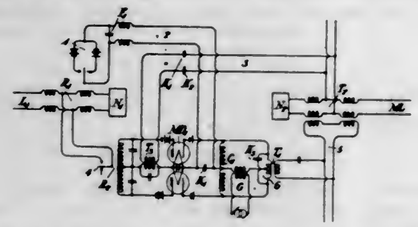
1,502,814. HIGH-FREQUENCY MULTIPLEX SIGNALING SYSTEM. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Original application filed Sept. 30, 1919, Serial No. 327,500. Divided and this application filed Apr. 16, 1921. Serial No. 461,966. 14 Claims. (Cl. 179—15.)

11. In a carrier current system, a hybrid coil, a low pass filter and a high pass filter connected to one terminal of the said coil and a high pass filter and a low pass filter connected to the other terminal of the said coil.



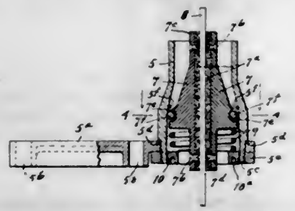
1,502,815. HIGH-FREQUENCY MULTIPLEX SIGNALING SYSTEM. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Original application filed Sept. 30, 1919, Serial No. 327,500. Divided and this application filed Apr. 16, 1921. Serial No. 461,967. 10 Claims. (Cl. 179—15.)

10. In a carrier current system, the combination with a high frequency line of a low frequency line, means for modulating currents flowing from said low frequency line to said high frequency line, said means acting also to detect currents flowing from said high frequency line to said low frequency line and an amplifier in series with the said means for amplifying all of said currents.



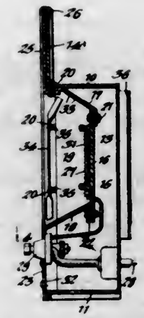
1,502,816. HIGH-FREQUENCY MULTIPLEX SIGNALING SYSTEM. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Original application filed Sept. 30, 1919. Serial No. 327,500. Divided and this application filed Apr. 16, 1921. Serial No. 461,968. 11 Claims. (Cl. 179—15.)

11. In a high frequency signaling system the combination of a main transmission circuit adapted to be connected with a receiving branch circuit and a transmitting branch circuit by a triple winding transformer, a balancing network associated with said transformer adapted to balance said main transmission circuit, a translating circuit having means to impress thereon currents from said receiving and said transmitting branch circuits, and a source of unmodulated carrier oscilla-



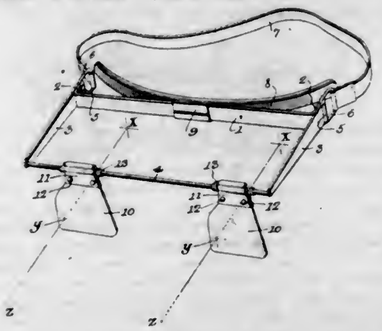
tions connected in parallel with said balancing network, and means connected with the translating circuit for modulating and detecting the transmitted and received currents respectively.

1,502,817. HIGH-FREQUENCY MULTIPLEX SIGNALING SYSTEM. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Original application filed Sept. 30, 1919, Serial No. 327,500. Divided and this application filed Apr. 16, 1921. Serial No. 461,969. 6 Claims. (Cl. 178—51.)



3. In a signaling system, the combination with a low frequency signaling circuit of a high frequency transmission circuit, a four-wire connecting circuit, means responsive to telegraph currents transmitted by the said low frequency circuit to impress corresponding impulses upon the said four-wire circuit, a source of carrier current, means to impress high frequency modulated oscillations upon the said four-wire circuit, and means to modulate the carrier current in accordance with the telegraph currents and demodulate the modulated high frequency oscillations by the carrier current, and to transmit the currents resulting from modulation and demodulation.

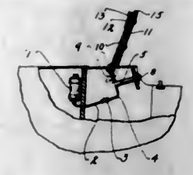
1,502,818. SNUBBER FOR VEHICLE SPRINGS. SEAMAN D. FILSON, Cleveland, Ohio. Filed Oct. 16, 1922. Serial No. 594,719. 13 Claims. (Cl. 188—129.)



1. A snubber for vehicle springs, comprising a tubular guide block, snubbing members mounted therein and movable vertically and circumferentially thereof, a friction strap between said snubbing members, and means for adjusting said snubbing members in said block relative to said friction strap.

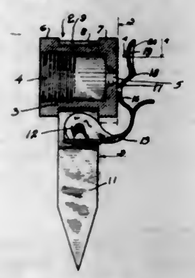
1,502,819. ELECTRIC HEATER. GEORGE N. FROLICK, Buffalo, N. Y., assignor to Frank S. Wendling, Cleveland, Ohio. Filed Sept. 29, 1922. Serial No. 591,217. 4 Claims. (Cl. 219—34.)

1. A heater of the character described, comprising a casing open at its front side, a shell arranged in said casing and spaced from the walls thereof to form an air space the bottom wall of said shell being detachable and in spaced relation to the corresponding bottom wall of the casing and having a depending front portion for closing the space between said walls, and an electric heating element mounted on the rear wall of said shell, the latter being provided at its upper and lower ends with air passages communicating with said air space.



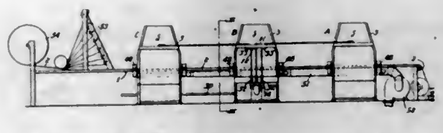
1,502,820. ANTIGLARE GOGGLES. WARREN S. FUNK, Sioux Falls, S. Dak. Filed Oct. 29, 1923. Serial No. 671,451. 4 Claims. (Cl. 2—149.)

2. Anti-glare goggles comprising a supporting frame having a horizontally arranged cross bar, means for supporting said bar on the head of the wearer, two translucent lenses slidably mounted on said cross bar and independently adjustable sidewise on said bar, and means for holding each lens against accidental displacement in any desired position on the bar.



1,502,821. WINDSHIELD SPRAYER. SAMUEL A. HARRINGTON, Portland, Oreg. Filed Nov. 11, 1922. Serial No. 600,449. 1 Claim. (Cl. 20—40.5.)

A device of the character described, comprising in combination, an automobile dashboard, an instrument board, and a wind shield, a container attached to the dash board, manually operable pumping means inserted in the instrument board, said pumping means comprising a cylinder traversing the instrument board at right angles, a flange around the top of the cylinder, said flange being secured to the visible surface of said instrument board, a piston movably mounted in the cylinder, said piston having a handle extending beyond the top of the cylinder, a tube traversing the bottom of the cylinder diametrically, said tube having a lateral opening communicating with the cylinder and being air tight secured in the walls of the cylinder, a one-way valve secured in each end of said tube, clamps attached to

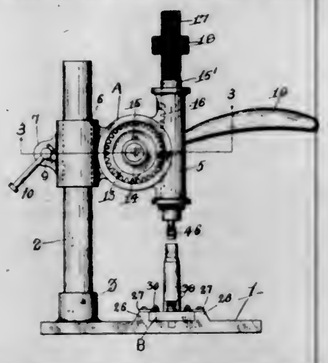


the top of the wind shield, a perforated tube rigidly secured in the clamps, a rigid connecting tube between one of said valves and said container, and a flexible tube between the other of said valves and the perforated tube, whereby said perforated tube is capable of following the relative movements of the wind shield.

1,502,822. SPRAY NOZZLE. CLYDE E. HILL, Fort Logan, Colo. Filed Mar. 13, 1922. Serial No. 543,399. 2 Claims. (Cl. 299—18.)

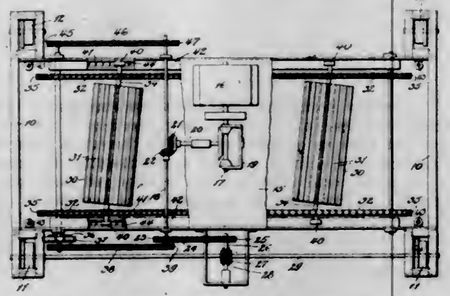
1. A spray nozzle, comprising in combination, a body member adapted to be secured to the end of a hose and provided with an opening in one end thereof, a deflector plate hingedly secured thereto and extending upwardly in front of said opening, the portion of said plate directly in front of the opening being upwardly and forwardly inclined, the portion directly above said inclined portion being upwardly and rearwardly inclined, and the remaining portion being upwardly and forwardly inclined.

1,502,823. SPRAYING MACHINE. LESLIE E. FROST, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 30, 1920. Serial No. 400,234. 6 Claims. (Cl. 91—45.)



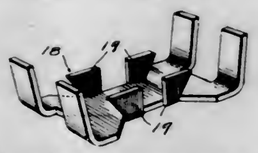
1. A spraying machine having, in combination, a movable spraying device, means for causing material to be sprayed to pass thereunder, and means for causing the spraying device to move laterally across said material.

1,502,824. CARTRIDGE-RELOADING TOOL. LOUIS HAROLD HUETER, San Francisco, Calif. Filed Mar. 24, 1923. Serial No. 627,442. 12 Claims. (Cl. 86—23.)



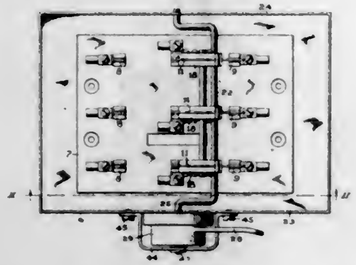
7. A tool of the class described including a base member, a casting arranged above the base and mounted for adjustment toward and away from the base, a bearing

sleeve formed integral with the casting, a plunger mounted within the bearing sleeve, said casting including a housing, a shaft extending into the housing, a gear mounted upon the shaft and arranged within the housing, a handle upon the outer end of the shaft whereby move-



ment of the handle in the arc of a circle will impart a rotary movement to the gear, means carried by the plunger co-operating with the gear to impart reciprocating movement of the plunger upon rotation of the gear, and a tool detachably connected to the lower end of the plunger.

1,502,825. ROAD-SURFACING MACHINE. CHRISTIAN J. HUG, Highland, Ill., assignor to The Hug Company, Highland, Ill., a Corporation of Illinois. Filed Dec. 27, 1921. Serial No. 524,876. 5 Claims. (Cl. 94—48.)

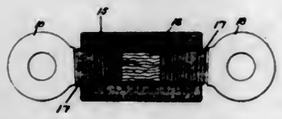


5. In a road surfacing machine a tamping tool having a series of peripheral plane faces; a series of parallel slats grouped in multiples on each of said faces; and means embodying a mutilated gear for rotating said tool and holding said faces, successively in contact with the work.

1,502,826. MALLEABLE SUPPORT BRACKET. WILLIAM JANUS, St. Louis County, Mo., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 14, 1924. Serial No. 686,167. 12 Claims. (Cl. 188—213.)

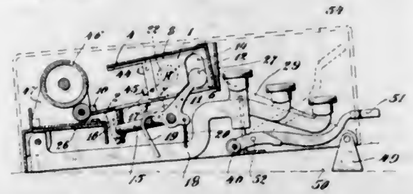
5. A support bracket comprising a body portion adapted to receive and support a brake gear support member and having portions extending from said body portion and adapted to partially embrace a car truck member and secure said bracket thereto.

1,502,827. SWITCH MECHANISM. OLIVER S. JENNINGS, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 10, 1922. Serial No. 542,740. 10 Claims. (Cl. 200—70.)



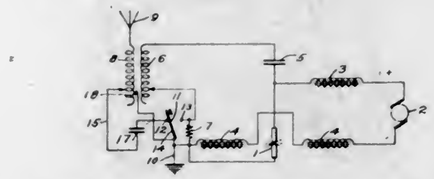
1. Switch mechanism comprising a movable switch member, an operating handle therefor having a lost-motion connection thereto, a spring for connecting the operating handle to the switch mechanism and for moving the switch mechanism in response to movement of the handle, stop members on the switch member, a latch for successively engaging the stop members for retaining the switch member in predetermined positions and cam members on the handle for successively engaging the latch whereby the latch is successively released from the stop members by a progressive movement of the handle in one direction.

1,502,828. OVERHEAD TROLLEY SYSTEM. OSMUND M. JORSTAD, East Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 7, 1922. Serial No. 550,361. 19 Claims. (Cl. 191—41.)



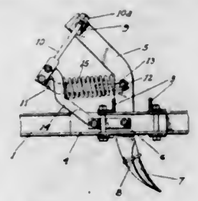
1. In an overhead trolley system, the combination with a plurality of main supporting structures, of a contact conductor, means comprising a messenger conductor for supporting said contact conductor, means for securing said messenger conductor to said structures, and means independent of said structures for taking a portion of the horizontal pull of said messenger conductor.

1,502,829. INSULATED STRAIN ROD. WILLARD H. KEMPTON, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 13, 1918. Serial No. 222,195. 2 Claims. (Cl. 173—318.)



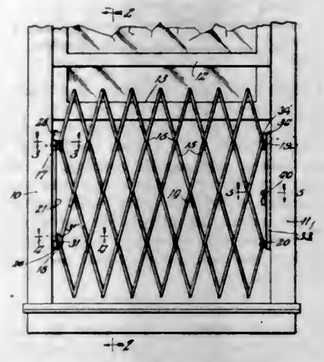
1. A strain insulator including a pair of connector elements, a spacer element interposed between the connector elements, and a sleeve, formed of a sheet of fibrous material impregnated with a phenolic condensation product as a binder wound into tubular form, the sleeve being molded about the spacer element and adjacent ends of the connector elements.

1,502,830. TYPEWRITING MACHINE. WELLINGTON P. KIDDER, Jamaica Plain, Mass., assignor, by mesne assignments, to Rochester Industries, Inc., Rochester, N. Y., a Corporation of New York. Filed July 25, 1919, Serial No. 313,177. Renewed Dec. 24, 1923. 15 Claims. (Cl. 197—25.)



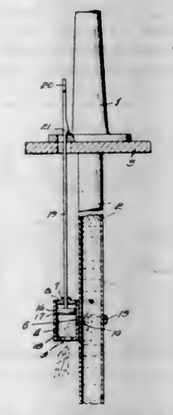
1. In a typewriting machine, the combination of a slidably moving type-bar, an actuating lever for moving the type-bar said actuating lever operating within a space bounded by the planes of the sides of its respective type-bar, a key lever, a link operatively connecting the key lever and the actuating lever, said type-bar, said actuating lever, said key lever, and said link all moving in substantially the same vertical plane.

1,502,831. SYSTEM OF CONTROL. SAMUEL MONTGOMERY KINTNER, Pittsburgh, Pa., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 11, 1921. Serial No. 468,570. 13 Claims. (Cl. 250—19.)



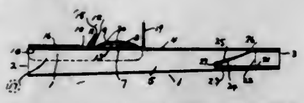
1. In a high-frequency transmission system, an oscillatory circuit adapted to produce high-frequency oscillations of a predetermined frequency, a correspondingly tuned antenna circuit coupled thereto, said oscillatory circuit including an impedance, and means adapted to substantially simultaneously cause said impedance to become effective and said antenna circuit ineffective, and vice versa.

1,502,832. CULTIVATOR TOOTH. CLARENCE D. KIRTLAN, Visalia, Calif. Filed Apr. 4, 1923. Serial No. 629,798. 2 Claims. (Cl. 97—184.)



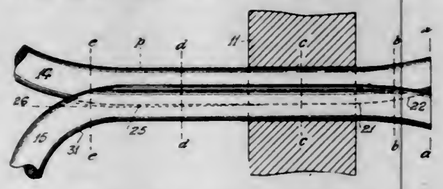
1. A cultivator tooth structure including a supporting frame, a tooth pivoted therein for limited fore and aft swinging movement, straps pivoted on the frame to the rear of the tooth pivot and extending upwardly in spaced relation to the tooth, links between the upper ends of the straps and teeth and pivotally connected to both, and a helical spring between the straps and tooth and arranged for compression when the upper portion of the tooth moves forwardly.

1,502,833. WINDOW GUARD. FRANK KITZELMAN, Chicago, Ill., assignor to Acorn Wire & Iron Works, Chicago, Ill., a Corporation of Illinois. Filed Feb. 12, 1923. Serial No. 618,481. 5 Claims. (Cl. 20—71.)



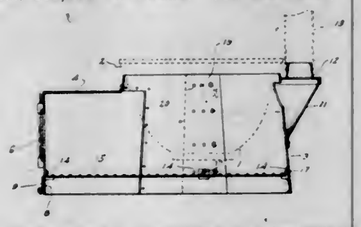
1. A window gate comprising a lazy tongs grille a bracket therefor, said bracket being provided with a retaining screw, a pivotal support on said bracket for one end of said grille, and means carried by said grille for overlying the head of said screw to prevent the removal of the latter when said grille is swung into closed position, said screw being removable when said grille is swung away from such position.

1,502,834. FROST-LINE DRAIN VALVE FOR PUMPS. PHILIP H. KOEBBE, Barnhart, Mo. Filed Feb. 7, 1921. Serial No. 443,003. 1 Claim. (Cl. 137—34.)



In a device of the class described, a cylindrical tubular body and a semicylindrical body united to form a unit, said semicylindrical body adapted to engage a suction pipe, ears extending from the edges of said semicylindrical body, a U-shaped clamp member adapted to engage said pipe, said U-shaped clamp having its ends screw threaded and passing through said ears, nuts applied to the ends of said U-shaped clamp for holding the U-shaped clamp and said semi-cylindrical body from displacement upon said pipe, said cylindrical tubular body having a laterally directed passage midway its ends adapted to register with an opening in the suction pipe and further provided with a drain passage in the bottom wall thereof, a piston positioned within said cylindrical tubular body, a packing fixed to the lower face thereof and an operating rod fixed to said piston for moving the same up and down in the cylindrical tubular body to open and close the drain passage in the bottom wall of the cylindrical tubular body.

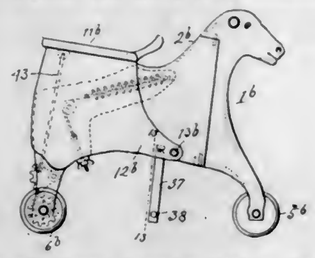
1,502,835. MUSICAL TOY. MICHAEL J. MCINTYRE, Eden, N. Y. Filed Sept. 3, 1921. Serial No. 498,240. 8 Claims. (Cl. 46—46.)



1. In a device of the character described having a longitudinal tubular body with an inlet mouth-piece opening at one end and an opening at the outlet end restricted by a horn and a reed projecting into said ontlet end toward said mouth opening, a side opening in said body covered by a diaphragm and another side opening forming a whistle with said mouth opening, whereby said horn, diaphragm or whistle are each adapted to be operated separately and independently of the others from the mouth end of said body and without removal from the lips.

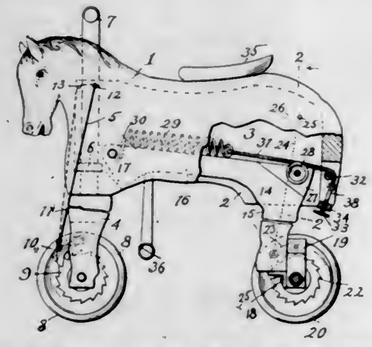
1,502,836. RAIL BOND. MATTHEW H. LOUGHRIDGE, Bogota, N. J., assignor to Atlas Railway Signal Company, a Corporation of New Jersey. Filed Aug. 9, 1919. Serial No. 316,312. 8 Claims. (Cl. 173—262.)

6. A bond for a rail joint, consisting of a pair of wires, a section formed on a taper in each of said wires near the end to match the complementary end of the other wire, said wires when placed together forming a tapered section of substantially circular cross-section of larger diameter than the individual wires.



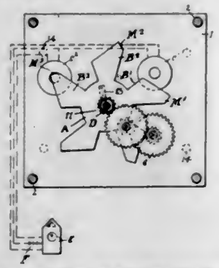
1,502,837. WASH-KETTLE FURNACE. KARTER S. MARTIN, Tarrant City, Ala. Filed Jan. 18, 1923. Serial No. 613,373. 3 Claims. (Cl. 126—345.)

1. A kettle furnace comprising a substantially cylindrical downwardly flaring metal jacket adapted to rest on the ground, a combustion chamber forming an extension at one side of said jacket and opening unobstructedly thereinto, said jacket being free of baffles or obstructions interfering with the products of combustion, a top outlet for said products of combustion at the top of said jacket on the opposite side from the combustion chamber, and a flue having an enlarged base into which said outlet opens.



1,502,838. CHILD'S VEHICLE. WILLIAM J. BARBER, East Cleveland, Ohio, assignor to The E. & N. Manufacturing Company, Cleveland, Ohio, a Corporation. Filed Oct. 12, 1922. Serial No. 594,036. 15 Claims. (Cl. 208—42.)

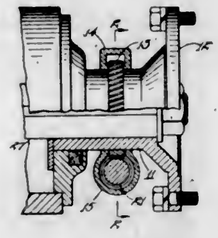
1. In a child's vehicle, the combination with a body having supporting wheels, of a vertically swinging member pivoted at its forward end to the body carrying a seat, a tension spring for normally holding said member in elevated position, said spring being connected to the



body above the pivotal connection and at its opposite end to the vertically swinging member and means for adjusting the tension of said spring.

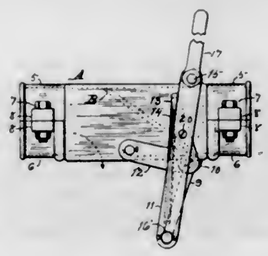
1,502,839. CHILD'S VEHICLE. WILLIAM J. BARBER, East Cleveland, Ohio, assignor to The E. & N. Manufacturing Company, Cleveland, Ohio, a Corporation. Filed Dec. 26, 1922. Serial No. 608,877. 13 Claims. (Cl. 208—42.)

L. In a child's vehicle, a body having a supporting wheel mounted thereon adjacent its forward end, a rear support for said body comprising a rear axle with wheels thereon and a rigid leg connected at its rear end to said axle and at its forward end to said body adjacent the forward end thereof by means of a horizontal pivot, said body having a seat portion at the rear of said pivot, a spring coacting with said body and leg for normally holding the seat portion of the body in elevated position and means for preventing backward rotation of the forward supporting wheel.



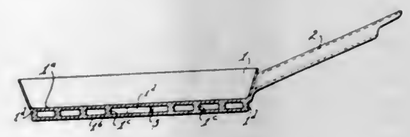
1,502,840. ELECTRIC CLOCK. CHARLES L. BEARD, Chester, Pa. Filed Sept. 30, 1921. Serial No. 504,398. 7 Claims. (Cl. 58—26.)

1. In mechanism of the class described having a master clock provided with a commutator, a suitable source of electric current and a secondary measuring device energized by said source and through said commutator,



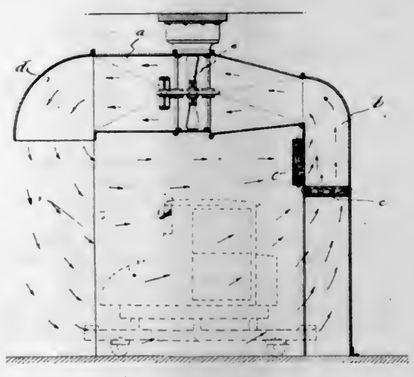
in combination in said secondary measuring device, a pair of electro-magnets adapted to be alternately energized and a rotating armature having a plurality of poles, said combination being characterized by the following cycle of operations: first, the moving of an armature pole by one of said magnets into a position to be exerted upon by a maximum force by said magnet; second, the holding of said position for an interval of time; third, the moving away of said pole from such position by the other magnet, and simultaneously with said third operation, the moving of another pole into a position to be exerted upon by the first of said magnets with a force less than the maximum, said simultaneous operation being caused by the action of the second magnet moving an armature pole from a position in which said second magnet exerts a force on said latter pole to a position in which it exerts a maximum force upon it; fourth, the moving of the second said pole by the first said magnet into a position of maximum force thereon, from which point said magnets continue to act upon said armature poles in the manner of the above cycle.

1,502,841. SPEEDOMETER DRIVE. GUIDO G. BEHN, Detroit, Mich., assignor to Essex Motors, Detroit, Mich., a Corporation of Michigan. Filed Dec. 2, 1921. Serial No. 519,561. 5 Claims. (Cl. 74—7.)



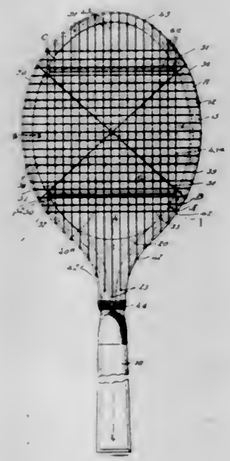
1. A speedometer drive comprising a vehicle shaft, a sectional gear on said shaft, a removable casing enclosing said gear, means in said casing and on said gear for retaining the sections of said gear in an assembled position on said shaft when said casing is in place and a pinion meshing with said gear and supported within said casing.

1,502,842. CUT-OUT FOR EXHAUST PIPES. JACOB C. BEISWENGER, Jackson, Mich. Filed Jan. 3, 1921. Serial No. 434,855. 1 Claim. (Cl. 251—125.)



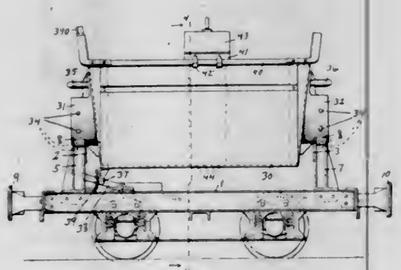
The combination of an open-ended union having a side opening and an oscillatory valve adapted to control said opening and the passage through said union, of a crank journalled to said union and adapted to oscillate said valve, a lever pivoted to said union on the same side with said crank and opposite thereto, said lever extending by said crank and formed with a slot at its free end, said crank at its free end extending through said slot, an arm pivoted to said union above the journal of said crank and to one side thereof, a member pivoted intermediate its length to said lever and also hinged at one end to the free end of said arm to form an elbow in which its joint will coincide with the axis of said crank when said lever is moved, so that said lever crank and member are aligned, and a spring connected at its ends to both the free ends of said member and said crank, substantially as and for the purpose set forth.

1,502,843. COOKING UTENSIL. FRANK BERGER, Stoughton, Wis. Filed Oct. 8, 1923. Serial No. 667,148. 2 Claims. (Cl. 53—7.)



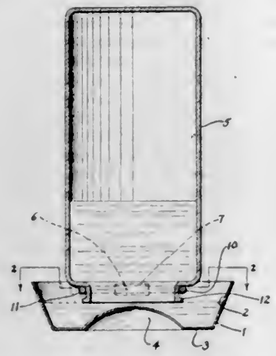
1. A cooking receptacle including spaced cast bottom sections, one of said bottom sections being provided with raised rim portions extending upwardly against the bottom and connected thereto and having a series of regularly spaced heat transmitting stud elements extending to the underside of the other bottom section.

1,502,844. PAINTING BOOTH. FREDERICK P. BINGMAN, Detroit, Mich., assignor to Fisher Body Corporation, Detroit, Mich., a Corporation of New York. Filed May 16, 1923. Serial No. 639,285. 8 Claims. (Cl. 183—44.)



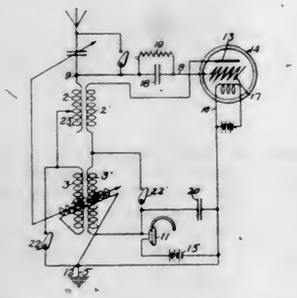
8. In a paint booth, the combination of a shell including a painting chamber, an air duct for taking the air from the upper rear portion of said chamber and conducting it to the front of the chamber and directing the same downwardly on the workman, means for filtering the air, and means for providing a forced re-circulation of the air through the booth and air duct, whereby the air is forced downwardly on the workman and passed laterally through the booth away from the workman.

1,502,845. RACKET. WALTER C. BLACHE, Englewood, N. J. Filed Sept. 30, 1922. Serial No. 591,453. 3 Claims. (Cl. 46—24.)



1. A racket having an open frame having a plurality of spaced transverse grooves in its outer edge, the grooves on one side and one end of the frame being perpendicular to the frame, and the grooves at the other side and the other end of the frame being oblique to the frame, and a cord wound about the frame and forming a plurality of spaced transverse loops and a plurality of spaced longitudinal loops positioned by said grooves.

1,502,846. CONSTRUCTION CAR. EDWARD G. CARR, Milwaukee, Wis., assignor to The Lakewood Engineering Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 12, 1918. Serial No. 249,562. 1 Claim. (Cl. 105—264.)

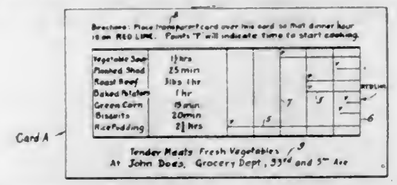


The combination with the body frame of a car, of a receptacle provided with rockers, the body frame being provided with cross members to support the rockers, a latch and a jaw member located under the receptacle for vertical engagement or disengagement with respect to each other, one being secured to the receptacle and the other being secured to the car body frame.

1,502,847. DRINKING FOUNTAIN. WALTER H. COLLINS, Summit, N. J. Filed Mar. 1, 1922. Serial No. 540,192. Renewed June 25, 1924. 9 Claims. (Cl. 119—77.)

1. A reservoir drinking fountain including in combination a pan, and a jar holder comprising a wire resiliently movable to receive and hold the jar neck and having its ends and medial portion permanently engaging the pan wall.

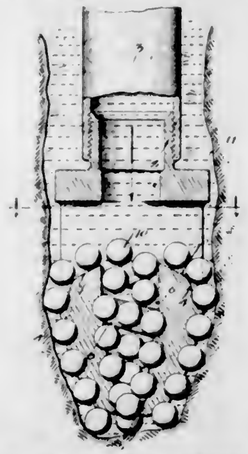
1,502,848. TUNING SYSTEM OF ANTENNÆ. FRANK CONRAD, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 7, 1920. Serial No. 394,520. 14 Claims. (Cl. 250—20.)



1. An improved method in the art of signalling comprising the step of first adjusting a circuit for resonance to a given frequency and thereafter additively adjusting said circuit for maximum selective response while maintaining said resonant condition substantially undisturbed.

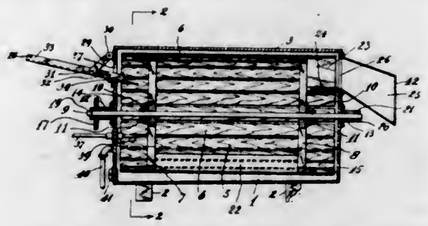
1,502,849. PROCESS FOR THE PRODUCTION OF NITROSO-META-CRESOL AND ITS APPLICATION TO THE SEPARATION OF META-CRESOL AND PARA-CRESOL. JACOB EHRLICH, Belleville, N. J., assignor to Verona Chemical Co., North Newark, N. J., a Corporation of New Jersey. Filed Mar. 11, 1922. Serial No. 542,865. 11 Claims. (Cl. 260—69.)

1. A process for the production of nitroso-meta-cresol which comprises treating meta-cresol and strong sulfuric acid with nitrous acid without causing sulfonation.



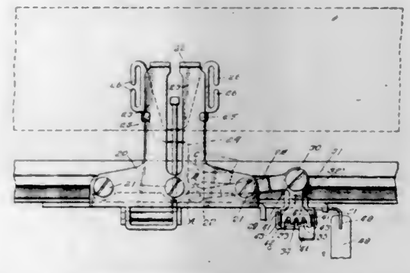
1,502,850. COOKING CHART. MARTIN T. FISHER, New York, N. Y. Filed Apr. 17, 1922. Serial No. 553,896. 6 Claims. (Cl. 235—89.)

1. A cooking chart, comprising a card with a list of foods thereon, a horizontal line opposite each article of food the length of which is proportional to the time it takes that article to cook, and a second card with ver



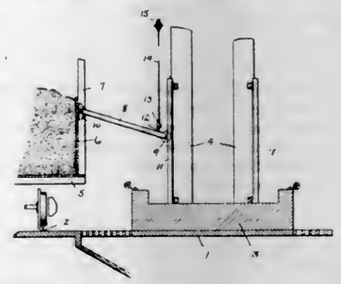
tical lines thereon spaced apart for indicating the periods of time, one of the cards being transparent, superposable on, and relatively movable with respect to, the other card.

1,502,851. MAGAZINE ROTARY DRILL BIT. GEORGE WASHINGTON GALE, Greeley, Colo. Filed Jan. 20, 1922. Serial No. 530,595. 5 Claims. (Cl. 255—61.)



1. A drill bit comprising a body having an axial bore extending from the lower end of the body, said body having a spiral groove in the outer wall thereof and having also a spiral groove in the wall of said bore, said grooves being adapted to be traversed by ball members, and said body having a lateral opening adapted for the passage of the ball members between the axial bore and the groove in the outer wall of the body.

1,502,852. WASHING PROCESS AND MACHINE THEREFOR. RALPH HARVEY, Etna, Pa. Filed Dec. 11, 1923. Serial No. 679,945. 6 Claims. (Cl. 146—194.)

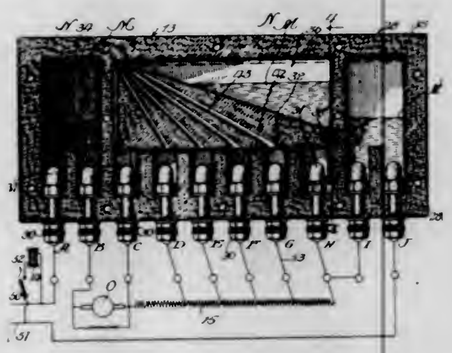


1. The process of washing vegetables which consists in causing them to fall through sheet-like sprays of water disposed substantially at right angles to the path of said falling vegetables and collecting them in a body of water.

1,502,853. RIBBON VIBRATOR FOR TYPEWRITERS. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed May 29, 1920. Serial No. 385,185. 7 Claims. (Cl. 197—157.)

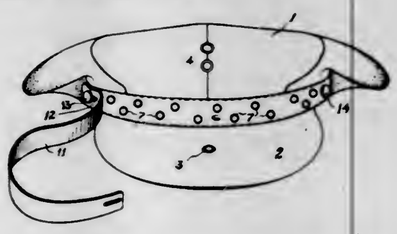
5. In a typewriter having a platen carriage arranged to move into and out of operating position; a ribbon carrier movably mounted on said carriage; an actuating lever for said carrier; a spring for normally holding said actuating lever and carrier in a fixed initial position; a lever for operating said actuating lever; an adjustable connection between said levers to vary the position of said operating lever when said actuating lever is in initial position; and a universal member arranged to cooperate with said operating lever when said platen carriage is in operating position and to move said operating lever to a fixed limiting position to impart different amounts of movement to said actuating lever and said ribbon carrier for the different adjustments of said levers relative to one another.

1,502,854. GRAIN-DOOR REMOVER. THOMAS C. HUTCHINSON, Duluth, Minn. Filed Oct. 22, 1923. Serial No. 669,911. 2 Claims. (Cl. 254—133.)



1. A grain car door opening device comprising in combination an upright fixed stanchion spaced from the grain door of a car and independently thereof, a portable beam, having a door engaging shoe pivotally mounted in one end thereof and a stanchion roller at the other end for installation intermediate of the door and the stanchion, and a line suspended from over head for vertically raising the stanchion end of the beam for the purpose described.

1,502,855. ELECTRIC SWITCH. CLARENCE W. JAMESON, Lombard, Ill. Filed Dec. 1, 1920. Serial No. 427,612. 8 Claims. (Cl. 200—112.)

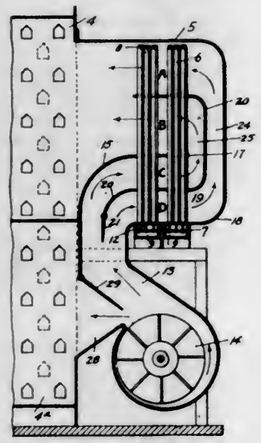


2. A motor-starting switch comprising a body having a chamber, said body having a plurality of wells sequentially connected, the first of said wells being connected with said chamber, a plurality of contacts each located in one of said wells, a quantity of mercury located normally in said chamber and adapted to enter

said wells in succession upon movement of said body to connect said contacts, the connections between said wells being arranged to prevent the flow of mercury

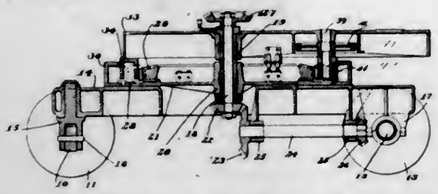
into one well until all of the preceding wells have been filled, and means for effecting a movement of said body to cause the flow of mercury into said wells.

1,502,856. VENTILATED CAP. JACOB KAUFMAN, Toronto, Ontario, Canada. Filed Aug. 29, 1923. Serial No. 660,016. 1 Claim. (Cl. 2—176.)



In a cap of the kind referred to, a pliant crown substantially reinforced above its visor, a series of perforations disposed in such crown reinforcement, a strap partially encircling the crown for the purpose of covering said perforations, and means to detachably secure said strap to the crown.

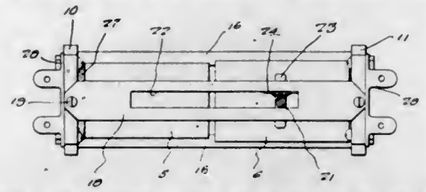
1,502,857. PROCESS OF TREATING COPPER AND THE PRODUCT THEREOF. SUSAN B. LEITER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 2, 1923. Serial No. 616,513. 4 Claims. (Cl. 148—11.)



1. The process of rendering copper containing oxygen immune to the embrittling effect of reducing gas, which consists in segregating the oxide located between the boundaries of the grains of said copper into globules distributed throughout the mass thereof.

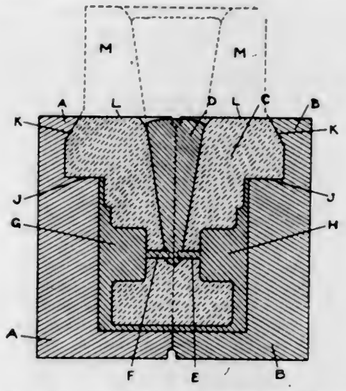
1,502,858. AIR-HEATING MEANS. PHILIP LITTLE, Jr., Minneapolis, Minn., assignor to The Strong Scott Manufacturing Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Dec. 9, 1920. Serial No. 429,566. 7 Claims. (Cl. 257—137.)

1. An air heater, comprising a heating chamber, radiators arranged in said chamber and provided with zones of different temperatures, an air duct through which currents of air are conducted and means for deflecting said air currents first through the coolest part of the radiators and then in an opposite direction through the hottest part of the radiators.



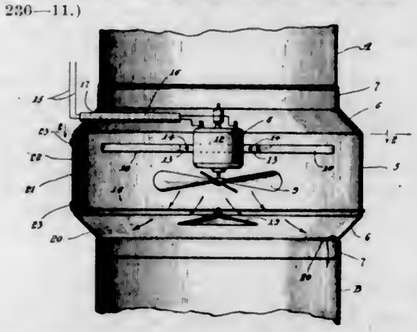
1,502,859. THRUST BEARING. GRAFTON E. LUCE, Chicago, Ill. Filed May 24, 1923. Serial No. 641,249. 4 Claims. (Cl. 64—86.)

1. In an improved bearing, the combination of a plurality of bearing races concentrically arranged with respect to each other, a rotatable member, a shaft mounted thereon, a roller rotatably mounted on said shaft and engaging with one of said races to carry the weight of the rotatable member, a second roller rotatably mounted on said shaft and engaging with the other of said races, whereby lifting of one side of said rotatable member is prevented.



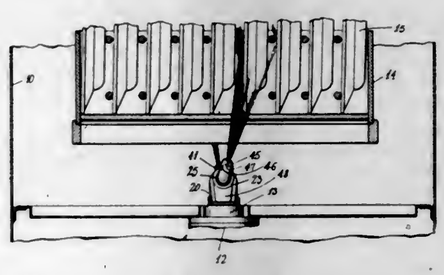
1,502,860. VARIABLE CONDENSER. DOUGLAS S. MCCRUM, Saranac Lake, N. Y. Filed Nov. 24, 1923. Serial No. 676,740. 3 Claims. (Cl. 250—41.)

1. A condenser comprising a pair of end plates connected in spaced relation by means of a rod to form a support, a plurality of cylindrical metallic members of different diameters all having their adjacent ends in electrical connection, said cylindrical members being concentrically arranged one within the other and forming one electrode, means for mounting said one electrode in fixed relation to one of the end plates and said rod, a series of similar cylindrical members concentrically arranged one within the other, and all having their outer ends electrically connected to form a second electrode, the members of said second electrode adapted to be inserted between the members of the first named electrode, means including a handle fixed to and extending laterally from the outermost cylindrical member of the electrode for adjusting the latter axially of each other, and a



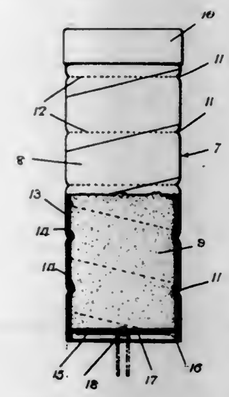
sealed ring mounted upon the outer end of the first named electrode for sealing relation with the adjacent end of the outermost cylindrical member of the second named electrode when said electrodes are adjusted toward each other to maximum capacity position.

1,502,861. METAL MOLD. DANIEL H. MELOCHE, Detroit, Mich., assignor to Earl Holley, Detroit, Mich. Filed Oct. 2, 1922, Serial No. 591,725. Renewed Feb. 23, 1924. 5 Claims. (Cl. 22—126.)



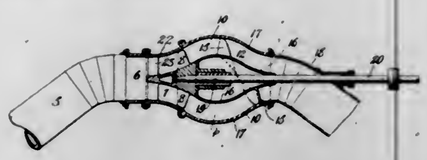
1. In a metal mold adapted to the casting of an internal combustion engine piston, a horizontal shoulder, a re-entrant conical face above said shoulder, a dry sand core resting on said shoulder and prevented from rising by said re-entrant conical face.

1,502,862. AIR CIRCULATOR. RUDOLPH W. MENK, Joliet, Ill., assignor to Excelsior Steel Furnace Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 28, 1922. Serial No. 597,436. 4 Claims. (Cl. 230—11.)



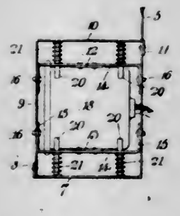
1. A device of the kind described comprising a cylinder, frustum-conical walls at the ends thereof, cylindrical sleeves extending oppositely from said walls for assembly with adjacent ends of an air conduit, oppositely arranged straps secured at their outer ends to said structure and at their adjacent central portions constructed to receive and clamp the casing of a motor, a motor and fan unit mounted in the central portions of said straps, and a shield and deflector positioned in front of said unit.

1,502,863. WASHING MACHINE. HENRY R. MERSELES, Bronxville, N. Y., assignor to Herbert E. Merseles, Bronxville, N. Y. Filed Sept. 16, 1921. Serial No. 501,110. 8 Claims. (Cl. 141—9.)



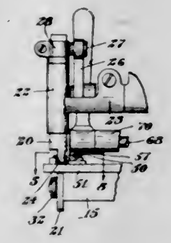
4. In a washing machine, a projector having an inlet opening, means for forcing washing medium into said projector through said inlet opening, means for supporting the articles to be washed at the opposite side of the projector from said inlet opening, the side of the projector adjacent to said support being provided with a plurality of discharge openings formed and arranged to project a sheet of washing medium in a common plane extending diametrically across the projector and across the article support, and means for rotating the projector about an axis lying at an angle to said plane and passing through the article support.

1,502,864. CONFECTION. JOSEPH F. MILLIGAN, Swissvale, Pa. Filed May 20, 1922. Serial No. 562,378. 4 Claims. (Cl. 206—56.)



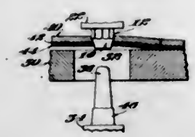
1. A shell for holding an edible filling having a closure at one end, and means carried by said closure and normally disposed flatly thereagainst, and bendable away from said closure to provide a finger piece to be held between the thumb and fingers for supporting the shell, the shell being adapted to be torn away from the opposite end.

1,502,865. HYDRAULIC PUMP. LEWIS FERRY MOODY, Philadelphia, Pa. Filed Aug. 21, 1920. Serial No. 405,185. 23 Claims. (Cl. 103—89.)



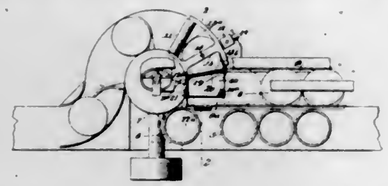
1. In a hydraulic pump the combination with a rotary impeller, of a diffuser receiving the discharge therefrom and comprising an annular vane-free passage followed by a plurality of helical passages, the discharge from each of said helical passages being directed along the axis of the helix.

1,502,866. LAMP SUPPORT. ARTHUR MOORE, Chanute, Kans. Filed May 11, 1923. Serial No. 638,186. 5 Claims. (Cl. 240—90.)



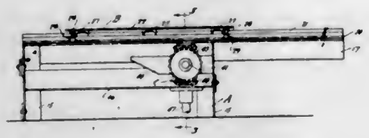
1. In a device of the class described, a bracket comprising spaced parallel forward and rear bars, each bar having upper and lower slots disposed longitudinally of the bar, a frame within said bracket, pins on said frame engaged in said slots, and equalizing springs tending to force said frame to the middle portion of said bracket.

1,502,867. FOLDING MACHINE. LORENZ MUTHER, Newton, Mass. Filed Dec. 1, 1922. Serial No. 604,370. 4 Claims. (Cl. 12—55.)



1. In a folding machine, the combination of means for feeding material having a binding attached to one edge thereof, a fixed member having its operative face perpendicular to the body of the material for turning said binding around the edge of said material and into an upright position, a plow for turning said upright binding downwardly toward the body of said material and means for pressing said binding upon the body of said material; said fixed member and said plow being so positioned in relation to each other that said upright binding is delivered by the feeding means from said fixed member to said plow in position to be turned down by the latter without straining the edge thereof.

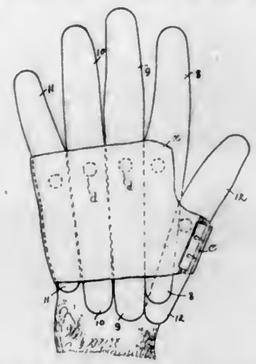
1,502,868. EYELETING MACHINE. LORENZ MUTHER, Newton Center, Mass. Filed Apr. 14, 1923. Serial No. 632,110. 2 Claims. (Cl. 218—14.1.)



1. In an eyeleting machine, a setting tool having a restricted setting shoulder adapted to pass through a hole in the outer layer of a plurality of layers and set an eyelet upon an inner layer and having that portion above the setting shoulder polygonal in cross section and provided with sides sufficient in number to avoid impairing the function of the setting shoulder and few enough in number to substantially reduce the friction between the outer layer and the tool when the said outer layer is passed above the setting shoulder during the operation of the machine.

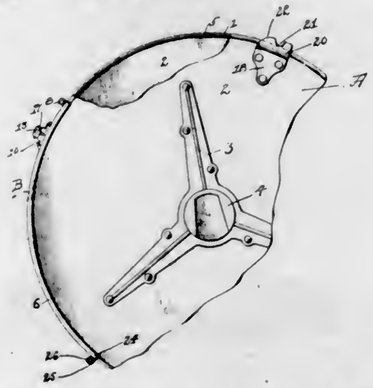
1,502,869. CAN-CAPPING MACHINE. MILO V. NEMECEK and RUDOLF STROPPEL, Cedar Rapids, Iowa. Filed Oct. 30, 1922. Serial No. 597,860. 3 Claims. (Cl. 93—55.)

1. In a capping machine having a sweep adapted to advance a can, and an inclined cover-chute adapted to present a cover with the forward portion of its flange in the path of the advancing can, a pair of lateral guide-fingers to prevent lateral expansion of the can while moving into capping position.



1,502,870. RECIPROCATING MOVEMENT. ORVILLE P. NORMAN, Los Angeles, Calif. Filed July 14, 1923. Serial No. 651,623. 11 Claims. (Cl. 74—98.)

1. A mechanical movement comprising the combination of a frame, a carriage slidably mounted thereon and having a pair of racks secured thereto, a pair of pinions geared to rotate in opposite directions and disposed so that either will mesh with its corresponding rack, and thereby move said carriage, and means operated by said carriage at the ends of its travel to alternately engage one rack with its pinion and then the other whereby to reciprocate the carriage.

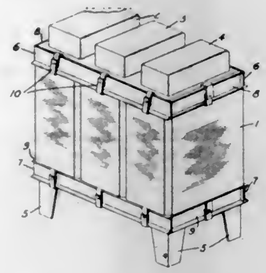


1,502,871. GLOVE. CHARLES H. NOYES, Mondamin, Iowa. Filed Apr. 11, 1923. Serial No. 631,424. 1 Claim. (Cl. 2—161.)

In a glove, a plurality of sheaths closed at their respective ends, each having an aperture midway between its ends and adapted to be disposed with approximately one-half enclosing a thumb or finger and with its remaining half on the back of the

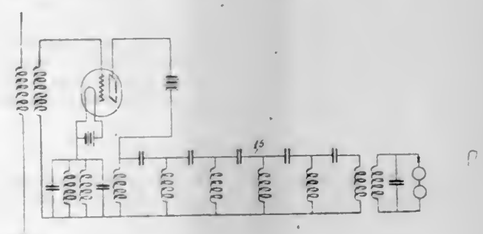
wearer, and a flexible holder removably connected with said sheaths and adapted to surround the hand outwardly of the sheaths.

1,502,872. SLIDING DOOR AND LOCK FOR WASHING-MACHINE CYLINDERS. GUNNARD A. OBERG, Jamestown, N. Y., assignor to Blackstone Manufacturing Company, Jamestown, N. Y., a Corporation of New York. Filed Nov. 15, 1922. Serial No. 601,197. 3 Claims. (Cl. 220—41.)



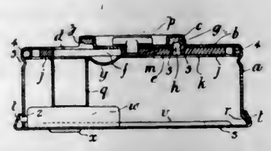
1. A sheet metal cylinder provided with an opening and a circumferential flange on each end, a lid provided with means for embracing and sliding upon said flanges, a stop on the body to limit the movement of the lid, a lock on the body and a bolt on the lid to engage the lock when the lid is in its closed position.

1,502,873. PERFORATED SHEET METAL. GUNNARD A. OBERG, Jamestown, N. Y., assignor to Blackstone Manufacturing Company, Jamestown, N. Y., a Corporation of New York. Filed Nov. 15, 1922. Serial No. 601,198. 2 Claims. (Cl. 29—180.)



1. The improved perforated sheet metal comprising a bead surrounding and defining the perforation and of a size greater than the thickness of the sheet metal, and an annular ring surrounding the beaded perforation and extending outwardly beyond one surface of the metal, the metal between the ring and the bead being inclined.

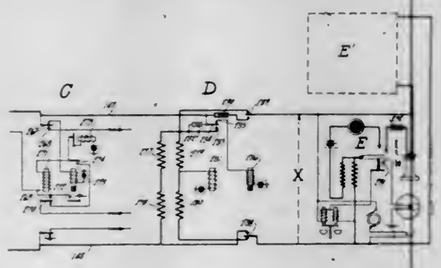
1,502,874. TRANSFORMER FRAME. JOHN F. PETERS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 10, 1919. Serial No. 343,971. 10 Claims. (Cl. 175—356.)



9. In combination with an alternating-current electrical device having a magnetizable portion subject to heating by stray magnetic flux, of a short-circuited band around said portion for substantially preventing the passage of flux therethrough.

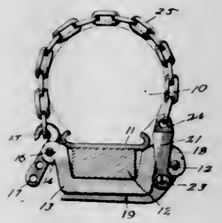
1,502,875. TONE-PRODUCING RADIORECEIVER. MICHAEL I. PUPIN, Norfolk, Conn., and EDWIN H. ARMSTRONG, Yonkers, N. Y., assignors to Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Feb. 10, 1916. Serial No. 77,436. 3 Claims. (Cl. 250—6.)

3. In a radio signaling system, a vacuum-tube device, a translating device and a filter coupling them, said filter including a plurality of like units, each unit comprising two reactances of opposite sign, all the reactances of one sign being connected in series and all those of the other sign in parallel, whereby the units form a chain extending the length of the filter.



1,502,876. MONEY BOX. JOSEPH EDGERLEY PURSER, Bristol, England. Filed Oct. 24, 1922. Serial No. 596,543. 2 Claims. (Cl. 232—4.)

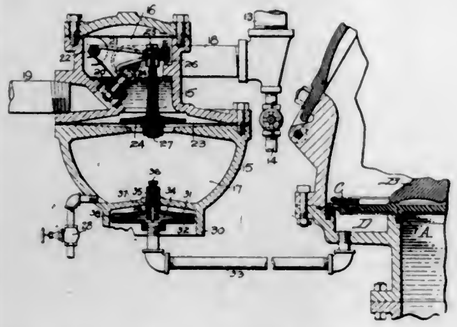
1. In money boxes wherein a revoluble disc provided with an aperture and constituting a carrier is capable of being devolved between the top of the box and a fixed plate within the box, said top of the box and fixed plate being perforated to allow coins to pass faceways from



outside of the box to within the box but in which the perforations do not register, an annular groove in the under face of the top of the box, an annular projection on the upper face of the revoluble disc adapted to coact with the said annular groove, an annular recess in the underside of said revoluble plate, a spring finger on the upper side of said fixed plate, said finger lying in the annular groove in the revoluble disc so that no coin can pass from the box through the aperture in the revoluble disc to the aperture in the top of the box.

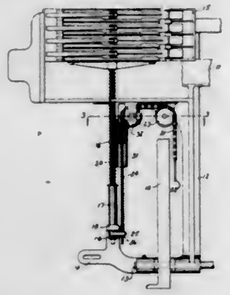
1,502,877. AUTOMATIC TELEPHONE SYSTEM. ARTHUR J. RAY, Chicago, Ill., assignor to Automatic Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 23, 1921. Serial No. 447,011. 5 Claims. (Cl. 179—17.)

1. In a telephone system, a line, a connector switch having access to said line, means for operating said connector to extend a connection to said line, a relay in said connector and a relay individual to said line, said individual relay energized in series with said other relay by direct current, means in said connector for supplying ringing current to said line through the winding of said relay in the connector, and contacts on said individual relay for closing the ringing circuit.



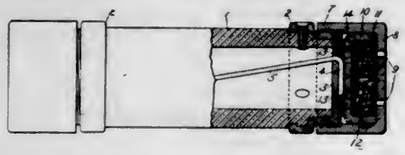
1,502,878. ANTISKID DEVICE. VALENTIN F. REJČEK, Penelope, Tex. Filed Apr. 30, 1923. Serial No. 635,789. 5 Claims. (Cl. 152—14.)

1. An anti-skid device comprising a saddle strap, a hook mounted at one end thereof, a pivoted cam locking lever associated with the other end thereof, a pivoted yoke carried by the locking lever, and a chain connected between the yoke and the hook.



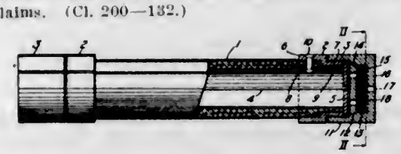
1,502,879. AIR EXHAUSTER FOR DRY-PIPE SPRINKLER SYSTEMS. GEORGE I. ROCKWOOD, Worcester, Mass. Filed Jan. 6, 1921. Serial No. 435,312. 8 Claims. (Cl. 169—17.)

1. An air exhauster for dry pipe sprinkler systems having a dry pipe valve, comprising a restrictedly connected air exhaust chamber and air pressure chamber, said air exhaust chamber being connected to the system and having an exhaust valve, means for operating the



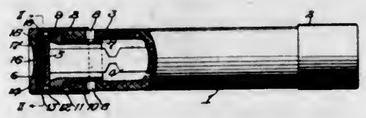
exhaust valve from the air pressure chamber, and means for releasing the air pressure in the air pressure chamber when the dry pipe valve opens.

1,502,880. DROP-BOX MECHANISM FOR LOOMS. EPPA H. RYON, Waltham, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 27, 1923. Serial No. 659,464. 4 Claims. (Cl. 139—182.)



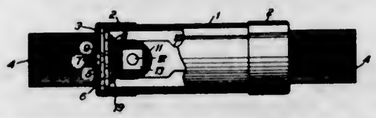
1. In a loom having a plurality of drop boxes, box lifting mechanism comprising a lifting chain, a rod connected thereto, a yielding connection between said rod and boxes, and a spring device encircling said rod and the end portion of said chain and acting to prevent overthrow of said boxes.

1,502,881. FUSE. MAURITS JEROME SANDIN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 13, 1918. Serial No. 234,060. 18 Claims. (Cl. 200—120.)



1. A fuse cartridge for a fusible element having a perforated double-walled end member and means disposed between said walls for preventing the escape of flame and the solid combustion products attending the rupture of said element.

1,502,882. REFILLABLE FUSE. MAURITS J. SANDIN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 5, 1919. Serial No. 308,686. 19 Claims. (Cl. 200—132.)

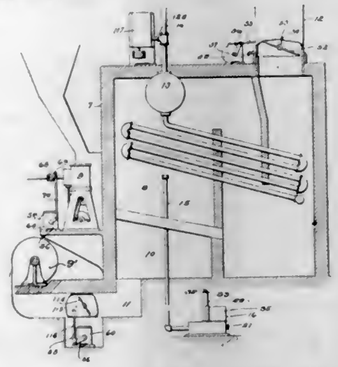


1. A cartridge fuse comprising a member having a groove and a consumable member adjacent said groove to form a gas path, said consumable member to be consumed along a line following said groove to compensate for a filling deposit therein, caused by the operation of said fuse, to maintain a path similar to said first path.

1,502,883. REFILLABLE FUSE. MAURITS J. SANDIN, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 12, 1920, Serial No. 350,947. Renewed Feb. 2, 1924. 10 Claims. (Cl. 200—132.)

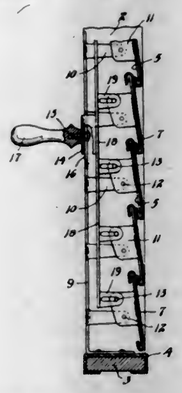
1. A cartridge fuse comprising a discoidal member having a radial groove in one of its faces and an opening from face to face thereof communicating with the groove and disposed adjacent the periphery of the member.

1,502,884. REFILLABLE FUSE. MAURITS J. SANDIN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 12, 1920, Serial No. 350,948. Renewed Feb. 2, 1924. 20 Claims. (Cl. 200—132.)



1. A refillable cartridge fuse comprising a casing, an end cap member therefor, and a terminal means movable with respect to said casing and said cap member having spaced co-operating surfaces disposed within the casing and providing a gas cooling chamber therebetween.

1,502,885. REFILLABLE FUSE. MAURITS J. SANDIN, Wilkinsburg, and JOHN B. MACNEILL, Pittsburgh, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 12, 1920. Serial No. 351,000. Renewed Feb. 2, 1924. 11 Claims. (Cl. 200—132.)

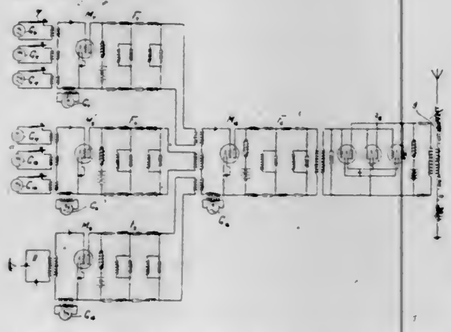


1. A cartridge fuse comprising three members engaging in relatively-broad-surface relation, the central one of which has its perimeter and intermediate portions of different thicknesses to provide a gas-cooling chamber between it and the other members.

1,502,886. FURNACE. WILMER M. SHALLCROSS, Milwaukee, Wis., assignor to Shallcross Control Systems Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Sept. 15, 1921. Serial No. 500,896. 5 Claims. (Cl. 236—14.)

1. In a furnace, regulating means therefor including an electric motor, an electric circuit including said motor, means within said circuit for actuating said motor upon a change in the furnace condition from normal, and means within the circuit whereby a strong dynamic braking force is applied to said motor upon the furnace condition returning to normal.

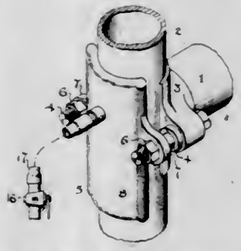
1,502,887. ADJUSTABLE VENTILATOR DEVICE. ABRAHAM SWENSEN, Minneapolis, Minn.; Mary Swensen special administratrix of said Abraham Swensen, deceased. Filed Mar. 10, 1922. Serial No. 542,547. 5 Claims. (Cl. 98—31.)



3. A ventilating device having in combination, an extensible frame, a series of telescoping slats pivoted to the end members of said frame, a member extending transversely of said frame intermediate thereof to which said slats are additionally pivoted and means slidably mounted on said member and connected to said slats for swinging the same about their pivots.

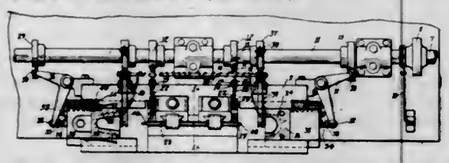
1,502,888. PROCESS OF MAKING LEAVENED BREAD. GEORGE S. TITUS and FRANK M. GROUT, Minneapolis, Minn. Filed Jan. 24, 1923. Serial No. 614,677. 6 Claims. (Cl. 99—10.)

2. The method of making leavened bread which consists in mixing from 50% to 90% of the flour to be used with from 50% to 90% of the water to be used, together with from one-tenth of 1% to 2% of suitable



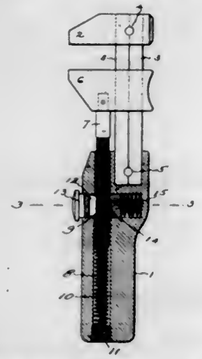
salts characterized by their yeast stimulating properties and then allowing said mixture to stand for a considerable period to mature and toughen the gluten content of the flour, then adding the remainder of the flour and water together with the yeast and other ingredients and fermenting the batch.

1,502,889. METHOD OF AND SYSTEM FOR RADIO-SIGNALING. HENDRIK J. VAN DER BIJL, Pretoria, South Africa, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 8, 1918, Serial No. 210,808. Renewed Nov. 23, 1921. Serial No. 517,382. 45 Claims. 250—6.)



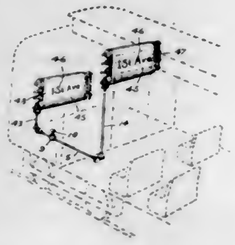
1. The method of signaling which comprises inverting the frequencies of a talking signal so as to produce an unintelligible noise current of audio frequency and modifying oscillations in accordance with said noise current.

1,502,890. CLAMP. JOHN HERBERT VEASEY, Johannesburg, Transvaal, South Africa. Filed June 16, 1923. Serial No. 645,799. 4 Claims. (Cl. 24—243).



3. In a fluid actuated clamp, a flexible bag having a face to make contact with a part to which the clamp is attached, a clamp member recessed to receive the bag, and, with the said part, to support the bag substantially over its whole area.

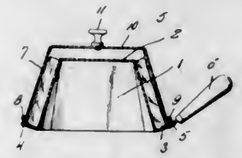
1,502,891. MACHINE FOR MAKING SHOE-TREES. LOUIS F. VOISARD, Galion, Ohio, assignor to The Plymouth Stamped Metal Company, Galion, Ohio, a Corporation of Ohio. Filed June 20, 1923. Serial No. 646,697. 23 Claims. (Cl. 1—1.)



23. In a machine for making shoe-trees, the combination of power means; means for holding a toe portion of a shoe-tree; means for holding a heel portion of a shoe-tree; means for holding a connector adapted to extend between the toe and heel portions of a shoe-tree; means for moving the toe portion and heel portion holding means relative to each other and the connector so as to cause said connector to be inserted in said toe and heel portions; and means adapted to nail said connector to the toe and heel portions of the shoe-tree.

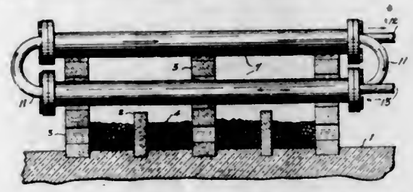
1,502,892. AUTOMATICALLY-CLOSING WRENCH. FREDRICK WALZ, Burnside, Conn. Filed Jan. 3, 1923. Serial No. 610,544. 2 Claims. (Cl. 81—145.)

1. A wrench having a handle with a longitudinally extending bore and a circular socket extending transversely across said bore, a fixed jaw, means connecting the fixed jaw with the handle, a movable jaw sliding on said connecting means, a circular threaded rod extending from the movable jaw in front of said connecting means into and substantially fitting the bore in the handle, a spring arranged in said bore and adapted to thrust the rod outward, a cylindrical plunger located in the transverse socket in the handle, said plunger having a transverse opening through which the threaded rod extends, the inner wall of said opening having teeth, and a spring in the socket thrusting the plunger outward and causing the engagement of the teeth on the wall of the opening through the plunger with the threaded rod.



1,502,893. STREET INDICATOR FOR PASSENGER VEHICLES. HARRIS G. WARD, Seattle, Wash. Filed Sept. 23, 1922. Serial No. 590,029. 1 Claim. (Cl. 40—87.)

A street indicator for passenger vehicles comprising a casing adapted for observation by the passengers of said vehicle, a corresponding casing arranged for observation by the operator, spring tension rollers mounted in both of said casings adjacent the central portions thereof, friction rollers revolvably mounted in the upper and lower portions of each of said casings, sprocket means connecting said rollers, a flexible material disposed over said friction rollers and its end portions wound on said tension rollers in each of said casings, said materials having the names of localities designated thereon in

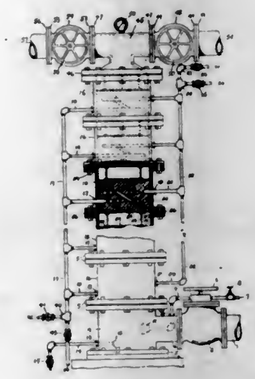


spaced apart relation, gears on the ends of each of said lower friction rollers, vertical shafts in mesh with said gears, a horizontal shaft gearedly connecting said vertical shafts, means for actuating said horizontal shaft to cause said flexible materials in each of said casings to synchronously move a predetermined distance, and means for reversing the movement of said flexible materials.

1,502,894. BREAD TOASTER. JOHN ANSCHUTZ, Washington, D. C. Filed Mar. 10, 1924. Serial No. 698,235. 2 Claims. (Cl. 53—5.)

1. A bread toaster comprising a substantially frusto pyramidal shaped heating body formed of imperforate sheet material having its bottom open and its top closed, a flange formed on the bottom of said heating body and extending entirely around the sides thereof to provide a bread support, said flange being disposed at substantially right angles to the sides of the heating body, and a substantially frusto-pyramidal shaped cover formed of imperforate sheet material movably supported on the outer edges of said base flange and extending entirely over the heating body.

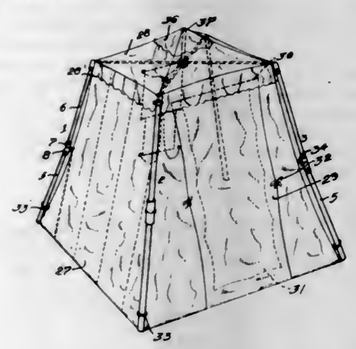
1,502,895. APPARATUS FOR TREATING GASES. OSCAR L. BARNEBEY, Cleveland, Ohio. Filed Oct. 24, 1919. Serial No. 333,115. 2 Claims. (Cl. 75—1.)



1. An apparatus for highly superheating gases having all of the parts in contact with the superheated gases of iron alloy containing a small quantity of copper and possessing high resistance against corrosion and deterioration by superheated gases under pressure.

1,502,896. PROCESS FOR THE UTILIZATION OF VEGETABLE MATERIALS AND MANUFACTURE OF GAS ADSORBENT AND DECOLORIZING CARBONS. OSCAR L. BARNEBEY, Detroit, Mich. Filed Mar. 23, 1921. Serial No. 454,972. 7 Claims. (Cl. 252—3.)

1. The process of treating vegetable carbonaceous materials to effect the economic utilization of constituents thereof including carbon, which comprises charring said materials, treating the charred materials with hydrofluoric acid and a mineral acid other than hydrofluoric acid to convert the silica thereof into volatile silicon tetra-fluoride and extract the base constituents thereof as soluble salts of mineral acids, and washing and drying the residual carbon.

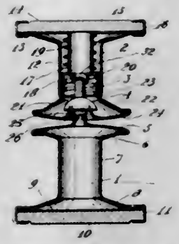


1,502,897. APPARATUS FOR SEPARATING AND RECOVERING GASES. OSCAR L. BARNEBEY, Columbus, Ohio. Original application filed July 20, 1920, Serial No. 397,745. Divided and this application filed July 29, 1922. Serial No. 578,332. 5 Claims. (Cl. 183—4.)

1. In apparatus for separating the constituents of gaseous mixtures by adsorption under pressure, the combination of a plurality of separable metallic container sections comprising end sections and a series of intermediate sections, separated layers of adsorbent material in said intermediate sections, foraminous plates engaging the opposite sides of each layer of adsorbent material to hold it in position against the force of gravity and

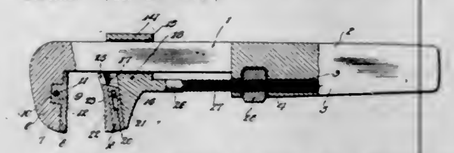
the force of gas under pressure, an inlet passage in one of said end sections for the gaseous mixture to be treated, valved outlet passages in the other end section for unadsorbed gas and adsorbed gas, respectively, and means for controlling the temperature of the adsorbent material.

1,502,898. TENT. FREDERICK O. BERG, Spokane, Wash. Filed Jan. 12, 1924. Serial No. 685,757. 4 Claims. (Cl. 135—4.)



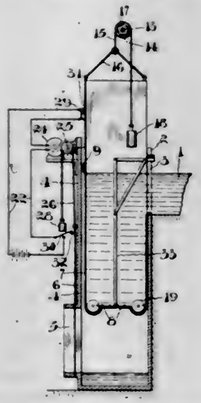
4. The combination with four foldable posts, of a central bushing and an adjustable post therein, pairs of perforated ears on said bushing and angular radiating bars pivoted in said ears, adjustable, telescopic bars forming extensions of the radiating bars, a bracket between each post and its complementary extension, and said bracket having a swivel joint with its post section and a pivoted joint on its complementary extension.

1,502,899. CUFF BUTTON. SAMUEL F. BERNARDINI and PARIS DELLA CASSE, Cuddy, Pa. Filed Mar. 17, 1924. Serial No. 699,649. 2 Claims. (Cl. 24—109.)



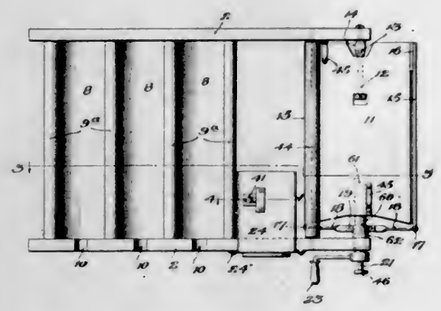
1. In a cuff-button, a male part and a female part; a substantially cruciform retaining member secured to said male part, the longitudinal stem of said retaining member extending considerably beyond the cross-arms thereof; an aperture provided in said female part engaged by said retaining member; rectangularly disposed

notches provided in said female part for engagement by said retaining member; spring operated means to hold said retaining member in said notches against rotation,

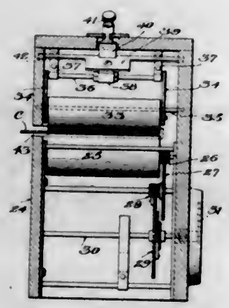


and a sleeve element positioned within the female member and closely engaged by said extension of the retaining member.

1,502,900. WRENCH. LARKIN BRILES, Davis Creek, Calif. Filed July 7, 1922. Serial No. 573,271. 2 Claims. (Cl. 81—179.)



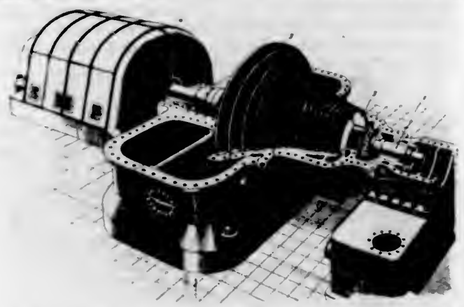
1. A wrench comprising a shank and coacting jaws having opposing faces, one of which is adjustable with relation to the other, working face of the plates mounted upon the jaws, the face plate of one of the jaws being slightly inclined with respect to the longitudinal edge of the shank and the working face of the plate of the other jaw being more pronouncedly inclined with respect to said longitudinal edge, and means including a pin and slot connection for slidably supporting one of said face plates upon the adjacent jaw, the working face of said plate being, when the plate is in position, located in a plane diverging from the plane of the face of the first-mentioned jaw and in the direction of the outer ends of the jaws, the last-mentioned face plate being arranged for conction with the other face plate to grip an object supported therebetween.



1,502,901. HYDRAULIC POWER DEVICE. BRUCE A. BRISTOW, Toronto, Ontario, Canada. Filed Dec. 1, 1923. Serial No. 678,047. 3 Claims. (Cl. 253—18.)

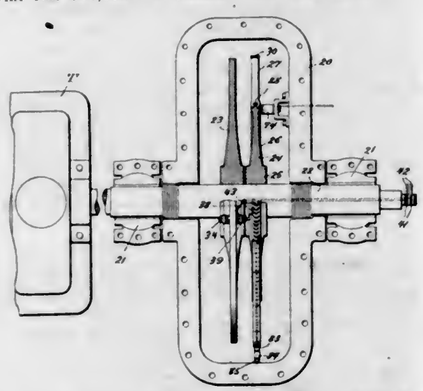
1. A hydraulic power device comprising a reservoir; a stationary chamber having the upper part of one side open to the reservoir and extending downwardly to provide a suitable fall; a crib vertically movable in said chamber and having an opening in one side adapted to maintain communication with the opening in the side of the stationary chamber as the crib rises and falls; a gate controlled outlet adjacent the bottom of the chamber; and a gate controlled outlet in the bottom of the crib.

1,502,902. CLOTH-MEASURING MACHINE. LEE ROY BROWN, Chickasha, Okla. Filed June 28, 1923. Serial No. 648,239. 9 Claims. (Cl. 33—129.)



1. In a cloth measuring machine, a casing having transverse partitions, a sheet metal member bent to form roll-receiving pockets having sides engaged with the opposite sides of the partitions and having rounded tops engaged with the partition tops and further having rounded bottoms disposed between the partitions, a case carried by a side of the casing, measuring mechanism in the case, said case being disposed adjacent the innermost pocket and having its ends and inner side slotted at points adjacent the tops of the pockets to receive the cloth through the slots, and a cloth-receiving reel carried by the casing and arranged on the opposite side of the case from the pockets.

1,502,903. STEAM-TURBINE ROTOR AND METHOD OF AVOIDING WAVE PHENOMENA THEREIN. WILFRED CAMPBELL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 27, 1923. Serial No. 621,655. 7 Claims. (Cl. 253—39.)

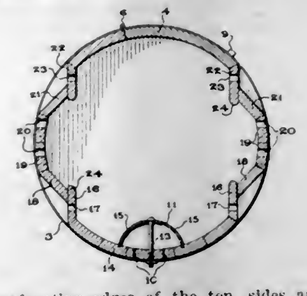


1. A turbine rotor comprising a shaft and a plurality of turbine wheels mounted thereon, at least one of said wheels possessing such stiffness and mass that it has a critical speed in the neighborhood of the normal operating speed of the rotor, the rotor being further

characterized by the fact that all of the wheels on said rotor are so proportioned that no standing waves

of appreciable magnitude are produced in any of said wheels at speeds closer to the normal operating speed than approximately 10% of said operating speed.

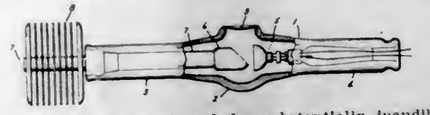
1,502,904. ELASTIC-FLUID TURBINE ROTOR AND METHOD OF AVOIDING TANGENTIAL BUCKET VIBRATION THEREIN. WILFRED CAMPBELL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 22, 1923. Serial No. 647,193. 8 Claims. (Cl. 253—39.)



1. In an elastic fluid turbine, a rotor having a row of buckets thereon which buckets have a natural frequency of tangential vibration less than 3.5 times the normal operating speed of the turbine, characterized by the fact that said row of buckets is tuned in advance so that the rotor speeds of which the natural running frequencies of tangential vibration of the row of buckets are multiples are not closer to said normal operating speed than approximately 5% of such normal operating speed.

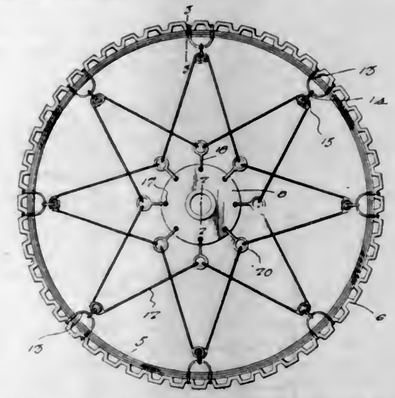
1,502,905. COMPOUND FOR CURING AND COLORING MEATS. SALADINE EUGENE COLGIN, Dallas, Tex. Filed May 15, 1922. Serial No. 561,023. 6 Claims. (Cl. 99—1.)

1. A compound for curing and coloring meat consisting of pyroligneous acid; sugar browned sufficiently to impart color without detracting from the sweetening properties; and glycerine substantially in the proportions specified.



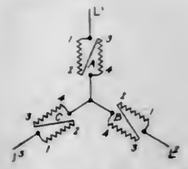
1,502,906. CYLINDER. RICHARD M. COMISKEY, Quincy, Ill. Filed Nov. 25, 1922. Serial No. 603,276. 1 Claim. (Cl. 68—21.)

A clothes containing cylinder adapted for rotation in a washing machine, comprising a top, apertured sides, a bottom having a series of apertures therethrough, and a spray element surrounding said apertures, oppositely inclined strips connected together in pairs and connected



to the confronting edges of the top, sides and bottom, and one of each pair of strips having a central line of apertures therethrough.

1,502,907. X-RAY DEVICE. WILLIAM D. COOLIDGE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 30, 1919. Serial No. 307,814. 5 Claims. (Cl. 250—35.)

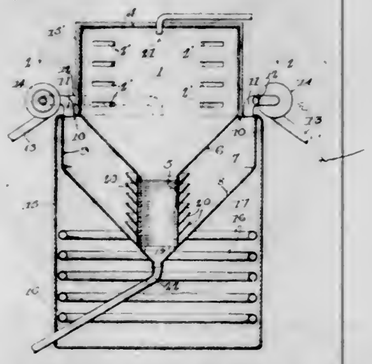


1. An X-ray tube adapted for substantially inaudible operation comprising a cathode adapted to operate at incandescence, an anode and an enclosing evacuated envelope of glass closely surrounding said electrodes having a thickness of the order of about one-fourth inch.

1,502,908. SPRING WHEEL. COMMODORE PERRY COZATT, Danville, Ill. Filed Nov. 14, 1923. Serial No. 674,702. 1 Claim. (Cl. 152—29.)

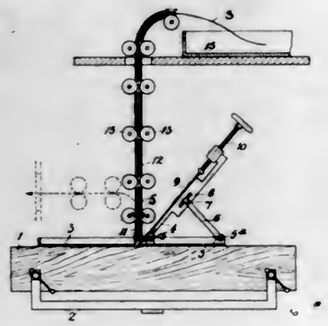
In a spring wheel of the character described, a resilient deformable rim, a hub disposed within the rim and having end flanges, tangential spokes normally connecting the hub and rim in concentric spaced relation, said spokes having pivotal connection with the hub flanges and the rim for swinging movement relative to the latter in the plane of the wheel and being arranged in pairs with the spokes of each pair arranged in inwardly diverging relation, means to adjust one of the hub flanges longitudinally of the hub toward and away from the other flange, said hub comprising a flanged section having a reduced end with an externally threaded sleeve rotatably disposed upon said reduced end, said adjustable flange having threaded connection with said sleeve.

1,502,909. ASYNCHRONOUS MOTOR. FLEURY DE-FLASSIEUX, Paris, France, assignor to General Electric Company, a Corporation of New York. Filed Sept. 3, 1921. Serial No. 498,446. 2 Claims. (Cl. 172—214.)



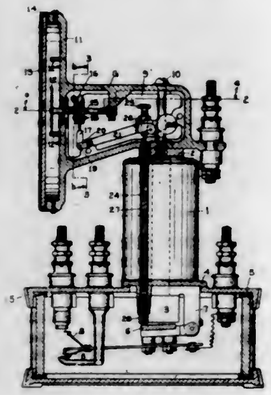
1. The method of starting a squirrel cage polyphase motor having a plurality of sections in each of its stator phases, which consists in first operating the motor with the sections in each phase in series and the phases in star, and then changing, in a plurality of steps to parallel connection of the sections and to delta connection of the phases.

1,502,910. COMBINED CANDY BOX AND RECEPTACLE FILE. HARRY DILAS, Bay City, Mich. Filed Aug. 11, 1922. Serial No. 581,142. 2 Claims. (Cl. 206—62.)



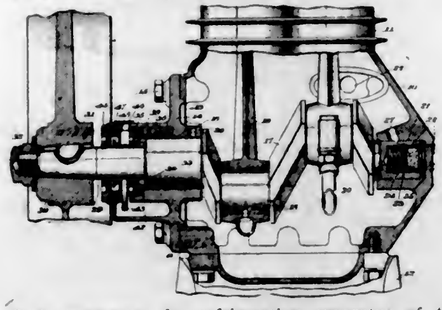
1. A combined confectionery box and record file, comprising a receptacle the upper edges of which are bent inwardly to form individual compartments on the top and bottom respectively, record files or shelves on the interior of the receptacle, and doors hingedly secured thereto to facilitate the inserting or removal of the records.

1,502,911. EVAPORATING APPARATUS. WILLIAM G. DOERN, Milwaukee, Wis. Filed May 17, 1920. Serial No. 381,818. 5 Claims. (Cl. 159—4.)



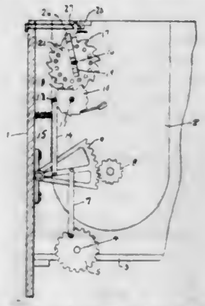
5. In a device of the character described, the combination with a cylindrical receptacle, of a heating coil disposed in the lower portion of said receptacle about the wall thereof, a second receptacle having a downwardly converging bottom wall portion terminating in a port and disposed within the heating influence of said coil, a pipe leading from said port through said coil and outwardly of said first mentioned receptacle, a third receptacle having a major portion above said second receptacle and having a downwardly converging wall portion within said second receptacle and terminating in a port substantially in axial alignment with the port of said second receptacle, a cylindrical screen peripherally connected with said second and third receptacles about said ports, means for withdrawing air from said second receptacle and means for admitting air and liquid to said major portion of said third receptacle.

1,502,912. PROCESS OF AND APPARATUS FOR FORMING BAST-WOOD FIBERS FOR MAKING FABRICS AND WEBS. JOSEF KÜMPFEL, Alt-Ehrenberg, Czechoslovakia. Filed July 10, 1923. Serial No. 650,725. 1 Claim. (Cl. 144—2.)



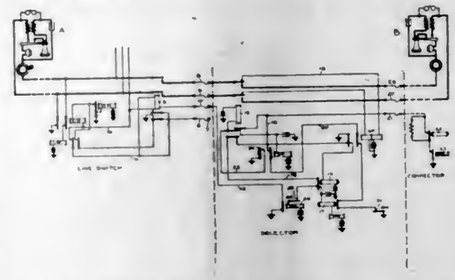
A process of forming bast-wood fibers for making fabrics and webs, consisting in planing-off from a wood piece thin chips of the width of the latter, collecting said chips in superposed fashion in a collector, providing one end of the uppermost chip with glue, joining the single chips into a long strip, splitting the latter into single thin fibers, winding the latter on bobbins, and using the same as warps and wefts, substantially as set forth.

1,502,913. TOWER INDICATOR. RICHARD C. LEAKE, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y., a Corporation of New York. Filed July 7, 1919. Serial No. 309,208. 15 Claims. (Cl. 177—3.)



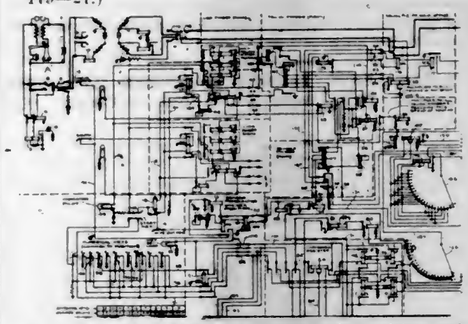
1. In an indicating relay having a movable armature, an up-and-down rod resting upon said armature and raised by the attraction thereof, a biased rocking lever actuated by said rod, and indicating means movable from one indicating position to another in a vertical plane and operatively connected to said rocking lever, said rod being guided by said rocking lever.

1,502,914. COMPRESSOR OR LIKE DEVICE. HENRY B. JOY, Detroit, Mich., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio, a Corporation of Delaware. Filed Dec. 24, 1917. Serial No. 208,627. 9 Claims. (Cl. 286—7.)



8. A compressor for refrigerating apparatus of the household type comprising a casing having shaft bearings formed therein, a shaft member journaled in said bearings and having a crank integral therewith, one end of said shaft member projecting through the casing wall and provided with an annular shoulder having a bearing surface thereon, the shaft bearing for the projecting end of said shaft member being relatively short, interfitting sealing means between the shoulder and the adjacent wall of the casing so constructed and arranged as to seal the casing during all conditions of alinement or misalinement of the shaft in the bearings, said sealing means including a bearing ring member surrounding the shaft member and having a bearing surface in engagement with said first-mentioned bearing surface and spring means within the casing and interposed between the casing and one end of the shaft member to thrust the entire shaft member endwise and to force said bearing surfaces together.

1,502,915. TIMING DEVICE FOR WASHING MACHINES. PETER NEUWERK, Moline, Ill., assignor to Henry W. Hubers, Davenport, Iowa. Filed Dec. 27, 1920. Serial No. 433,268. 2 Claims. (Cl. 192—142.)

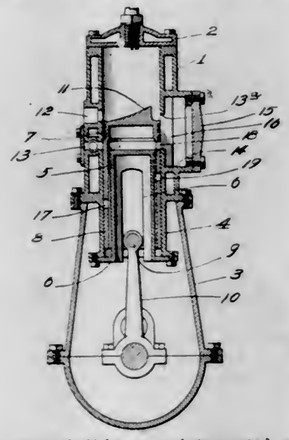


1. In a device of the class described, in combination with the frame of the machine and operating mechanism thereof, a shaft mounted therein so as to be rotatable and also capable of a limited longitudinal movement; a toothed wheel loosely mounted on said shaft; a frame fixed to said shaft and provided with a switch-throwing member; means for compelling a normal engagement of said last-named frame with said toothed wheel; yieldable means for holding said last-named frame and toothed wheel in spaced-apart relations, when disengaged; a movable member in proximity to said toothed wheel, adapted to receive intermittent progressive movements, and provided with means for engagement with said toothed wheel to impart a partial rotation thereto for each cycle of operation of said member; and means for imparting the movement of said operating mechanism to said movable member, to give intermittent action thereto.

1,502,916. AUTOMATIC TELEPHONE SYSTEM. WINFRED T. POWELL, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed July 23, 1919. Serial No. 312,824. 12 Claims. (Cl. 179—18.)

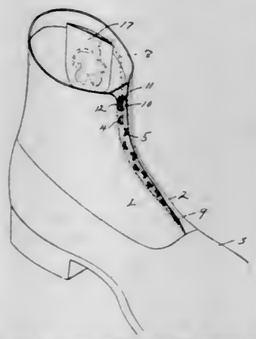
1. In a telephone system, an automatic switch, primary and secondary magnets for operating said switch, a primary circuit for said primary magnet, an initial energizing circuit for said secondary magnet local to said switch, and a substitute circuit including the winding of said secondary magnet and completed at a point remote from said switch, and releasing means therefor.

1,502,917. INTEROFFICE TRUNKING SYSTEM. WINFRED T. POWELL, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 4, 1920. Serial No. 428,225. 23 Claims. (Cl. 179—27.)



1. In telephone system, an operator's position, telephone lines terminating in said position, a second operator's position, other lines terminating thereat, trunk circuits connecting said positions, a trunk indicating device at said first position, a line indicatng device at said second position, means at said first position whereby an operator receive the designation of wanted lines, means controlled at said position for initiating a connection to a wanted telephone line, means responsive thereto for selecting an idle trunk to said second operator's position and for causing said trunk indicating device to give the trunk indication of the selected trunk line at said first operator's position, a circuit for connecting the calling line and the selected trunk, means controlled at said first position for causing said line indicating device to give the designation of the wanted line, and a manual switch by means of which an operator at said second position connects the selected trunk to the wanted telephone line.

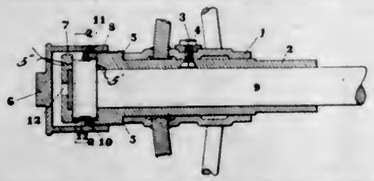
1,502,918. TWO-CYCLE INTERNAL-COMBUSTION ENGINE. LELAND L. SCOTT, Savannah, Mo. Filed July 31, 1922. Serial No. 578,669. 1 Claim. (Cl. 123—50.)



In a two-cycle internal combustion engine, a cylinder having an elongated bore, an internal cylinder head bolted to the extremity of said cylinder and closing the end thereof and being provided with a series of piston

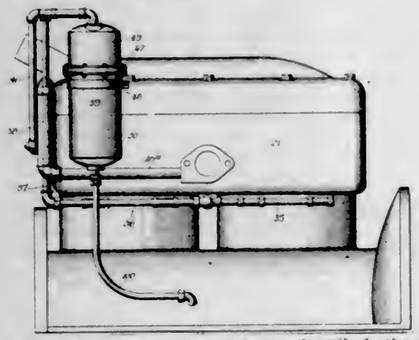
rings, a piston for reciprocation in said cylinder and having its internal face in frictional contact with the rings of said internal head, a combustible mixture supply and an exhaust port in said cylinder, a by-pass chamber having a single port with its lower edge in horizontal alinement with the top of the internal head, a pair of ports in said piston; said by-pass and piston ports being so ar-

ranged that there shall be an uninterrupted compression of the combustible mixture in the by-pass chamber on the back stroke of the piston, one of said piston ports passing beyond the rings of the internal head on the back stroke of the piston, and a supply port in said piston adapted for registration at times with said cylinder supply port and on the back stroke of the piston passing beyond the rings of the internal head.



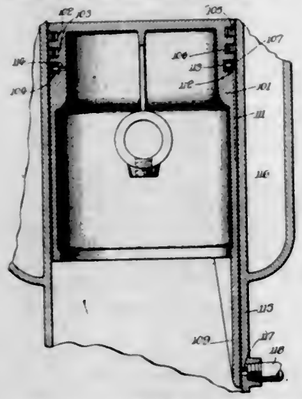
1,502,919. SHOE. FRANK A. SEIB, Detroit, Mich. Filed July 10, 1922. Serial No. 574,039. 5 Claims. (Cl. 24—140.)

1. In a shoe, the combination with upper sections having spaced edges, of eyelets arranged in the space between said edges and alternately secured thereto, a lace extending through said eyelets and having its lower end secured to the shoe, and cleats extending from said edges at the upper ends of said upper sections and around which said lace is looped.



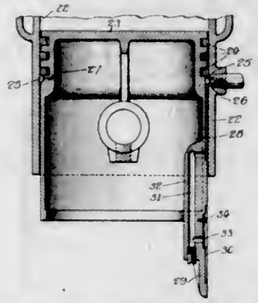
1,502,920. WHEEL HUB. WALTER H. SILVER, Moline, Ill., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed May 19, 1919. Serial No. 298,231. 7 Claims. (Cl. 301—122.)

7. An axle support comprising a wheel hub, a bearing box extending through the hub and secured thereto, the outer end of said box being of greater diameter than the outer end of the hub, a transverse recess in the outer portion of said box, an opening extending from said recess to the outer surface of the box, a collar insertible in said recess and having diametrically opposed openings, an axle journaled in said box and extending through said collar, an opening transversely of said axle in line with



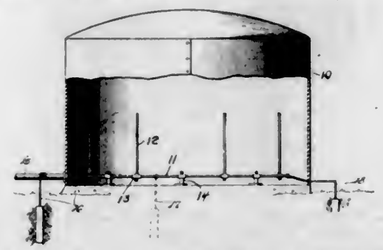
the openings in the collar, and a cotter inserted in the openings in the collar and the shaft to hold the two together, and a cap on the end of the box.

1,502,921. INTERNAL-COMBUSTION-ENGINE OIL AND FUEL APPLIANCE. RALPH L. SKINNER, Sacramento, Calif., assignor to Skinner Automotive Device Co., Inc., Sacramento, Calif., a Corporation of California. Filed May 26, 1921. Serial No. 472,746. 45 Claims. (Cl. 123—196.)



1. In a structure of the character described, the combination of a cylinder of an internal-combustion engine, a reciprocatory piston in said cylinder having a transverse, fluid-collecting channel, means to admit air to said channel, means to lubricate said cylinder and piston, and means to apply suction to said channel to withdraw its contents.

1,502,922. INTERNAL-COMBUSTION-ENGINE CONSTRUCTION. RALPH L. SKINNER, Detroit, Mich., assignor to Skinner Automotive Device Co., Inc., Sacramento, Calif., a Corporation of California. Filed July 21, 1922. Serial No. 576,516. 9 Claims. (Cl. 74—108.)

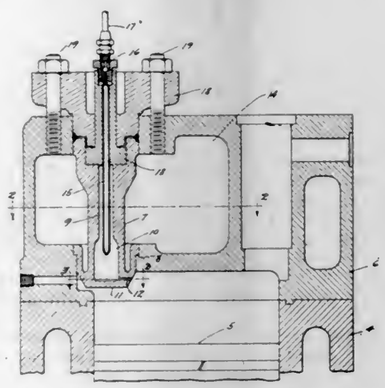


1. The combination of a piston having a piston-ring groove and a piston-ring in said groove, said piston having a groove on its exterior disposed longitudinally of the piston and in communication with said piston-ring groove inwardly of the piston-ring.

1,502,923. PISTON FOR INTERNAL-COMBUSTION ENGINES. RALPH L. SKINNER, Detroit, Mich., assignor to Skinner Automotive Device Co., Inc., Sacramento, Calif., a Corporation of California. Original application filed May 26, 1921, Serial No. 472,746. Divided and this application filed Aug. 30, 1922. Serial No. 585,309. 17 Claims. (Cl. 74—108.)

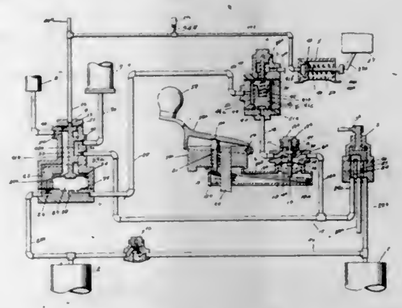
1. An internal-combustion engine piston having an external, transverse channel, an external longitudinal groove communicating with said channel and adapted when opposite a port in the engine cylinder wall to establish connection between such port and channel, and a lengthwise extension at one side of the piston-skirt in register with said longitudinal groove and adapted to co-operate with said cylinder-port.

1,502,924. INDUCTIVE STATIC DRAIN FOR OIL-STORAGE TANKS. CHARLES A. STANLEY, Wichita, Kans. Filed Nov. 21, 1921. Serial No. 516,839. 3 Claims. (Cl. 175—364.)



1. A device for continuously draining induced electric charges from conducting particles suspended within the contents of a tank and for conducting said charges to the ground, said device comprising a horizontally positioned base member, a plurality of upright collecting members, and a ground connecting element for said base member, said members being made from short metallic rods, T's joining said rods to form the base and collecting members, and feet attached to said base member, said ground connecting element including a bent rod attached to one of said T's, the lengths of said rods for said members being such that the device may be completely enclosed by the tank.

1,502,925. PROJECTILE. CHARLES W. STONE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed July 30, 1918. Serial No. 247,393. 8 Claims. (Cl. 102—28.)

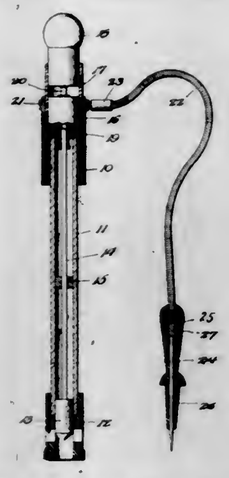


7. An armor piercing projectile comprising a core of wrought tungsten substantially smaller than the bore of the gun with which it is to be used, a jacket of aluminum encasing the nose of said bullet, and a cap of metal harder than aluminum adapted to take the rifling of the gun surrounding the base of the core.

1,502,926. METHOD OF AND MEANS FOR FUEL INJECTION FOR INTERNAL-COMBUSTION MOTORS. JOHN H. SUTER, Los Angeles, Calif. Filed June 7, 1920. Serial No. 387,096. 4 Claims. (Cl. 123—33.)

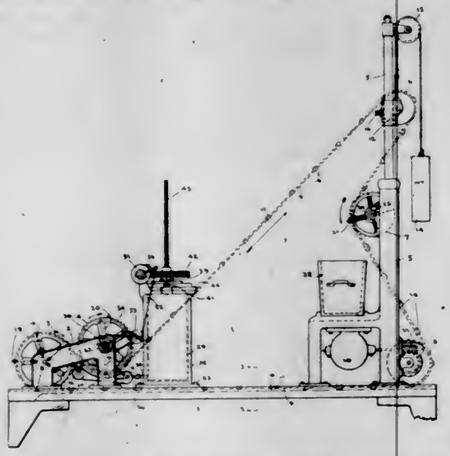
1. In an internal combustion engine, the combination of the cylinder thereof with a fuel injection means comprising a chamber having an elongated outer end and a bulbous inner end communicating with said cylinder, means to cool substantially all of the walls of said chamber, and means to introduce a charge of fuel into the enlarged end of said chamber.

1,502,927. FLUID-PRESSURE BRAKE. HARRISON S. SWEET, Utica, N. Y. Filed Nov. 10, 1921. Serial No. 514,193. 24 Claims. (Cl. 303—19.)



1. In a fluid pressure brake containing an emergency valve, a brake cylinder, pipes for carrying fluid pressure whereby to operate the emergency valve, and means for switching the fluid pressure from the pipes which operate the emergency valve to other pipes carrying fluid pressure and others carrying atmosphere pressure.

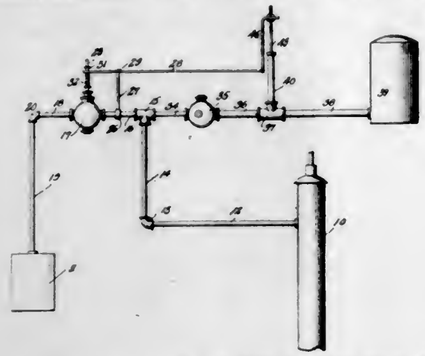
1,502,928. STORAGE-BATTERY TESTER. JAMES L. THOMPSON, Greensburg, Pa. Filed July 15, 1920. Serial No. 396,520. 2 Claims. (Cl. 175—183.)



1. A storage battery tester including a shell, a lamp socket carried thereby, an indicating lamp fitted in said socket, an immersible electrode coupled with the shell

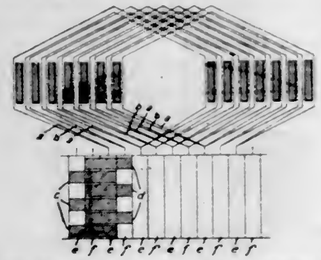
and electrically connected with the socket, a collar surrounding the socket in circuit with the lamp, a cable

connected to said collar and provided with means to coact with the socket locking the collar in position, and a contact electrode connected to said cable.



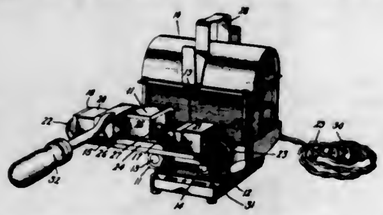
1,502,929. OLIVE-STUFFING MACHINE. JAMES K. TUTTLE, Oakland, Calif. Filed June 26, 1923. Serial No. 647,868. 14 Claims. (Cl. 146—27.)

1. An organized mechanism for stuffing olives, comprising means for centering the olives, means for pitting the olives, and means for filling the pit spaces with a compound comprising an injector nozzle inserted into the pitted olive and withdrawn upon the space being filled.



1,502,930. AUTOMATIC WATER CUT-OFF. MACK P. WERHAN, Bennington, Kans. Filed Mar. 21, 1921, Serial No. 453,918. Renewed June 3, 1924. 4 Claims. (Cl. 103—42.)

1. In a device of the character described the combination with a pump and a stock tank connected to the pump to receive water therefrom, of a cut off valve interposed between said pump and said stock tank and normally closing communication between the pump and the stock tank, a pressure tank, a check valve, means connecting said check valve and said pressure tank, means connecting said pump and said cut off valve, means connecting said check valve and said last named means,

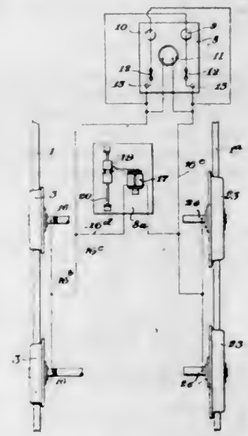


means connecting said cut off valve and said stock tank, and pressure actuated means operable from a point intermediate said pressure tank and said check valve to open said cut off valve upon the accumulation of a predetermined pressure within said pressure tank.

1,502,931. DYNAMO-ELECTRIC MACHINE. FRANK PERCY WHITAKER, Rugby, England, assignor to General Electric Company, a Corporation of New York. Filed Nov. 1, 1920. Serial No. 420,923. 2 Claims. (Cl. 171—206.)

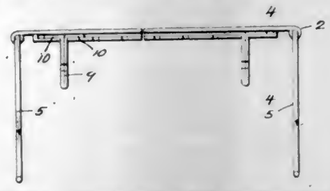
2. A winding, each of the coils of which are formed of two sections, one being under and one over pole pitch, each section being formed of a portion which occupies the bottom of one slot, a portion which occupies the top of another slot and a conductor joining the two portions, the conductors which join the portions of two sections of the single coil crossing each other at the rear of the armature.

1,502,932. ELECTRIC HEATER. WILBUR L. YOUNG, Fort Wayne, Ind., assignor to General Electric Company, a Corporation of New York. Filed June 30, 1921. Serial No. 481,492. 6 Claims. (Cl. 219—23.)



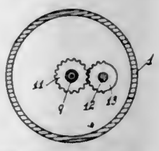
1. In an electric heater, the combination with a workpiece, of a support for said workpiece, and stationary and resiliently yieldable electrodes on said support adapted to engage said workpiece and heat the same.

1,502,933. AUTO LOCK. JOHN M. ALLEN, St. Johnsbury, Vt. Filed Aug. 22, 1923. Serial No. 658,818. 5 Claims. (Cl. 70—90.)



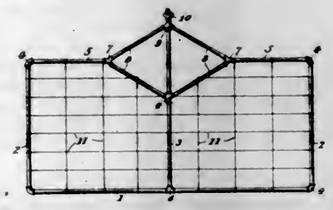
1. A device of the class described comprising a T-plate having a head and a shank, a head-plate slidable on the shank, a slide on the shank to abut the head-plate, said shank having apertures to receive a pad lock.

1,502,934. MEANS FOR TESTING TRACK CIRCUITS. ABRAHAM B. BARNETT, Roanoke, Va. Filed Dec. 10, 1923. Serial No. 679,771. 3 Claims. (Cl. 175—183.)



3. Apparatus for testing the continuity of a track circuit having a source of current connected between the rails thereof, comprising a car adapted to run upon the rails and having the wheels on one side insulated from those on the other side, an internal combustion engine for driving said car, an electromagnet on said car having one end of its winding connected with the wheels at one side of the car, and the other end of its winding connected with the wheels at the other side of the car, whereby said winding is included in a series circuit with said source of current through the rails, a battery carried by said car, a circuit for supplying ignition current from said battery to said engine, a switch in said circuit, a lamp also on said car, a circuit for supplying current from said battery to said lamp, said circuit including a switch, means controlled by said electromagnet, when energized, for maintaining said ignition circuit switch closed and said lamp circuit switch open, and means operating automatically, upon deenergization of said electromagnet for simultaneously closing said lamp circuit switch and opening said ignition circuit switch, whereby a signal is given and the car stopped when any break in the continuity of the track circuit is encountered.

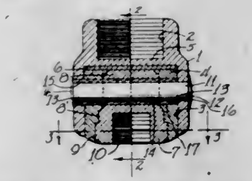
1,502,935. SHADE AND CURTAIN BRACKET. AUGUST BOHRER, Jersey City, N. J. Filed May 15, 1922. Serial No. 561,059. 1 Claim. (Cl. 156—23.)



A combined curtain and shade bracket formed from a single sheet of material bent at its longitudinal axis to provide a base plate and a retaining plate, said retaining plate having spaced notches formed thereon adapted to receive means for supporting a shade roller and having its ends bent at right angles toward the base plate to keep said retaining plate spaced parallel from said base plate and the ends of said base plate being rolled to provide cylindrical sleeves adapted to receive curtain supporting elements.

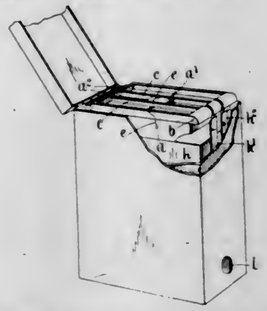
1,502,936. SOAP DISPENSER AND CONTAINER. JOSEPH N. BORROUGHS, Oakland, Calif. Filed Apr. 25, 1921. Serial No. 464,120. 2 Claims. (Cl. 221—79.)

1. A soap dispenser including a soap container, a nozzle extending from one end of said container, a screw journaled longitudinally in said container, a piston slidable on said screw, a clutch on said screw for engaging said piston when the screw is rotated to advance said piston to eject soap through said nozzle, a gear on said screw, a shaft in the upper end of the container extending outside the container, a mutilated gear on said shaft meshing with the gear on said screw, and a thumb wheel on the outer end of said shaft.



1,502,937. GATE. WESLEY J. BRIGNER, Grano, N. Dak. Filed Feb. 8, 1922. Serial No. 534,920. 1 Claim. (Cl. 256—73.)

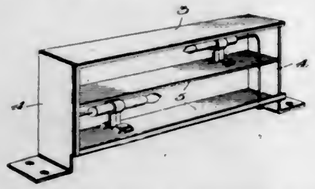
A gate structure comprising a main frame including upper and lower horizontal sections, each section comprising a pair of tubular members, vertical sections at the outer ends of said upper and lower horizontal sections, the tubular members forming the lower section being connected at their inner opposed ends by a T shaped coupling, an auxiliary frame substantially dia-



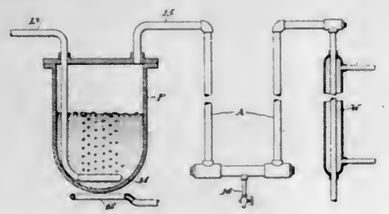
mond-shaped supported at one pair of diametrically opposed apices thereof on the inner opposed ends of the tubular members forming the upper horizontal section, and a central bracing member supported at its lower end in said T shaped coupling and extending vertically through the upper and lower apices of said auxiliary frame.

1,502,938. INSULATED COUPLING FOR ELECTRIC FIXTURES. FRANK LOWELL BUTLER, Chicago, Ill. Filed Jan. 19, 1922. Serial No. 530,397. 1 Claim. (Cl. 173—365.)

An insulated coupling comprising a body portion having an internally threaded recess in one end thereof and a recess in the other end thereof, said recesses being separated by a partition, an insulating disc disposed adjacent to said partition, an insulating sleeve disposed in the recess having the disc, and being adapted to abut said disc, a pipe supporting member disposed in said sleeve, a pin inserted through said body portion and said member, and an insulating sleeve disposed between said pin and said member.



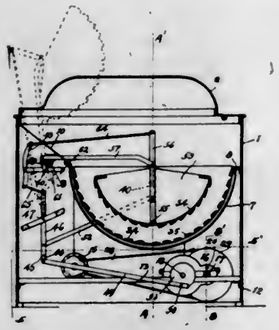
1,502,939. FLASH-LIGHT APPARATUS. EMILE CHASSERAUX, Paris, France. Filed Sept. 24, 1923. Serial No. 664,633. 3 Claims. (Cl. 67—31.)



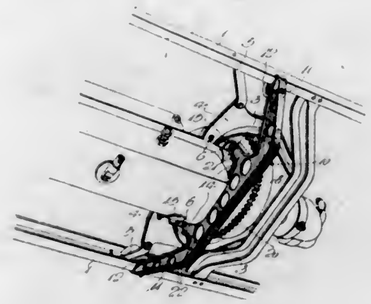
1. A flashlight apparatus comprising in combination a dry battery mounted in a case, a cap formed of insulating material mounted on the said case and adapted to receive on its upper face a charge of flashlight powder, a bobbin supported rotatably by the said cap, a fine fusible wire wound on the said bobbin, and a pair of contact arms pivotally mounted on the said cap and adapted to clamp the free end portion of the said wire upon its upper face, one of the said arms being in electrical contact with one pole of the battery and the other arm being adapted to be connected to the other pole by means of a switch when the wire has been so clamped.

1,502,940. AUTOMOBILE DIRECTION INDICATOR. HERBERT THOMAS COX, Long Beach, Calif. Filed Apr. 8, 1921. Serial No. 459,786. 2 Claims. (Cl. 177—329.)

1. A casing for direction indicators for use on automobiles constructed of a single piece of metal including a back, a top integral with the back and extending at right angles thereto, depending side walls integral with the top, said side walls each having a foot portion provided with apertures to constitute attaching means, the top and one of the side walls being flanged to provide a support, a bottom secured in the casing and having a flange providing a support complementary to the support of the top and side, a signalling panel for the front of the casing, engaged with the supports of the top side and bottom and signalling means within said casing.

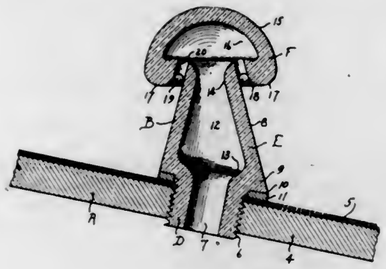


1,502,941. PROCESS OF OXIDIZING DIBENZYL. HENRY R. CURME, Clendenin, W. Va., assignor to Carbide and Carbon Chemicals Corporation, a Corporation of New York. Filed May 4, 1922. Serial No. 558,533. 4 Claims. (Cl. 260—108.)



4. Process of oxidizing dibenzyl which comprises bringing molecular oxygen into intimate contact with the dibenzyl at a temperature between 150° C. and 284° C., whereby the oxygen acts directly on the dibenzyl with the formation of oxygenated aromatic compounds; and recovering the oxygenated compounds so formed.

1,502,942. WASHING MACHINE. JOHN DONALD DOWNIE, Winnipeg, Manitoba, Canada. Filed Feb. 27, 1922. Serial No. 539,607. 10 Claims. (Cl. 68—20.)

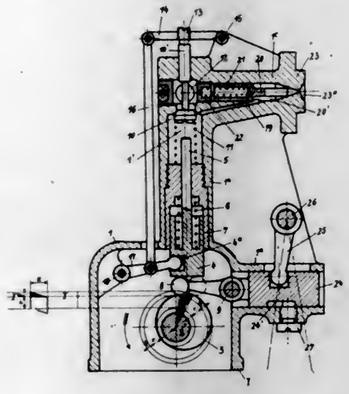


2. In a washing machine of the type embodying upper and lower relatively movable rubbers, the provision of means supporting the upper rubber for displacement from an operative to an inoperative position, with respect to the lower rubber, power driven means for actuating said rubbers and means acting automatically to render said power driven means substantially inoperative with respect to actuation of the upper rubber upon displacement of the latter to an inoperative position.

1,502,943. MOTOR SUPPORT. WILLIAM G. DUNN, Clarinda, Iowa. Filed June 16, 1921. Serial No. 478,086. 6 Claims. (Cl. 180—64.)

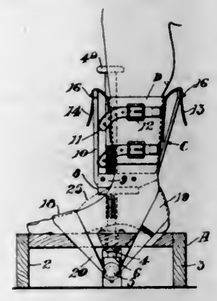
1. An automobile chassis having side bars, a motor between said side bars, transmission supporting bracket arms straddling the fly-wheel of the motor and having horizontal plate-like front ends at opposite sides of and secured to the motor crank case, a cross bar having a pair of rigid upstanding arms secured against the lower sides of said plate-like ends of the bracket arms, said cross bar having additional rigid arms projecting outwardly from the lower ends of said upstanding arms, said additional arms having their inner ends spaced downwardly from the upper ends of said upstanding arms to extend under said transmission supporting bracket arms, and means for rigidly securing the free ends of said additional arms to said side bars of the chassis.

1,502,944. VENTILATOR. DAVID S. EARHART, Wauchula, Fla. Filed June 1, 1923. Serial No. 642,811. 2 Claims. (Cl. 98—4.)



1. A ventilator comprising a hollow frustro conical shaped body portion, a depending nipple for engagement with a solid roof, and a dome shaped head formed on the body portion having an inner chamber therein communicating with said hollow body portion, said dome shaped head having its under surface convex, defining an annular flange and extending into an annular groove provided with port openings leading into the inner chamber of the head.

1,502,945. PROCESS OF MAKING COLLOIDAL BODIES. CARLETON ELLIS, Montclair, N. J. Filed Apr. 3, 1922. Serial No. 549,309. 10 Claims. (Cl. 260—3.)

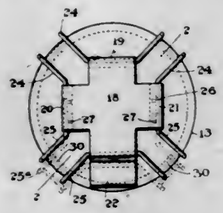


2. The process of making a colloid which comprises reacting on acetone and formaldehyde in the presence of disodium phosphate and caustic soda such reaction being continued to form a white transparent jelly.

1,502,946. FUEL-INJECTION DEVICE FOR DIESEL MOTORS WITHOUT COMPRESSORS. ERNST FREY, Troisdorf, near Cologne-on-the-Rhine, Germany. Filed Mar. 7, 1924. Serial No. 697,653. 4 Claims. (Cl. 123—140.)

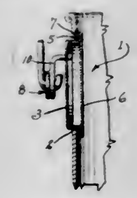
1. A fuel injecting device of the character described, comprising a casing, a plunger and a guide member therefor, a cam mounted beneath said guide member, a slide mounted for movement at right angles to said plunger, a regulating arm hinged at one end to said slide with its free end interposed between said guide member and cam, a swingingly-mounted arm loosely engaged in said slide, a suction valve movable in line with the plunger, and means operably connected with said guide and valve for actuating the latter.

1,502,947. ANKLE TENSION BOARD AND ARCH DEVELOPER. FRANK M. FRIESELL, San Francisco, Calif. Filed Nov. 14, 1922. Serial No. 600,793. 5 Claims. (Cl. 128—69.)



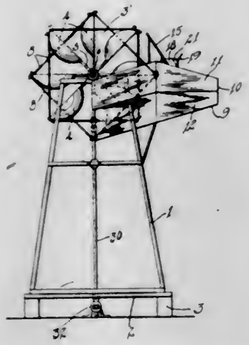
1. A device of the character described comprising a foot support, means for securing the heel and toes of the foot to said support, and means for exerting an upward pull on the leg of the foot at a point above the ankle.

1,502,948. COVER FOR RECEPTACLES. WILLIE GILL, Montreal, Quebec, Canada. Filed Mar. 30, 1923. Serial No. 628,747. 6 Claims. (Cl. 215—86.)



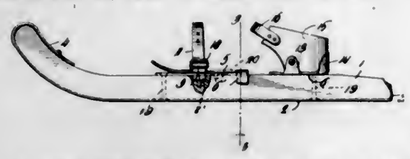
1. In a device of the character decsribed, a receptacle having a ridge formed integral with the neck and positioned on the outside of the receptacle, recesses cut in the underside of the ridge and parallel with the top of the receptacle, a cover adapted to fit over the top of the receptacle, a rubber or like gasket between the cover and

said top, a centre guide, cross-shaped to fit over said cover, a wire fixed to the centre guide by bending the ends of the cross guide over the wire, said wire being bent over the side of the ridge and adapted to engage



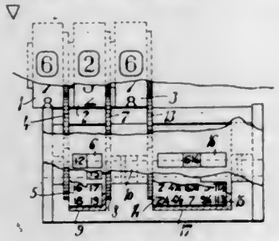
with the recesses, a second wire slidably mounted in said guide and adapted to engage with the remaining recesses in the ridge, and means integral with the guide to lock and unlock said second wire.

1,502,949. SANITARY EAR FOR BUCKETS. PERRY A. GILLIT, Rowden, Tex. Filed Apr. 5, 1923. Serial No. 630,143. 4 Claims. (Cl. 220—91.)



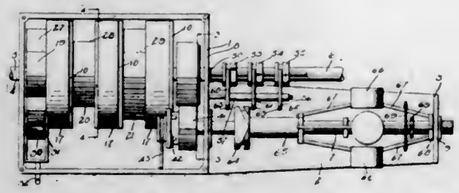
1. A bail ear of the class described comprising a cup-shaped member, a cover therefor, and a bail supporting member formed of wire carried by said cup-shaped member.

1,502,950. WIND MOTOR. HANS C. GREENBROOK, Chicago, Ill. Filed Feb. 5, 1923. Serial No. 617,632. 5 Claims. (Cl. 170—12.)



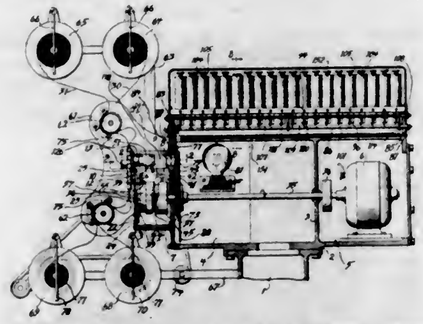
1. A device of the type described comprising a frame, a wind wheel carried by said frame, a wind shield adapted to cover the portion of said wind wheel that is turned against the wind, an auxiliary wind shield movably carried by said first named shield, a curved plate secured to said auxiliary shield, said curved plate being adapted to raise said auxiliary shield to cover a greater portion of the wind wheel when the wind exceeds a predetermined speed, said plate being hinged to said auxiliary shield, whereby it may be swung into inoperative position.

1,502,951. SKATE. JOHN HALVERSON, Madison, Wis., assignor of one-half to Charles E. Friday, Madison, Wis. Filed July 30, 1921. Serial No. 488,650. Renewed Feb. 20, 1924. 1 Claim. (Cl. 46—50.)



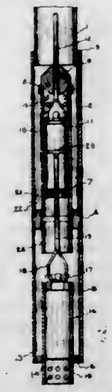
1. A skate comprising an elongated body, a nut embedded in said body, a wear plate covering said nut and having an opening to align with the opening in the nut, a toe plate slidably mounted upon said wear plate and being equipped with a slot, and a screw extending through the slot, wear plate and nut for retaining said toe plate in adjusted position.

1,502,952. CALCULATING MACHINE. HANS HERLITZ, Gothenburg, Sweden. Filed Apr. 9, 1923. Serial No. 630,938. 1 Claim. (Cl. 235—79.)



In a calculating machine, based on a definite numerical system, which machine comprises a plurality of counters, each including a plurality of figure wheels, the combination with some of the figure wheels of any of said counters, of figure wheels graduated according to a numerical system other than that upon which the machine is based, others of said first-mentioned figure wheels being connected to drums surrounding said second-mentioned figure wheels graduated according to said other numerical system, said drums being provided with apertures to cause the figures of said second-mentioned figure wheels to appear according to some definite rule.

1,502,953. AUTOMATIC TRANSMISSION FOR MOTOR VEHICLES. HENRY R. HOFFMAN, Chicago, Ill. Filed May 13, 1922. Serial No. 560,597. 3 Claims. (Cl. 74—97.)

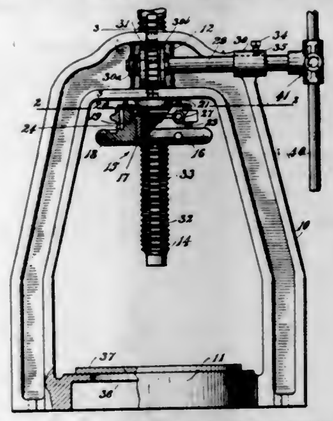


1. In a device of the character described, a sliding cam shaft, and means for intermittently moving said cam shaft longitudinally, said means comprising a plurality of fingers extending laterally of said shaft adjacent one end, a drum having a helical groove in the peripheral wall thereof at a relatively steep pitch, said groove in said drum being arranged to engage said fingers as said drum is moved longitudinally, said drum being mounted for rotation and with its axis in parallel relation to said cam shaft, means for rotating said drum, and means associated with said first named means for moving said drum longitudinally.

1,502,954. AUTOMATIC LIGHT-CONTROL APPARATUS FOR PHOTOGRAPHIC-PRINTING MACHINES. ALBERT S. HOWELL, Chicago, Ill., assignor to Bell & Howell Company, Chicago, Ill., a Corporation of Illinois. Filed July 25, 1921. Serial No. 487,225. 26 Claims. (Cl. 95—75.)

1. A photographic printing machine including feeding means operating constantly during the printing operation, a control member fed by said feeding means and having irregularities disposed in predeterminately selected arrangement thereon, a source of printing light, means for varying the printing light to predetermined degrees including a plurality of separately actuable adjustment devices, a plurality of electro-magnets for controlling actuation of respective adjustment devices, a plurality of circuit breaker devices, circuit connections whereby said electro-magnets are selectively controlled by said circuit breaker devices, said circuit breaker devices being normally in position to prevent actuation of said adjustment devices and individually controlled, to be caused to move into and out of position to effect actuation of said adjustment devices, by respective irregularities of the control member when it is in respective positions of its travel.

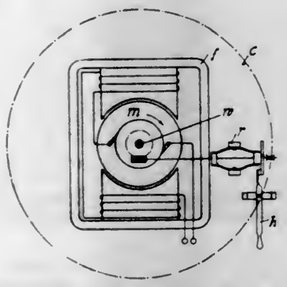
1,502,955. OIL-WELL PUMP. GROVER C. JOHNSON, Wichita Falls, Tex. Filed Jan. 11, 1923. Serial No. 612,129. 1 Claim. (Cl. 103—180.)



A pair of tubular members connected with a nipple having male and female threads, a reducing nipple in the lower end of the lower tubular member, a perforated tubular member extending downward from said reducing nipple, a tubular member extending upward from said reducing nipple, a tapered seat at the top of the last mentioned tubular member, a tubular member threaded into the first mentioned nipple and extending downward, a perforated tubular member threaded into the first mentioned nipple and extending upward, a close fitting tubular member slidably disposed in the last mentioned perforated tubular member, one of said valves attached to the top of said close fitting tubular member, and one of said valves disposed in the said tapered seat, a tapered ping removably disposed in the top of the last mentioned tubular member.

1,502,956. INSECTICIDE. PAUL R. JONES, Porterville, Calif., assignor to Balfour, Guthrie & Company, San Francisco, Calif., a Copartnership. Filed Apr. 27, 1921. Serial No. 465,012. 6 Claims. (Cl. 167—6.)

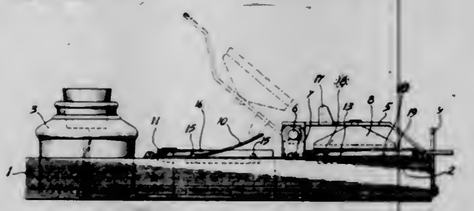
1. As a composition of matter, an insecticide comprising sodium naphthenate and a liquid vehicle therefor.



5. An insecticide emulsion comprising sodium naphthenates, cresol soap, a vehicle of mineral oil and an additional quantity of water sufficient to produce a smooth emulsion.

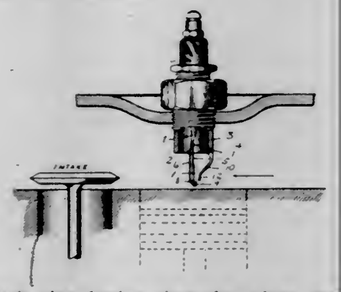
1,502,957. PRESS. LARNED T. KIMMERLE and DANIEL S. KIMMERLE, San Francisco, Calif. Filed May 5, 1923. Serial No. 636,962. 5 Claims. (Cl. 29—85.)

1. A press comprising a frame having a guide formed at one end thereof, an exteriorly threaded ram mounted for movement in said guide toward and from the other end of the frame, a hand wheel threaded on the ram adapted to bear against the inner end of the guide whereby a turning movement of said hand wheel in one direction will force said ram toward the other end of the frame, a rack and pinion feed mechanism for the ram operable independently of said hand wheel, said hand wheel being movable with said ram when said rack and pinion feed mechanism is being operated.



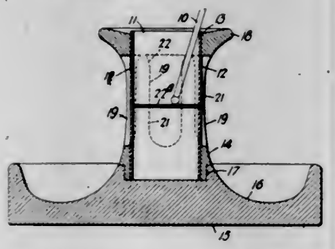
1,502,958. DEVICE FOR DRIVING SHAFTS AT A LOW AND UNIFORM SPEED BY AN ELECTROMOTOR. CARL LOTT, Horgen, Switzerland. Filed June 15, 1922. Serial No. 568,538. 1 Claim. (Cl. 172—36.)

Electric device for direct driving of shafts at low and uniform speeds, comprising an electromotor with its armature mounted upon said shaft and a centrifugal



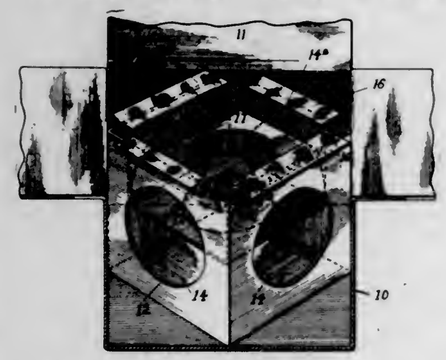
brake governor for said electromotor, and in which the magnetic field of the electromotor is supersaturated to a density of lines of force of 20000 and over per cm.², substantially as and for the purpose set forth.

1,502,959. FILM-SPLICING APPARATUS. JOSEPH H. MCNABB, Chicago, Ill., assignor to Bell & Howell Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 21, 1922. Serial No. 538,161. 18 Claims. (Cl. 154—42.)



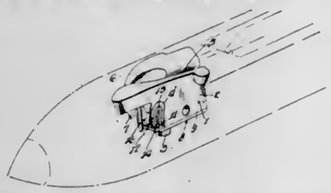
1. A film splicing apparatus including a base, film clamping means on the base comprising a clamp lever pivotally mounted on the base at an intermediate point for clamping overlapping film ends on one side of the lever axis, and film shearing means on said base and disposed on the other side of the lever axis and adapted to be actuated to shear with the movement of the lever in a direction out of its clamping position.

1,502,960. SPARK PLUG. EARL T. MARTIN, Proctor, Minn. Filed Apr. 1, 1922. Serial No. 548,844. 1 Claim. (Cl. 123—169.)



A spark plug having electrodes whose terminl are spaced apart laterally from each other, a resilient member rigidly fixed at one end to one of the electrodes for alternate engagement with the terminl of the electrodes.

1,502,961. MATCH SAFE. JACOB E. NEAHR, Hartsdale, N. Y. Filed May 7, 1921. Serial No. 467,726. 3 Claims. (Cl. 206—20.)

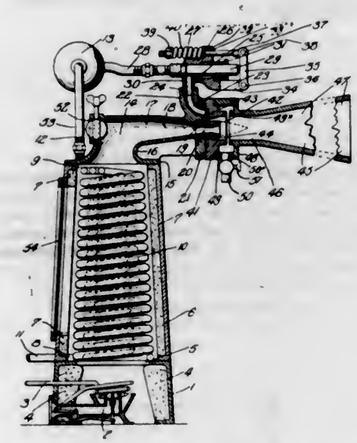


1. The combination of a pedestal having a suitable support and having apertures, and a match-container inserted in said support and comparatively narrow and high to support laterally matches upstanding therein, and having a match-striking surface exposed through the apertures, said match-container being rotatively adjustable to expose different portions thereof through the apertures, and comprising a permanent floor to support matches upstanding thereon within the apertured portion of said support, said apertures on all sides of the support and extending downwardly in a helical direction.

1,502,962. PACKING CRATE FOR HATS. BERTRAM PULVERMAN OSTERMAN, San Francisco, Calif., assignor to National Paper Products Company, San Francisco, Calif., a Corporation of California. Filed Feb. 23, 1924. Serial No. 694,597. 3 Claims. (Cl. 206—9.)

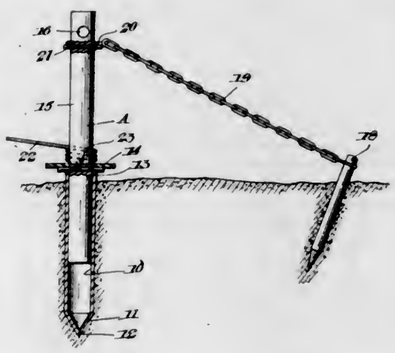
1. A packing crate for hats comprising a box-like container, a square frame arranged diagonally therein, the sides of said frame being formed with openings for the reception of hats, and a pair of removable supports suspended within the frame and extending different distances into the frame and each having an opening to receive a hat.

1,502,963. LOOM-SHUTTLE BLOCK. GEORGE R. PLOTT, Hillsboro, N. C. Filed Jan. 19, 1923. Serial No. 613,678. 6 Claims. (Cl. 139—220.)



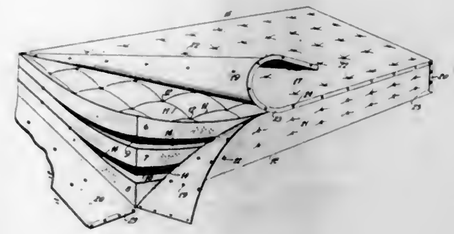
2. The combination with a loom shuttle threading block comprising a body having an anchoring stud upon its under side and provided with a slot for the passage of the filling, of tensioning means for the filling comprising a supporting member having an attaching portion removably fitted to the said stud and having also a tongue portion extending from the attaching portion beside one end of the body and overturned to provide a coacting lip, and a friction element comprising a piece of friction material anchored at one end between the lip and tongue and extending over the junction of the two and engaging at its other end between the said tongue and the said end of the body of the threading block.

1,502,964. FLUID-POWER GENERATOR. WILLIAM JOHN RODGERSON, Toronto, Ontario, Canada. Filed Mar. 23, 1922. Serial No. 546,054. 1 Claim. (Cl. 60—45.)



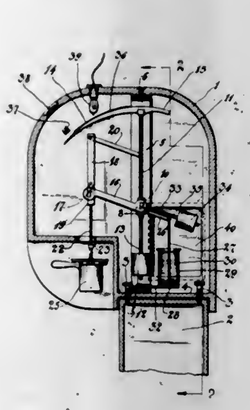
In a power generator, a furnace having a discharge outlet for the products of combustion, a steam boiler coacting therewith, a steam receiver for receiving the steam from the boiler, a nozzled chimney through which

the products of combustion pass, a steam duct leading from the steam receiver to discharge in proximity to the nozzle, an annular member surrounding the nozzle having its interior periphery contracted towards its inner end and having an annular recess formed in its



inner face to receive the steam from the steam duct, means for raising the steam pressure within the receiver to a predetermined point, and means for automatically discharging the steam through the steam duct when such predetermined pressure is reached.

1,502,965. STAKE WINDLASS. LESTER JOHN SEYLER, Port Arthur, Ontario, Canada. Filed Aug. 29, 1923. Serial No. 660,015. 1 Claim. (Cl. 254—150.)

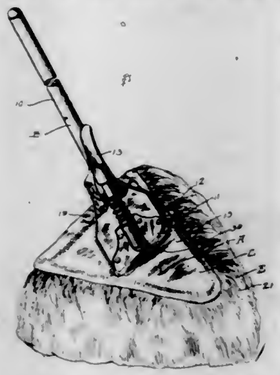


A device of the character described comprising a hollow anchoring stake pointed at one end and open at the other and adapted to be sunk in the ground, a flat top for the open end adapted to engage with a washer, a solid post adapted to fit into and rotate in said stake to form a detachable winding drum, means in the solid post for securing a cable thereto, a ring member loosely mounted on the solid post, a stop member carried by the post to limit the downward travel of said ring, and a retaining chain connecting the ring with a retaining post, an orifice in the solid post adjacent the top between the top and said ring, and a handle adapted to fit into said orifice whereby the solid post is rotated to wind theron a cable.

1,502,966. MATTRESS. HARRY SCHIMMEL, New York, N. Y. Filed June 18, 1923. Serial No. 645,977. 8 Claims. (Cl. 5—359.)

1. A mattress, comprising a pad, means for securing the material of the pad in the desired form, a tick or cover enclosing the pad, and means for securing the tick to the pad securing means.

1,502,967. ICE-CREAM-OVERRUN TESTER. HUGO HENRY SOMMER, Madison, Wis. Filed Nov. 12, 1921. Serial No. 514,705. 4 Claims. (Cl. 265—36.)

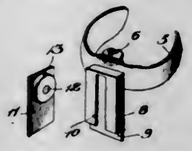


1. A device of the character described comprising a cup for holding ice cream, a pivotally mounted lever for supporting said cup, a weight for counter-balancing said cup and lever, a scale associated with said lever bearing legends designating percentages of overrun from zero to infinity per cent in ice cream, and gravity operated means for resisting the movement of said scale by an amount proportional to the displacement of said cup of ice cream, said weight and said gravity operated means adapted for adjustment to various sizes and weights of cups and various specific gravities of said compound.

1,502,968. POLISH MOP. HENRY T. TUCKER, Fort Smith, Ark. Filed May 8, 1922. Serial No. 559,385. 5 Claims. (Cl. 15—229.)

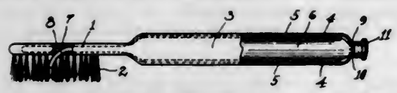
1. In a mop, a head including a fabric body, a form plate in said body, a flexible handle engaging strip hav-

ing one end connected to one face of the body intermediate the length of the body and at the other end movable



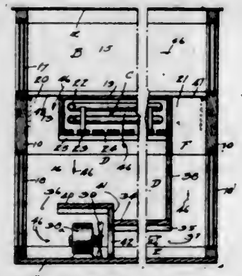
independent of the body, and swab strands carried by the body and arranged to extend from the opposite face of the body.

1,502,969. ANNEALING AND APPARATUS USED THEREIN. FRANK TWYMAN, London, England, assignor to Adam Hilger, Limited, London, England. Filed Dec. 13, 1921. Serial No. 522,038. 9 Claims. (Cl. 73—51.)



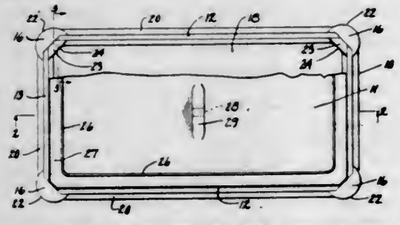
1. The method of ascertaining the time of relaxation of a substance by subjecting a piece of the same substance as that to be annealed to heat, maintaining the piece under conditions such that it is deformed a determined amount and applying stress tending to increase the deformation.

1,502,970. ARTIFICIAL DENTURE. AUGUSTUS S. VAN HOUTEN, Newark, N. J. Filed Aug. 4, 1923. Serial No. 655,702. 2 Claims. (Cl. 32—12.)



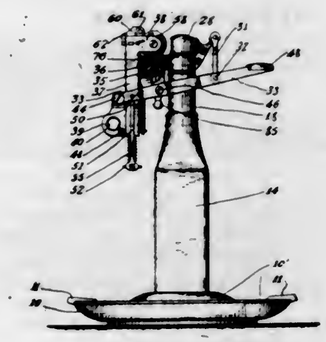
1. An attachment for artificial dentures comprising a hollow part attached to means removably connected with a natural tooth, said part having a slot in the side thereof and a second part attached to a denture body, said part comprising a plate having a circular member attached thereto and separated therefrom, whereby a slidable and pivotal connection is formed between said parts.

1,502,971. TOOTHBRUSH. ABRAHAM WALLACE, Oakland, Calif. Filed Feb. 16, 1922, Serial No. 536,916. Renewed Dec. 27, 1923. 1 Claim. (Cl. 15—136.)



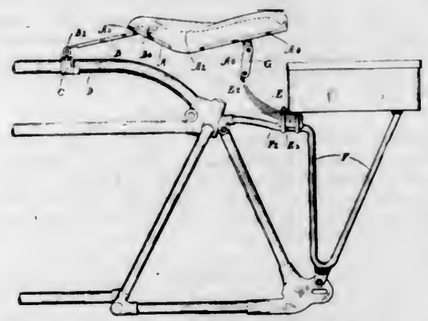
In a fountain brush, a hollow handle, a hollow head formed by an extension of said handle, bristles projecting laterally from said head, said head being formed with an opening located substantially centrally of said bristles, an elastic fountain tube in said handle for containing tooth paste, means on one end of said tube projecting through said opening for guiding tooth paste to the bristles, said handle being provided with elongated slots on opposite sides thereof, a plate on each side of said tube between the handle and the tube, each plate covering one of said slots, an internally and externally screw threaded nipple on the rear end of said fountain tube extending through the rear end of said handle, and a cap detachably secured to the nipple.

1,502,972. COMBINED COOLER DISPLAY CASE AND REFRIGERATOR. GEORGE C. AMEND, Des Moines, Iowa. Filed May 28, 1923. Serial No. 641,897. 6 Claims. (Cl. 62—37.)



5. A refrigerator show casing having four compartments therein arranged one above another, the two intermediate compartments terminating short of the ends of the show case so as to form a pair of vertical passageways, doors in said case for gaining access into said compartments, said passage ways connecting the upper and lower compartments together, a refrigerating apparatus in one of said compartments, a fan element in the lower compartment for drawing cold air from the refrigerating apparatus through the intermediate compartments and forcing it through the lower compartment, thence upwardly through one of the passageways and into the upper compartment and thence through the other of the pair of passageways whereby the cold air will travel in a complete circuit.

1,502,973. CARBURIZING BOX AND THE LIKE AND PROCESS OF MAKING SAME. PERCY A. E. ARMSTRONG, Loudonville, N. Y., assignor to Ludlum Steel Company, Watervliet, N. Y., a Corporation of New Jersey. Filed Dec. 2, 1921. Serial No. 519,495. 15 Claims. (Cl. 263—49.)



1. A metal box for use at high temperatures made up of plates joined together by castings, said castings extending on both sides of the plates.

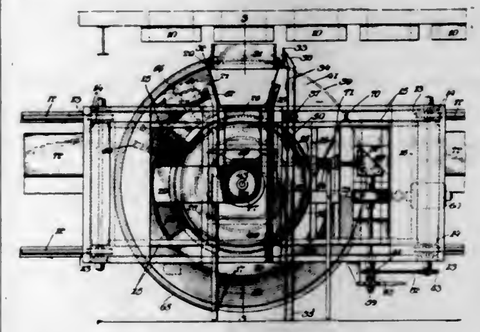
1,502,974. CIGAR CLIPPER AND LIGHTER. LOUIS V. ARONSON, Newark, N. J. Filed Feb. 12, 1921. Serial No. 444,442. 3 Claims. (Cl. 131—64.)

3. An apparatus of the class described comprising in combination a heavy circular base, a hollow standard acting as a reservoir rising therefrom, a burner tube carried by said standard, a wick therein, a cap for said tube over said wick, a frame supported on said burner tube, a lever pivoted on said frame, operative connections between said cap and said lever, sparking means adapted to ignite said wick, said sparking means being operated by said lever, means for rendering said sparking means inoperative, means for clipping a cigar by the actuation of said lever, said cigar clipping means comprising a pair of spaced plates containing an aperture for the cigar, a shear plate pivoted to said lever movable between said plate, and means permitting said shear plate to swing outwardly upon its pivot upon depression of the lever and return to normal position upon release.

1,502,975. SADDLE. STEPHEN LESLIE BAILEY, Bristol, England. Filed Sept. 19, 1922. Serial No. 589,055. 3 Claims. (Cl. 208—100.)

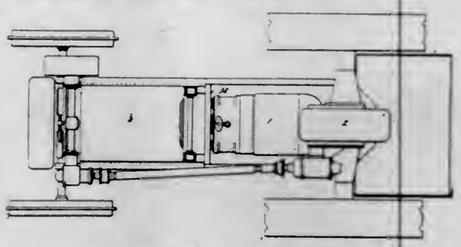
1. A saddle for a vehicle comprising in combination with the vehicle frame, a seat, a pan supporting the same, a leaf spring adjustably secured at its one end to the front part of the said pan and at its other end pivotally connected with the said vehicle frame, a laminated spring arm detachably secured to the said vehicle frame and adapted to resiliently support with its free end the rear end of the said pan, and a means for permitting relative movement between the free end of the said spring arm and the said pan.

1,502,976. TROUGHING SUPPORT FOR CONVEYER BELTS. CLARENCE KEMBLE BALDWIN, Chicago, Ill., and MARIUS JULIUS POS, New York, N. Y., assignors to Robins Conveying Belt Company, a Corporation of New Jersey. Filed Feb. 15, 1922. Serial No. 536,686. 11 Claims. (Cl. 198—192.)



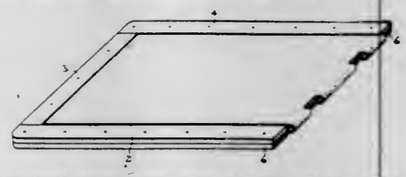
1. In a support for a conveyer belt, a base, a longitudinal alinement bar, a pair of spaced-apart brackets mounted on the base and slidably fitted to the bar, means whereby the brackets are secured to the base to permit of their lateral adjustment, standards on said brackets, and idler pulleys mounted to rotate between the standards.

7. In a conveyer-belt support having standards provided with apertured and threaded head portions, a shaft having threaded ends for engagement with said end portions, a pulley on said shaft, and ball-bearings between the shaft and the pulley, said shaft, with the pulley and bearings assembled thereon, being adapted to be mounted in and between the standards.



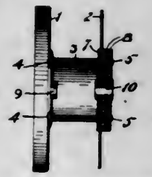
11. In a conveyer-belt support, two hollow idler pulleys each having an end head and a central hub portion, such portion at the open end of each pulley being internally threaded, in combination with a threaded coupling sleeve engaging the threads of the respective hub portions and uniting them in close relation to each other.

1,502,977. APPARATUS FOR QUENCHING COKE. CLARENCE K. BALDWIN, Chicago, Ill., assignor to Robins Conveying Belt Company, a Corporation of New Jersey. Filed Aug. 12, 1922. Serial No. 581,406. 20 Claims. (Cl. 202—11.)



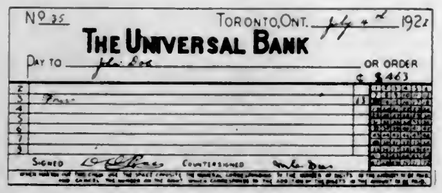
20. In a coke-quenching apparatus, a car structure, a coke-conveying platform rotatably supported on said structure, a coke delivery conduit located at one side of the structure and having at its lower end a lateral outlet overhanging the platform, a hood including a shell extending from the outlet side of the conduit and partially encircling the platform, quenching means arranged within said hood adjacent the outlet side of the conduit, a stack, a pipe connection between the hood and the stack, and means for discharging the coke from the platform in proximity to the opening of the shell.

1,502,978. ENGINE MOUNTING FOR STEAM-PROPELLED VEHICLES. GEORGE ALFRED BRYAN, Peru, Ind., assignor to Bryan Harvester Company, Inc., a Corporation of New Mexico. Filed Feb. 9, 1922. Serial No. 535,167. 6 Claims. (Cl. 180—56.)



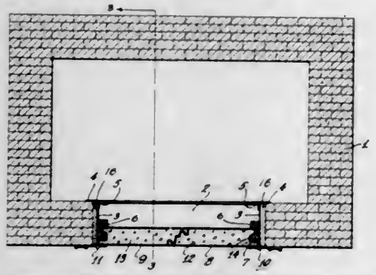
1. In a self propelled vehicle, the combination of a transmission case on the rear axle open at its front end, a unitary engine mechanism including cylinders, crank shaft and connecting rods, two bearings for the crank shaft, tie rods coupling the cylinders and bearings for the crank shaft, a yoke member on the rods removably attached to the front end of the transmission case and supporting the tie rods with the crank shaft within the opening, and means for supporting the front end of the engine.

1,502,979. BOOK COVER. ROBERT J. COPELAND, Toronto, Ontario, Canada. Filed Aug. 22, 1921. Serial No. 494,195. 3 Claims. (Cl. 281—29.)



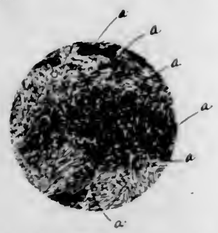
1. A book cover, comprising, a stiff board, a thin strip of reinforcing material covering the outer face of the board at the edge, a strip of a rigid wear-resisting material of lesser width than the aforesaid strip arranged on the outer face of said strip and at the outer edge thereof, said strips and board being rigidly secured together, and a board secured to the aforesaid board and fitting between the outer strips and overlapping the reinforcing strip.

1,502,980. SPOOL CONSTRUCTION. CHARLES H. CUNO, Meriden, Conn., assignor to The Cuno Engineering Corporation, Meriden, Conn., a Corporation of Connecticut. Filed June 9, 1922. Serial No. 567,050. 3 Claims. (Cl. 173—367.)



3. A reel or winding drum comprising two oppositely arranged sheet metal discs forming head-pieces, a hollow cylindrical metal hub connecting said head-pieces, with means for insulating said head-pieces from each other, said insulating means being located at one end of said hub and comprising a plurality of washers of insulating material, said hub and one head-piece being interlocked with one of said washers to prevent independent rotation, the adjacent disc being also interlocked with one of said washers to prevent separation of the parts.

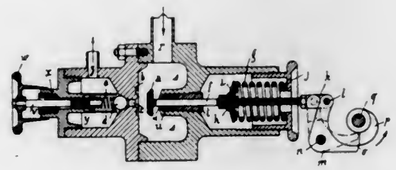
1,502,981. SAFETY BANK CHECK. WILLIAM RICHARD DAVIS, Toronto, Ontario, Canada, assignor of one-half to Thomas Tweddle, Toronto, Canada. Filed Mar. 10, 1923. Serial No. 624,152. 3 Claims. (Cl. 283—9.)



1. A safety bank check having a plurality of spaces for the reception of the written designation of the amount to be paid, such spaces being numbered to indicate the number of figures in the amount to be paid.

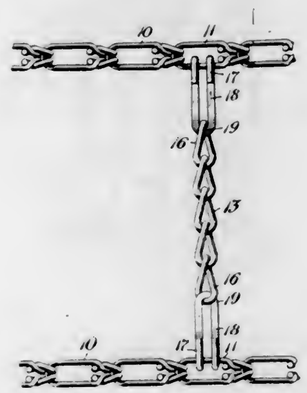
1,502,982. VAULT. RALPH H. DICK, Marietta, Ohio, assignor to The Safe-Cabinet Company, Marietta, Ohio, a Corporation of Ohio. Filed July 31, 1923. Serial No. 654,829. 3 Claims. (Cl. 109—2.)

1. In combination with a vault of fireproof construction and having an aperture therein to receive a suitable vestibule and door frame construction, the latter comprising a rectangular frame formed of sheet metal with external and internal flanges and being of a size adapted to enter said aperture in the vault, and means for sealing said vestibule and frame into said aperture in the vault, a door or doors pivotally mounted on said frame and adapted to cooperate therewith, said doors being formed of sheet metal and of hollow construction, a space between the walls thereof filled in with fire resisting material, the frame and doors respectively being provided with interlocking flanges of hollow construction filled with fire resisting material, said flanges cooperating to seal the vault aperture for heat resisting purposes.



1,502,983. PRODUCTION OF GRAY CAST IRON. PHILIPP AUGUST DIEFENTHÄLER, Heidelberg, Germany, assignor to the Firm Heinrich Lanz, Mannheim, Baden, Germany, a Copartnership. Filed Apr. 2, 1921. Serial No. 458,049. 6 Claims. (Cl. 22—200.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

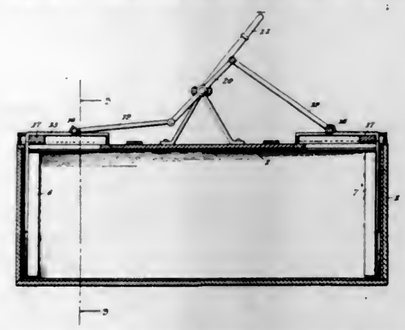
1. The method of producing gray cast iron having a uniformly distributed lamellar pearlite structure with moderate veinings of graphite and with little if any free



ferrite which consists in making the castings from an iron composition with a low content of carbon and silicon and in heating the mould to a temperature above normal to artificially retard the cooling of the castings therein and permit the pearlite structure to develop.

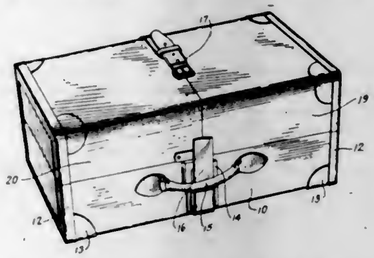
1,502,984. PERCUSSION PUMP. ROBERT ESNAULT-PELTERIE, Paris, France. Filed Oct. 22, 1923. Serial No. 669,932. 17 Claims. (Cl. 103—154.)

1. A percussion pump comprising a pump body and a striker disposed therein a stationary member having a conduit formed therein, the said striker being adapted to strike against the stationary member, whereby the fluid in the said pump body shall be discharged through the said aperture.



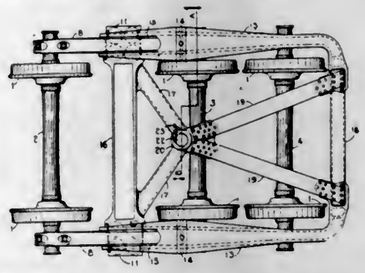
1,502,985. CONNECTER FOR TIRE CHAINS. JOHN H. EVERS, Irvington, N. J. Filed Apr. 11, 1924. Serial No. 705,722. 3 Claims. (Cl. 24—233.)

3. In a tire chain comprising side chains and a tread chain, a connecter comprising a U-shaped shank with hooks at its ends and a U-shaped spring on the shank with its ends under the hooks, the arms of the shank being spaced apart to receive the end link of the tread chain, the connecter being adapted to be snapped into engagement with the side chain and when detached from the side chain being readily detachable from the tread chain by depressing one of the ends of the spring.



1,502,986. WASHING MACHINE. WALTER GISH and HERBERT L. THOMAS, Palco, Kans. Filed Apr. 17, 1922. Serial No. 553,651. 2 Claims. (Cl. 61—37.)

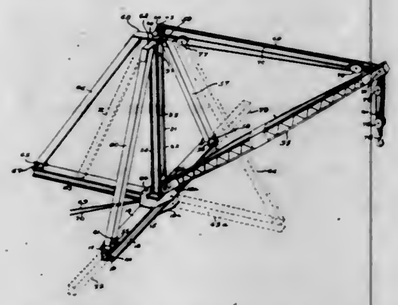
1. In a washing machine, comprising a tub rectangular in shape, reciprocating plungers positioned in opposite ends of the tub, a rocker arm positioned on top of the tub, means for connecting the opposite ends of the rocker



arm to the reciprocating plungers and guide means for the reciprocating plungers positioned on top of the tub at opposite ends of same.

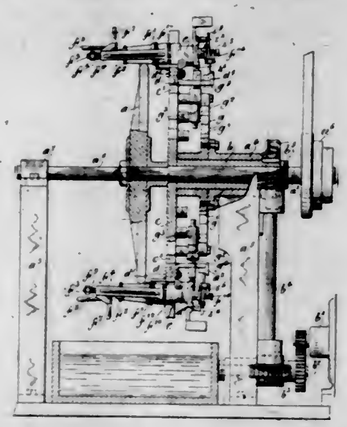
1,502,987. TRAVELING BAG. SAMUEL GLASS and SAMUEL WOHL, Newark, N. J. Filed June 5, 1922. Serial No. 565,892. 2 Claims. (Cl. 190—48.)

1. A traveling bag comprising an elongated rectangular base having raised inner walls, projecting above its outer walls, cover elements hingedly engaged at the ends of said base, said cover elements when closed meeting at approximately the center of the structure, on a line perpendicular to the walls of the bag, the outer walls of said cover elements extending past the inner walls and adapted to make contact with the outer walls of said body, and a single strap so disposed as to cover the joint between said cover elements.



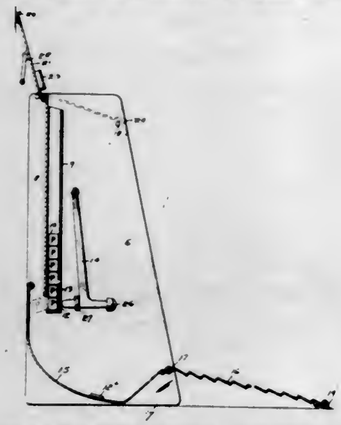
1,502,988. SIX-WHEEL CAR TRUCK. ERNEST G. GOODWIN, New York, N. Y., assignor to John A. Pilcher, Roanoke, Va. Filed June 21, 1921. Serial No. 479,329. 22 Claims. (Cl. 105—195.)

1. In a six-wheel car truck, a pair of side frames disposed without the lines of the truck wheels and resting on the oil boxes of two adjacent axles, a pair of load-receiving equalizing members disposed without the lines



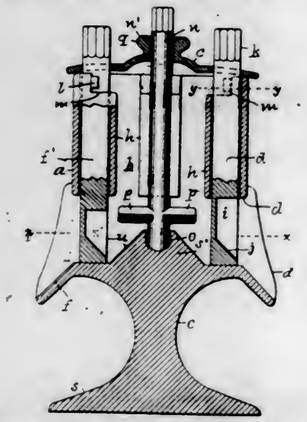
of the truck wheels, one end of said load-receiving equalizing members being supported by said side frames and the other end by the oil boxes of the third axle, all of the superimposed car body loads being transmitted direct to said load receiving equalizing members.

1,502,989. STIFF-LEG DERRICK. AMOS S. HEFFRON, Philadelphia, Pa. Filed June 25, 1921. Serial No. 480,410. 6 Claims. (Cl. 212—58.)



1. A derrick including a transversely extending front sill; a rear sill pivotally connected to the front sill; a mast in pivotal connection with the front sill; a boom pivotally connected to said mast; a stiff leg pivotally connected to said mast and connected to said rear sill and arranged to swing therewith; attaching means for pivoting said rear sill forward of said front sill; and lateral stiff legs pivotally secured with respect to the mast and detachably secured to the front sill at opposite sides of the mast whereby either of said stiff legs can be detached from the front sill and moved into position to permit the boom to swing to the rear of the front sill, and the rear sill to be swung and mounted forward of the front sill; substantially as described.

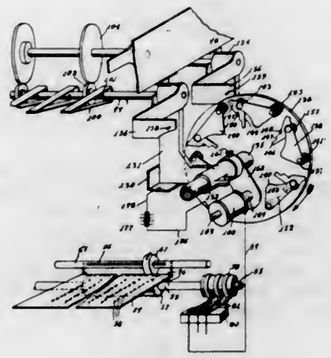
1,502,990. GLASS-CUTTING MACHINE. EDWARD J. KIEFER, New York, N. Y. Filed Feb. 1, 1923. Serial No. 616,268. 19 Claims. (Cl. 51—107.)



1. In a machine of the character described, the combination of a grinder, a rotatable carrier concentric with the grinder, a holder for the article to be treated mounted movably on the carrier, means for moving the holder so as to move the article to be treated into and out of contact with the grinder, and means to rotate the holder, step by step, on its axis when the article to be treated is out of contact with the grinder.

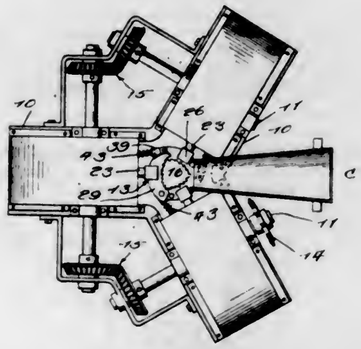
1,502,991. CHILD'S EDUCATIONAL APPLIANCE. GOTTLIEB L. E. KLINGBEIL, Omaha, Nebr. Filed Dec. 26, 1923. Serial No. 682,733. 4 Claims. (Cl. 35—9.)

1. A child's education appliance comprising a bank of magazines adapted to receive letter bearing blocks and open laterally at their lower ends and a common ejecting mechanism for all of said magazines shiftable to operative position with respect to each of them.



1,502,992. SANITARY DISPENSING MEASURE. CLIVE W. LANPHERE, Brooklyn, N. Y. Filed July 1, 1922. Serial No. 572,120. 13 Claims. (Cl. 221—106.)

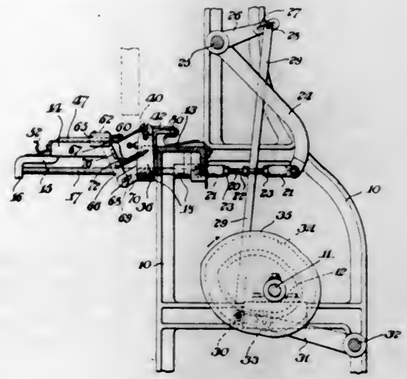
1. A dispenser for granular materials comprising a magazine having a top and a bottom, a cylindrical socket disposed between the top and bottom and at one side of said magazine, said socket having inlet and outlet openings, a measuring spindle within said socket and having a measuring pocket cooperating with said openings, upon rotation of said spindle, to receive and deliver granular material, and means for limiting the rotation of said spindle.



1,502,993. ROTARY SWITCH ELECTRICAL TIMED SORTER. WILLIAM W. LASKER, Brooklyn, N. Y., assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York, N. Y., a Corporation of Delaware. Filed Dec. 19, 1919. Serial No. 346,121. 20 Claims. (Cl. 83—92.)

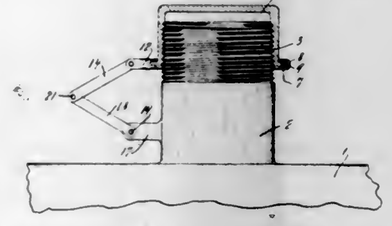
1. In combination, a rotary card analyzing member comprising insulated contact members adapted to register with the index point locations of a card; a pressure member adapted to press against and contact said contact members; sorting stations adapted to receive cards from said members; an electrically operated means electrically

connected with the contact member corresponding to the perforation of the card destined for such compartment, for causing the cards to enter the stations.



1,502,994. CORN-HUSKING APPARATUS. FRANK LEE, Clearwater, Nebr. Filed June 27, 1923. Serial No. 648,027. 28 Claims. (Cl. 130—5.)

1. In corn husking apparatus, gripping means adapted to grip the husks of an ear of corn introduced therebetween at points spaced about the periphery thereof, and means for moving said gripping means in divergent relation from the point of engagement with the husks to thereby strip the husks from the ear and eject the ear, said gripping means including pairs of jaws operated by the engagement thereof with an ear of corn to grip the husks of the corn therebetween and to thereby draw the husks from the ear and strip the ear during such divergent movement.

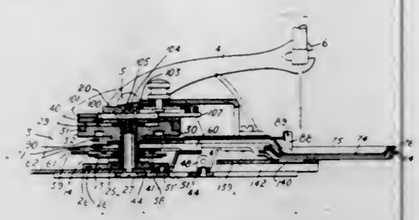


1,502,995. CIGAR-BUNCHING MACHINE. BERNARD LIBERMAN, LEON LIBERMAN, and WILLIAM M. REICHART, Philadelphia, Pa.; said Leon Liberman and said Reichart assignors to said Bernard Liberman. Filed Aug. 2, 1919. Serial No. 315,000. 5 Claims. (Cl. 131—42.)

5. In a cigar bunching machine, in combination with the usual bunch rolling table, apron, cooperating roller and reciprocating roller support, a brush for cooperating with the apron, brush-supporting arms having pin and upwardly inclined slot connection with the reciprocating support and spring controlled, a stop on the stationary table and an adjustable stop on the reciprocating support

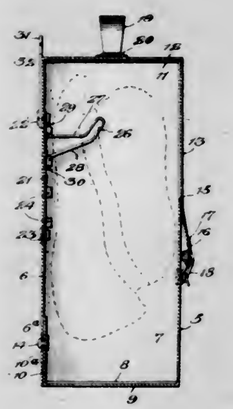
for engaging a brush supporting arm, one stop effective in certain positions of the reciprocating support and the other stop effective in other positions of said support.

1,502,996. HINGED CAP. MARTIN B. LOETSCHER, Hollywood, Calif. Filed Dec. 4, 1922. Serial No. 604,951. 5 Claims. (Cl. 220—32.)



1. Fastening means for a cap engaging a port member in an axial direction, comprising a ring loosely fitting on the cap, a tongue and groove engagement between the cap and the ring, and flexible means for securing the ring to the port member, comprising links pivotally engaging the cap and the port member, and a pivotal engagement between the links.

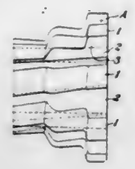
1,502,997. AERIAL TRANSPORTER. HARRY HERBERT BLAKEMORE MARRIAN and ERNEST EDWARD CARVER, Vancouver, British Columbia, Canada. Filed Dec. 23, 1922. Serial No. 608,783. 9 Claims. (Cl. 212—24.)



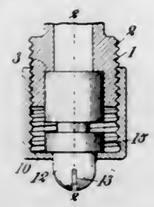
1. The combination with a series of corner supports of cable means extending between the corner supports, a transversely arranged strut carried by said cables, said cable means having load carrying portions thereof extending horizontally between opposite ends of the strut.

1,502,998. ATTACHMENT FOR SEWING MACHINES. ALBERTUS B. MATTINGLY, New York, N. Y. Filed Dec. 20, 1919. Serial No. 346,235. 11 Claims. (Cl. 112—77.)

1. In apparatus of the character stated, the combination of a base plate having stud projection receiving holes therein, a tubular stud having projections for engaging said holes, to prevent rotary movement of the stud, said stud having a head provided with laterally disposed springs, a lower cam having a slotted hub rotatably mounted upon said stud, an upper cam having a recessed top and a depending sleeve provided with ears rotatably mounted upon said stud, the ears of said sleeve engaging with the slots of said hub and the springs of said head engaging the walls of said recessed portion and means passing through said base plate, stud and head for locking said cams in rotative relation.



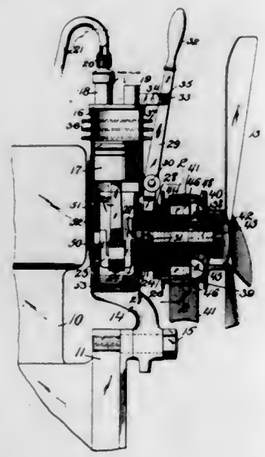
1,502,999. HATBOX. PEARL E. MILLER, Nescopeck, Pa. Filed Mar. 9, 1923. Serial No. 623,979. 2 Claims. (Cl. 206—8.)



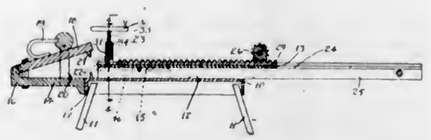
1. A hat box comprising a collapsible body adapted to be opened from its flat condition to form a cubical receptacle, a metal stay fixed to the inside rear wall of the receptacle, a hat supporting hook connected to said stay, a hanger on the outside of said wall and also secured to said stay through the back wall of the receptacle.

1,503,000. MILLING CUTTER. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 24, 1921. Serial No. 524,586. 9 Claims. (Cl. 29—103.)

1. A milling cutter for cutting a predetermined contour other than a straight line, comprising a plurality of generally longitudinal but inclined teeth each having a cutting face provided with a contour different from the predetermined contour but adapted to cut the predetermined contour as the cutter is rotated, the outer surface of each tooth behind the front cutting face being relieved along lines extending backward, inward, and to the right or left from the front cutting edge.

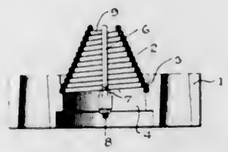


1,503,001. NOZZLE TIP. JOHN D. MURRAY, San Francisco, Calif. Filed Nov. 19, 1923. Serial No. 675,511. 6 Claims. (Cl. 91—45.)



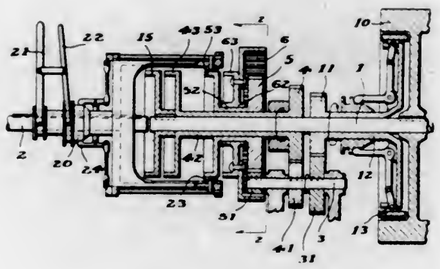
1. A discharge nozzle comprising a body provided with cylindrical axially aligned inlet and discharge bores having parallel walls, the discharge bore being of greater diameter than the inlet bore, and a spherical member loosely held within said discharge bore at a point inwardly from the discharge end of the discharge bore for breaking up the stream flow passing therethrough.

1,503,002. PUMP FOR INTERNAL-COMBUSTION ENGINES. STEPHEN NAGY, Irvington, N. J., assignor of one-half to Nikolas Viehmann, Newark, N. J. Filed Apr. 11, 1923. Serial No. 631,470. 4 Claims. (Cl. 230—27.)



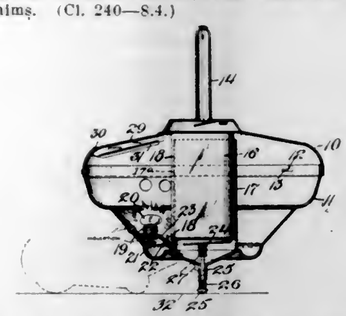
1. A pump having its casing provided with a bearing for supporting a fan shaft, a fan pulley, a clutch for engaging the pulley with the shaft, all of said associated parts being supported by the pump casing.

1,503,003. DEVICE FOR REMOVING RIND FROM BACON. ALFRED J. NEHRING, Cincinnati, Ohio, assignor to The H. H. Meyer Packing Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Apr. 15, 1924. Serial No. 706,780. 4 Claims. (Cl. 146—130.)



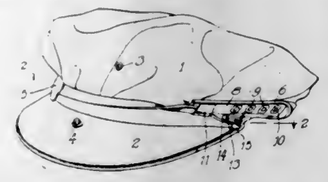
1. A device of the class described comprising a pair of relatively movable tables, an independent means on each of the tables for fixedly securing different parts of a separable objects, and means for moving the tables relatively to one another for separating the different parts of the object.

1,503,004. VAPORIZER. JOHN J. PARKER, Paterson, N. J. Filed Apr. 8, 1922. Serial No. 550,583. 2 Claims. (Cl. 48—180.)



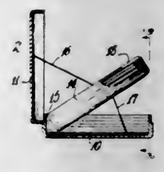
1. In a device of the kind described, a base, a spiral spring wound in the form of a truncated cone, the base of which cone is supported by the aforementioned base, the end of the spring remote from its base being extended axially through the cone and adjustably attached to the base.

1,503,005. VARIABLE-SPEED TRANSMISSION MECHANISM. ORSON M. POPE, Seattle, Wash. Filed Mar. 14, 1923. Serial No. 625,104. 5 Claims. (Cl. 74—59.)



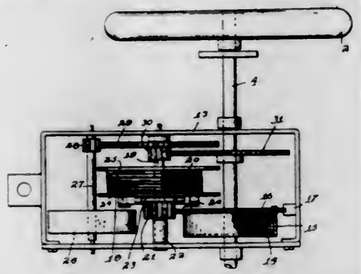
1. In combination with a driving shaft and a driven shaft, power transmission mechanism connecting said shafts including a reverse gear and a forward gear adjacent thereto, a driving pinion in mesh with each of said gears, concentric sleeves surrounding said driving shaft and operatively connected each with one of said gears, and selective means for connecting either said forward or said reverse gear sleeve to the driven shaft.

1,503,006. ILLUMINATED TOP. PAUL J. RAUSE, South Orange, N. J. Filed Nov. 21, 1923. Serial No. 675,980. 6 Claims. (Cl. 240—8.4.)



2. A top having an illuminating device therein operated by an electric circuit said circuit including a make and break device operated to complete the circuit when the weight of the top rests on the peg.

1,503,007. ADJUSTABLE CAP. JULIUS ROSENZWEIG, New York, N. Y. Filed Nov. 26, 1923. Serial No. 677,053. 1 Claim. (Cl. 2—197.)

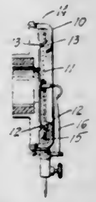


A cap having a crown, a visor and separated skirt portions independent of the sweat band, reinforcing members secured to the skirt portions and having a series of holes, loops on the underside of said skirt portions, a strap guided at it ends in said loops with its ends fastened to opposite edges of the visor, and pivoted hooks on the ends of said strap and engageable in the holes of said reinforcing members.

1,503,008. CIGARETTE AND MATCH BOX. ANTONINA RYBICKY, New London, Conn. Filed Oct. 26, 1922. Serial No. 597,023. 1 Claim. (Cl. 206—48.)

A package of cigarettes and matches including a main box, a cover hinged thereto, a relatively small match receptacle extending along one wall of the box, thereby leaving a cigarette compartment to one side thereof, said match receptacle being hinged at one end to the side of the box to which the cover is hinged and having its opposite end in close proximity to te opposite side of the box and open for the removal of matches, the top wall of said receptacle at its open end being formed with a finger notch, and a pair of tapes connected at one end to the top and bottom faces respectively of said match receptacle and at opposite ends respectively to the cover and the bottom of the box, whereby upon raising the lid, the matches are raised to an accessible position, while the cigarettes remain undisturbed in their compartment.

1,503,009. TOY VEHICLE. EDWARD S. SAVAGE, Rochester, N. Y. Filed May 21, 1921. Serial No. 471,402. 7 Claims. (Cl. 208—38.)



1. A wheeled toy vehicle comprising a steering mechanism, a propelling mechanism, and a cable connected with the propelling mechanism for effecting the propelling of the vehicle through a longitudinal movement of the cable and connected with the steering mechanism between its ends to cause the latter to shift when the cable is moved laterally from a point beyond the connection with the steering mechanism.

1,503,010. INDICATING SIGNAL FOR VEHICLES. ARTHUR C. SCHROEDER, Syracuse, N. Y. Filed Dec. 28, 1920. Serial No. 433,574. 1 Claim. (Cl. 177—329.)

An indicating signal for vehicles including a casing having longitudinal and transverse partitions dividing the casing into end chambers and front and rear middle chambers, the transverse partition having a light transmitting "stop" symbol, a front plate having light transmitting "right" and "left" direction symbols in front of the end chambers, and a light transmitting "warning" symbol in front of the front middle chamber in alinement with the "stop" symbol and arranged to coact with either of the direction symbols, and means for illuminating a symbol or symbols.

1,503,011. BALANCED DIAPHRAGM FOR SOUND TRANSMITTERS. DAVID A. SEALEY, New York, N. Y. Filed July 8, 1922. Serial No. 573,613. 2 Claims. (Cl. 181—31.)

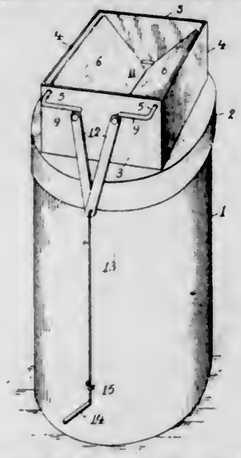
1. In a sound transmitting apparatus, a diaphragm, clamping means for the diaphragm rigidly engaging the opposite faces of the diaphragm inward of its periphery and disposed concentric to the center of the diaphragm whereby the perimeter of the diaphragm may flex, means located adjacent the center of the diaphragm whereby force may be applied thereto to vibrate it, and means engaging the diaphragm adjacent its perimeter for approximately counter-balancing said force.

1,503,012. AUTOMOBILE WHEEL CHAIN MECHANISM. ANGELO SERAFINI, Erie, Pa. Filed Jan. 17, 1924. Serial No. 686,753. 3 Claims. (Cl. 152—14.)

2. In an automobile wheel chain mechanism, the combination of a spoke attaching means comprising side plates, one of the ends of the plates having a hook; a chain secured to the similar end of the other plate and arranged on the hook, the opposite ends of the plates having a chain loop securing means comprising a hook on one plate and a ring on the other plate; and a chain having a link arranged over the hook with the opposite end of the chain extending through the ring over the hook.

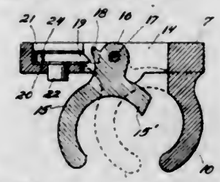
1,503,013. PROCESS OF MAKING SODIUM SULPHIDE. EARL BURNARD ALVORD, Cleveland, Ohio, assignor to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 15, 1922. Serial No. 561,020. 3 Claims. (Cl. 23—13.)

1. Process of purifying solutions of sodium sulphide containing sodium sulfate which comprises treating such solutions with lime and hydrogen sulphide in quantity sufficient to convert the sodium sulfate to sodium sulphide.



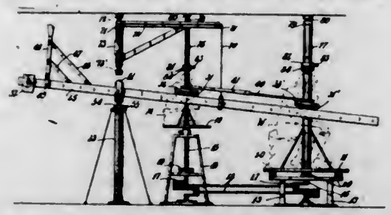
1,503,014. BACK FOR BRUSHES. HANSEL S. BAIRD, Denver, Colo. Filed May 31, 1922. Serial No. 564,779. 2 Claims. (Cl. 15—176.)

1. The combination with a brush comprising a handle and looped bristle-supporting member having its ends secured in one end of the handle, bristles radiating from said member, of a back on one side of the brush, means securing the back to the brush comprising hooks projecting from either end of the back, one of said hooks engaging the bristle-supporting member at the loop thereof and the other hook extending partially around the body of the handle.



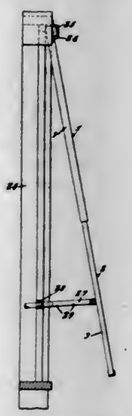
1,503,015. RECEPTACLE COVER. SIDNEY G. BARNSTEAD, Cambridge, Mass. Filed Feb. 1, 1923. Serial No. 616,273. 2 Claims. (Cl. 220—36.)

1. A receptacle cover comprising a member for the open top of the receptacle having a rectangular opening through it, four walls rising from the edges of said opening, two trap doors hinged close to opposite walls, resilient means connected with said doors to urge their free edges together, the width of said doors being in



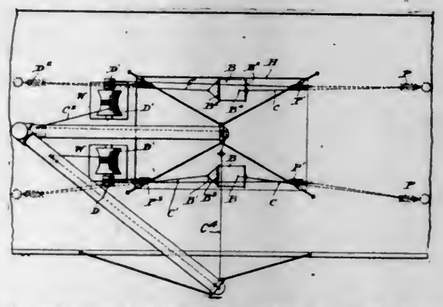
excess of the distance between their hinges to render them angularly disposed relative to each other, and means operated by the foot for separating said edges.

1,503,016. BOTTLE HOLDER. GEORGE A. BARTON, Kansas City, Mo. Filed Apr. 9, 1923. Serial No. 630,828. 1 Claim. (Cl. 232—41.)



A bottle holding device comprising a main plate portion, a curved retaining finger rigid with said main portion and projecting outwardly therefrom, a curved movable bottle maintaining finger pivoted intermediate its ends to said main plate portion and provided with a lock shoulder adjacent its pivotal point, one end portion of said movable finger being adapted for receiving engagement with the neck of a bottle in cooperation with said rigid finger, the other end portion of said movable finger being operated by the insertion of a bottle between said fingers to swing said movable finger into bottle retaining position, and a spring locking device housed within said main body portion and adapted to spring automatically into locking engagement with the shoulder of said movable finger to hold the latter in bottle retaining position.

1,503,017. POINTING MACHINE. ANTON BASKY, New York, N. Y. Filed Nov. 10, 1922. Serial No. 600,175. Renewed June 4, 1924. 5 Claims. (Cl. 33—174.)



1. A machine of the type set forth comprising a pair of turntables vertical cranked shafts on which said turntables are mounted, connecting rods extending between said shafts whereby the latter may be caused to rotate in unison a work beam, a universal joint mounting for said work beam, a pair of pointers mounted on said work beam, and means for adjusting said pointers in unison along the work beam while maintaining their proportionate distances from the fulcrum point of the latter.

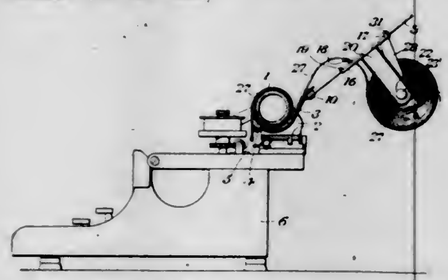
1,503,018. SCREEN AND STORM WINDOW. ARTHUR J. BEECHLER and GEORGE L. MCKAY, Detroit, Mich. Filed Oct. 17, 1921. Serial No. 508,160. 2 Claims. (Cl. 189—76.)

1. A window sash comprising an L-shaped member including a tubular body having flanges, the body being cut at a forty-five degree bevel, and the flanges being cut at right angles to the axis of the body, said member being folded to give it the aforesaid L-shape to bring the edges of the forty-five degree cut together, and to bring into overlapped relation the ends of the flanges formed by said rectangular cut.

1,503,019. UNLOADING APPARATUS. JOHN BOMBARDI, Rosebank, N. Y. Filed Sept. 19, 1922. Serial No. 589,211. 1 Claim. (Cl. 214—12.)

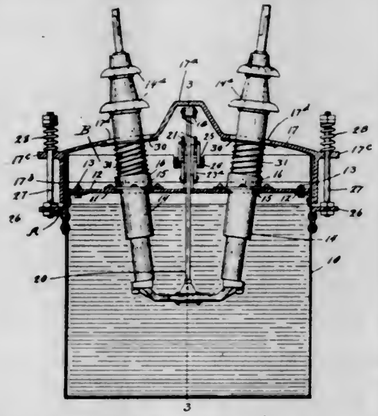
An unloading apparatus for vessels including in combination with the hold having a hatchway, an unloading receptacle having a bail at one end and a door constituting a dumping bottom at the other end, a cable anchoring member on one side of the receptacle, a draw cable attached to the bail, fixed pulleys located in remote portions of the hold and having the draw and drag cables passing thereover, a reversible winch adjacent the hatchway adapted to be alternately connected with the draw and drag cables, and a hoisting cable positioned above the hatchway and adapted to be ttached to the bail of the receptacle when the draw and drag cables have been detached therefrom to life the receptacle out of the hold.

1,503,020. BUCKLE BASE. ARNOLD V. BROWN, Worcester, Mass., assignor to American Narrow Fabric Company, a Corporation of Massachusetts. Filed July 22, 1922. Serial No. 576,783. 1 Claim. (Cl. 24—191.)



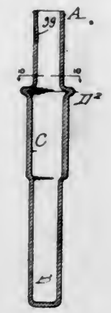
As an article of manufacture, a blank for a buckle base plate comprising a flat plate of sheet metal furnish-

ing a broad surface for receiving and supporting a tape thereon in flat condition, having diverging ends and provided with two opposite flat arms projecting in the same plane, from the edges of said ends, at a distance from each edge of said plate, said arms extending at right angles therefrom and then extending inwardly toward each other to form two pivot ends in alignment with



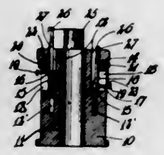
each other at a distance from the point at which the arms are connected with the plate, whereby said arms are located largely in the space left by the shaping of the ends of the plate to diverge from each other, and whereby said arms can be bent away from the plate at any desired angle, leaving their ends in alignment with each other and at a distance from the plate to constitute pivots for a clamping plate.

1,503,021. TYPEWRITING MACHINE. HAROLD MCD. BROWN, Groton, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed May 13, 1922. Serial No. 560,758. 19 Claims. (Cl. 197—133.)



1. The combination with a typewriting machine having a traveling carriage, of a paper roll supporting shaft, end and intermediate shaft-carrying members movable in unison with the carriage, and means whereby said intermediate and end members exert pressure on the shaft transversely of said shaft.

1,503,022. ELECTRIC SWITCH. GEORGE A. BURNHAM, Saugus, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Company, a Corporation of Massachusetts. Filed June 27, 1921. Serial No. 480,559. 9 Claims. (Cl. 200—150.)

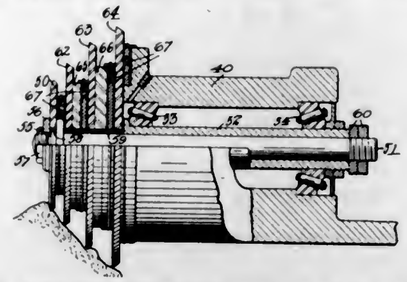


1. An electric switch having a casing, stationary and movable switch members and operating mechanism disposed within and carried by said casing, and a movable cover free from said switch members and operating mechanism yieldingly supported on said casing.

1,503,023. METHOD OF MAKING ARTICLES OF PRESSED METAL. HJALMAR G. CARLSON, Worcester, Mass., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass., a Corporation of Massachusetts. Filed Dec. 15, 1922. Serial No. 607,195. 7 Claims. (Cl. 29—148.2.)

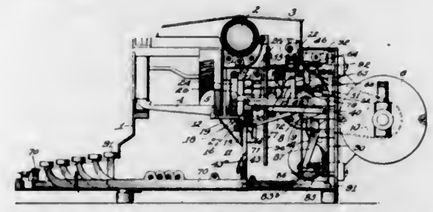
1. The method of making a long hollow article of pressed metal having a central portion with reduced ends, which consists in drawing out a blank of sheet metal to a general cylindrical cup-shape having a closed end and an open end, reducing the diameter and the thickness of metal of the open end by a series of steps, reducing the diameter and thickness of the extreme closed end thereof, leaving an intermediate portion between the open and closed ends of the cup, and then further drawing out the extreme ends without materially modifying the thickness of the intermediate portion.

1,503,024. AUTOMATIC HAND KNITTING MACHINE. JULIA CHAPATTE, Tuxedo Park, N. Y. Filed Apr. 15, 1922. Serial No. 553,052. Renewed Dec. 6, 1923. 3 Claims. (Cl. 66—21.)



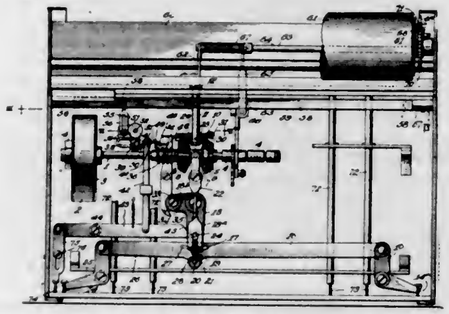
1. A device of the class described comprising a cylindrical body, a series of needles spaced around the axis of said body and projecting from one end thereof and being located in sockets formed in said body, said needles being parallel to the axis of the said body and movable longitudinally of themselves thereon, hooks and latches on said needle, said latches being adapted to be closed on said hooks on inward movement of said needles in said body, pins on said needles projecting radially outward through slots in said body said slots leading from the said sockets, a ring rotatable on said body, a pair of cam projections on said ring adapted to engage said pins to depress said needles, springs coiled around the inner ends of said needles and urging the same outward

---



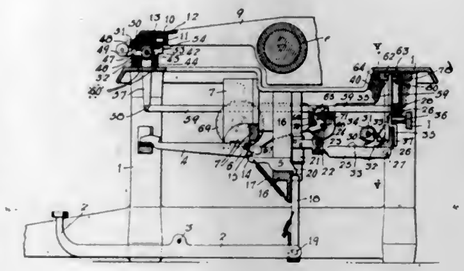
1,503,025. [WITHDRAWN.]

1,503,026. GRANITE-WORKING TOOL. ELROY ALBERT CHASE, Northfield, Vt. Original application filed Feb. 11, 1921, Serial No. 444,221. Divided and this application filed May 29, 1923. Serial No. 642,363. 6 Claims. (Cl. 125—37.)



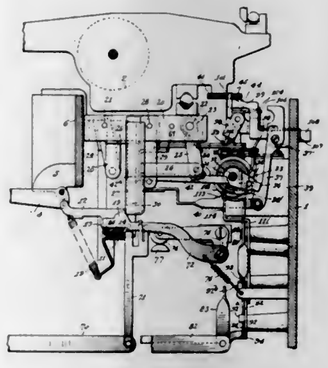
1. A granite working tool comprising a shaft, a supporting bearing in which said shaft is rotatably mounted, a work engaging disc mounted in fixed angular relation on said shaft, and additional discs mounted for free and independent rotation on said shaft.

1,503,027. TYPEWRITING MACHINE. MANSFIELD C. CRAWLEY, Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif., a Corporation of California. Filed Aug. 29, 1917, Serial No. 188,770. Renewed Dec. 3, 1921. Serial No. 519,804. 30 Claims. (Cl. 197—82.)



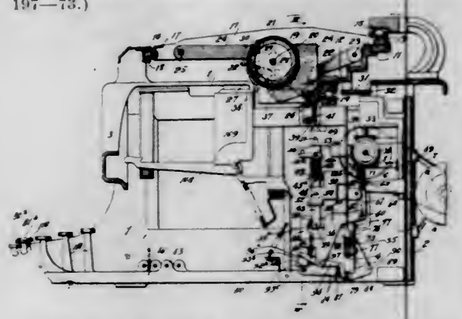
1. In a typewriting machine, a power-driven type-bar actuator, means for moving the carriage letter-spacing from said actuator, means for locking the carriage against movement also operated by said actuator, and independent motor means for restoring the actuator to retracted position and unlocking the carriage-locking device.

1,503,028. TYPEWRITING MACHINE. MANSFIELD C. CRAWLEY, Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif., a Corporation of California. Filed Aug. 29, 1917, Serial No. 188,772. Renewed Oct. 2, 1922. Serial No. 591,989. 13 Claims. (Cl. 197—82.)



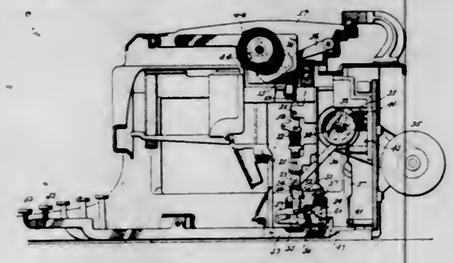
1. In a typewriting machine, a key-controlled power-driven line-spacing mechanism embodying toothed gearing held constantly in mesh, said gearing including a rack-bar actuated by the power, a gear driven thereby, another gear driven by the aforesaid gear, and another rack-bar actuated from this latter gear.

1,503,029. TYPEWRITING MACHINE. MANSFIELD C. CRAWLEY, Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif., a Corporation of California. Filed Apr. 8, 1918, Serial No. 227,259. Renewed Jan. 29, 1924. 15 Claims. (Cl. 197—108.)



1. In a typewriting machine having a source of power and a universal power-operated type-bar actuating device, the combination of type-bar selecting means, a latch normally locking the type-bar actuating device against movement, means for releasing said latch upon the selection of a type-bar by the type-bar selecting means, a traveling platen carriage, a stop member, and mechanism operable automatically upon movement of the carriage to a predetermined point to shift said stop member into engagement with said latch to prevent release of the latch by said latch-releasing means.

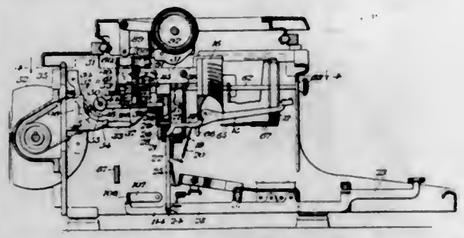
1,503,030. TYPEWRITING MACHINE. MANSFIELD C. CRAWLEY, Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif., a Corporation of California. Filed Mar. 25, 1919, Serial No. 284,968. Renewed Jan. 11, 1924. 38 Claims. (Cl. 197—16.)



1. In a typewriting machine, a power-driven type-actuator, a carriage-feeding mechanism actuated from said type-actuator and embodying means whereby the direction of feed of the carriage may be controlled at will, said means embodying two reversed positively-acting feed-pawls, each arranged to feed the carriage in a different direction, and a device for throwing one or the other into position for action when the feed is subsequently actuated from the keyboard.

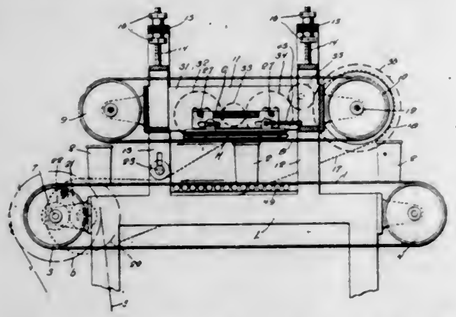
1,503,031. TYPEWRITING MACHINE. MANSFIELD C. CRAWLEY, Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif., a Corporation of California. Filed June 11, 1919, Serial No. 303,422. Renewed July 31, 1922. Serial No. 578,848. 16 Claims. (Cl. 197—73.)

1. Case shift mechanism for a typewriting machine comprising a main frame, a shift frame, means for shifting said frame, a source of power for actuating said shifting means, means for operatively connecting said shifting means with the source of power, means on the main frame for locking said shift frame in lower case position, independent means on the main frame for locking said shift frame in upper case position, and means operable by a single key for releasing the lower case locking means and actuating said connecting means when the key is depressed and for releasing the upper case locking means when the key is released.



1,503,032. TYPEWRITING MACHINE. MANSFIELD C. CRAWLEY, Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif., a Corporation of California. Filed Aug. 11, 1919, Serial No. 316,649. Renewed Jan. 23, 1924. 19 Claims. (Cl. 197—73.)

12. In a case-shift mechanism, a key, a shift frame, a constantly running motor for actuating the shift frame, a clutch for connecting the motor with the shift frame, clutch-shifting means operable by the key, and means operable by power from the motor for disconnecting the clutch-shifting means from the key upon movement of the shift frame by the motor into upper case position independently of the release of manual pressure on the key.

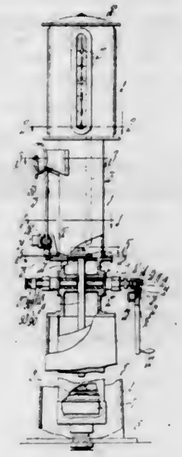


1,503,033. TYPEWRITING MACHINE. MANSFIELD C. CRAWLEY, Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif., a Corporation of California. Filed Dec. 30, 1922. Serial No. 609,877. 44 Claims. (Cl. 197—73.)

1. In a typewriting machine the combination of a plurality of type carriers each having upper and lower case characters, an actuator common to all of said type carriers, power mechanism for moving the actuator, means for locking the actuator out of operation, key actuated selecting devices for operatively connecting the actuator with the type carriers, means common to all of the selecting devices and operable thereby for

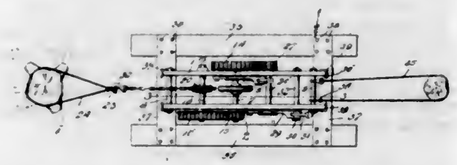
releasing the power mechanism when a type carrier is operatively connected with the actuator, a case shift mechanism, and means for increasing the power of the actuator when printing the upper case characters.

1,503,034. CAPPING MACHINE. FRANK M. DALRYMPLE, Brooklyn, N. Y., assignor, by mesne assignments, to The Closure Service Company, a Corporation of Ohio. Filed Feb. 4, 1921. Serial No. 442,392. 9 Claims. (Cl. 226—80.)



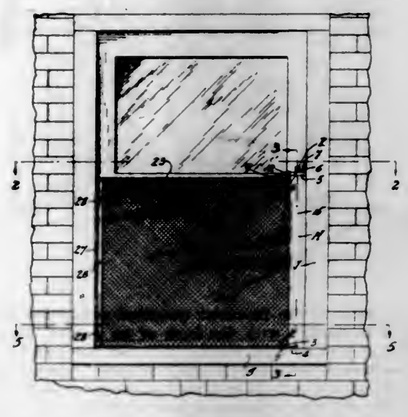
1. A receptacle capping machine comprising a conveyer adapted to transport receptacles at a uniform rate of travel, and a plunger device supported above said conveyer movable toward and away from the conveyer for forcing closure elements on to the passing receptacles, said plunger device comprising a body element movable toward and away from said conveyer and a pressure element slidably connected with the body element to move with the receptacle during the pressure period.

1,503,035. LIQUID-DISPENSING APPARATUS. JOHN B. DAVIS, Springfield, Mass., assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass., a Corporation of Massachusetts. Filed Aug. 7, 1920. Serial No. 401,968. 11 Claims. (Cl. 221—100.)



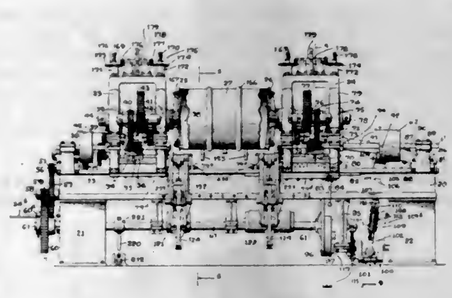
1. In a liquid-measuring apparatus, a reservoir, a passage continuously filled with liquid when the apparatus is in operative condition for supplying liquid to said reservoir, an overflow pipe connected with the interior of said reservoir adapted to withdraw liquid therefrom above a fixed and predetermined level, a discharge pipe, and a multiple port valve having tubes of different heights connected with the several ports, and movable to close off communication between said pipe and reservoir or to bring any one of said ports into registry therewith.

2. In a liquid-measuring apparatus, a reservoir, a passage continuously filled with liquid when the apparatus is in operative condition for supplying liquid to said reservoir, an overflow pipe in said reservoir adapted to maintain the liquid therein at a fixed and predetermined level, a discharge pipe, a multiple ported valve cooperating with said discharge pipe, and means carried by



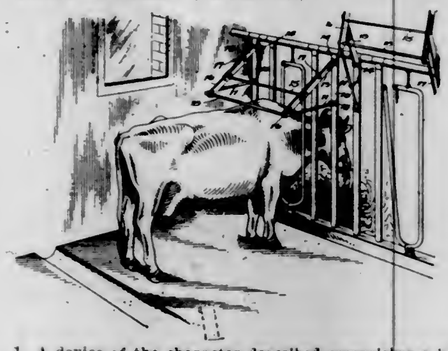
said valve adapted to permit the withdrawal of fixed and measured quantities of liquid from the reservoir upon registry of said ports with said discharge pipe.

1,503,036. STUMP PULLER. ANTON DEPALM, Cambria, Ill. Filed Jan. 22, 1923. Serial No. 614,076. 1 Claim. (Cl. 254—176.)



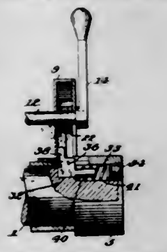
A stump puller comprising a rectangular frame having an open center, a cable connected with one end of the frame and adapted to be passed around the stump, a power shaft journaled at the intermediate portion of the frame and bridging the space between the sides thereof, ratchet and lever mechanism for rotating said shaft in one direction, means for holding the said shaft against rotation in an opposite direction, a second shaft journaled in the frame and bridging the space between the sides thereof, intermeshing gear wheels operatively connecting the power shaft with the second mentioned shaft, a sprocket wheel mounted upon the second mentioned shaft and located between the sides of the frame, a chain arranged to wind upon the sprocket wheel and adapted to be connected with the stump, a third shaft journaled in the frame at the opposite side of the power shaft from that side at which the second mentioned shaft is located, intermeshing gear wheels operatively connecting the third mentioned shaft with the power shaft, a lever and ratchet mechanism for rotating the third mentioned shaft in one direction, means for holding the third mentioned shaft against rotation in an opposite direction, the first mentioned lever and ratchet mechanism being located adjacent one side of the frame and the second mentioned lever and ratchet mechanism being located adjacent the opposite side of the frame and a skid having brackets adapted to receive the frame between them.

1,503,037. WINDOW SCREEN. MATTHIAS A. DIETRICK, Patton, Pa. Filed June 14, 1922. Serial No. 568,286. 2 Claims. (Cl. 156—39.)



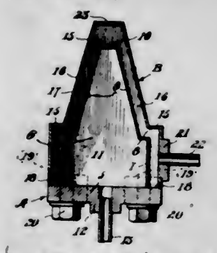
1. A screen structure for windows comprising a casing containing a roller having a screen wound thereon, the casing having a slot through which the screen may be drawn to be extended across the window opening, and means for mounting said casing on the window frame, said means comprising an ear at the upper end of the casing pivotally mounted upon one side of the window frame, a plate secured upon the window sill and formed with an upstanding flange arranged in spaced parallel relation to the adjacent side of the window frame, and an upwardly extending spring tongue on said plate engageable by one side of said casing for maintaining the casing in vertical position against the side of the window frame.

1,503,038. STEEL-BARREL MAKING. CHARLES T. DRAPER, Cleveland, Ohio, assignor to The Draper Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 13, 1920. Serial No. 409,992. 129 Claims. (Cl. 113—24.)



1. In apparatus for making steel barrels and the like, in combination, a rotary member adapted to engage one end of a barrel, a rotary member adapted to engage the opposite end of said barrel, a driving shaft, and a series of members adapted when arranged successively to be operated by said driving shaft to move one of said rotary members toward the other to grip a barrel therebetween, one of said series of members being operatively controlled by said driving shaft and adapted thereby to be placed in operative relation to the remaining members to effect a movement of said rotary member.

1,503,039. CLEAN-COW BAR. EDWIN J. FRANKLIN, Kellogg, Idaho. Filed July 18, 1922. Serial No. 575,910. 3 Claims. (Cl. 119—27.)

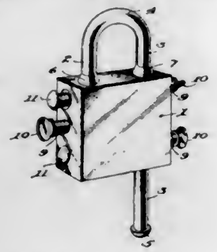


1. A device of the character described comprising a bar adapted to contact with the back of an animal, parallel arms extending at right angles from said bar and having their ends secured to a stall, a pair of spaced parallel arms mounted at one end on said bar and their opposite ends provided with lugs, a second pair of spaced parallel arms having their one end secured to the stall and their opposite ends provided with a series of openings, similar openings intermediate the ends of the first mentioned spaced parallel arms and a rod insertable thru each of said arms as and for the purposes set forth.

1,503,040. SIGNAL-OPERATING MEANS. HARRY L. FURR, Harrisonburg, Va. Filed Apr. 10, 1924. Serial No. 705,460. 6 Claims. (Cl. 116—36.)

1. In a signal operating device for motor vehicles, the combination of means manually controlled for setting a signal, connections, including two movable members, and a device carried by the steering mechanism and arranged to engage one of said members to restore the signal to neutral position when said mechanism is moved in a direction to cause the vehicle to proceed straight ahead.

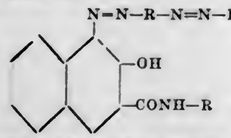
1,503,041. FUEL-OIL BURNER. JAMES N. GALBRAITH, Mexico, Mexico. Filed July 18, 1923. Serial No. 652,347. 2 Claims. (Cl. 158—75.)



1. In a burner of the type described, a heating chamber, a mixing chamber surrounding said heating chamber, inlets for said chambers, said chambers each having a plurality of walls extending at right angles to its axis, said heating chamber having a discharge in each of said walls, and said mixing chamber having a discharge in one of said walls only.

1,503,042. BURNER. WILLY GÖSMANN, Hannover, Germany. Filed Aug. 17, 1921. Serial No. 493,073. 2 Claims. (Cl. 158—118.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

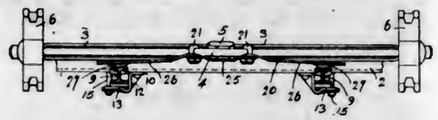
1. In a device of the kind described in combination, a burner tube, a closely wound wire spiral forming a truncated cone and a handle extending in parallel to the axis from the base thereof.



1,503,043. LOCK. BENJAMIN J. GREER, Poynor, Tex. Filed Dec. 14, 1921. Serial No. 522,242. 5 Claims. (Cl. 70—113.)

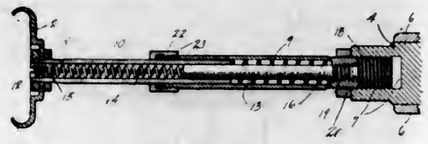
1. A lock including a body and a slidable shackle, the shackle being provided with a groove, and a locking screw adapted to engage said groove, said locking screw also being provided with a groove, whereby the shackle is released when the groove on the locking screw is aligned with the shackle.

1,503,044. NEW AZODYESTUFFS. JOSEF HALLER, Wiesdorf, near Cologne-on-the-Rhine, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne, Germany. Filed Sept. 26, 1922. Serial No. 590,721. 2 Claims. (Cl. 260—84.)



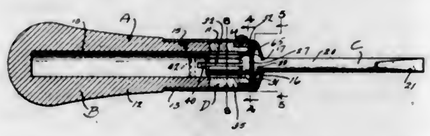
1. As new articles of manufacture the dyestuffs having most probably the formula:

wherein A means an alkylamino group, R_1 an aromatic residue containing a negative group, R an aromatic residue, which dyestuffs, when reduced give an alkylized diamin containing a negative group which may be changed by reduction, a diamin and an arylid of 1-amino-2-oxynaphthoic acid, substantially as described.



1,503,045. FOUR-POINT FLEXIBLE SUPPORT AND SAFETY DEVICE FOR RAILWAY BRAKES. SOREN HANSSON, Butler, Pa., assignor of one-half to Harry T. Anderson, Butler, Pa. Filed Apr. 26, 1923. Serial No. 634,875. 8 Claims. (Cl. 188—213.)

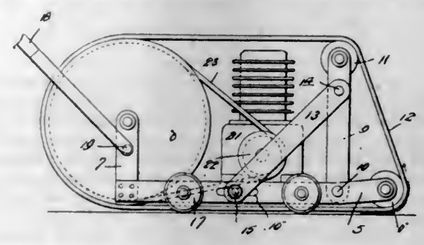
5. In a car truck, the combination of a trussed brake beam having a compression member and a tension member, two fixed bars extending beneath said brake beam on opposite sides of its center, and a spring member carried



by the tension member of said brake beam and having its ends provided with members resting slidably on said bars.

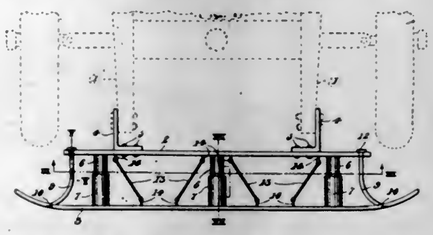
1,503,046. VEHICLE WHEEL. DAVID R. HELSER, Olympia, Wash. Filed Aug. 31, 1923. Serial No. 660,421. 2 Claims. (Cl. 301—48.)

1. A vehicle wheel comprising a resilient tire supporting rim, a hub ring having threaded sockets therein and a plurality of spokes each of which comprises an inner tubular section that is threaded within a socket of the hub ring, an outer tubular section that is fixed to the rim and is telescopically slidable within the inner section, plungers for the spokes having head portions threaded into the sockets and against which the spoke ends abut with the rods extending within the inner spoke section and slidable into the outer, a plug threaded through the outer end of the outer section, a spring disposed within the outer section to bear against the plug and outer end of the plunger and a spring mounted within the inner section about the plunger and bearing at its end against the inner end of the outer spoke section and against the base end of the inner section.



1,503,047. TOOL CONSTRUCTION. ELI HENDRICKSON, Seattle, Wash. Filed Dec. 19, 1923. Serial No. 681,626. 4 Claims. (Cl. 145—75.)

1. A tool of the class described comprising a handle defining a compartment therein, a bit adapted to be inoperably disposed in the compartment, latch means for holding the bit extended from the handle, ratchet means cooperatively supported by the handle and bit to permit intermittent movement of the bit in a selected direction upon oscillative movement of said handle, and common means for moving the latch means to an inoperative position and for controlling operation of said ratchet means.



1,503,048. FLOOR-POLISHING MACHINE. BERNARD HUBER, Oakland, Calif. Filed July 16, 1923. Serial No. 651,824. 2 Claims. (Cl. 15—99.)

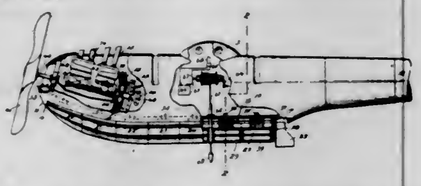
1. In a floor polishing machine of the class described, a pair of parallel spaced side frame bars, a roller having a shaft with its ends journaled in the forward ends of the side frame bars, upstanding frame members rigid with the rear end of said frame bars, a second relatively large roller having a shaft with the ends of the same journaled in the upper ends of said frame members, a pair of upstanding arms having their lower ends pivoted to the forward portion of the side frame bars directly rearwardly of the first named roller, for movement longitudinally of the machine, a roller having a shaft with its ends journaled in the upper ends of said arms, a motor, a platform upon which said motor is mounted rigidly connecting the intermediate portions of the side frame bars, a

polishing belt passing around the rollers above and below said motor, means operatively connecting the second named roller and the motor for driving said polishing belt, means associated with said pivoted arms and with the side frame bars for adjusting said arms in any desired swung position for maintaining the polishing belt tight, and relative small supporting wheels carried by said side frame bars.

1,503,049. AUTOMOBILE BUMPER. ANTON JEŽEK, Hopkins, Minn. Filed Mar. 27, 1924. Serial No. 702,336. 1 Claim. (Cl. 293—55.)

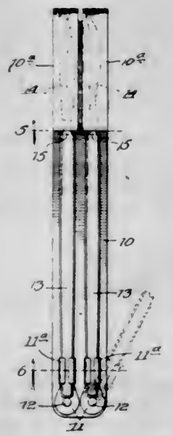
In a bumper for automobiles, a rear and a forward bumper bar, telescoping tubular members respectively carried by the bars, springs enclosed in the tubular members, means for limiting the separating movement of said bumper bars, said means including flexible cables attached at their opposite ends to the bumper bars, and curved rods anchored at their outer ends to the forward bumper bar and slidably associated with the rear bumper bar.

1,503,050. ROTARY TOOTHBRUSH. AUGUST H. JURK and PAUL SYRACUSE, Buffalo, N. Y. Filed Feb. 1, 1922. Serial No. 533,351. 2 Claims. (Cl. 15—23.)



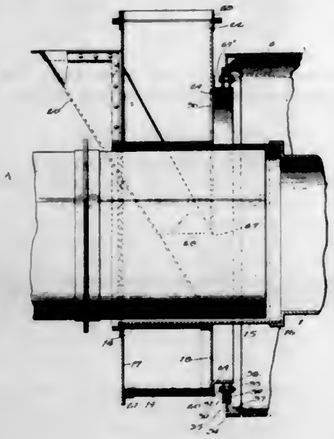
1. A rotary tooth brush having a first brush and a second brush to simultaneously engage the teeth at opposite surfaces thereof, a shaft carrying one of said brushes, a casing tapering inwardly away from the brushes and carrying said shaft, a handle extending from the smaller end of the casing in line with said shaft, and a shaft diverging from the first shaft carrying the other brush and geared to the first shaft in said casing.

1,503,051. SNAP FASTENER. MAX KIESSLING, Waterbury, Conn. Filed Feb. 15, 1923. Serial No. 619,162. 2 Claims. (Cl. 24—208.)



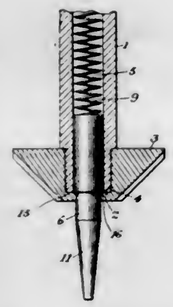
1. A fastener adapted to be attached to an article by a sewing machine, this fastener having a continuous peripheral rim of greater thickness than the main body of the fastener, a plurality of sewing eyes disposed adjacent this rim, and a plurality of centering surfaces formed in diametrical pairs in the rim in predetermined relation to the sewing eyes, the radius of the portions of the rim between adjacent centering surfaces being greater than the diametrical distance between the opposed centering surfaces.

1,503,052. FLYING-BOAT FUSELAGE. HENRY E. KRAMMER, New York, N. Y. Filed July 6, 1918, Serial No. 243,565. Renewed Dec. 27, 1923. 8 Claims. (Cl. 244—2.)



1. A craft having a hull portion provided with a longitudinal base groove, and a keel composed of separate, longitudinally abutting sections, each provided with upper, groove engaging means, characterized by having interlocking relation with the groove to prevent vertical displacement of the keel sections from the hull.

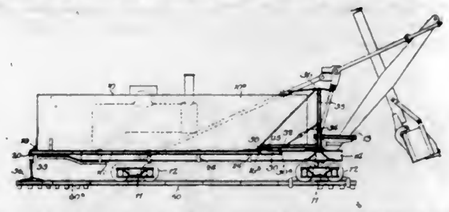
1,503,053. KNIFE AND SHIELD. LOUIS R. KRATZMUELLER, Chicago, Ill. Filed Dec. 17, 1920. Serial No. 431,359. 6 Claims. (Cl. 206—16.)



1. In combination, a knife having a rigid handle and blade, and a metal shield detachably secured to the free end of said handle and having a portion bent back over said blade, said portion being bent along a line substantially at right angles to the length of said shield.

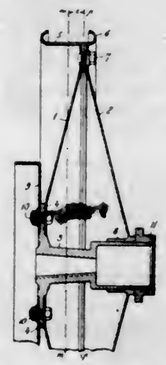
1,503,054. ROTARY DRIER. WILLIAM JACOB KUNTZ, York, Pa., assignor to McGann Manufacturing Company, Incorporated, York, Pa., a Corporation of Pennsylvania. Filed Mar. 6, 1923. Serial No. 623,273. 6 Claims. (Cl. 34—6.)

1. In a device of the character described, the combination with a rotating shell and a stationary wall positioned adjacent to one end of the shell, of a ring carried by the wall and extending into the rotating shell in spaced concentric relation to the latter, an inwardly extending annular member carried by the shell in spaced concentric relation to the first ring, and imperforate annular members disposed on the first ring and extending at opposite sides of the inwardly extending annular member beyond the inner edge of the latter.



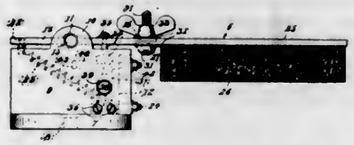
1,503,055. VALVE-SEAT REAMER. JOHN J. MCGUCKIN, Brooklyn, N. Y. Filed Nov. 26, 1921. Serial No. 517,944. 3 Claims. (Cl. 90—12.5.)

1. In a valve-seat reamer, the combination of a shank, a cutter, an adjustable pilot housed within the cutter, and means for yieldably projecting the pilot.



1,503,056. MOBILE POWER MECHANISM. CHARLES B. MAGRATH, Chicago, Ill. Filed Apr. 11, 1923. Serial No. 631,307. 12 Claims. (Cl. 104—4.)

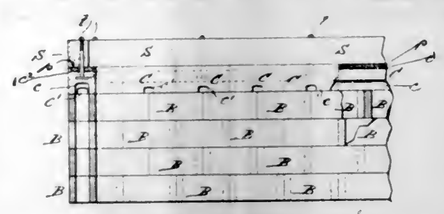
3. In structure of the class described, a rail, a swinging beam, a rail section carried thereby and alinable with said rail, means to lock said rail and rail section in alined position, said means comprising a fin carried by



one of said members and a pivoted latch engageable with said fin and carried by the other of said members.

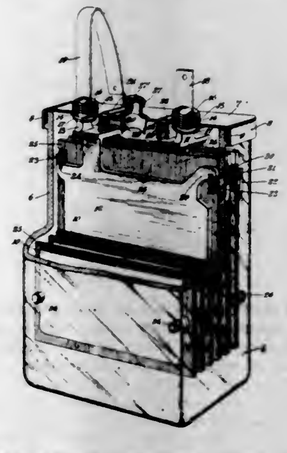
1,503,057. WHEEL. GUILLERMO LUIS MARTIN, La Plata, Argentina. Filed Oct. 22, 1920. Serial No. 418,743. 1 Claim. (Cl. 301—63.)

In a vehicle wheel having a hub, and a body portion fixed upon the hub, the combination of a rim, an inwardly extending annular flange on the rim situated to one side of the median plane of the rim, and means for removably clamping the rim flange to the peripheral face of the wheel body, the relation of the parts being such that the median plane of the rim can be shifted within the limits of the hub.



1,503,058. PHONOGRAPH-RECORD-CLEANING BRUSH. JOHN L. MIKOVITS and FRANK PETERSELL, East Pittsburgh, Pa. Filed Nov. 15, 1923. Serial No. 674,854. 2 Claims. (Cl. 274—1.)

1. In a phonograph record cleaning brush of the type described, a support, a brush carrying arm pivotally connected to said support, means for retaining said brush carrying arm in a horizontally extending position, and means for swinging said arm into a vertically extending position when the arm is released by the aforesaid holding means.

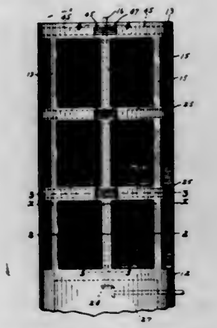


1,503,059. CONCRETE CAP AND SILL BLOCK FOR BUILDING PURPOSES. STEPHEN O. MOROSO, Closter, N. J. Filed Mar. 6, 1924. Serial No. 697,261. 2 Claims. (Cl. 72—86.)

1. A cap block of the character designated, formed on its underside with a longitudinal air space, and with a lateral opening on the inner side of the block communicating with said longitudinal air space, said cap block

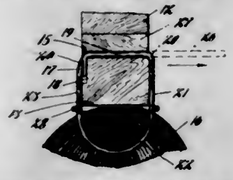
being also formed on its upper side with a longitudinal trough for the reception of plastic cement, substantially in the manner and for the purpose set forth.

1,503,060. STORAGE BATTERY. WILLARD B. OSBORNE, Elma, N. Y., assignor to Gould Storage Battery Company, a Corporation of New York. Filed Nov. 22, 1920, Serial No. 425,603. Renewed Feb. 19, 1924. 3 Claims. (Cl. 204—29.)



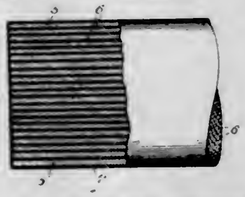
2. A storage battery having in combination a suitable container, an antimony lead cover therefor, a set of positive plates and a set of negative plates supported in the container from said cover, said cover having reinforcing means depending from the bottom side thereof to reduce the sagging of the cover due to the weight of the plates supported thereby, said reinforcing means comprising a plurality of acid resisting members, U-shaped in cross-section, secured to and extending across the underneath side of the cover.

1,503,061. MOTOR. FREDERICK W. PENDERGAST, Cambridge, Mass.; Grace T. Pendergast administratrix of said Frederick W. Pendergast, deceased. Filed May 18, 1923. Serial No. 639,785. 8 Claims. (Cl. 170—14.)



1. In a wind motor, in combination, a fixed tower exposed on all sides to wind, and having a central vertical wheel-receiving space, and a plurality of tapering wind-conducting and concentrating tangential passages extending from the exterior of the tower to the space, a wind wheel located in said receiving space and rotatable on a substantially vertical axis by wind entering the tower at the windward side thereof, the said passages being formed and arranged to direct concentrated wind currents against the wind-wheel blades in directions causing a undirectional rotation of the wheel, vertical shafts in and extending below said passages and provided with-

in the passages with governing shutters extending in opposite radial directions from the shafts, and means for simultaneously turning said shafts and shutters, said means including pulleys fixed to the lower ends of said

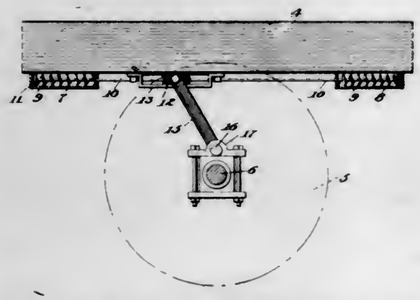


shafts, a cable engaged with and connecting said pulleys, a worm gear fixed to one of said shafts, and a manually rotatable worm meshing with said gear, means being provided to transmit power from the wind wheel.

1,503,062. MOP. FREDERICK W. PENDERGAST, Cambridge, Mass.; Grace T. Pendergast administratrix of said Frederick W. Pendergast, deceased. Filed May 31, 1923. Serial No. 642,497. 6 Claims. (Cl. 15—147.)

1. A mop comprising a handle having a notched inner end and a transverse orifice spaced above said end; a mop body composed of a bunch of mop threads, the central portions of which are laid across the notched end of the handle; and mop-body confining means including a flexible wire rod having a hooked reinforcing head formed from one end of the wire and bearing on one side of the handle, two inner neck portions extending through the orifice, and a loop composed of two side portions extending beside the handle and an outer neck portion connecting the side portions and extending across the notched end of the handle, to confine the threads against said notched end, one of said side portions bearing on said reinforcing head, the looped portion being maintained under tension, and the head reinforcing the handle at one end of said orifice, and supporting the pressure of a portion of said rod.

1,503,063. DENTAL APPLIANCE. GEORGE ELLIOT PERRY, Chicago, Ill. Filed Feb. 26, 1921. Serial No. 448,222. 4 Claims. (Cl. 32—5.)

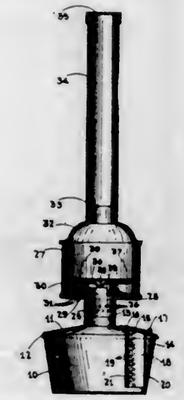


1. An article of manufacture comprising a porous stick with the natural pores thereof filled with a powdered dentifrice, and a sanitary jacket enclosing and hermetically sealing the stick.

1,503,064. TYPEWRITING MACHINE. GEORGE W. RENZ, New York, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed June 16, 1923. Serial No. 645,720. 17 Claims. (Cl. 197—126.)

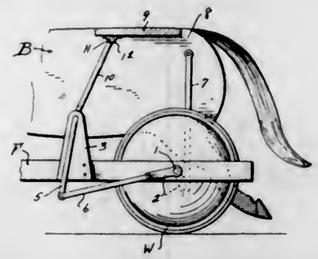
1. In a typewriting machine having a platen, in combination with feed-roll mechanism to feed a plurality of superposed packs of work-sheets interleaved with carbons successively or alternately around said platen, a carbon-carrier provided with a plurality of carbon-holding means, each of which in turn is provided with a plurality of carbon-holding blades, said carbon-holding means being mounted one above another and so positioned as to permit some of said work-sheets or packs of work-sheets to remain interleaved with their respective carbons and partially threaded into said machine while one work-sheet or pack of work-sheets is being fed through the machine to be typed upon.

1,503,065. VEHICLE BODY SUSPENSION. BENJAMIN F. SEYMOUR, Washington, D. C. Filed Mar. 11, 1920. Serial No. 365,037. 2 Claims. (Cl. 267—20.)



1. In a resilient suspension for vehicle bodies, the combination with a chassis or frame, a wheel support, and a wheel journaled thereon, of oppositely acting springs operable longitudinally of the chassis, a bracket interposed between said springs and beneath the chassis, a member longitudinally reciprocable in said bracket, reach rods connecting said springs with the reciprocable member, and an arm fulcrumed on the wheel support having supporting connection with said reciprocable member, substantially as set forth.

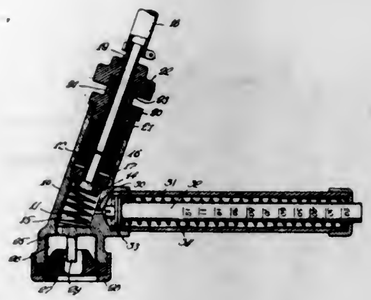
1,503,066. ORCHARD HEATER. FRED ROBERT SHIKORA and THOMAS RUSSELL LEWERS, Kelowna, British Columbia, Canada. Filed June 14, 1922. Serial No. 568,349. 7 Claims. (Cl. 158—91.)



1. A heater comprising a body; a primary combustion chamber mounted on said body; a final combustion chamber mounted on said primary combustion chamber; said body having an air inlet opening; means adjustable over said air opening to control the air draft through said body and through the primary and final combustion chambers; said primary and final combustion chambers having air openings provided therein; a vertical perforated grate plate within said body and suspended therein with its bottom above the bottom of said body for causing capillary attraction of the liquid fuel contents

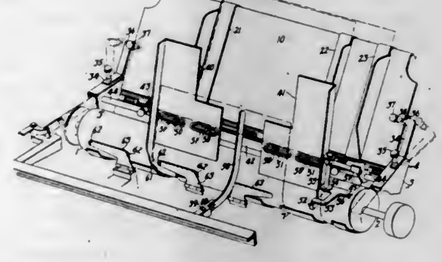
of the body toward the air inlet opening of said body for ignition of the liquid fuel and conversion of the liquid fuel into a gaseous fuel whereby the gaseous fuel may mix with air entering the heater to produce a combustible mixture for complete consumption within said

primary and final combustion chamber; said primary and final combustion chambers having air inlet openings; and a spreader member spaced from the upper end of the primary combustion chamber within said final combustion chamber to deflect and spread the combustible gases entering said final combustion chamber.



1,503,067. CHILD'S VEHICLE. ERNEST S. SHOWERS, Michigamme, Mich. Filed Dec. 18, 1922. Serial No. 607,654. 4 Claims. (Cl. 208—42.)

1. A device of the class described comprising, in combination, a frame, a shaft carried by the frame, a ground engaging wheel mounted on the shaft, angularly related cranks carried by the shaft, a rock shaft mounted upon the frame, a body, a rock arm carried by the second shaft and pivotally engaged with the body, a second rock arm depending from the second named shaft, an operative connection between the last named rock arm and one of the crank arms of the first named shaft, and a pitman operatively connected with the second crank of the first named shaft and the body.

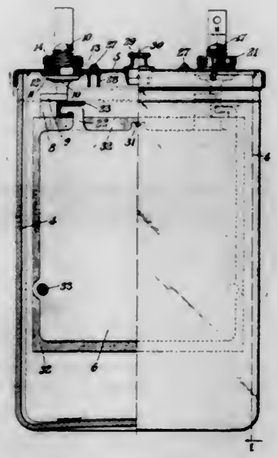


1,503,068. INFLATING NOZZLE AND TIRE GAUGE. LOUIS J. SLADEK, Sycamore, Ill. Filed Mar. 4, 1920. Serial No. 363,177. 8 Claims. (Cl. 284—17.)

1. In a hose connection for a tire valve, a casing adapted to be connected to a tire valve, a hollow plunger adapted to have its outer end secured to an air supply hose, and a spring resisted valve operable by the plunger whereby upon movement of the plunger relatively to the

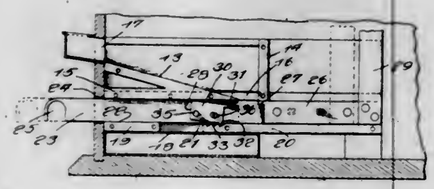
casing air is admitted to the casing and may pass to the tire valve, the valve adapted to be closed without unfastening the hose.

1,503,069. TYPEWRITING MACHINE. JESSE A. B. SMITH, Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 22, 1920. Serial No. 432,376. 12 Claims. (Cl. 197—125.)



1. In a typewriting machine, the combination with a cylindrical platen, of means for guiding wide and narrow work-sheets to the platen in predetermined superposed relation, comprising wide and narrow paper-chutes, one within the other, the wide chute comprising a pair of high side gages, and the narrow chute comprising one of said high side gages and a relatively low side gage between the high side gages, all three of said side gages being adjustable, the arrangement being such that the widths of both chutes may be adjusted simultaneously by the adjustment of their common side gage, and the width of either chute may be adjusted independently of the other by the adjustment of its individual side gage.

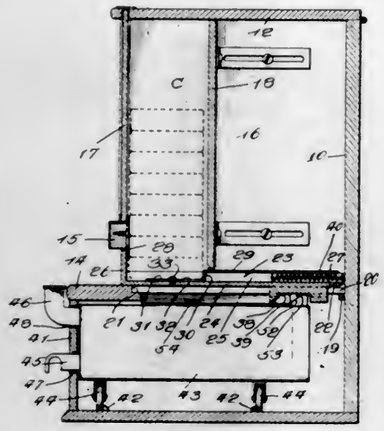
1,503,070. STORAGE BATTERY. ALMOND H. SNYDER, Lancaster, N. Y., assignor to Gould Storage Battery Company, a Corporation of New York. Filed Nov. 22, 1920. Serial No. 425,629. 13 Claims. (Cl. 204—29.)



1. A storage battery having in combination a container, a cover therefor, a set of storage battery negative and

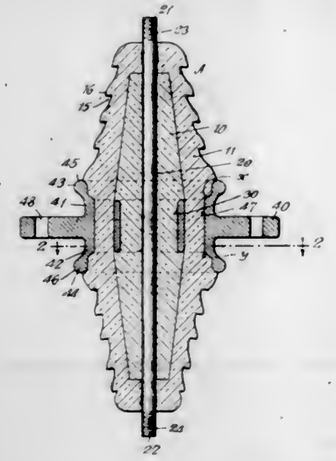
positive plates in the container and supported by said cover, said cover being composed of antimony-lead whereby the usual shocks and blows to which the battery is

subjected in shipment and handling are prevented from substantially injuring the battery by reason of the weight of the plates supported thereby.



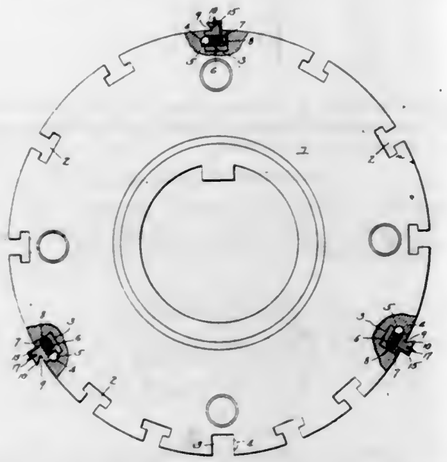
1,503,071. COIN-CONTROL LOCK FOR VENDING MACHINES. LEE ROY SPOONER and PAUL L. GRAY, Watertown, S. Dak. Filed Mar. 21, 1923. Serial No. 626,606. 5 Claims. (Cl. 194—55.)

1. In check control apparatus, a mounting having a channel, a plunger reciprocable within the channel and having an abutment on one side face thereof, a lock slidable between said side face of the plunger and the opposed wall of the channel and normally having engagement with a wall of the channel preventing this movement when engaged by the abutment of the plunger, said lock including a rearward extension engaged and shifted by a coin preceding the plunger and by its shifting releasing the engagement of the lock with said channel wall.



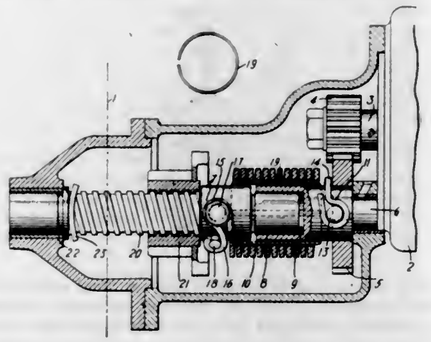
1,503,072. VENDING MACHINE. LEE ROY SPOONER and PAUL L. GRAY, Watertown, S. Dak. Filed Apr. 28, 1923. Serial No. 635,252. 9 Claims. (Cl. 194—2.)

1. In a vending machine, the combination with a casing formed to provide a plurality of compartments arranged in a row, each compartment having a shiftable article ejector and a shiftable coin controlled mechanism alignable with any of said compartments and having a plunger for shifting the article ejector of the compartment with which it is aligned, said plunger being locked when fully retracted, of means carried by the casing preventing shift-



ing of said coin controlled mechanism from the compartment with which it is aligned until the plunger thereof is fully retracted.

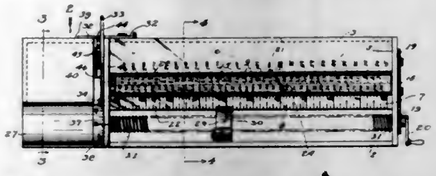
1,503,073. INSULATED CONNECTER. LOUIS STEINBERGER, Brooklyn, N. Y. Filed May 5, 1919. Serial No. 294,704. 5 Claims. (Cl. 173—311.)



1. In a device of the class described, a solid core of insulating material having a conductor extending axially therethrough, a conductor ring surrounding and spaced apart from the conductor at the central portion of the insulator body, an outer layer of insulating material surrounding said core, and molded to the projecting ends of said conductor to hermetically seal said core, and a supporting ring for said outer layer of insulating material, said ring being formed with a cylindrical portion of substantially the same length as said conductor ring and adapted to distribute the electrical stresses set up within the insulator over a large area.

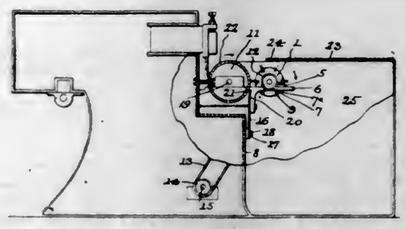
1,503,074. PLATE CLAMP AND HEADLINE MARKER FOR PRINTING PRESSES. GEORGE W. SWIFT, Jr., Bordentown, N. J., assignor to George W. Swift, Jr., Inc., Bordentown, N. J., a Corporation of New Jersey. Filed July 6, 1923. Serial No. 649,861. 16 Claims (Cl. 101—375.)

1. In a headline marker for printing presses, the combination with a supporting bar, of a marker provided with resilient portions yieldably engaging said supporting bar and having headline marking portions projecting therefrom.



1,503,075. STARTING MECHANISM FOR GAS ENGINES. LESTER M. TAYLOR, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 29, 1915. Serial No. 24,750. 8 Claims. (Cl. 74—7.)

1. In a starting mechanism, the combination with a motor-driven shaft, and a shaft in axial alinement therewith, of a spring for connecting said shafts, and a resilient member between said shafts and said spring.

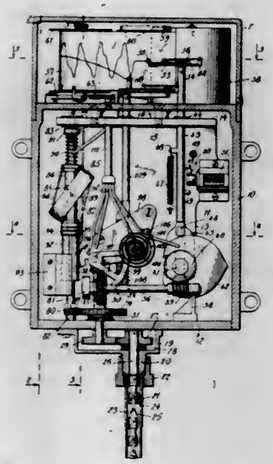


1,503,076. CALCULATING MACHINE. FERDINAND J. TILLMAN, St. Louis, Mo., assignor to Yard-O-Meter Corporation, St. Louis, Mo. Filed Feb. 12, 1920. Serial No. 358,164. 1 Claim. (Cl. 235—86.)

A calculating machine, comprising a casing having a longitudinal slot through one side thereof, a column of multiplicand numbers on the casing adjacent to one side of the slot, a column of multiplier numbers on the casing adjacent to the opposite side of the slot, a sheet operatively supported in the casing, a series of columns of products on the sheet, means for operating the sheet transversely of and adjacent to the slot to different positions to selectively display the columns of products through said slot, and a diagonal line on said sheet ar-

ranged to indicate the respective multiplicand numbers in calculation in which the column of products visible through said slot are the products of the multiplicand number so indicated by said line multiplied by the various multiplier numbers in said column of multiplier numbers.

1,503,077. ATTACHMENT FOR ROLLER COTTON GINS. JAMES S. TOWNSEND, Charleston, S. C., dedicated, by mesne assignments, to the Citizens of the United States of America. Filed Nov. 1, 1923. Serial No. 672,214. 1 Claim. (Cl. 19—48.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)



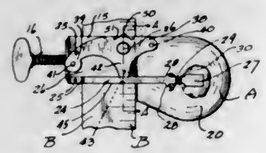
An attachment for roller cotton gins, comprising a rotatable flapper roller positioned on a horizontal line with the gin roller, flaps attached to said flapper roller, means for rotating said flapper roller thereby causing said flaps to strike against cotton conveyed over the cotton gin roller and together with the current of air provided by said rotating flapper roller to throw the cotton in an upward direction, a box positioned below said flapper roller to receive the cotton thrown from said cotton gin roller, a screen superimposed over said flapper roller and adapted to receive waste matter in the cotton thrown from the cotton gin roller, and an air baffle affixed to the cotton gin below the gin roller adapted to prevent the passage of air currents created by the rotating flapper roller, beneath the gin roller.

1,503,078. SPEED INDICATOR AND RECORDER. ANTHONY F. WALLBILLICH, Newark, N. J., assignor, by mesne assignments, to Distance Speed Recording Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 16, 1918. Serial No. 222,847. 8 Claims. (Cl. 284—31.)

1. The combination of a shaft adapted to be driven at variable speed, a centrifugal member connected to said shaft, a collar on the shaft connected to said centrifugal member and adapted to be moved along the shaft in accordance with the displacement of the centrifugal member, a sleeve slidably mounted on the shaft and prevented from rotating thereon, a rack on the sleeve, a gear engaging the rack on the sleeve, a second gear associated with the first gear, a second shaft, a pinion on the second shaft engaging the second gear, an index on the end of the second shaft, and a spring connected to said second shaft and adapted through said pinion and gears to hold said sleeve in contact

with said collar so that displacements of the centrifugal member will be communicated to the index through said rack, gears and pinion.

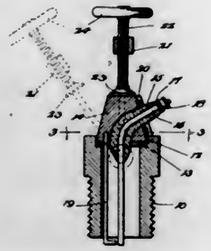
2. The combination of a shaft adapted to be driven at variable speed, a centrifugal member connected to said shaft, a collar on the shaft connected to said centrifugal member and adapted to be moved along the shaft in accordance with the displacement of the centrifugal member, a sleeve slidably mounted on the shaft and prevented from rotating thereon, a rack on the sleeve, a gear engaging the rack, a second gear associated with the first gear, a second shaft, a pinion on the second shaft engaging the second gear, an index on the end of the second shaft, a second pinion on the second shaft, a rack engaging the second pinion, a marker associated with the rack, a travelling tape supported in coaction with the marker, and a spring connected to said second shaft and adapted through said pinion and gears to hold said sleeve in contact with said collar so that displacements of the centrifugal member will be communicated to the index and marker through said racks, gears and pinions.



6. The combination of a casing, a housing attached to the bottom of the casing and provided with a depending portion, a shaft rotatably mounted in the depending portion, a tubular member, a collar for attaching the said tubular member to the depending portion of the housing, a flexible driving connection in the tubular member connected to the lower end of the shaft and adapted to be driven at variable speed, a gear on the upper end of said shaft, a ball bearing within the housing and surrounding the shaft and upon which the gear, shaft and driving connection are carried, a second shaft, a gear on said second shaft mesbing with the gear on the first-named shaft, a centrifugal device driven from said second shaft, an index and marker actuated by the centrifugal device and a travelling tape supported in coaction with the marker.

1,503,079. NONSKID ATTACHMENT FOR VEHICLE WHEELS. JOHN P. WALSH, Cambridge, Mass., assignor to Henry J. Walsh, Syracuse, N. Y. Filed June 13, 1922. Serial No. 567,960. 2 Claims. (Cl. 152—14.)

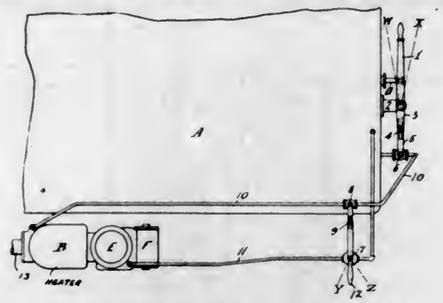
1. In a non-skid attachment for vehicle wheels, the combination with two annular radially-inflexible members adapted to overlie the sides of a vehicle tire, of non-skid elements overlying the tread of the tire and connected to the annular members, the central portions of said non-skid elements being relatively inflexible and the end portions that are secured to the annular members being made of sections hinged together to provide for the necessary yielding movement as the wheel passes over inequalities in the road.



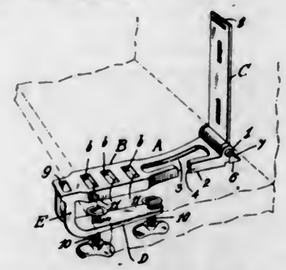
1,503,080. GARMENT-MARKING DEVICE. GUY R. WILLIAMS, Attleboro, Mass. Filed July 29, 1921. Serial No. 488,383. 13 Claims. (Cl. 33—10.)

1. A garment marking device comprising a supporting frame having an aperture therein, a resilient arm mounted upon said supporting frame at a point remote from said aperture and whereby the free end of said resilient arm extends over said aperture, a marking element on the free end of said spring arm, and means for flexing said spring arm whereby said marking element may register delineations through the aperture in said supporting frame.

1,503,081. SPARK PLUG. DONALD W. WILLIS, Canton, Ohio. Filed Oct. 19, 1921. Serial No. 508,802. 3 Claims. (Cl. 123—169.)



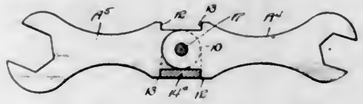
1. A spark plug including a shell, a block closing the shell at its upper end, an insulator extending through the block to project at its upper end at one side of the block, a main electrode extending through said insulator within the shell, a ground electrode upon the block to cooperate with the main electrode, reinforcing ribs upon the block at opposite sides of the projecting upper end of said insulator, and means coacting with the upper end of the block clamping the block upon the shell.



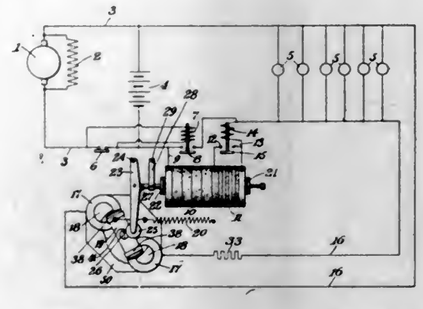
1,503,082. FEED-WATER-HEATING SYSTEM. GEORGE P. ABORN, Brookline, Mass., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Dec. 30, 1920. Serial No. 433,979. 2 Claims. (Cl. 122—441.)

1. The combination with a boiler and its feedwater heater and supply pump therefor, of a valve controlled

live steam connection to said heater, connections between said valve and the engine throttle for controlling admission of live steam to the feedwater heater, and means cooperating with the supply pump steam valve for controlling the live steam supply to the heater.

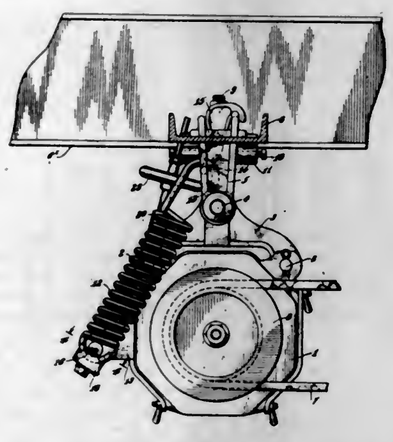


1,503,083. LUGGAGE CARRIER. JOHN AMEY, Long Island City, N. Y., and FREDERICK W. BECKER, Rutherford, N. J. Filed Oct. 5, 1921. Serial No. 505,629. 4 Claims. (Cl. 222—29.)



1. A luggage carrier comprising a base member adapted to be secured transversely to the top of a running board; a strap eye provided towards the outer end of said base member; a back strut for the inner end of said base member provided with a strap eye at its free end; and an elbow hinge hinging said strut member to said base member at approximately the inner end of said base member, permitting said strut to fold down upon said base member but preventing its swinging back substantially beyond a right-angular position relatively to said base member, all whereby a piece of luggage may be secured through the medium of a strap engaging said eyes upon said base member and is positively prevented by said elbow hinged strut from contacting with the side of the vehicle extending up from said running board.

1,503,084. WRENCH. FOREE BAIN, La Grange, Ill. Filed Oct. 13, 1922. Serial No. 594,259. 7 Claims. (Cl. 81—119.)

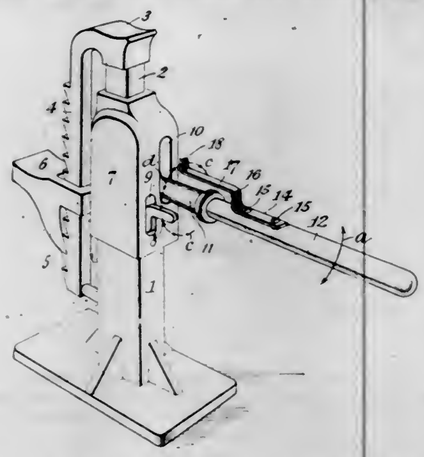


1. In a foldable tool a pair of wrenches each having an operative head and a shank, the latter perforated near its end and providing a transversely extending abrupt shoulder by reduction in section near said perforation and a U-shape clip pivoted to said shanks and rotatable about the pivot arranged to abut both shoulders and to be included therebetween when one wrench is extended.

1,503,085. REGULATOR. ELI J. BLAKE, Buffalo, N. Y., assignor to Gould Coupler Company, a Corporation of New York. Filed Oct. 9, 1920. Serial No. 415,800. 21 Claims. (Cl. 171—229.)

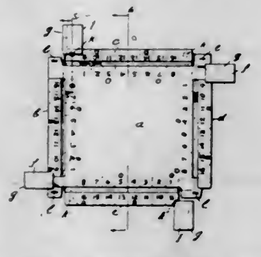
1. In a regulator the combination of a carbon pile, two electro-magnets having parallel cores, an armature, pivoted on an axis between said cores and parallel thereto, pole faces formed on said cores substantially concentric with the axis of said armature, a lever for operating said pile, and a roller operatively interposed between the armature and said lever whereby movement of the armature operates the lever to vary the resistance of said pile.

1,503,086. GENERATOR SUSPENSION. ELI J. BLAKE, Buffalo, N. Y., assignor to Gould Coupler Company, a Corporation of New York. Filed Oct. 29, 1921. Serial No. 511,373. 11 Claims. (Cl. 105—106.)



1. In a generator suspension, the combination of a car body, a generator adapted to be belt-driven from the car axle, a pivotal support for the generator beneath the car body, and a spring connected to said generator and car body, so arranged as to tend to swing the generator around its pivotal point away from the car axle, and so that its tension is in a substantial degree opposed to the weight of the generator.

1,503,087. LIFTING JACK. ARTHUR J. BROWN, New York, N. Y. Filed Feb. 28, 1923. Serial No. 621,742. 9 Claims. (Cl. 254—110.)

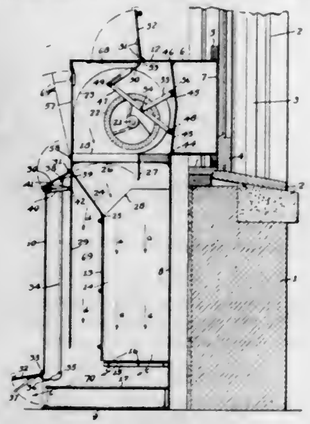


1. In a lifting jack, the combination with a socket member, and a reversing pawl mechanism, of a handle bar engageable detachably with the socket member, and

a finger carried by the handle bar and positioned exteriorly of the socket member, said handle bar being

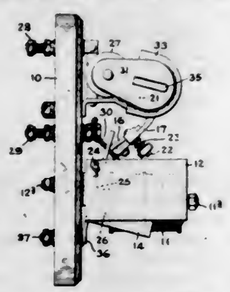
rotatable at will relatively to the socket member and said finger being engageable on the rotative movement of the handle bar with the reversing pawl mechanism.

1,503,088. CARD-TABLE COVER. HARRIET CRANE BRYANT, Potsdam, N. Y. Filed June 1, 1922. Serial No. 565,152. 4 Claims. (Cl. 46—55.)



1. A table cover comprising a main body portion of flexible material, and a plurality of edge portion pendent therefrom and also made of flexible material, said main body portion being provided with a number of pockets for carrying hands of cards or the like, and further provided with indicating marks disposed adjacent said edge portions, each of said pendent edge portions being provided with pockets for carrying hands of cards or the like, the pockets carried by said edge portions being paired in mating relation to the pockets carried by the main body portion, said pendant edge portions being further provided with indicating marks relating to the indicating marks of said main body portion.

1,503,089. VENTILATING UNIT. MICHAEL J. CALLAHAN, New York, N. Y. Filed June 2, 1919. Serial No. 301,190. 32 Claims. (Cl. 98—27.)

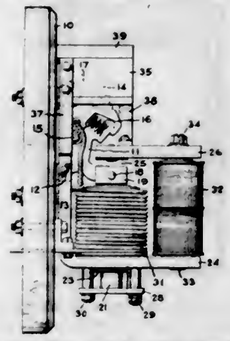


2. A ventilating unit comprising an inclosing casing divided into a plurality of chambers, two being arranged in parallelism and one of the latter having two discharge openings arranged one above the other; a third chamber above the other two and a blower therein; a heating element in one of the parallel chambers; a passage between the blower and heater chambers; dampers arranged in cooperative relation to the discharge openings; and means for actuating the dampers whereby the heated air may be driven from the casing through either one of the discharge openings.

16. A ventilating unit comprising a casing having a chamber at its top; a fan or blower located in said chamber; an air inlet to said chamber in rear of the

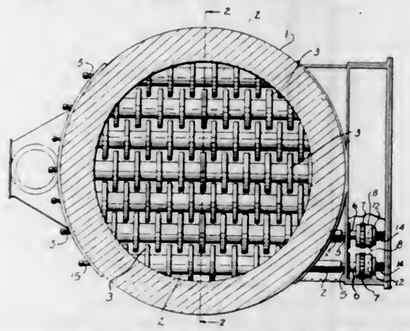
fan; an air inlet at the top of said chamber; means for controlling the air inlet at the top of said chamber and connected for simultaneously controlling the air inlet at the rear of said chamber.

1,503,090. ELECTROMAGNET. EUGENE R. CARICHOFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 27, 1920. Serial No. 361,694. 19 Claims. (Cl. 175—336.)



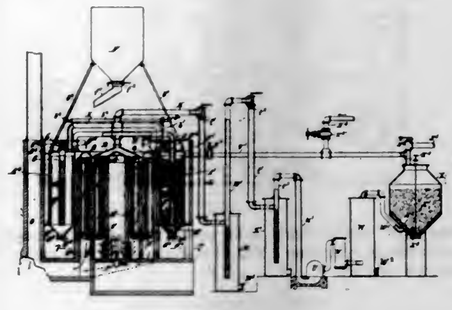
1. An electromagnet comprising a magnet winding, and a magnetic structure therefor including two similarly shaped telescoping members, one of which is movable into and out of a position of alignment with reference to the other under the control of the magnet winding.

12. The combination in an electromagnet of a magnet frame to which one end of the core of the electromagnet is secured, a support for the said frame to which the frame is secured with the axis of the electromagnet disposed at an angle to the support, and a pivotally mounted armature in the space between the support and the other end of the core of the electromagnet, the pivotal support for the armature being disposed with respect to the frame so that the armature is biased away from the said other end of the electromagnet by gravity and the armature is movable about its pivot away from the support toward the said other end of the electromagnet.



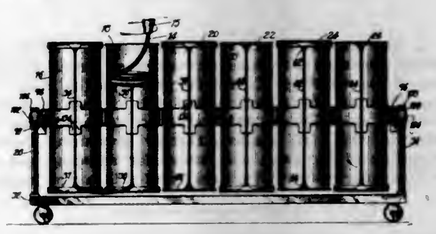
1,503,091. MAGNETIC BLOW-OUT DEVICE. EUGENE R. CARICHOFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 2, 1920. Serial No. 421,212. 10 Claims. (Cl. 200—102.)

1. An electromagnetic switch comprising an operating electromagnet having a magnetic structure with an air gap across which there is a difference of magnetic potential while the switch is opening, a pair of relatively movable switch contacts, and a pair of magnetic members each of which has one end connected to the magnetic structure and the other end disposed adjacent the switch contacts, forming a path for the magnetic flux of the magnetic structure shunting the said air gap through which the magnetic flux of the electromagnet is caused to pass at right angles to the plane of movement of the switch contacts.



10. The combination in an electromagnetic switch of the lock-out type having a magnetic structure with a variable current winding and a constant current winding disposed thereon, a magnetic movable element under the control of said windings, a pair of relatively movable cooperating switch contacts magnetically held by the said magnetic element in the open position when the current in the variable current winding is above a predetermined value, magnetically operated to the closed position when the current in the variable current winding drops to said value, and magnetically operated to the open position when the current in the variable current winding reverses in direction, of a magnetic blow-out device comprising a plurality of members of magnetic material connected to the magnetic structure to be energized by the said constant current winding and arranged to have corresponding ends thereof adjacent the switch contacts so that the magnetic flux through the members is caused to be at substantially right angles to the plane of movement of the switch contacts when the said contacts open due to the reversal of the current through the said variable current winding.

1,503,092. METHOD OF AND APPARATUS FOR AUTOMATIC CLEANING AND AUTOMATIC CONTROL OF MECHANICAL GRATES. ROBERT A. CARTER, Jr., Bay Ridge, Brooklyn, N. Y. Filed June 12, 1923. Serial No. 644,880. 19 Claims. (Cl. 126—181.)

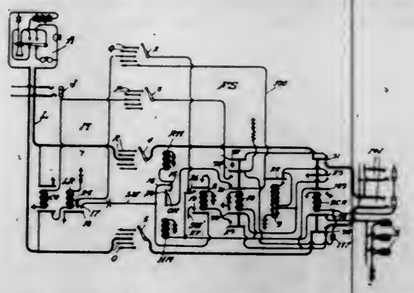


1. The method of automatically cleaning a fire bed, consisting in removing the ash and clinker, and employing the heat of the fire bed to itself directly control the rate of removal of the ash and clinker from said fire bed.

1,503,093. SHALE-DISTILLATION APPARATUS. ROBERT M. CATLIN, Franklin, N. J., assignor to Catlin Shale Products Company, Wilmington, Del., a Corporation of Delaware. Filed Aug. 4, 1920. Serial No. 401,130. 6 Claims. (Cl. 202—14.)

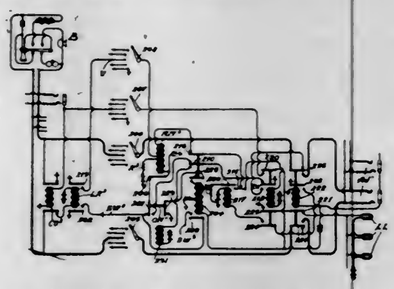
1. In a shale distilling plant the combination, with a receptacle for the shale charge, said receptacle having a perforated inner lining spaced from the outer wall of the receptacle to form an annular space for the escape of gas, and having a shale-charging opening and discharging opening for solid products, of means for closing said openings, means for conducting away gas from the annular space, means for heating said gas, a perforated pipe arranged to discharge said heated gas along the interior of the shale charge so that the gas may travel radially through the charge to the perforated lining, and means for drawing off the liquid products of distillation.

1,503,094. WARP CONDENSER. STUART W. CRAMER, Jr., Philadelphia, Pa., assignor to Cramerton Mills, Incorporated, a Corporation of North Carolina. Filed Sept. 15, 1923. Serial No. 662,829. 19 Claims. (Cl. 28—27.)



2. A method of handling warp which comprises, coiling warp upwardly in a can, continuing said warp from the upper part of said can to the upper part of an adjacent can, inverting said cans, coiling said warp in said second can in the opposite direction from that of said first can and drawing the warp from adjacent cans from the portions connecting the upper parts of said coils.

1,503,095. TELEPHONE SYSTEM. HIRAM D. CURRIER, Chicago, and GEORGE R. EATON, Oak Park, Ill., assignors to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 24, 1919. Serial No. 278,745. Renewed Sept. 17, 1923. 63 Claims. (Cl. 179—27.)

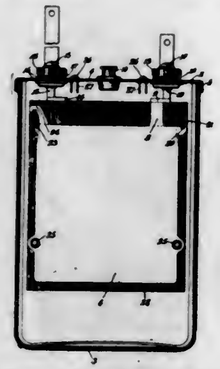


1. A telephone system including subscribers' telephone lines, connection circuits less in number than said telephone lines, automatic means for connecting a calling subscriber's line and an idle one of said connection circuits, a link circuit having a manually operated con-

nection plug for use in extending connection from said connection circuit, and subscriber-controlled means individual to said link circuit for operatively disassociating

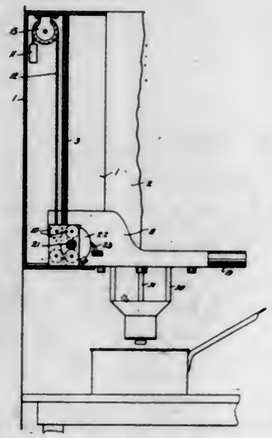
said link circuit from said connection circuit whereby said calling subscriber's line is disconnected from said connection circuit.

1,503,096. CALL-DISTRIBUTING SYSTEM. HIRAM D. CURRIER, Chicago, and GEORGE R. EATON, Oak Park, Ill., assignors to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed June 23, 1919, Serial No. 306,042. Renewed July 18, 1923. 38 Claims. (Cl. 179—27.)



1. An automatic switch provided with a double-wound motor magnet, means for closing a circuit through one of the windings of said motor magnet to cause the operation of the same, means for closing a circuit through the other of said windings to neutralize the effect of the first winding, thereby preventing further operation of the same and means for releasing and restoring said switch independently of said motor magnet.

1,503,097. BRACELET WATCH. JOSEPH DAVING, Brooklyn, N. Y. Filed Apr. 30, 1923. Serial No. 635,505. 2 Claims. (Cl. 58—88.)

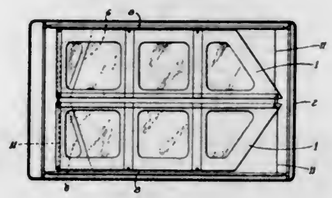


1. As an article of manufacture, a bracelet-watch encasement of the character designated, comprising a basic watch-works holding section formed with bracelet-attaching means, a bezel section mounted thereon, a combined crystal and dust plate interposed between said bezel section and the watch-works holding section, and a retractile illusory cover plate mounted on said bezel section, substantially in the manner and for the purpose set forth.

1,503,098. STORAGE BATTERY. THEODORE B. ENTZ, New York, N. Y., assignor to Gould Storage Battery Company, a Corporation of New York. Filed Dec. 28, 1920, Serial No. 433,609. Renewed Feb. 19, 1924. 2 Claims. (Cl. 204—29.)

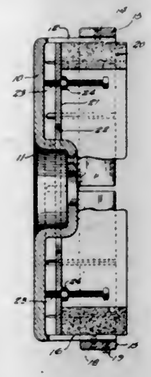
1. A storage battery having in combination a plurality of negative plates, a container for the plates, a cover for the container, means whereby the two sets of plates are suspended and supported from the cover, a member of insulating material extending transversely of the plates and having a part extending into notches in the terminal end of the upper edge of the positive plates, the negative plates being provided at their free ends with hook shaped arms extending upwardly from their upper edges and engaging over the upper edge of said insulating material member to be supported thereby, and another member of insulating material extending transversely of the plates and having a part extending into notches in the terminal end of the upper edge of the negative plates, the positive plates being provided at their free ends with hooked shaped arms extending upwardly from their upper edges and engaging over the upper edge of said second insulating material member, said insulating material members passing through cut away portions in the side edges of the separators adjacent the top thereof whereby the separators are supported by the plates through said insulating material members.

1,503,099. COMBINATION MOUNTING FOR MOTORS AND FITTINGS. ELMER A. GRIFFITTS, Calgary, Alberta, Canada. Filed Mar. 3, 1923. Serial No. 622,703. 2 Claims. (Cl. 74—7.)



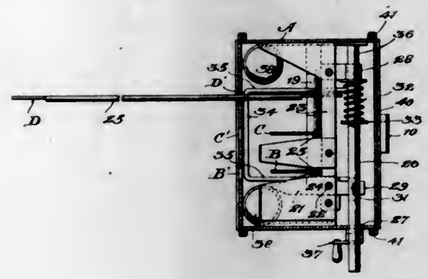
1. An article of the class described comprising a driving motor and a train of gears driven thereby, a base plate mounting for the said motor, means for holding accessories upon the said base plate in relation to and driven by any member of the gear train, brackets upon which the said base plate is pivoted, supporting rods upon which the brackets are movable and a cabinet interiorly of which the said rods are mounted.

1,503,100. TYPEWRITER CARRIAGE. DE WITT CLINTON HARRIS, Pineland, Fla. Filed Sept. 1, 1921. Serial No. 497,648. 10 Claims. (Cl. 197—138.)



1. A typewriter having, in combination, a carriage frame, a platen journaled therein, a bracket rigidly mounted in said frame beneath said platen and having a plurality of alined pairs of upstanding ears along its forward edge and a plurality of alined upstanding ears positioned rearwardly from the first mentioned ears, a plurality of forward feed rolls, means for mounting each of said feed rolls comprising a carrier having two spaced parallel sides and a connecting cross piece, said sides having upwardly opening notches in opposite ends, a shaft journaled in a pair of said forward ears, one pair of said notches engaging said shaft from beneath, another shaft journaled in the other pair of said notches and having one of said feed rolls mounted thereon, a rock shaft journaled in said frame rearward from the forward ears and having a plurality of laterally projecting keys thereon, a rear feed roll carrier comprising spaced sides and a connecting cross piece, said sides having notches at their opposite ends, the forward pair of notches engaging beneath the said rock shaft, a shaft mounted in the rear pair of said notches, a plurality of rear feed rolls mounted on the last mentioned shaft, springs associated with said forward and rear feed-roll-carriers and tending to hold the rolls against the platen, a lug on each of said carriers overlapping one of said keys on said rock shaft, said keys being arranged to engage said lugs and swing said feed roll carriers away from the platen when said rock shaft is rocked, and means for rocking said rock shaft.

1,503,101. VEHICLE CURTAIN. EDWARD ACKERMAN, New York, N. Y. Filed July 10, 1923. Serial No. 650,643. 8 Claims. (Cl. 296—140.)

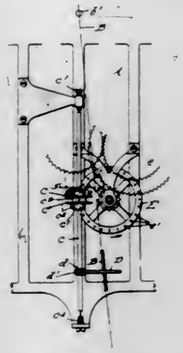


1. In combination with a vehicle top, a rod having a hollow portion and detachably secured longitudinally of the top, a spring arranged entirely within the hollow portion of said rod, said spring being fixedly secured intermediate its ends and having its ends freely movable, a curtain, and means for connecting said curtain with the free ends of the spring.

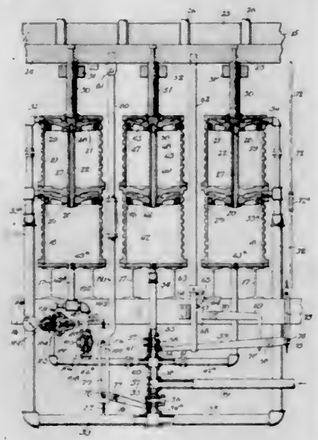
1,503,102. RING-WHEEL CHUCK. EDWARD P. ALSTED, Truesdell, Wis. Filed May 24, 1923. Serial No. 641,277. 6 Claims. (Cl. 51—209.)

1. In a ring wheel chuck a shell body formed with peripheral slots providing a plurality of leaves, a retaining ring recessed adjacent said leaves and means for moving said leaves into said recesses for releasing a ring wheel adapted to be secured thereby.

1,503,103. AUTOMOBILE SIGNAL. JOHN F. ARCHER, Trinidad, Colo. Filed Sept. 10, 1923. Serial No. 661,980. 7 Claims. (Cl. 115—53.)



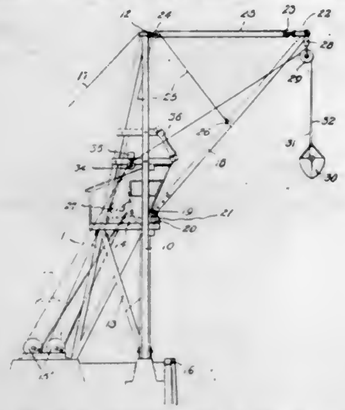
1. An automobile signal comprising a plurality of independent signal arms pivoted off center, and capable of gravitating from an upright inoperative position into a displayed position, selective holding means for maintaining each arm in an upright position, each holding means including a latch member and a push device controlling the latch member, and a single means common to the several signal arms for returning them from their operative positions into engagement with the respective holding means.



1,503,104. CLOCK ESCAPEMENT. JAMES P. ARMSTRONG and JOSEPH V. ARMSTRONG, Lancaster, N. Y. Filed June 29, 1922. Serial No. 571,587. 14 Claims. (Cl. 58—116.)

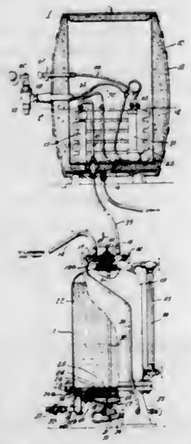
1. In an escapement mechanism, the combination of a pivoted oscillatory member, means for imparting power to said member at intervals to cause the same to turn in

opposite directions, an oscillatory weighted member which moves about a different pivot than said first-mentioned oscillatory member, and a connection between said oscillatory members, whereby each member imparts movement to and is moved by the other member.



1,503,105. PRESSURE PAD. MARTIN BALCKER, Chicago, Ill., assignor to Marquette Tool & Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 6, 1922. Serial No. 534,296. 29 Claims. (Cl. 113—46.)

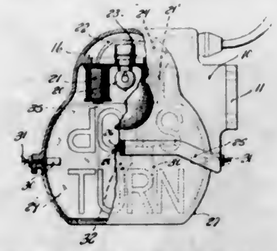
1. A pressure pad for sheet metal presses, said pad being operable as a blank holding means during a portion of the cycle of operation of the press, and means for causing the pad to drop beyond the bottom of the operative stroke of the press during another portion of the same cycle of operation of the press.



1,503,106. TRIPLE-MAST COAL HOIST. OTTO E. BARENE, Brooklyn, N. Y. Filed June 16, 1921. Serial No. 478,069. 3 Claims. (Cl. 212—66.)

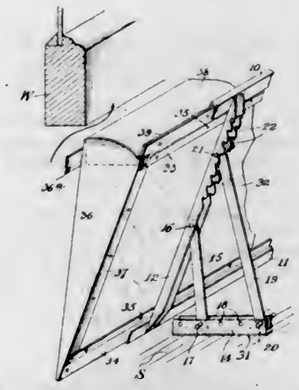
1. In a hoisting device, the combination of an upright support whose front lies substantially in a vertical plane, a gaff pivoted at one end upon said support close in front of said plane and movable up and down as well as laterally in either direction with respect to its pivotal support, connections between the top of the support and the remote end of the gaff for holding it at a predetermined elevation and for permitting it to swing laterally as aforesaid, a load carrying member, a pair of guide members on said support, located above the point of pivotal support for the gaff and at the rear of the aforesaid vertical plane of the support front, a pair of independently controllable power cables operating over said guide members and connected to said load carrying member, and a fulcrum member journaled upon said upright wholly in front of said support plane and in a

vertical plane perpendicular to the front plane aforesaid and above said guide members and having its axis inclined at an oblique angle to the plane of the support front, said fulcrum member being located to co-operate with one of said cables for returning the load carrying member to filling position after having been swung laterally for dumping.



1,503,107. DISPENSING APPARATUS. CHARLES L. BASTIAN, Chicago, Ill., assignor to The Bastian-Blessing Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 17, 1923. Serial No. 663,052. 15 Claims. (Cl. 225—21.)

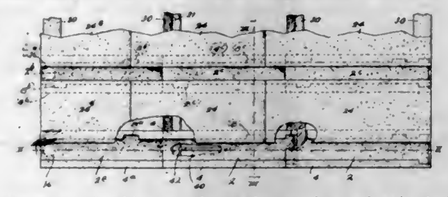
1. In dispensing apparatus, a plurality of coolers arranged seriatim, means for supplying beverage under pressure to one of the coolers, means for drawing the beverage after it has passed through only one of the coolers, and means for drawing the beverage after it has passed through the plurality of coolers.



15. In dispensing apparatus, a cooler, means for supplying a carbonated beverage to the cooler, a faucet, means connecting the discharge end of the cooler with the faucet, and a second means connecting the discharge end of the cooler with the faucet including friction means for gradually reducing the pressure of the carbonated beverage.

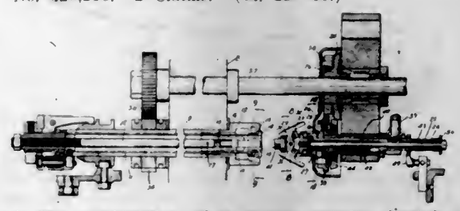
1,503,108. AUTOMOBILE SIGNAL. FREDERICK BAUER, Milwaukee, Wis. Filed Jan. 27, 1922. Serial No. 532,151. 1 Claim. (Cl. 177—327.)

In an automobile signal, a casing, a lens carried thereby and adapted for use as a tail light, a glass bowl supported by said casing and suspended beneath the casing, a plate extending across the casing and glass bowl, pivots carried in said casing for revolubly supporting said plate, a pair of arcuate members rigid with said plate and formed of magnetic material, said arcuate members being of different curvature through their extent, a weight rigid with said plate and adapted to maintain it normally in a horizontal position, a lamp carried within said casing above said plate and adapted to illuminate said lens and said plate, a pair of electromagnets each positioned above an arcuate member, means for supporting said lamp and said magnets, said plate having signalling indicia upon opposite sides thereof, whereby said plate normally extends horizontally across the apparatus and shields said bowl from said light and upon energization of one of said magnets rocks into a vertical position to display one side thereof and the corresponding signalling indicia carried thereon.



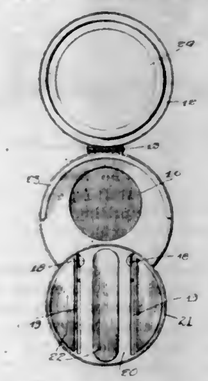
1,503,109. WINDOW VENTILATOR. JOHN BELLOCCHIO, New York, N. Y. Filed Jan. 15, 1924. Serial No. 686,321. 5 Claims. (Cl. 98—31.)

1. In a window ventilator, the combination of a frame comprising upper and lower channel rails, means including upright stays attached to the rails and serving to hold them in fixed spaced parallel relation to each other, brace means for the frame, and windshield means carried by the rails, said brace means including adjustable members pivotally connected to the stays.



1,503,110. SECTIONAL ROOF. WALTER C. BROUGHTON, Kansas City, Mo. Filed Oct. 27, 1922. Serial No. 597,299. 2 Claims. (Cl. 108—10.)

1. In a roof structure, a gutter slab consisting of a body portion having a transverse lip at its upper surface at one end and a longitudinal slot at its underside, a panel adapted to fit into said longitudinal slot, and a

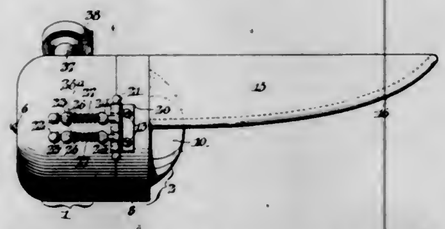


transverse shoulder at the under surface of said body portion at its end opposite the end containing said transverse lip.

1,503,111. METAL-WORKING MACHINE. ROBERT S. BROWN, New Britain, Conn., assignor to The New Britain Machine Company, New Britain, Conn., a Corporation of Connecticut. Filed Feb. 20, 1923. Serial No. 620,210. 2 Claims. (Cl. 29—60.)

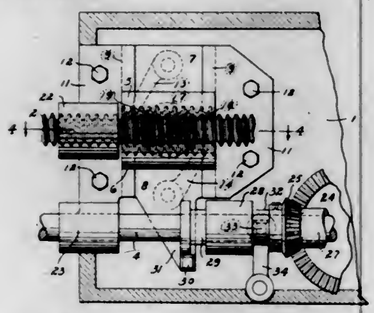
1. The combination of a rotary spindle, having a work-holder, of a second spindle having work-carrying means, driving and driven discs, the driving discs being constantly rotative, means to present work to the work-carrying means, means for endwise moving the second spindle to present the work carried thereby to the work-holder and means for driving the second spindle at a speed approximately agreeing with that of the rotary spindle at the time the work carried by the rotary spindle is presented to the work-holder.

1,503,112. VANITY CASE. CHRISTIAN A. BUSCHAM, Irvington, N. J., assignor to C. A. Buscham Mfg. Co., Irvington, N. J. Filed Sept. 10, 1923. Serial No. 661,925. 4 Claims. (Cl. 132—83.)



1. A vanity case including a case bottom having a hollow top hinged thereto at one side, a well in said case bottom for the reception of a cosmetic, a cosmetic receptacle fitted on top of the case bottom and having rectilinear sliding connection with said bottom, said receptacle forming a cover for said well when slid inwardly and being housed in the top upon closing of the latter on the case bottom, and an arcuate stop fixed on said case bottom to limit the movement of said receptacle.

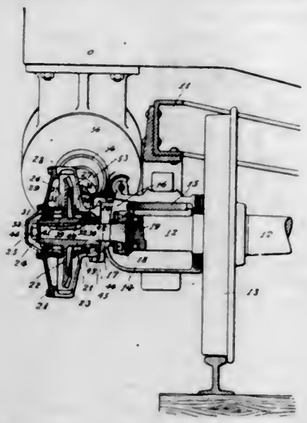
1,503,113. PROCESS FOR VULCANIZING RUBBER WITH CONDENSATION PRODUCTS OF AMMONIA AND ALDEHYDES AS ACCELERATORS. SIDNEY M. CADWELL, Leonia, N. J., assignor to The Naugatuck Chemical Company, a Corporation of Connecticut. Filed May 15, 1922. Serial No. 561,021. 12 Claims. (Cl. 18—53.)



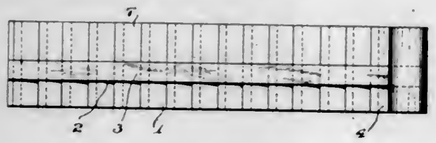
8. A vulcanized rubber derived from rubber combined with a vulcanizing agent and a reaction product of an aldehyde having seven carbon atoms in a straight hydrocarbon chain and ammonia.

1,503,114. VEHICLE LAMP. DANIEL CAMPBELL, Philadelphia, Pa. Filed Dec. 18, 1922. Serial No. 607,541. 9 Claims. (Cl. 240—7.)

1. The combination in a motor vehicle of spaced signals, means shading against observation from either side of the vehicle of more than one signal at a time, and automatically extensible hinge connections therefor with the pintles supported for independent shifting and subject to yielding means.



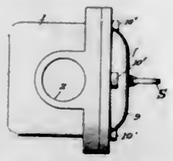
1,503,115. LATHE. LIONEL A. CARTER, St. Louis, Mo. Filed Dec. 3, 1920. Serial No. 428,056. 3 Claims. (Cl. 82—22.)



1. In combination with the feed-screw and the feed-rod of a lathe, and a gear-shifting sleeve slidable on said feed-rod, of a feed-nut comprising a pair of half-sections adapted to be closed upon said feed-screw and to be released therefrom, one of the half-sections of said feed-nut having a portion that projects beyond said feed-rod and has a lateral extension that overlaps said sleeve and lies close to the surface thereof in one position of said sleeve so as to be obstructed thereby but is unobstructed by said sleeve in its opposite position, whereby simultaneous operation of said feed-screw and said feed-rod is prevented.

1,503,116. POWER TRANSMISSION FOR ELECTRIC-CURRENT GENERATORS. KURT H. CONLEY, Bridgeport, Conn. Filed Feb. 14, 1923. Serial No. 618,895. 7 Claims. (Cl. 105—118.)

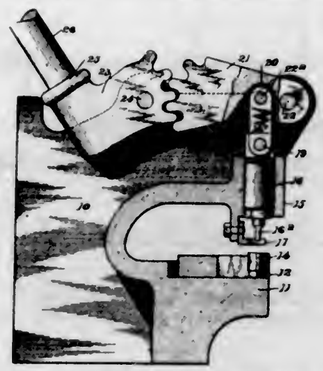
1. In combination with a wheeled vehicle including a body, an axle, and a truck carrying said axle, a power-using device mounted on the car body, an extension on said axle, an attachable and removable casing supported entirely on said extension, means to prevent rotation of said casing, gearing carried within said casing and adapted to be driven by said shaft extension, and transmission means connecting said gearing to said power-using device.



1,503,117. BIB. EARL A. CRAWFORD and GEORGE P. LA MERE, Hudson Falls, N. Y. Filed Nov. 5, 1923. Serial No. 672,737. 6 Claims. (Cl. 2—50.)

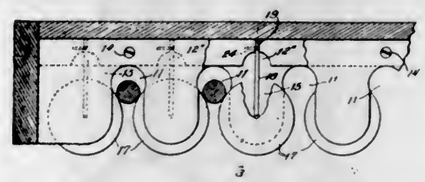
1. A strip of suitable material, pleated transversely of its length, said pleats being secured in pleated form longitudinally of said strip and intermediate the edges thereof, said device being adapted to be used as a bib.

1,503,118. SINK TRAP. ADOLPH L. DE LEEUW, Plainfield, N. J. Filed July 14, 1923. Serial No. 651,565. 6 Claims. (Cl. 182—23.)



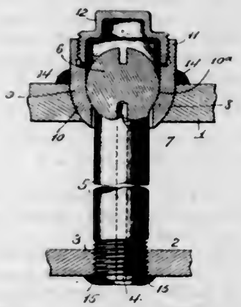
1. A sink-trap comprising a casing provided with inlet and outlet openings; transverse walls within said casing affording a water-pocket, a chamber formed within said casing adjacent said inlet; and a cylindrical cup removably secured within said chamber.

1,503,119. PUNCH PRESS. EDWARD J. DREIS, San Francisco, Calif. Filed Aug. 13, 1923. Serial No. 657,151. 3 Claims. (Cl. 164—96.)



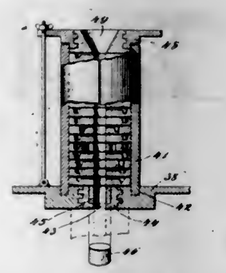
1. A punch press comprising a frame formed with an anvil, a ram guide carried by the frame above the anvil, a ram reciprocably mounted in the guide to operate against the anvil, an eccentrically mounted gear segment carried by the frame, a link pivotally connected

to the gear segment and to the ram forming a connection therebetween whereby oscillation of the gear segment will reciprocate the ram, an eccentrically mounted



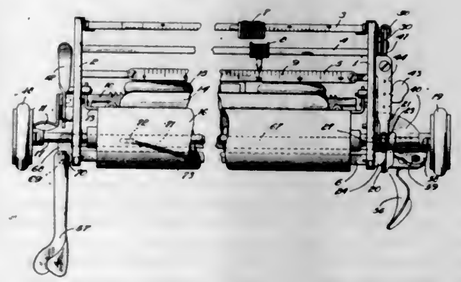
pinion carried by the frame and in mesh with the gear segment, the relative positions of the gear segment and pinion being such that the greatest ratio therebetween will occur at the beginning of the punching operation.

1,503,120. CUE RACK. THOMAS DROST, Elmhurst, N. Y., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill., a Corporation of Delaware. Filed Nov. 15, 1920. Serial No. 424,022. 12 Claims. (Cl. 46—6.)



1. A cue rack comprising a holder having a plurality of spaced recesses to receive the cues, and a cue engaging means yieldingly mounted in said holder between and projecting into each pair of said recesses to coact with the corresponding means on either side thereof to hold the cues in the recesses and bodily movable laterally to permit the insertion and removal of the cues.

1,503,121. STAY-BOLT STRUCTURE. JOHN ROGERS FLANNERY and ETHAN I. DODDS, Pittsburgh, Pa., assignors to Flannery Bolt Company, Pittsburgh, Pa., a Corporation of Delaware. Filed July 2, 1919. Serial No. 308,121. 1 Claim. (Cl. 85—1.5.)

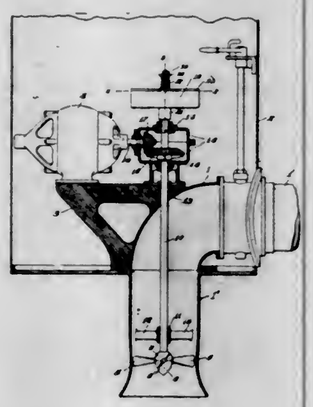


In a staybolt structure, the combination with inner and outer boiler sheets having openings, of a bearing member having initial universally movable mounting at the opening in one boiler sheet, a staybolt having a head at one end movably mounted in said bearing member, said staybolt having its other end passing through the opening in the other boiler sheet, and means including a weld for uniting the last-mentioned end of the staybolt with the boiler sheet through which it passes.

1,503,122. MACHINE FOR MAKING MULTIPLE MOLDS AND CASTINGS. HARRY S. FRANK, St. Louis, Mo. Filed Aug. 29, 1918. Serial No. 251,966. 10 Claims. (Cl. 22—65.)

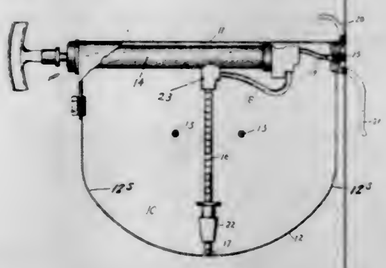
1. The combination in a set of molding and casting devices for making multiple molds and castings, of a cylindrical and rotatable mold holder, consisting of a divided shell enclosing a pile of molds preparatory to pouring, a base or mold rest, and a head or mold cover, both interlocking with said shell, and means for permitting a quick assembling and demounting of all said parts.

1,503,123. LINE-SPACE MECHANISM. DE WITT CLINTON HARRIS, Pineland, Fla. Filed Sept. 1, 1921. Serial No. 497,649. 11 Claims. (Cl. 197—114.)



1. In a mechanism of the class described, an actuator having a fixed pivotal support, a pair of studs fixed on said actuator, a pivoted lever having an arcuate slot to receive one of said studs, a bar having an arcuate slot to receive the other of said studs, said studs being normally positioned at one end respectively of said slots for operative engagement by said lever and said bar, and being arranged to pass through said slots as when either of said latter members remain inoperative.

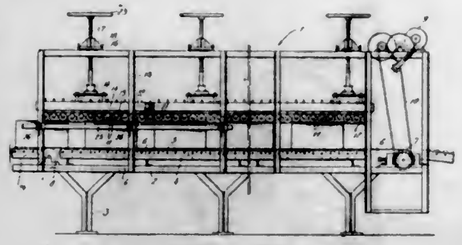
1,503,124. HYDROELECTRIC POWER PLANT. JOHN J. HOPPES, Springfield, Ohio. Filed May 23, 1923. Serial No. 640,972. 11 Claims. (Cl. 253—97.)



1. In a power plant of the character described, a water wheel comprising a series of blades of the propeller type

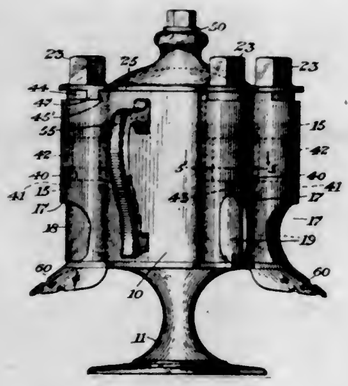
each rotatable upon its axis, and a governing mechanism rotatable with said wheel and connected with said

blades to change the pitch of the faces thereof to maintain a uniform speed of said wheel.



1,503,125. FIRE EXTINGUISHER WITH A SINGLE DELIVERY TUBE. ROSCOE C. IDDINGS, Dayton, Ohio, assignor to The Fyr-Fyter Company, Dayton, Ohio, a Corporation of Ohio. Filed Apr. 10, 1919, Serial No. 288,931. Renewed Dec. 31, 1923. 3 Claims. (Cl. 299—98.)

2. A fire extinguisher comprising a fluid container of flat and approximately segmental form, in combination with a pump, a flexible tube connected to said pump and suspended from a point in the container which approximates the axis of the segment and around which said tube is adapted to oscillate as a center, and means for compelling the tube to oscillate around a point of smaller radius when the inclination of said container exceeds a certain angle, the perimeter of the container being of such form that the mouth of the tube will be substantially the same distance from it whether the tube is hanging free from its support or is under the control of one of said centers of smaller radius.

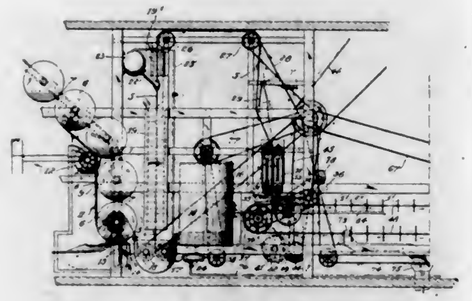


1,503,126. SEALING MACHINE FOR FILLED CARTONS. WALLACE D. KIMBALL and ARTHUR E. RIDEOUT, New York, N. Y., assignors to Standard Sealing Equipment Corporation, New York, N. Y., a Corporation of New York. Filed July 15, 1920. Serial No. 396,362. 10 claims. (Cl. 93—6.)

1. In a carton-closing machine, the combination of means to advance the cartons with the flaps gummed and folded, and means for applying pressure to the flaps comprising a presser member of less width than the

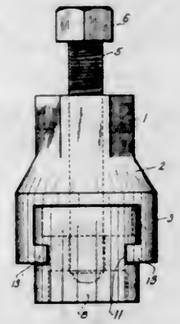
width of the carton, the contacting surface of said member being stationary relative to the carton.

1,503,127. DISPENSING DEVICE FOR GRANULAR MATERIALS. CLIVE W. LANPHERE, New York, N. Y. Filed June 27, 1923. Serial No. 648,026. 22 Claims. (Cl. 221—106.)



1. A dispensing device for granular materials, comprising a magazine having an outlet opening in its side wall and a bearing post on its bottom wall provided with an undercut annular shoulder, a cover for the magazine having an opening, and a rotatable stirring spindle resting at its lower end on the bearing post and having its upper end projecting through the opening in the cover as a means whereby it may be operated, the said spindle being provided with a locking finger loosely engaging the annular shoulder on the bearing post to lock the spindle against withdrawal from the magazine when the cover is in place.

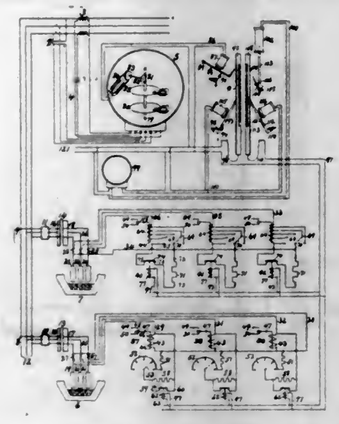
1,503,128. PROCESS AND APPARATUS FOR COATING CORSET STEELS. HOYT HARRISON LELAND, East Orange, N. J., and GUSTAVUS A. NEW, New York, N. Y., assignors to L. S. & N. Corporation, a Corporation of New York. Filed Apr. 17, 1922. Serial No. 554,600. 23 Claims. (Cl. 91—68.)



1. The process of coating strip material with a liquid coating composition comprising applying a primary coating to the strip of material, drying the primary coating, then applying an edging to the strip of material.

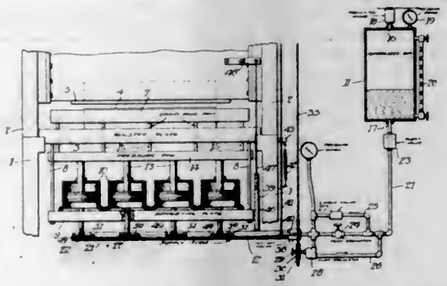
6. An apparatus for making corset bones or similar articles, comprising means for coating a strip of material with a liquid coating composition, means for cutting the material into appropriate lengths and means for dipping the ends of the cut lengths into a coating bath for rounding off such ends.

16. In a machine of the character described, the combination of means for applying a primary coating to a strip of material, means for cutting the strip into appropriate lengths, and means for applying a protecting bud to the ends of the pieces thus cut.



1,503,129. WHEEL PULLER. CHARLES H. MILES, Jr., Birmingham, Ala. Filed May 1, 1923. Serial No. 635,830. 5 Claims. (Cl. 29—85.)

1. A wheel puller comprising a chuck having a laterally opening recess, a screw working longitudinally through said chuck and recess, a socket member removably mounted in said recess, means to interlock said socket with the chuck against relative longitudinal movement, and means on the socket to engage a wheel hub, there being a central aperture in the socket for the passage of said screw.

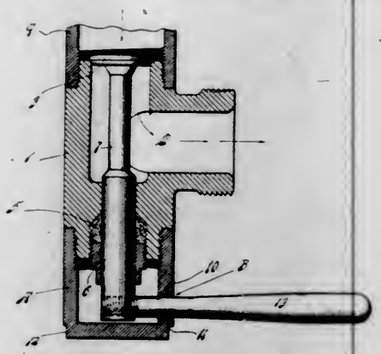


1,503,130. ELECTRICAL APPARATUS FOR AUTOMATICALLY CONTROLLING PEAK DEMANDS. EDWARD TALCOTT MOORE, Syracuse, N. Y. Filed Feb. 14, 1920. Serial No. 358,748. 10 Claims. (Cl. 171—312.)

1. The combination with an electric working circuit including therein an electric meter, of automatic means for controlling the peak demands in said circuit, comprising normally spaced cooperative contacts movable one in relation to the other, electrically operated means controlled by said meter for gradually moving one of the contacts toward the other at a rate of speed proportionate to the speed of the meter and electrically operated means

controlled by said contacts for causing a reduction of the power demands in said circuit in case the contacts should be closed during a predetermined interval of time.

1,503,131. POWER PRESS. JOHN NELSON, Chicago, Ill., assignor to Marquette Tool & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 16, 1922. Serial No. 529,494. 14 Claims. (Cl. 113—46.)



1. In a die press, the combination of a fluid pressure control system including a pressure pad, a controlling valve, means for causing a fluid pressure to be exerted upon said pad, and means for automatically increasing said pressure during the movement of said pad.

1,503,132. VALVE. ERNEST P. PRATOR, Leeper, Mo., assignor of one-third to John T. Fredricks, Leeper, Mo., and one-third to John R. Stephens, St. Louis, Mo. Filed Dec. 12, 1921. Serial No. 521,691. 4 Claims. (Cl. 251—131.)

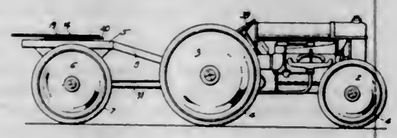
4. A quick-closing pressure-actuated valve device comprising a valve housing having an angular passageway provided with an annular valve seat at one of its ends, a stuffing box co-axial with said valve seat, a pressure-actuated valve adapted to be closed and held on said seat in response to fluid pressure, a valve stem fixed to said valve and extending through said stuffing box, a tubular member screwed onto said valve housing and surrounding the outer end of said stem, said tubular member having an angular cam slot comprising a horizontal portion and a portion provided with an inclined cam face and a notch in said face, and a valve-opening handle extending through said slot and removably fixed to said valve stem, said handle being movable along said cam face to open the

valve and a portion of said handle being adapted to enter said notch to retain the valve in its open position, said handle being separated from said cam face and free to

oscillate in said horizontal portion of the slot when the valve is held on said seat, so as to grind the valve on the seat.

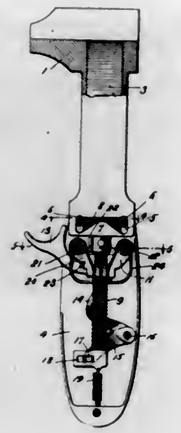
1,503,133. PROCESS FOR THE PRODUCTION OF A FILTRATION ACCELERATOR. CHARLES F. RITCHIE, Lompoc, Calif., assignor to The Celite Company, Los Angeles, Calif., a Corporation of Delaware. Filed Mar. 26, 1923. Serial No. 627,713. 41 Claims. (Cl. 252—2.)

1. The process of producing a filter-aid which consists in subjecting kieselguhr to repeated calcinations, before using the same as a filter-aid.



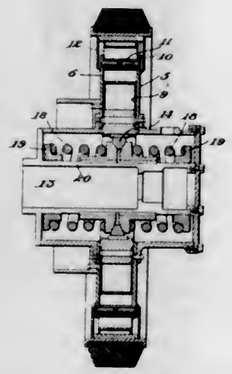
37. As an article of manufacture a filter-aid consisting of kieselguhr which has been repeatedly calcined before use as a filter-aid.

1,503,134. SANITARY HOUSING FOR TOOTH-BRUSHES. THOMAS A. RYAN, Yonkers, N. Y. Filed May 18, 1920. Serial No. 382,269. 1 Claim. (Cl. 266—15.1.)



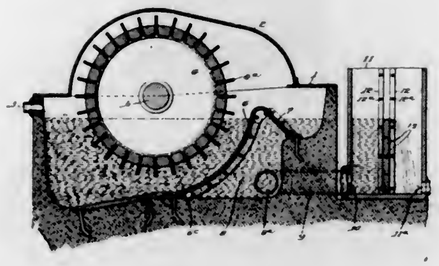
The combination with a tooth brush of a complete housing adapted to swing to and from and encase the brush end of said tooth brush, said housing comprising a casing having an arm pivoted to a clamp adapted to attach to the handle of said brush, an opening formed in the top of one end to receive the handle, and the casing side adjacent to said opening adapted to open and close to enable said casing to swing to and from said brush end.

1,503,135. TRUCK-HAULING ATTACHMENT FOR TRACTORS. WILLIAM H. SARGENT, Clayton, Mo., assignor of one-third to George Rixmann and one-third to Julius Seidel, both of St. Louis, Mo. Filed Jan. 13, 1923. Serial No. 612,546. 7 Claims. (Cl. 280—33.)



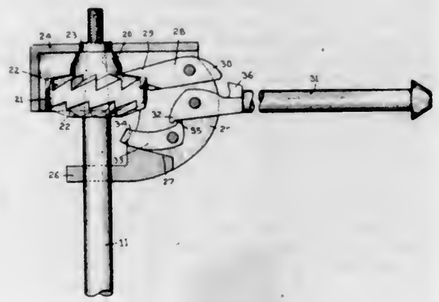
1. In combination with a tractor, an auxiliary two-wheeled body connected thereto, and means on said body adapting it for detachable connection with a semi-trailer.

1,503,136. WRENCH. LOUIS W. SCHAAFF, Hoboken, N. J. Filed May 18, 1921. Serial No. 470,645. 13 Claims. (Cl. 81—129.)



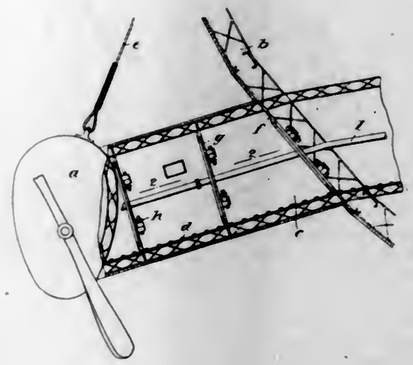
1. A wrench comprising jaws one of which is movable relative to the other, shafts connected with the jaws and having portions co-acting to maintain alignment therebetween, manually-actuated means for imparting relative longitudinal movement to one shaft in one direction, said shaft being so movable to the full extent of its range of movement, spring-actuated means for imparting movement thereto in the other direction, and spring-actuated means operable upon adjustment of the jaws to the object to be turned to lock the jaws against separation.

1,503,137. RESILIENT TRANSMISSION AND BEARING. BENJAMIN F. SEYMOUR, Washington, D. C. Filed Sept. 9, 1919. Serial No. 322,628. 2 Claims. (Cl. 152—45.)



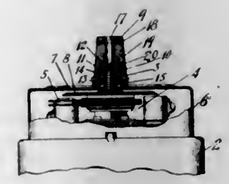
1. In a combined resilient bearing and drive for vehicle wheels, the combination of a hub member, a wheel rim mounted to have limited radial movement thereon, said rim having a plurality of centrally disposed pyramidal shaped members, a pair of sleeves mounted to have axial movement on said hub member, said sleeves having portions provided with relatively angular surfaces cooperable with the angular surfaces of said pyramidal members, and springs normally holding said cooperable angular surfaces in contact to provide the bearing and drive, substantially as set forth.

1,503,138. PROCESS OF PRODUCING PAPER PULP AND APPARATUS THEREFOR. CHARLES W. SHARTLE, Middletown, Ohio, assignor to The Shartle Brothers Machine Company, Middletown, Ohio, a Corporation of Ohio. Filed Oct. 1, 1923. Serial No. 665,756. 5 Claims. (Cl. 92—23.)



1. In a pulp-making system, the method described of reducing continuously supplied raw stock to a predetermined degree of fineness and drawing off the same as the reduction proceeds, which consists in subjecting it to the action of a breaker which includes a screened discharge chamber arranged to cause a gravity discharge of the reduced stock to and through a receiving vessel which includes in itself adjustable means to automatically maintain the water and raw stock in the breaker at a level with said means so adjusted.

1,503,139. SAFETY REVERSE RATCHET BRAKE. BURL SOOTS, JOHN KLANCHER, HOMER A. MAGRATH, and GEORGE C. VAN BRIMER, Pueblo, Colo. Filed Nov. 22, 1923. Serial No. 676,376. 6 Claims. (Cl. 74—116.)

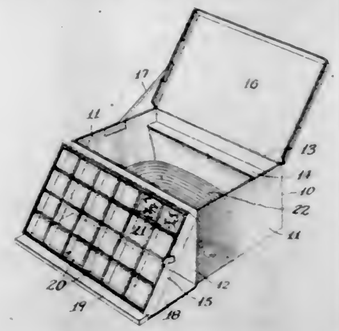


1. In a mechanism for the purpose specified, a rotatable shaft, a bracket rotatably mounted on said shaft, a lever pivoted to the bracket to swing from a position substantially parallel to the shaft into acute angled relation to the shaft, and a pawl and ratchet mechanism associated with the shaft and bracket and operable under the influence of the varying positions of the lever to effect intermittent rotation of the shaft in one direction or the other.

1,503,140. AIRSHIP GONDOLA. KARL STAHL, Friedrichshafen, Germany, assignor to the Firm: Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed Oct. 26, 1921. Serial No. 510,582. 2 Claims. (Cl. 244—6.)

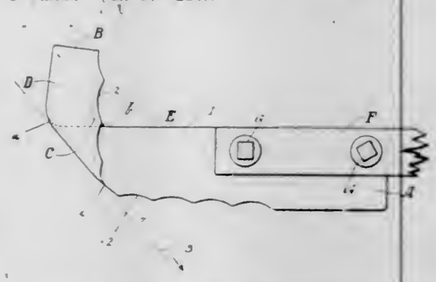
1. In an airship in combination, an airship body, a gondola projecting and suspended from said body, a passageway or shaft connecting said gondola with said body and bulkheads subdividing said shaft into several compartments.

1,503,141. ELECTRIC SWITCH. CLARENCE C. STIRLING, Hartford, Conn. Filed Jan. 5, 1921. Serial No. 435,061. 1 Claim. (Cl. 200—172.)



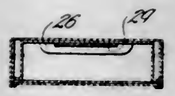
A button for the spindle of an electric switch, provided with a clutch portion in the form of a fin to engage the slot on the switch spindle, and a coiled spring around the spindle acting to yieldingly lock the fin into the slot to prevent backward motion of the button when it is operatively connected with the spindle, said spring acting to permit the button to be freed from the spindle by the retraction and the backward motion of the button.

1,503,142. DISPLAY DEVICE. ABRAHAM SUSSELES, Brooklyn, N. Y. Filed May 24, 1923. Serial No. 641,142. 3 Claims. (Cl. 206—44.)



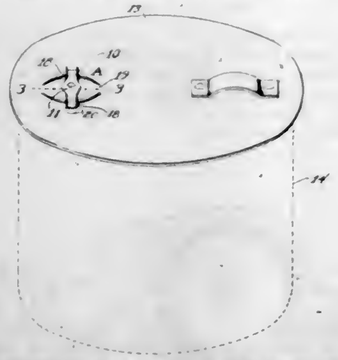
2. A display device of the class described comprising a box-shaped container composed of side and end walls, a supplemental wall forming part of the container and

movable relatively to one of the first named walls of the container, and a tray adapted to be normally contained



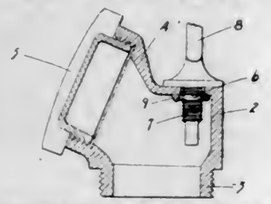
within said container and to be supported in an inclined position with reference to the container by said supplemental wall.

1,503,143. LAWN EDGER. CHARLES A. UPTON, St. Paul, Minn. Filed Oct. 2, 1920. Serial No. 414,264. 1 Claim. (Cl. 97—227.)



A device of the class described comprising a handle, a flat blade extending endwise from said handle and in line therewith, the free end of said blade at some distance beyond the handle being bent substantially at right angles to extend across and beyond the blade, the inner edge of said bent portion and the continuing straight edge of the straight portion of the blade being formed with regular wave-like serrations to form a cutting edge for the bent portion and to form an opposed cutting edge for the straight portion between the bent portion and handle, the serrations of the bent portion being beveled inwardly toward the handle and the serrations of the straight portion beveled downwardly, and the latter serrations extending in one direction beneath the handle and in the opposite direction merging into the serrations of the bent portion in a transverse and upwardly inclined direction.

1,503,144. DISPENSING CARDCASE. ROGERS M. WARWICK, Eastlake, Fla., assignor of one-half to Dudley W. Lester, Wilmette, Ill. Filed July 13, 1921. Serial No. 484,351. 8 Claims. (Cl. 206—40.)

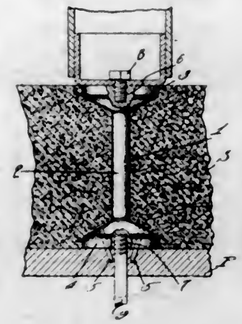


1. In a card case a receptacle open at the top, a card holding receptacle having an open side arranged within said first named receptacle in inverted position, and flanges extending laterally from said card holding receptacle into engagement with said first named receptacle.

1,503,145. VALVE. ROBERT H. WENTORF, West Bend, Wis., assignor to West Bend Aluminum Company, a Corporation of Wisconsin. Filed Aug. 8, 1921. Serial No. 490,748. 9 Claims. (Cl. 251—131.)

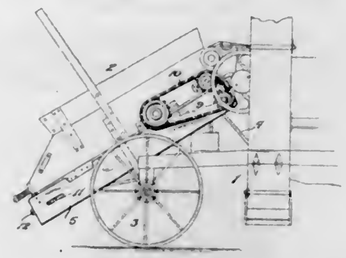
1. In combination with the cover of a boiler, having a port therethrough, a bar, a pin carried by said bar and passing through said port, a head carried by said pin, a washer carried by said pin, and cams formed integrally with said cover and in operative relation to said bar.

1,503,146. MOTOR-METER MOUNTING. CARL A. WITT, Los Angeles, Calif. Filed Sept. 15, 1922. Serial No. 588,342. 2 Claims. (Cl. 220—24.)



1. A hollow radiator cap member having an externally threaded bottom flange and being provided with an upwardly extending annular mount internally threaded to receive the cap, the said member having behind and below the upper part of the mouth a plane top portion apertured to receive a motor meter.

1,503,147. PAD FOR LAUNDRY AND OTHER MACHINES. WILLIAM A. ZEIDLER, New York, N. Y., assignor to Zeidler Economy Spring Pad Co., Inc., New York, N. Y., a Corporation of New York. Filed Mar. 18, 1922. Serial No. 544,735. 2 Claims. (Cl. 68—9.)

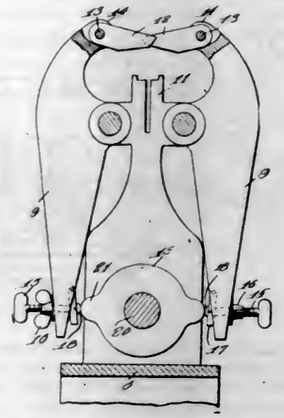


1. In a body for laundry machine pads, a plurality of layers of corrugated wire mesh, the corrugations of adjacent layers crossing each other at an angle and means for securing the layers together.

1,503,148. COMBINED REENFORCE AND LEVELER. HARRY WILLIAM BERNSTROM, Edgewood, R. I. Filed May 3, 1922. Serial No. 558,162. 1 Claim. (Cl. 72—101.)

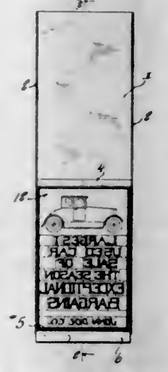
A combined leveler and reenforce and hanger for concrete structures comprising a shank threaded at its ends and having flat faced heads facing in opposite directions and provided with centrally disposed internally threaded bores extending therethrough, and having threaded engagement with said shank, said bores operating as attaching means for adjustable connection with the shank and to receive anchoring elements.

1,503,149. ATTACHMENT FOR CORN SHELLERS. HARRY B. BINGMAN, Robinson, Kans. Filed June 4, 1923. Serial No. 643,315. 1 Claim. (Cl. 130—7.)



An attachment for corn shellers consisting of a pair of side rails adapted to be supported in an inclined position by the frame of the sheller with their upper edges abutting the lower edges of the feeder of the sheller, shafts mounted transversely in the rails adjacent the ends thereof, the shaft at the upper ends of the rails being extended laterally beyond one rail and equipped with a gear element, operative connections between said element and the driving gearing of the feeder, rollers carried by said shafts adjacent the ends thereof, the lower shaft and rollers being below the lower end of the feeder, belts trained around said rollers, and an endless apron carried by said belts and delivering into the receiving chute of the sheller.

1,503,150. REFRACTORY ARTICLE AND METHOD OF MAKING THE SAME. CLARENCE J. BROCKBANK, Philadelphia, Pa., assignor to Ross-Tacony Crucible Company, a Corporation of Pennsylvania. Filed July 24, 1923. Serial No. 653,570. 5 Claims. (Cl. 25—157.)

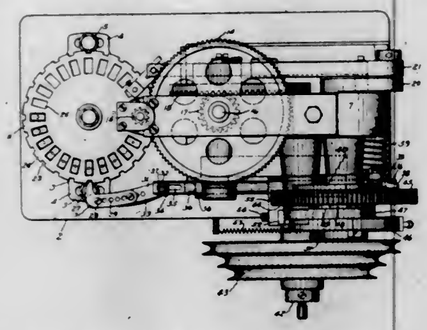


1. A refractory article of graphite and clay vitrified in an atmosphere of hydrocarbon gas and characterized by relatively increased hardness at high temperature and relatively increased refractory properties.

1,503,151. TWO-TOOTH SETTER. LAWRENCE PETER CHRISTIANSEN, Iron Mountain, Mich. Filed June 11, 1923. Serial No. 644,702. 1 Claim. (Cl. 76—62.)

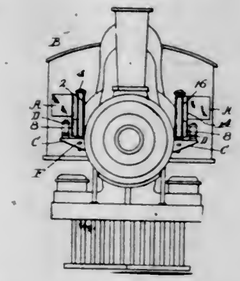
In a saw set, a base, supports extending upwardly from the base, a pair of pivoted arms mounted on the supports, adjustable setting dogs mounted at the upper ends of the arms, adjusting screws disposed at the lower ends of the arms, pivoted roller supports adapted to be engaged by the adjusting screws, and adjusted towards and away from the arms, and a double ended cam engaging the pivoted roller supports to move the arms with respect to each other.

1,503,152. PRINTER'S GALLEY AND METHOD OF ASSEMBLING PRINTERS' MATERIAL. EDMUND PAUL EHRLINGER, Janesville, Wis. Filed July 18, 1923. Serial No. 652,238. 2 Claims. (Cl. 276—40.)



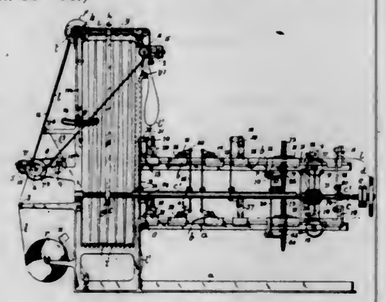
1. A compound printer's galley comprising an outer galley having a bottom, an end and sides, and an inner galley having a bottom and an end, said inner galley being normally slidably mounted within said outer galley.

1,503,153. METAL-WORKING MACHINE. URI D. FOSTER, Hartford, Conn., assignor to The Hart & Hegeman Manufacturing Company, Hartford, Conn., a Corporation of Connecticut. Filed Jan. 13, 1922. Serial No. 528,926. 9 Claims. (Cl. 10—129.)



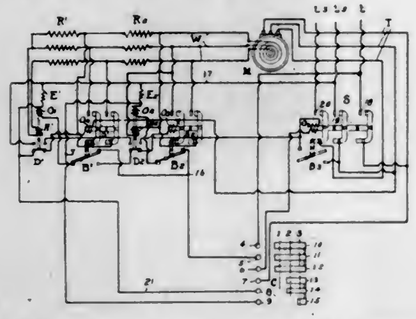
2. A machine of the class described comprising a power-driving member, a driven member to co-operate with the driving member, a work-carrier, a clutching member between the driving and the driven members

and acting normally to automatically couple the same, a work carrier, a reciprocatory actuator operable by the driven member, a latch to engage the clutching member,



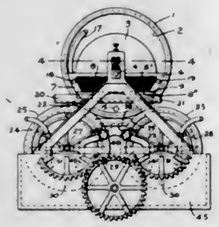
and means associated with the actuator for tripping the latch on each complete movement of the actuator to thus permit the clutching member to couple the driving and the driven members on each said complete movement.

1,503,154. LOCOMOTIVE FLAGSTAFF AND CONTAINER. WILLIAM L. GIBSON, Trenton, Mo. Filed May 3, 1923. Serial No. 636,483. 6 Claims. (Cl. 246—488.)



2. In a device of the character described a container adapted to hold one or more flags and their staffs, a lid to said container, and an exterior support on said container for holding a staff in position to display its flag.

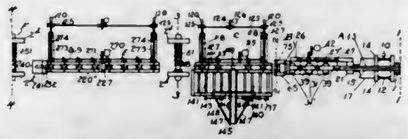
1,503,155. MACHINE FOR THE MANUFACTURE OF ENVELOPES. ADRIAN HAAS, Hounslow, England. Filed May 9, 1921. Serial No. 467,882. 10 Claims. (Cl. 93—64.)



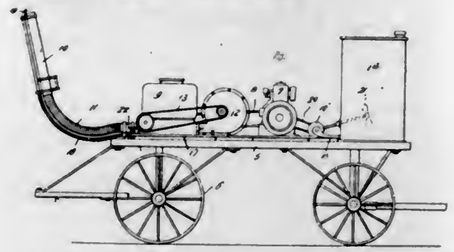
1. In a machine of the character described, means for continuously feeding a web of paper during certain operations in the course of making envelopes, means for intermittently feeding the paper during subsequent operations, and severing devices for dividing the web into strips between the two sets of operations and during continuous movement of the web, substantially as set forth.

1,503,156. MOTOR-CONTROL SYSTEM. JAY H. HALL, Cleveland Heights, Ohio, assignor to The Electric Controller & Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 13, 1922. Serial No. 574,747. 16 Claims. (Cl. 172—179.)

1. In an electric system containing a current-controlling resistance, a circuit containing the resistance, an electromagnetic switch for cutting out the resistance from the circuit, a relay for controlling the switch, a winding independent of said circuit for operating the relay and rendering said switch ineffective, a winding for holding the relay in its operated position, and means for shunting the operating winding to make the said switch effective.



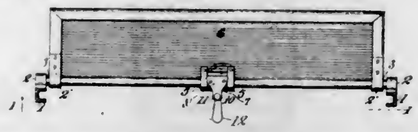
1,503,157. CRUSHER FOR MINERAL ORES. ALEXANDER HALLIDAY, Prince Rupert, British Columbia, Canada. Filed May 31, 1922. Serial No. 564,874. 13 Claims. (Cl. 83—85.)



1. In a mineral separator, a pair of rotatably mounted parallel closely-adjacent recovery cylinders, a crushing cylinder mounted between the aforesaid cylinders and having rolling contact therewith to form a second ore crushing means, means within the crushing cylinder for primarily crushing the ore, and means for feeding the ore crushed within the crushing cylinder to between such cylinder and the parallel cylinders.

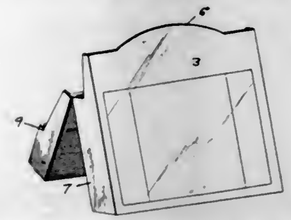
1,503,158. APPARATUS FOR THE MANUFACTURE OF SEAMLESS STEEL TUBES. JAMES J. HARKINS, Pittsburgh, and OTTO F. ORMAN, McKeesport, Pa., assignors of four-fifths to said Harkins and one-fifth to said Orman. Filed Dec. 2, 1919. Serial No. 341,931. 28 Claims. (Cl. 80—11.)

7. A rolling mill for the production of seamless tubes from pierced shells comprising a series of rolls arranged in tandem, said rolls being provided with grooves of graduated sizes therein for the production of tubes of different diameters, a receiving table for receiving the shells from a piercing mill, a feed table between the receiving table and the first roll of the series, and normally in alinement with the receiving table, means for moving the feed table transversely to the rolls and receiving table to selectively feed the shell into any desired groove in said rolls, means on said feed table for receiving shells when the feed table is moved transversely out of alinement with the receiving table, means between the rolls for receiving the shell from any groove in the preceding roll and feeding it into the corresponding groove of the following one and a run-out table after the last roll of the series.



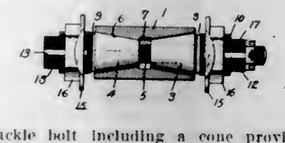
1,503,159. SPRAYING MACHINE. CHARLES E. HAYWOOD, Larkins, Fla. Filed July 30, 1923. Serial No. 654,542. 1 Claim. (Cl. 43—148.)

In a spraying machine, a relatively large air discharge nozzle, means for supplying a large volume of air under low pressure and high velocity through said nozzle, a relatively small liquid discharge nozzle associated with the outlet end of said air nozzle and opening in the path of the air, means for supplying spraying liquid through the second-mentioned nozzle under low pressure, manually controlled means for supplying dust to the air before the latter passes to said nozzle, and manually operable means to render the liquid supplying means operative or inoperative.



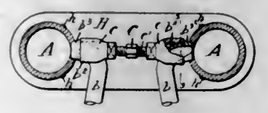
1,503,160. LEVER-OPERATED ADJUSTING MECHANISM. GEORGE N. HEIN, San Francisco, Calif. Filed Oct. 8, 1923. Serial No. 667,181. 5 Claims. (Cl. 296—95.)

1. In combination with a pivotally mounted sunshade, a lever fulcrumed to swing on a vertical axis and provided with a slotted end, and a pin associated with the sunshade and extending angularly therefrom adjacent its line of fulcrum and received within said slot to provide an operating connection between the sunshade and lever.



1,503,161. BOX. GEORGE HORNECKER, Elmhurst, N. Y., assignor to L. R. Conwell, Elmhurst, N. Y. Filed Jan. 14, 1924. Serial No. 686,059. 2 Claims. (Cl. 206—44.)

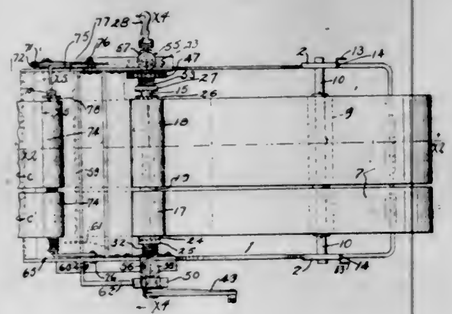
1. A box comprising a body adapted to form a box structure, a score line across one face of the box, cuts extending from such score line across the sides of the box and across the other face, whereby the box may be bent at said score line, and a locking device for holding the portions of the box after folding, in proper relative angular position, the front of the box when the box is in folded angular position being higher than the back scored surface to thereby protect the goods within the box, the front of the box being adapted for advertising



indicia, the goods within the two portions of the box when folded being protected against removal through the front of the box, the front of the box having an opening smaller in size than the units of merchandise within the box, whereby said units are directly displayed to the purchaser but cannot be removed through the front of the box.

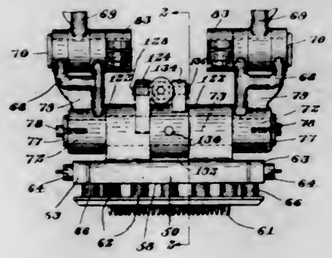
1,503,162. SHACKLE BOLT. FRANCIS F. JAMES, Philadelphia, Pa. Filed Dec. 28, 1923. Serial No. 683,158. 3 Claims. (Cl. 64—7.)

1. A shackle bolt including a cone provided at the inner end with an integral threaded shank and cone sleeve interiorly threaded and arranged on the shank, said cone and cone sleeve being provided with exterior annular grooves, means for securing the cone and cone sleeve in their relative adjustment and a cone bushing having opposite inwardly tapered bearing portions receiving the cone and cone sleeve, said bushing having its ends located at the said annular grooves and being provided with an interior centrally arranged groove of greater diameter than the inner ends of its bearing portions, said grooves cooperating to permit free adjustment of the cone sleeve, cone and bushing, by preventing the formation of shoulders.



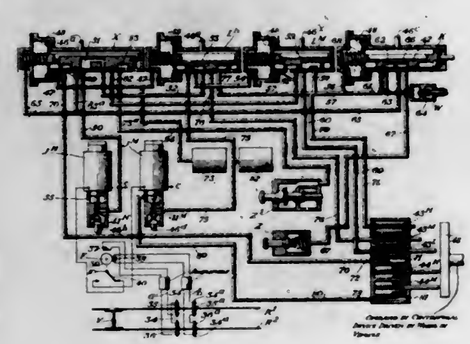
1,503,163. STEAM SUPERHEATER. ALBERT JEAVONS, Wolverhampton, England, assignor to John Thompson (Wolverhampton) Limited, Wolverhampton, England. Original application filed July 7, 1920. Serial No. 394,543. Divided and this application filed Oct. 2, 1923. Serial No. 666,203. 1 Claim. (Cl. 122—460.)

In a superheater the combination with a pair of high pressure and high temperature headers having openings arranged in pairs with the openings of each pair in axial alinement, said openings being acutely tapered; of a superheater section having oppositely disposed outwardly extending terminal portions arranged in axial alinement and tapered to correspond with the header openings, said tapered portions terminating inwardly with a shoulder, a pair of tubular members each having a lateral opening whereby the one end of each member is U-shaped in cross section, said members fitting over the terminal portions of the superheater section and bearing against



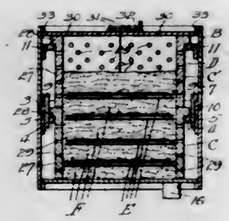
the shoulders thereof, one of said members having a right hand internal thread and the other having a left hand internal thread, a double ended screw having engagement with said internal threads, and turning tool engaging means located centrally of the screw.

1,503,164. TAPE FEEDER, MOISTENER, AND CUTTING APPLIANCE. ADOLPH KEDLER and HENRY ROSENTHAL, Los Angeles, Calif. Filed Feb. 4, 1922. Serial No. 534,094. 7 Claims. (Cl. 91—14.5.)



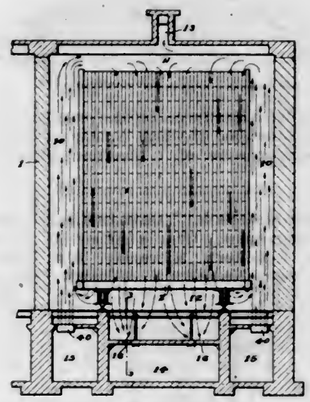
1. The tape appliance set forth comprising a frame; shafts in said frame; a tape cutter in said frame; a long pair of rollers on said shafts for feeding a wide tape toward said cutter; a short pair of rollers on said shafts for feeding a narrow tape toward said cutter, said pairs of rollers loosely mounted on said shafts; and selective means for clutching one or the other of said pairs of rollers into driving engagement with said shafts.

1,503,165. MICROMETRIC CONNECTION. WILLIAM F. LAUTENSCHLAGER, Cincinnati, Ohio, assignor to The Peerless Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed Dec. 1, 1922. Serial No. 604,317. 4 Claims. (Cl. 164—106.)



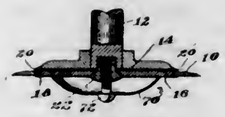
1. In a perforating machine, the combination of a die-carrying plunger, means for operating said plunger, and means for adjusting the relation between said plunger and said operating means; said means comprising a shaft having a main portion and an eccentric portion, said plunger being mounted on one of said portions and said operating means being connected to the other of said portions, an arm fixed to the main portion of said shaft and carrying a threaded member, and an adjusting screw mounted on a fixed part of said plunger and threaded through said threaded member.

1,503,166. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. LLOYD V. LEWIS, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Original application filed Sept. 11, 1919, Serial No. 323,168. Patent No. 1,419,869, dated June 13, 1922. Divided and this application filed Dec. 16, 1920, Serial No. 431,116. Renewed Nov. 6, 1922. Serial No. 599,443. 9 Claims. (Cl. 246—38.)



5. Railway traffic controlling apparatus comprising a medium speed valve and a high speed valve carried by the vehicle, means for reversing the medium speed valve upon a change from a more favorable to a less favorable traffic condition, a suppressed application valve also carried by the vehicle and normally occupying an inactive position, manually controllable means on the vehicle for reversing said suppressed application valve, means controlled by said suppressed application valve when in reversed position for preventing reversal of the medium speed valve and causing reversal of the high speed valve when said change of traffic conditions occurs, and means controlled by the two first-mentioned valves for causing certain speed restrictions when the medium speed valve is reversed and less severe speed restrictions when the high speed valve is reversed and the medium speed valve is in normal position.

1,503,167. HOGSHEAD FOR REDRYING, RECURING, AND RESWEATING TOBACCO. JOHN H. MILLS, St. Louis, Mo. Filed Nov. 25, 1921. Serial No. 517,827. 8 Claims. (Cl. 131—6.)



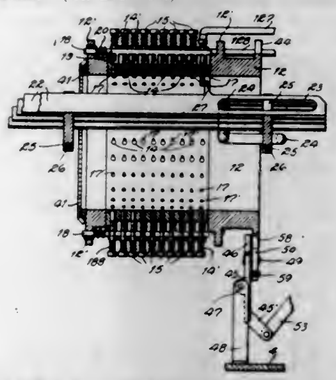
1. A hogshead for redrying, recuring and resweating leaf tobacco comprising a lower hogshead section consisting of two halves hingedly united on one side, an upper hogshead section consisting of two halves hingedly united on one side, a separable perforated tubular lining disposed within the hogshead sections for receiving leaf tobacco to be packed in layers, a perforated spacer between each layer of tobacco, a bottom for the hogshead, a top therefor and means for locking the hogshead in its closed position when treating the tobacco packed therein.

1,503,168. METHOD OF AND APPARATUS FOR KILN-DRYING LUMBER. MORITZ L. MUELLER, Seattle, Wash., assignor to Northwest Blower Kiln Company, Seattle, Wash., a Corporation of Washington. Filed Apr. 21, 1923. Serial No. 633,688. 4 Claims. (Cl. 34—19.)

4. A lumber drying kiln comprising a chamber having a trackway extending lengthwise thereof and adapted to receive lumber carrying trucks, an air-withdrawing flue located between the rails, an air discharging flue at each side of the track, said flues having openings close to the side walls of the kiln for discharging air upwardly, air reheating means and means for withdrawing air from the kiln through said central flue, passing it through the reheating means and discharging it upwards into the kiln from the side flues.

1,503,169. SKIVING MACHINE. CHARLES Q. REYNOLDS, St. Louis, Mo., assignor to Lorenz Muther, Newton, Mass. Filed May 22, 1922. Serial No. 562,624. 3 Claims. (Cl. 69—16.)

1. A skiving machine having, in combination, a cutting disk, means located below said disk for feeding the material to be skived against the cutting edge of said disk and then underneath said disk and a bell-guard mounted on the under side of said disk for deflecting the skived material downwardly and away from the cutting edge of said disk.

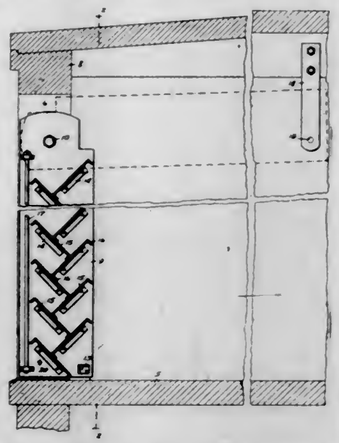


1,503,170. PROPELLER BLADE. JOHN W. SMITH, Philadelphia, Pa. Filed Mar. 16, 1918. Serial No. 222,932. 3 Claims. (Cl. 170—159.)

1. A hollow metallic propeller blade of gradually diminishing thickness from the base to its tip, said blade being longitudinally curved with relation to a plane radial to its axis of rotation and having the metal of its wall at successive cross sections symmetrically disposed to afford a continuously symmetrical median line of gravity which departs angularly from a plane radial to the axis of rotation, the direction of departure being similar to that in which the axial air thrust is exerted, and the extent of departure being such that at a predetermined

normal rate of rotation, the axial component of centrifugal force shall substantially counterbalance the axial air thrust.

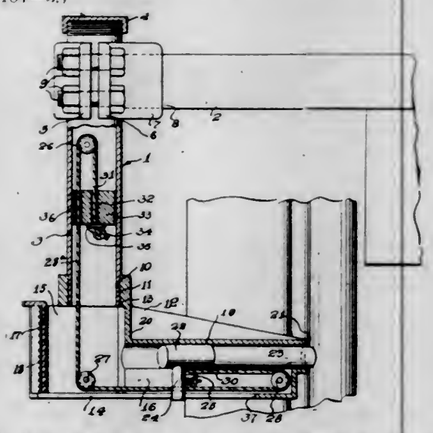
1,503,171. ADDING MACHINE. HAROLD S. STINSON, St. Louis, Mo. Filed Nov. 6, 1922. Serial No. 599,414. 25 Claims. (Cl. 235—63.)



1. A calculating-machine having a revoluble cylindrical stop-carriage and means in said carriage to visibly indicate the value of the set stops before any record is made.

1,503,172. INTERMEDIATE PRODUCT AND PROCESS FOR THE MANUFACTURE OF THE SAME. FRITZ STRAUB, Basel, and HERMANN SCHNEIDER, Riehen, near Basel, Switzerland, assignors to The Society of Chemical Industry in Basle, Basel, Switzerland. Filed Oct. 18, 1923. Serial No. 669,403. 4 Claims. (Cl. 260—158.)

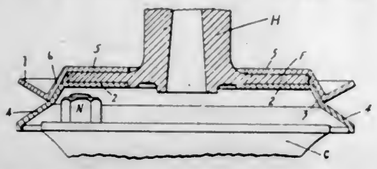
3. The herein described process for the manufacture of 1-oxynaphthalene-8-sulfamide, consisting in causing ammonia in a concentrated form to react for a long time on 1.8-naphthsultone, avoiding higher temperatures, and then separating the 1-oxynaphthalene-8-sulfamide from the reaction mixture due to its solubility in alkalies and acids.



4. As a new product the herein described new intermediate product, the 1-oxynaphthalene-8-sulfamide, forming a nearly colorless powder which in contrast with 1.8-naphthsultone is easily soluble in dilute caustic soda solution and in concentrated aqueous ammonia, which is precipitated from such solutions by action of dilute acid, and which is somewhat sparingly soluble in organic solvents like acetone, ethyl alcohol, and methyl alcohol, melting, when crystallized from the last-named solvents, at 222° C. with decomposition.

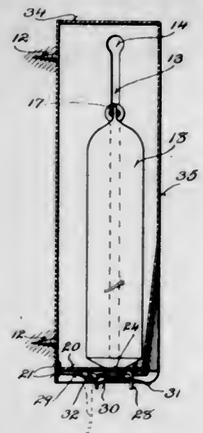
1,503,173. GRAIN-CAR DOOR. PHILIP EPHREIN TUFTS, Delisle, Saskatchewan, Canada, assignor to George Alexander Ferguson, Saskatoon, Saskatchewan, Canada. Filed Jan. 31, 1923. Serial No. 616,141. 10 Claims. (Cl. 20—27.)

1. In a door for grain cars, a frame, and a plurality of separable sections forming the body of the door supported in said frame, the intermediate portion of each of said sections forming a support for a next adjacent section.



1,503,174. FLANGE LUBRICATOR. LOUIS N. VINCENT, Seattle, Wash., assignor to Imperial Steam Appliance Company, Seattle, Wash., a Corporation. Filed Dec. 13, 1922. Serial No. 606,719. 8 Claims. (Cl. 184—3.)

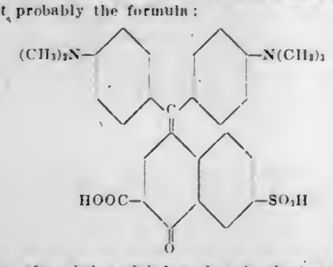
2. In a flange lubricator for wheels, a casing provided with a chamber, a tube, and a second chamber between said first mentioned chamber and tube, a lubricant stick carrier slidably mounted in the mentioned chamber and provided with a lug and a lubricant stick, a weight slidably mounted in said tube and means operatively connecting said weight with said lug whereby the said lubricant stick carrier and weight are caused to move simultaneously.



1,503,175. BRAKE DRUM OR THE LIKE. HERBERT A. WALKER, Fullerton, Calif., assignor to Frederick W. Smith, Whittier, Calif. Filed Sept. 8, 1922. Serial No. 586,854. 5 Claims. (Cl. 188—218.)

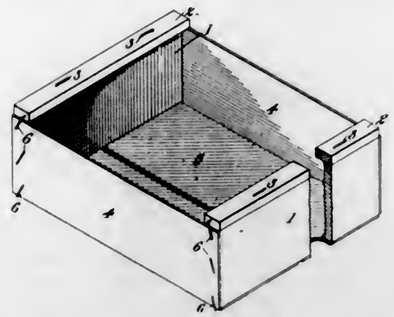
3. A braking drum device adapted for attachment to given types of standard wheel hubs having flanges, comprising a pair of rigidly united divergent braking rims forming a substantially V-shaped brake shoe groove, and means extending inwardly from said rims whereby the device may be securely attached to the said hub flange,

the rims having laterally deflected overlapping shoulder portions, the inner one of which is adapted to clear contiguous fastening nuts of a machine when mounted thereon.



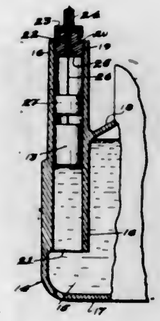
1,503,176. COLLAPSIBLE-TUBE HOLDER. JAMES H. WARING, Milwaukee, Wis., assignor of one-half to George E. Zirkelbach, Milwaukee, Wis. Filed Sept. 18, 1922. Serial No. 588,915. 2 Claims. (Cl. 220—1.)

1. In a device of the class described, the combination of a casing having a rear wall and side walls rigid with said rear wall, and a bottom, said casing being provided with a plurality of pairs of ears retaining said bottom slidably in position.



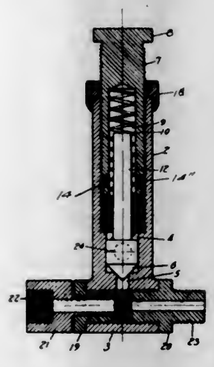
1,503,177. TRIARYLMETHANE DYE. MAX WEILER, Elberfeld, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Filed Mar. 19, 1924. Serial No. 700,368. 2 Claims. (Cl. 200—68.)

2. The herein described new triarylmethane dye having most probably the formula:



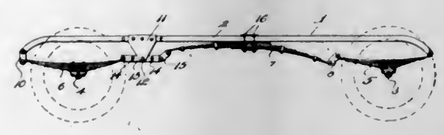
which is after being dried and pulverized a greenish crystalline powder difficultly soluble in water and easily soluble in caustic soda lye and sodium carbonate with a blue coloration, dyeing wool from acid bath and wool chromed or aftertreated with chrome a pure bluish-red shade, substantially as described.

1,503,178. LOCK-JOINT RECEPTACLE. GEORGE X. WENDLING, San Francisco, Calif. Filed Mar. 27, 1923. Serial No. 628,009. 1 Claim. (Cl. 217—171.)



1. A lug box, including a pair of ends of relatively thick material, side and bottom walls of substantially thin veneer material, lugs mounted on the upper edges of the ends and having overhanging portions extending inwardly of the box, and staples securing said side and bottom walls to said ends having the bridles arranged in inclined relation with respect to the ends of the box to position the ends of said staples out of line with the grain of the wood to prevent splitting of said ends, certain of said staples having one leg embedded in the box end, the bridles extending beyond the free upper edges of the sides in inclined relation to said ends and the other legs embedded in the overhanging portions of said lugs, for preventing splitting of the box ends and the upper free edges of the sides and for reenforcing the connection of the lugs with the box ends.

1,503,179. OIL GAUGE FOR CRANK CASES. LINCOLN L. WHITSON, Van Nuys, Calif., assignor of one-fourth to Hazel L. Harding and George A. Harding, both of Van Nuys, Calif. Filed Oct. 11, 1920. Serial No. 415,959. 1 Claim. (Cl. 73—82.)

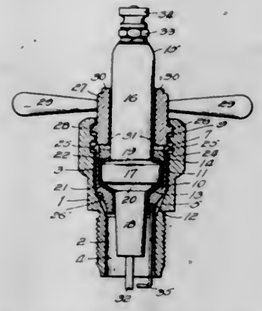


An oil gauge for crank cases comprising the combination with an engine crank case and an instrument board, of a vertical casing forming a float chamber communicating with the bottom of the chamber of the crank case, a plug closing the upper end of the casing and having a bore, a tube connected to the plug, a housing mounted upon the instrument board and connected to the tube, a main float and a reserve float in the float chamber, a wire connected to the main float and passing upwardly through the reserve float and connected to the reserve float and passing through the tube, an indicator wheel rotatably mounted in the housing and adjustably connected to the wire, and a spring connected to the indicator wheel to wind up the connection when the floats go up under the influence of oil in the crank case and adapted to yield under the weight of the floats when the oil goes down in the crank case.

1,503,180. SAFETY PRESSURE DEVICE. FRED WINDISH, Hartford, Conn., assignor of one-half to Martin Rudzik, Hartford, Conn. Filed Dec. 4, 1923. Serial No. 678,414. 1 Claim. (Cl. 152—11.5.)

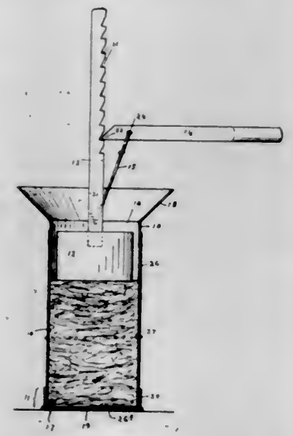
A body portion having a longitudinally extending bore and also having a lateral outlet furnished with a threaded bushing, a plug in the body portion, a valve in the bore, for controlling the outlet and having a stem extending into said bore, a spring around the stem bearing at its ends against the valve and against the plug, the body having a longitudinal slot, a scale on the body extending longitudinally of the slot, the plug having an annular groove at its end, and an annular member fitted in the annular groove and furnished with an extension projecting through said slot, the body having a scale and the extension having a pointer to traverse said scale.

1,503,181. AUTOMOBILE SPRING. THOMAS N. WINTER, Delaware, Ohio. Filed Sept. 25, 1922. Serial No. 590,397. 3 Claims. (Cl. 267—46.)



1. The combination with a vehicle frame and its associated front and rear axles, of springs supported upon the axles and having their outer ends pivotally connected with the sills of the frame, central springs fixed to the frames, the leaves of the central springs being overlapped capable of relative adjustment longitudinally, said central springs being pivotally connected with the adjacent ends of the axle supported springs.

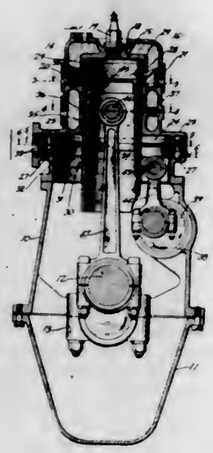
1,503,182. SPARK PLUG. ROLAND T. WRIGHT, St. Louis, Mo., assignor to Wright-Buncher Mfg. Co., St. Louis, Mo., a Common Law Trust. Filed Aug. 30, 1923. Serial No. 660,086. 3 Claims. (Cl. 123—169.)



1. In a spark plug construction, an outer shell having an internal shoulder provided with a ground surface, said shell having an internal groove and a pair of opposed inclined lock grooves, an inner shell having a ground curved circumferential shoulder for contact with

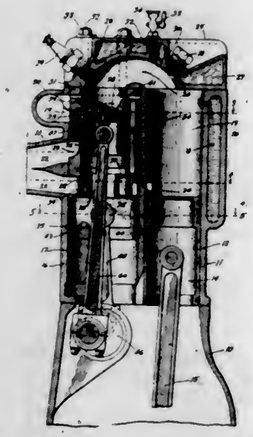
the ground surface of the internal shoulder of the outer shell, an insulator carried by the inner shell, an electrode carried by the

inner shell and means for locking the inner shell within the outer shell for forming a tight joint between the inner shell and the outer shell.



1,503,183. BALER. PRENTISS BAILEY, New Hartford, N. Y. Filed Nov. 14, 1918. Serial No. 262,451. 3 Claims. (Cl. 100—4.)

1. In a portable hand-operated device for baling waste paper and enclosing the same within a wrapper formed from a plain sheet of paper, the combination of a tubular receptacle open above to receive the loose paper to be baled and open below for the full size of the receptacle to remove the compressed material therethrough, said receptacle being adapted to have a sheet of paper wrapped thereabout with the lower part of the paper turned in across the bottom of the receptacle, a plunger having an upstanding handle for compressing the paper and means connected to said receptacle and adapted to engage said plunger handle and force the baled paper together with its wrapper downwardly free from said receptacle.

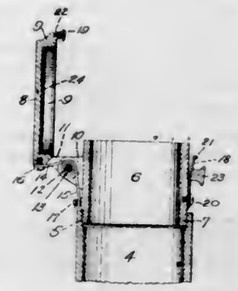


1,503,184. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor of one-half to Homer A. Brunell, Los Angeles, Calif. Filed Apr. 11, 1921. Serial No. 460,308. 2 Claims. (Cl. 123—75.)

1. In an internal combustion engine, a cylinder of two diameters having a combustion chamber and a compression chamber, exhaust ports formed in the combustion chamber, intake ports formed in the compression chamber, a valve sleeve slidable in the combustion chamber and controlling said exhaust ports, a piston fixed to the valve sleeve between the ends of the latter and working

within the compression chamber to control the intake ports, said valve sleeve being formed with ports for effecting communication between the combustion chamber and the compression chamber, and a piston working within the valve sleeve.

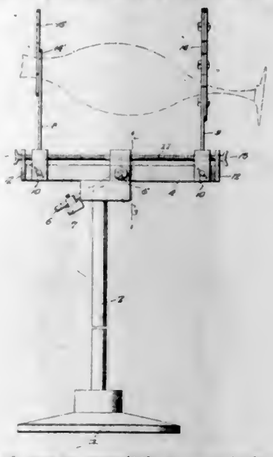
1,503,185. PISTON-VALVE STRUCTURE FOR INTERNAL-COMBUSTION ENGINES. EVERETT R. BURTNETT, Los Angeles, Calif., assignor of one-half to Homer A. Brunell, Los Angeles, Calif. Filed Feb. 3, 1922. Serial No. 533,852. 1 Claim. (Cl. 123—188.)



In an internal combustion engine, a manifold selector having upper and lower portions of different internal diameters, a pair of horizontal partitions spaced apart to form an annular chamber, and arcuate passageways extending from the outer wall of the manifold selector upwardly to the inner wall thereof.

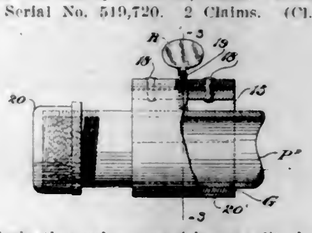
1,503,186. ROTARY KILN. JOHAN S. FASTING, Valby, near Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y., a Corporation of New Jersey. Filed Sept. 8, 1923. Serial No. 661,620. 1 Claim. (Cl. 222—7.)

A rotary kiln formed of a series of tubular sections of successively reduced diameters with the section of maximum diameter between the ends of the kiln and the successive sections toward each end of the kiln of successively reduced diameters and secured within the next adjacent section at one side.



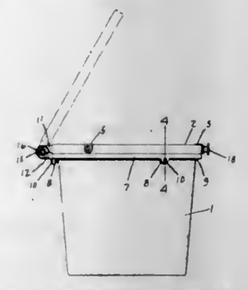
1,503,187. RADIATOR CAP FOR WATER-COOLED AUTOMOBILE ENGINES. FRANK FITCHETT, Cincinnati, Ohio. Filed July 30, 1921. Serial No. 488,725. 1 Claim. (Cl. 220—55.)

A radiator closure-cap for the inlet-orifice of water-cooled automobile engines, such cap comprising an outwardly-extending tubular or cylindrical member adapted to be directly held or secured in said orifice, a pair of hinge-lugs provided on said tubular-member, a resilient catch-member having a push-button thereon and mounted on said tubular-member diametrically opposite the position of said hinge-lugs, an inwardly-flanged lid or closure-proper having a pair of hinge-lugs mounted on its periphery and registering with the said hinge-lugs on the tubular-member, a horizontal pin pivotally-connecting the said registering sets of hinge-lugs, a spiral spring mounted on the said horizontal pin and with its opposite ends in contact with the lid flange and the face of the said tubular-member, respectively, and adapted to automatically cause the outward opening or raising of said lid from closing or seating engagement with the upper edge of said tubular-member, a gasket within the lid, and an adjustable screw engaging said lid flange at a point diametrically opposite said hinge-lugs thereof and adapted to hold the lid in locked and releasable engagement with the said catch-member on the said tubular-member, substantially as shown and described.



1,503,188. CATCHING-OFF MACHINE. PIERRE HOROUX, Rochester, Pa. Filed June 20, 1923. Serial No. 646,690. 2 Claims. (Cl. 49—14.)

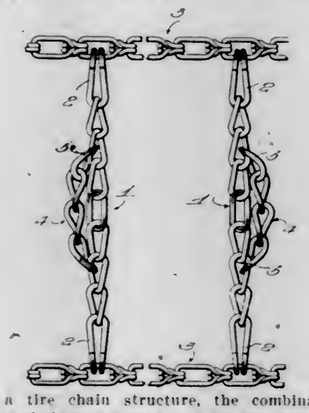
1. A device of the class described comprising a supporting stand, a frame tiltably supported thereon, an adjustable weight for balancing the frame in a horizontal position, a pair of holders adjustably arranged on



the frame and means permitting one of the holders to be opened to admit the top of the goblet.

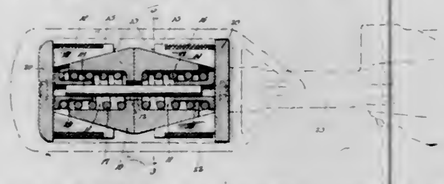
1,503,189. VALVE FOR IRRIGATING APPARATUS. CHARLES H. KAUP, Whittier, Calif. Filed Dec. 3, 1921. Serial No. 519,720. 2 Claims. (Cl. 251—8.)

2. An irrigating valve comprising a split sleeve whose ends are interlockingly folded above and secured to a bar and which is adapted to slide on a pipe to control a port therein, a gasket carried by the sleeve and movable therewith, and a set screw extending through said bar and adapted for securing the sleeve against movement on the pipe and forcing the gasket into tight engagement with the pipe to effect a non-leakable closing of said port.



1,503,190. SANITARY COVER. JULIUS KIM, Pittsburgh, Pa., assignor, by direct and mesne assignments, to Inland Manufacturing Company, Inc., Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 6, 1922. Serial No. 550,115. 4 Claims. (Cl. 220—32.)

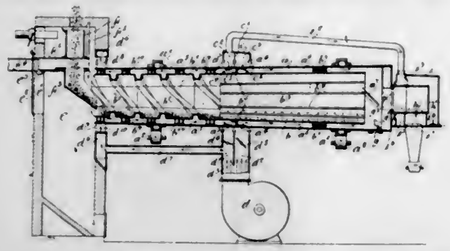
1. In a cover device for receptacles, a frame, a cover fitting over said frame, ears attached to said frame and cover, means for pivotally connecting the ears together,



and means for setting up continuing frictional engagement between said ears while the cover is being raised to open position.

1,503,191. AUTOMOBILE TREAD CHAIN. HALMER C. KITTELSON, Fargo, N. Dak., assignor to Standard Chain Company, Inc., of the State of Minnesota. Filed Apr. 9, 1923. Serial No. 630,937. 2 Claims. (Cl. 152—14.)

1. In a tire chain structure, the combination of a main cross chain to extend across the tread of a tire, and a relatively short and slack supplemental cross chain disposed alongside the intermediate portion of said main chain and having its ends directly connected to links of said main chain in spaced relation to the ends thereof, said supplemental chain being adapted to lap under said main chain and offer double resistance to wheel spinning in soft earth, snow, etc.

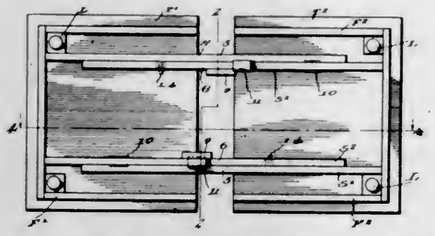


1,503,192. DRAFT GEAR. GEORGE H. LANGTON, Princeton, W. Va. Filed Oct. 31, 1921. Serial No. 511,577. 2 Claims. (Cl. 213—22.)

1. A draft gear for car couplings comprising a pair of conic frustums mounted with their bases together and provided with central sockets and registering central apertures through their bases, a buffer rod of a length slightly greater than the added length of the conic frustums, thimbles having axial bores, said rod being slidably mounted in said bores and said apertures, compression springs in said sockets surrounding said thimbles and abutting with their ends against the same and said bases respectively, a follower for each thimble contacting with the outer face of the thimble, a series of shoes surrounding the tapering surfaces of each conic frustum and provided with shoulders at their inner ends, springs surrounding each series of shoes tending to press the shoes tightly against the conic frustums, said springs being confined between said shoulders and said followers and engaging the external surfaces of the shoes.

1,503,193. ROTARY COOLER FOR CEMENT CLINKERS, ETC. POUL T. LINDHARD, Brooklyn, N. Y., assignor to F. L. Smidth & Co., New York, N. Y., a Corporation of New Jersey. Filed Jan. 6, 1923. Serial No. 610,996. 13 Claims. (Cl. 34—6.)

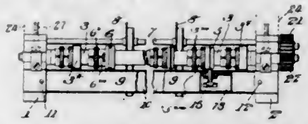
1. In a rotary cooler, the combination of an outer supporting shell, an inner shell separated therefrom by an annular space, and supported thereby, the inner shell being free at its discharge end from the outer shell, means to discharge the cooled material from the outer



shell, and means to supply cooling air to the annular space between the inner shell and the outer shell at the end opposite the discharge end.

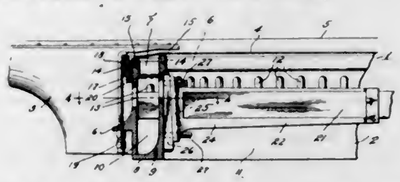
1,503,194. MORDANT DYESTUFFS AND PROCESS OF MAKING SAME. THÉODORE LOMBARD, Basel, Switzerland, assignor to the Firm, Durand & Huguenin S. A., Basel, Switzerland. Filed May 7, 1923. Serial No. 637,353. 10 Claims. (Cl. 260—56.)

9. As new articles of manufacture, the herein described mordant dyestuffs resulting from the condensation, in concentrated sulfuric acid, of a quinone-dianilido-compound obtained from chlorinated benzoquinone and an amino-salicylic acid body and dyeing the fibre of very fast, dark violet-blue tints, having their tinctorial properties intensified by introduction of nitro groups and being soluble in water in form of alkali salts.



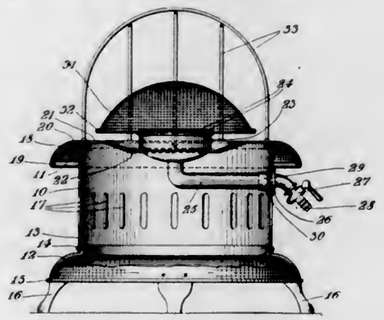
1,503,195. TABLE. CLIFFORD O. LOWE, Sweetgrass County, Mont. Filed Dec. 29, 1922. Serial No. 609,693. 1 Claim. (Cl. 45—115.)

An extension table comprising a top consisting of two complementary sections movably supported to lie in the same horizontal plane, and a plurality of sets of cooperative slide elements connecting the two top sections, each set comprising a slide bar having a portion thereof secured in underlying relation to one of the top sections so that the remaining portion thereof extends beyond the said one top section and a cooperative slide bar having a portion secured in underlying relation to the second top section and an extending portion adapted to slide in contact with the first slide bar, one of said slide bars having a longitudinal slot therein in open communication at its outer end with a relatively large opening and the other slide bar having a substantially U-shaped guiding and retaining member arranged with one arm and the web portion thereof extending laterally of the second slide bar adjacent to the end of the extending portion of the latter and in position to be moved through the opening at the end of the slot in the first slide bar into position to slide along the slot in engagement with the more remote of the side walls of the first slide bar, and an inverted U-shaped guiding and retaining member carried by the second slide bar at an appreciable distance from the end of the extending portion thereof and in position to slidingly embrace the lower edge portion of



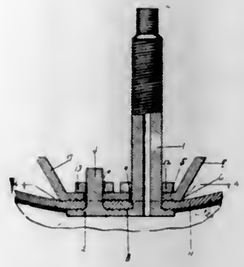
the first slide bar, and a cleat connecting the portions of the first slide which respectively extend above and below the slot, said cleat having a portion of the inner wall thereof cut away to afford clearance for the proximate portions of said guiding and retaining members.

1,503,196. RULING MACHINE. GEORGE F. MCADAMS, Brooklyn, N. Y. Filed Jan. 13, 1922. Serial No. 528,950. 6 Claims. (Cl. 33—37.)



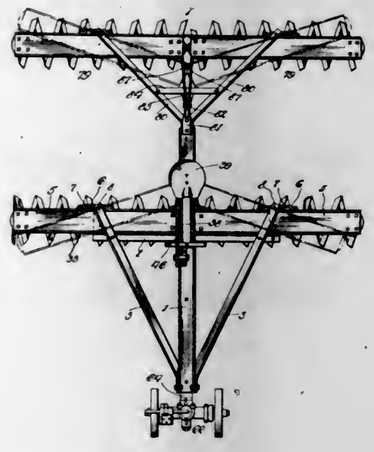
1. In a ruling machine, the main ruling head, and an auxiliary ruling head comprising upper and lower shafts, said auxiliary ruling head being operatively connected with the main ruling head, ruling discs and their impression rollers mounted on said shafts and adjustable laterally with respect to the main head ruling discs to bring the additional lines into the required positions relative to the main ruled lines.

1,503,197. MUSICAL INSTRUMENT. CLARENCE MCDANIEL, Columbus, Ohio. Filed June 10, 1921. Serial No. 476,614. 2 Claims. (Cl. 84—269.)



2. A musical instrument comprising a body portion, composed of a pair of concentrically disposed inner and outer rings, a flange uniting the lower edges of said rings, a second flange projecting from said outer ring, a head arranged to be tautly connected with each of said rings, fastening devices cooperative with said flanges for stretching said head, and a bridge device situated between said heads.

1,503,198. GAS STOVE. OTHMAR MAJCEN, New York, N. Y. Filed Nov. 28, 1923. Serial No. 677,359. 2 Claims. (Cl. 126—85.)

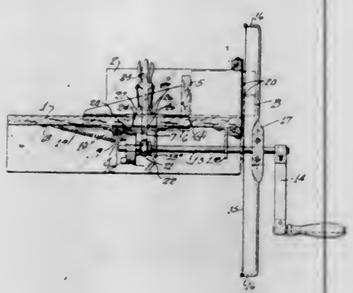


1. A gas heater comprising a casing open at the bottom and sides to the atmosphere, a cover extended over said casing, a burner head projecting through said cover, said head having a plurality of raised nipples, a feed pipe for said head, said pipe having a valve, controllable means for the inlet of air to said feed pipe, a foraminous hood disposed over said head, and a guard device fixed to said cover over said hood.

1,503,199. MEANS FOR REMOVABLY CLAMPING VALVES TO PNEUMATIC TUBES OR THE LIKE. ROYAL E. MARTIN, Mansfield, Ohio. Filed Nov. 7, 1923. Serial No. 673,235. 6 Claims. (Cl. 152—12.)

6. In a clamping mechanism for pneumatic tubes, comprising a valve member having an elongated base and threaded boss; said inner tube being provided with apertures spaced apart from each other and intersected by a slit whereby the valve member can be inserted from the outside into the inner tube and a clamping means adapted to clamp a portion of an interposed tube therebetween, as and for the purpose described.

1,503,200. HARROW. CHARLES F. MATZ, Dubuque, Iowa. Original application filed Oct. 11, 1921, Serial No. 506,949. Divided and this application filed May 25, 1922. Serial No. 563,549. 3 Claims. (Cl. 97—219.)

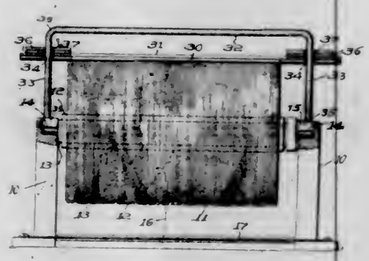


1. A spiral harrow comprising a spiral blade, an axle and spokes, the outer ends of the spokes being disposed obliquely to conform to the shape of the blade and secured thereto and the inner ends of the spokes being formed into split hubs adapted to encircle the axle and be clamped thereto.

1,503,201. BUTTER-SLICING MACHINE. JOSEPH KISS MEYER, St. Louis, Mo., assignor of one-third to David Pell and one-third to Fred Siegenthaler, both of St. Louis, Mo. Filed Nov. 2, 1922. Serial No. 598,668. 3 Claims. (Cl. 31—24.)

1. A butter-slicing machine comprising a butter-way, in combination with cutting-means for slicing the butter,

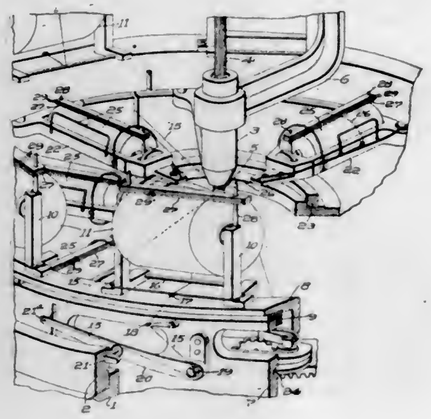
a ram for feeding the butter in the way to the cutting-means, and means for feedingly actuating the ram, said



actuating means including a rack on the ram, a pivoted bar adapted for tooth engagement with the rack, and a rotary cam-wheel adapted for pivotally shifting the bar.

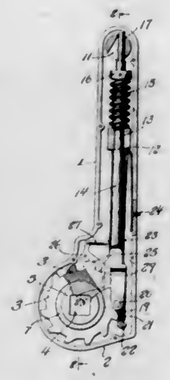
1,503,202. METHOD OF PREVENTING THE NATURAL DETERIORATION OF BAGASSE FIBERS. TREADWAY B. MUNROE, New Orleans, La., assignor to C. F. Dahlberg, Minneapolis, Minn. Filed Aug. 12, 1921. Serial No. 491,749. 6 Claims. (Cl. 92—3.)

5. A compacted mass of bagasse fibers suitable for pulp making purposes having a substantially air impervious layer on its outside and a fermentation retarding compound on its interior, substantially as described.



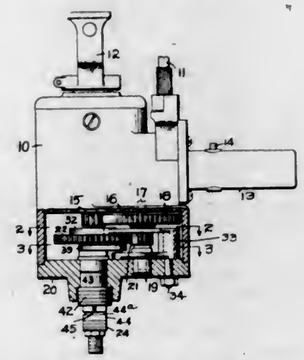
1,503,203. TENSION DEVICE. DANIEL H. MURPHY, West Hartford, Conn., assignor to American Wiremold Company, Hartford, Conn., a Corporation of Connecticut. Filed July 31, 1923. Serial No. 654,818. 7 Claims. (Cl. 96—13.)

1. In a braiding machine, the combination of a thread mass supported for rotation about a horizontal axis to unwind the yarn or thread, a gravity tension bar extending longitudinally of and resting upon the upper face of the yarn or thread mass to retard the rotation of the mass, and guides at the opposite ends of the tension bar and having sliding engagement with the bar to retain it in place against lateral displacement while permitting it to follow the gradually diminishing thread mass.



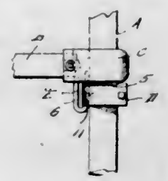
1,503,204. TENSION DEVICE. DANIEL H. MURPHY, West Hartford, Conn., assignor to American Wiremold Company, Hartford, Conn., a Corporation of Connecticut. Filed Oct. 12, 1923. Serial No. 668,083. 5 Claims. (Cl. 96—13.)

1. In a braiding machine, the combination of a thread mass supported for rotation about a horizontal axis to unwind the thread, a tension bar resting upon the thread mass to retard rotation of the mass, weights resting upon the tension bar to increase its retarding effect, and



means for relieving the tension bar from the action of the different weights as the diameter of the thread mass decreases.

1,503,205. SAFETY CRANK. EDWARD E. NELDNER and VINCENT NELDNER, Milwaukee, Wis. Filed May 3, 1923. Serial No. 636,291. 2 Claims. (Cl. 123—185.)

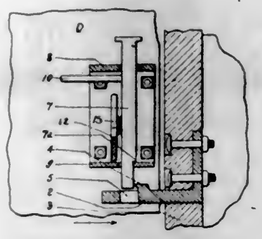


2. A safety crank for internal combustion engines comprising a casing having a revolubly mounted handle adjacent one end, a ratchet wheel carried by said casing adjacent the other end and adapted to engage the shaft of the internal combustion engine, a bearing pivotally mounted intermediate the ends of said casing, a bar slidably carried by said bearing, a helical compression spring surrounding said bar and attached thereto at one end and seating at its other end against said bearing, a projection carried by said bar for engaging said ratchet wheel to temporarily lock it relatively to said casing, cam means for disengaging said projection when said arm is moved against the action of said spring, a trip lever associated with said ratchet wheel and adapted to press against said bar when said ratchet wheel is reversely rotated to thereby disconnect said projection from said ratchet wheel, and means operated by said revolubly mounted handle for rocking said bar to move said projection from said ratchet wheel.

1,503,206. COMBINATION VALVE GRINDER AND DRILL. ARTHUR W. OJERHOLM, Worcester, Mass., assignor, by mesne assignments, to Worcester Electric Tool Company, a Corporation of Massachusetts. Filed Nov. 29, 1920, Serial No. 426,993. Renewed Dec. 21, 1923. 7 Claims. (Cl. 29—26.)

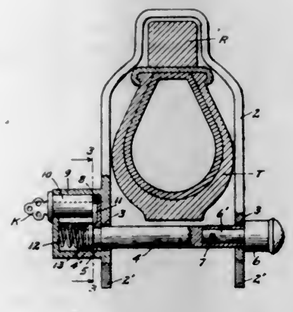
1. In a combination drill and valve grinder, the combination with a motor and a driving spindle, of a gear on the driving spindle, means for transmitting power to the gear at a reduced speed but in a constant direction, a connecting member mounted closely adjacent to said means projecting between the parts of said power transmitting means and connected to the gear to be oscillated thereby, and a hollow spindle connected with said connecting member to be oscillated thereby, said hollow spindle having means by which a valve grinder chuck can be secured thereto, the first named spindle having means by which a drill chuck can be secured to it.

1,503,207. POWER STRAP. ROBERT T. POWERS, Sr., North Oxford, Mass. Filed Apr. 16, 1923. Serial No. 632,483. 4 Claims. (Cl. 139—154.)



1. In combination, a picker stick, a sweep stick, a lug strap carried by the sweep stick receiving the picker stick, a supporting collar mounted upon the picker stick for supporting the lug strap, and a supporting hook connected with the sweep stick and receiving said collar.

1,503,208. PACKING OR FILLING BODY FOR FILTERS. HEINRICH PRYM, Stolberg, Rheinland, Germany. Filed Sept. 7, 1922. Serial No. 586,670. 3 Claims. (Cl. 261—95.)



3. As an improved article of manufacture, a packing body for filters, of semi-cylindrical contour, open at opposite ends and having reinforcing portions at one edge of the flat side and having an integral partition extending within said body.

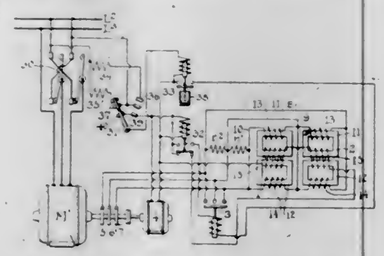
1,503,209. LATCH LOCK. BEN REES, Anaheim, Calif. Filed Dec. 29, 1922. Serial No. 609,690. 5 Claims (Cl. 292—332.)

1. A locking mechanism including a keeper element adapted to be fastened to one primary part and having a bolt hole and a bolt tripping lug, a bolt adapted to be slidably mounted on another primary part, a support upon which the bolt is slidably mounted and is adapted to be set in a position to be tripped by said lug when engaging the same, and a lockable lever extending through the primary part upon which the bolt is mounted whereby the bolt may be released from the keeper from the outside, said bolt being operable from within when said lever is locked.

1,503,210. AUTO LOCK AND TRACTION DEVICE. S. Q. SHANNON, Los Angeles, Calif., assignor to Donald R. Morrison, Los Angeles, Calif. Filed May 25, 1922. Serial No. 563,590. 2 Claims. (Cl. 70—90.)

1. A "theft-signal" device for vehicle wheels, comprising a yoke-like frame applicable to a rim and tire, a bolt slidable across the tire into position in the ends of the frame arms, one arm having a lock case into which said bolt projects, locking means in said case, and an ejector in said case for clearing the released bolt.

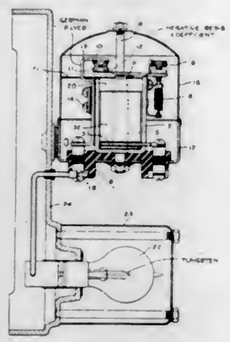
1,503,211. PLASTER BOARD HAVING HARD AND SOFT PORTIONS. JOHN K. SHAW, Minneapolis, Minn., assignor to C. F. Dahlberg, St. Paul, Minn. Filed Mar. 26, 1920. Serial No. 368,994. 5 Claims. (Cl. 154—44.)



1. The herein described heat insulating plaster board comprising a relatively unyielding hard and strong layer of bagasse fibres interlaced with a relatively soft and yielding layer of bagasse fibres, all said fibres being associated with their natural pith; and a layer of plaster attached to said board, substantially as described.

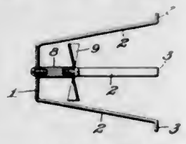
1,503,212. ADVERTISING DISPLAY SIGN. NORVIN J. STEINAU, Louisville, Ky. Filed Jan. 9, 1922. Serial No. 527,826. 1 Claim. (Cl. 40—2.)

As a new article of manufacture, an advertising display sign for use in conjunction with the surface of a window or the like, said sign being provided with letters or other symbols, and said sign comprising a blank of material having its peripheral portion cut to the desired contour to establish the peripheries of the lower portions of the symbols and to establish the peripheries of the upper portions of the symbols, the body portion of each symbol being upset or embossed, the peripheral portion of each symbol and a portion of the central portion of the body of the sign being flat and adapted to lie in flush manner against the surface of the window, said flattened portions being of a dark color, and the upset portions of the symbols being of a brightly contrasting color, and means for securing the sign to the surface of the window with its flat face lying flush against the window and with its upset portions projecting away from the surface of the window, comprising a pair of gummed tabs connected to the sign and adapted for attachment to the surface of a window pane, whereby, when the sign is in place against the surface of the window, the relatively dark peripheral portions of the symbols and of the body of the sign merge with a relatively darkened interior, and whereby the body portions of the symbols are emphasized to the observer, substantially as described.



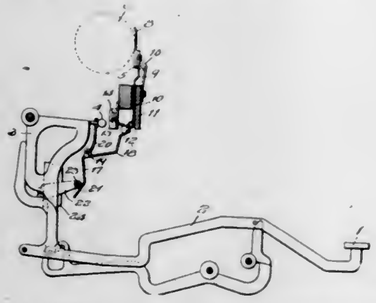
1,503,213. MOTOR CONTROLLER. ERWIN R. STOEKLE, Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed May 15, 1919. Serial No. 297,271. 2 Claims. (Cl. 172—289.)

1. The combination with an alternating current motor, of reversing means therefor, resistance to protect the motor in starting and plugging thereof, variable inductance in parallel with said resistance and means for varying said inductance for varying the effect of said resistance upon the motor, said last mentioned means insuring a maximum value of said inductance when the motor is plugged.



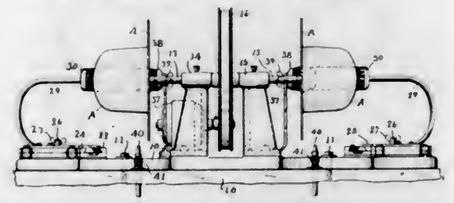
1,503,214. VIBRATORY REGULATOR. RAYMOND H. SULLIVAN, Rochester, N. Y., assignor to North East Electric Company, Rochester, N. Y., a Corporation of New York. Filed Apr. 17, 1922. Serial No. 553,910. 8 Claims. (Cl. 171—229.)

1. A vibratory regulator, having contacts of which at least one consists of material with a negative temperature coefficient of resistance, and a support, for such contact, consisting of material of low heat-conductivity



whereby rise in the temperature of the contact during operation is promoted.

1,503,215. FUEL-SAVING DEVICE. ROBERT G. THOMPSON, Seattle, Wash. Filed June 13, 1923. Serial No. 645,172. 1 Claim. (Cl. 48—180.)

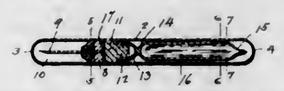


A diffuser comprising a disc-like central portion, a plurality of diametrically opposed frame bars projecting forwardly therefrom, said frame bars being divergent and having lateral terminals, an axially arranged post secured to the disc and projecting in the direction of the frame bars, and a multi-blade rotating member rotatably mounted on the inner end of said post, the diameter of said member exceeding that of the disc.

1,503,216. TYPEWRITER ATTACHMENT. FRANK J. UHER, Berwyn, Ill., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 2, 1922. Serial No. 585,922. 3 Claims. (Cl. 197—135.)

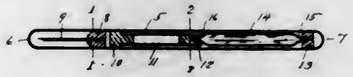
1. An attachment for a typewriter comprising a member adapted to be mounted adjacent the cylinder and movable independently thereof to hold a sheet thereon, and means for actuating said member to lift it at the same speed as the lift of said cylinder, whenever said cylinder is shifted, comprising a part hinged to said member, means to normally maintain said member at its lowermost position, a lever pivotally mounted intermediate its ends to the carriage shift rail of the typewriter, both of the ends being free and operatively engageable at one end with said first-mentioned member, and guide means fixedly mounted and engageable with the other end of said lever for oscillating it in a predetermined manner whenever said carriage shift rail is lifted.

1,503,217. HAT-RENOVATING APPARATUS. JOHN A. VOULGARES, Cleveland, Ohio. Filed Dec. 17, 1923. Serial No. 681,139. 7 Claims. (Cl. 223—26.)



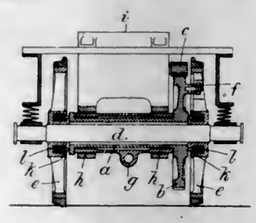
1. In apparatus of the class described, the combination of a base, a shaft rotatably mounted thereon and adapted to carry a hat form, a member slidable on said base to and from said form, a flexible member carried by the first mentioned member, and a brush carried by said flexible member and adapted to operate on a hat carried by said form.

1,503,218. HYPOTUBULE SYRINGE. JOHN H. WEDIG, Granite City, Ill. Filed Feb. 3, 1923. Serial No. 616,732. 4 Claims. (Cl. 128—218.)



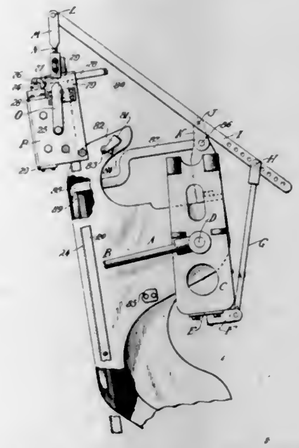
2. A device of the character described comprising a tube hermetically sealed at each end,—part of said tube constituting the walls of a syringe barrel and having a fixed wall with cannula needle and piston with plunger located therein,—said tube having circumferentially cut lines near said fixed wall and the end of said plunger for effecting fracture at such points, substantially as described.

1,503,219. HYPOAMPUL SYRINGE. JOHN H. WEDIG, Granite City, Ill. Filed Feb. 9, 1923. Serial No. 617,994. 4 Claims. (Cl. 128—220.)



4. In a device of the character described, an inner tube having a constricted portion near one end constituting an integral partition and forming a socket at said end, and a storage chamber for a medicament on the other side of the partition,—the end of said inner tube opposite the socket end being ampullate and hermetically sealed, substantially as described.

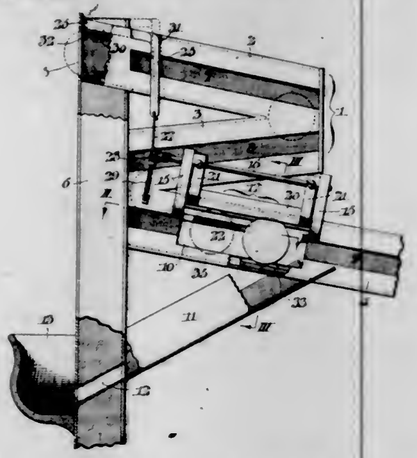
1,503,220. HYPODERMIC SYRINGE. JOHN H. WEDIG, Granite City, Ill. Filed Feb. 21, 1923. Serial No. 620,402. 1 Claim. (Cl. 128—218.)



A device of the character described comprising a hermetically sealed tube forming a chamber adapted to be fractured at two predetermined points into three parts,—the main part adapted to form the barrel of a syringe having a cannula needle mounted in a fixed closure at one end and exposing at the other end a plunger provided with a cushion recess in its exposed end, a hermetically sealed tube forming a medicament chamber having fragile ampullate ends adapted to be yieldingly supported in the cushion recess of said plunger and by a cushion mounted in the adjacent end of the device respectively, before fracture, substantially as described.

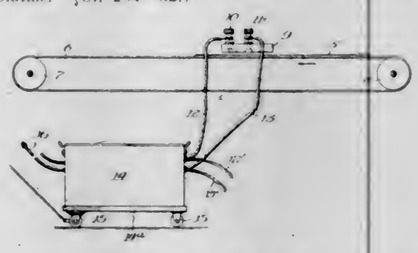
1,503,221. DEVICE FOR TRANSMITTING THE ROTARY MOTION OF A MOTOR TO THE WHEELS OF VEHICLES. JACOB WERZ, Geneva, Switzerland, assignor to Société Anonyme des Ateliers de Sécheron, Geneva, Switzerland, a Corporation of Switzerland. Filed Oct. 5, 1923. Serial No. 666,680. 4 Claims. (Cl. 105—113.)

1. In a device for use on vehicles, more particularly electric vehicles, for transmitting the rotary motion of a motor rigidly mounted on the vehicle frame, to a set of wheels with side play relatively to the vehicle frame, said device comprising a motor, a quill drive by said motor, means for gearing the axle of said wheel set arranged so as to pass through said motor driven quill, a coupling for transmitting the rotation of the quill to the set of wheels in such a manner that the quill and the axle of the set of wheels can move vertically relatively to each other, being at the same time arranged in such a manner that a lateral play is provided for between the quill relatively to the vehicle frame and to the motor.



1,503,222. ATTACHMENT FOR PRINTING PRESSES. HERMAN A. AGRICOLA, Jr., Atlanta, Ga., assignor of forty-nine per cent to Joseph E. Lane, Atlanta, Ga. Filed Jan. 7, 1922. Serial No. 527,574. 14 Claims. (Cl. 101—194.)

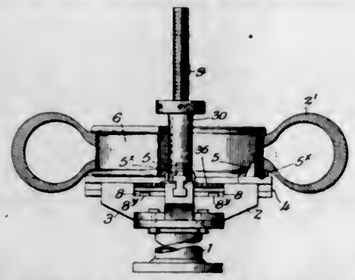
1. In combination with a printing press, a carriage adapted for reciprocation thereon, a chase mounted on the press, an ink supply receptacle mounted in the carriage, co-operating means on the carriage and chase and adapted with each reciprocating stroke of the carriage



to transfer ink to certain selected portions of the type, such means including contacting rollers, and means for holding the last of said rollers out of contact with the type during a portion of each reciprocation, substantially as described.

1,503,223. COIN DETECTOR FOR VENDING MACHINES. FRANCIS X. BEE, Philadelphia, Pa. Filed May 20, 1920. Serial No. 382,824. 7 Claims. (Cl. 194—101.)

1. In a device of the character described, the combination of a coin conductor with a lateral ejection opening, abraded magnetic means controlled by momentum and hardness of the coins for arresting and retaining spurious ones at said opening; and resilient means for subsequently releasing and discharging coins so arrested.

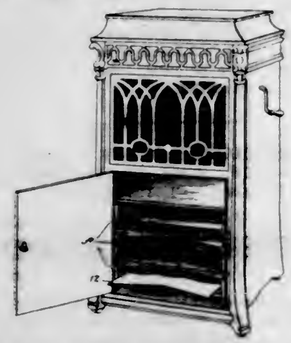


1,503,224. PORTABLE ANTIOFFSET DEVICE. JOSEPH R. BLAINE, Oak Park, Ill., assignor to Miehle Printing Press & Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 28, 1921. Serial No. 456,258. 3 Claims. (Cl. 204—32.)

1. The combination with the conveyor for carrying printed sheets from a printing press, of means for generating ozone, said means being supported adjacent the path of the printed sheets, means for generating radio frequency current, a portable support for said last-named means, and means for detachably connecting said radio frequency current generating means with said ozone generating means.

1,503,225. TIRE-REMOVING MACHINE. MAURICE PETER BREON, Newport News, Va., assignor to Cora Louise Breon, Newport News, Va. Filed June 27, 1922. Serial No. 571,330. 2 Claims. (Cl. 157—1.)

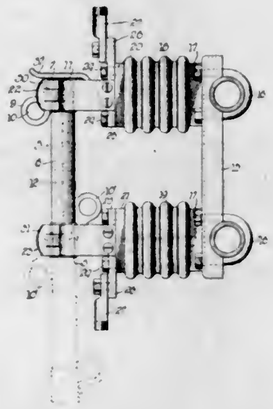
1. A tire removing machine consisting of a pedestal, a table mounted thereon, an upright rising centrally from said table, a grooved cam member fitting on said upright having a series of openings around its center and having teeth on its periphery, a pawl to engage said teeth to hold the cam at desired adjustment, a vertical sleeve fitting upon said upright and having depending lugs to



engage the series of openings at the center of the cam, a series of links having gudgeons at their inner end to engage the grooves of the cam, and tire clamps connected to the outer ends of said links.

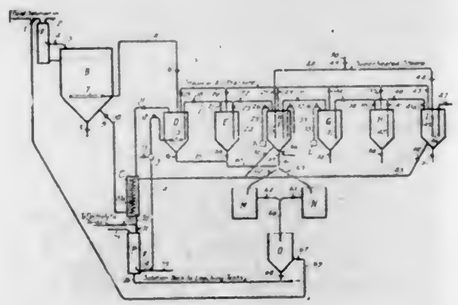
1,503,226. HOLDING ATTACHMENT FOR SOUND RECEIVERS. CHARLES W. BURROWS, New York, N. Y. Filed Mar. 11, 1922. Serial No. 543,115. 2 Claims. (Cl. 179—156.)

1. In a device of the class described, a one piece metallic head band having each end bent outwardly and a hole inserted therein to form one member of a gripping means, a member having a hole therein thrown downwardly from the material of the band to a point in spaced relationship to said upturned ends forming cooperating members to complete said gripping means, a saddle having means for carrying a sound receiver and a stud fastened to said saddle and adapted to be passed through the holes in said gripping means whereby the stud and receiver may be held in any position.



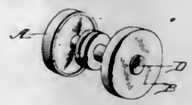
1,503,227. FILING RECEPTACLE. PAUL CHIPMAN, Detroit, Mich. Filed May 6, 1920. Serial No. 379,216. 9 Claims. (Cl. 211—16.)

1. In a filing cabinet having space to receive filing sections capable of holding phonograph records, a section comprising a body, separating elements carried by said body and serving to hold the records in stored position, and means carried by said section and adjustable relative thereto and said cabinet for removably securing said sections in said cabinet.



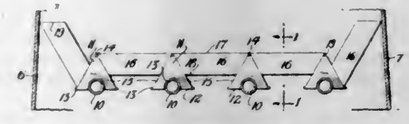
3. In a filing receptacle, a body portion having separating elements, and adapted to be removably inserted into the cabinet of a phonograph, and rotatably adjustable means for releasably securing said receptacle in said cabinet, but permitting removal thereof when said means are released.

1,503,228. FUSE AND MOUNTING. CHRISTEN CHRISTENSEN, Chicago, Ill., assignor to Electrical Engineer's Equipment Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 12, 1919. Serial No. 344,380. 40 Claims. (Cl. 200—114.)



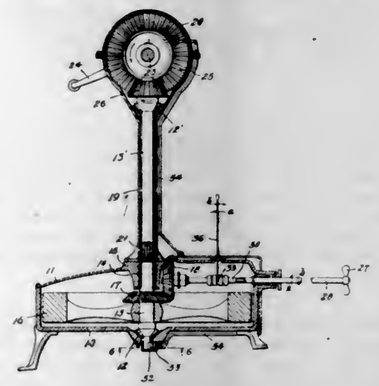
1. In a fuse having a sleeve and terminals thereon, current carrying means cooperating with said terminals, and a breech block associated with one of said current carrying means and engaging the corresponding terminal.

1,503,229. PROCESS OF TREATING SOLUTIONS OF METALS. LOUIS F. CLARK, Potrerillos, Chile. Filed July 2, 1921. Serial No. 482,018. 23 Claims. (Cl. 75—18.)



1. In the removal of impurities from acid solutions the method which comprises subjecting the solutions to heat and pressure sufficient to produce a precipitate containing the impurities.

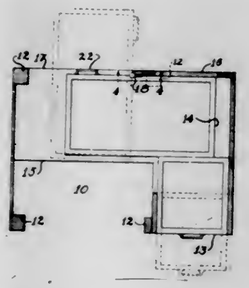
1,503,230. CUFF FASTENER. THOMAS ALBERT DAVIS, Paris, Ill., assignor of one-half to Orlon Sims, Paris, Ill. Filed Oct. 24, 1923. Serial No. 670,510. 2 Claims. (Cl. 24—110.)



1. A cuff fastener, consisting of a male member comprising a head, a hollow stem and a pair of spring jaws arranged in and extending beyond said stem, a female member comprising a head and a hollow stem having a seat to receive said spring jaws and a slidable stem mounted in said female member and having a head to engage and expand said jaws and lock said members in engagement.

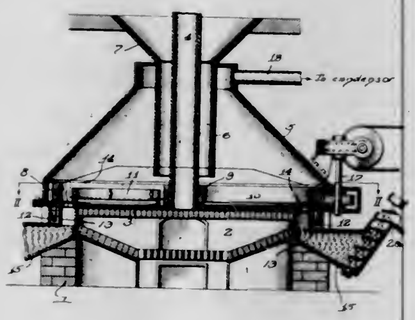
1,503,231. ARCH CONSTRUCTION FOR FIRE BOXES. GUY CARLETON DENNEY, Hinsdale, Ill., assignor to American Arch Company, a Corporation of Delaware. Filed Nov. 26, 1920. Serial No. 426,347. 5 Claims. (Cl. 110—87.)

1. In a locomotive fire box having circulation tubes, an arch supported on said tubes and comprising brick-supporting members adapted to lie and pivot on single tubes, and bricks spanning the distance between supporting members and wedged between them, the supporting members having inclined sides which converge toward the top and the bricks having inclined ends which converge toward the bottom, said inclined sides and ends being adapted to contact in support of the brick in various spaced relations of the supporting members.



1,503,232. BOAT PROPULSION. HARRY P. EFFERTZ, Union Hill, N. J. Filed May 14, 1923. Serial No. 638,707. 2 Claims. (Cl. 115—24.)

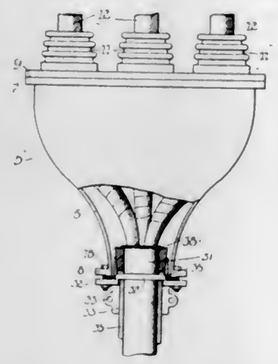
1. In propulsion mechanism, the combination with a casing, of a fly wheel mounted horizontally in the casing, a vertical shaft fixed to the fly wheel, a vertical tubular standard on the casing, a vertical drive shaft in the standard coupled to the fly wheel shaft, a pinion fixed to turn with the fly wheel, a propeller shaft pro-



jecting into the casing, a pinion meshing with the first mentioned pinion, an auxiliary shaft fixed to the last mentioned pinion and in line with the propeller shaft, and clutch mechanism in the casing connecting the last mentioned shaft with the auxiliary shaft.

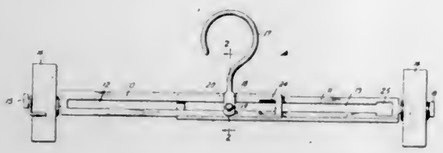
1,503,233. DESK. ALEXANDER S. FALLS, Chicago, Ill. Filed Oct. 6, 1922. Serial No. 592,686. 6 Claims. (Cl. 45—6.)

4. In a desk, a receptacle pivoted within the desk and rotatable rearwardly thereof, and a drawer adapted when closed to lock said receptacle against rotating movement.



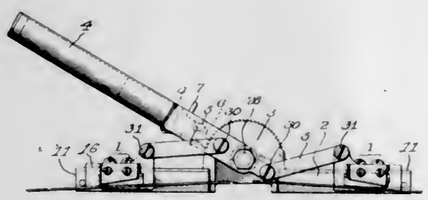
1,503,234. SHALE RETORT. DANIEL H. FRANCIS, Grand Junction, Colo. Filed May 2, 1921. Serial No. 466,108. 2 Claims. (Cl. 202—14.)

1. A shale retort comprising an enclosed heated shale-receiving bed, means for depositing shale centrally of said bed, a large horizontally disposed wheel above said receiving bed and having spokes of a configuration to cause shale to be distributed from the central portion of said bed to the marginal portion thereof, and means adapted to successively scrape the spokes of said wheel.



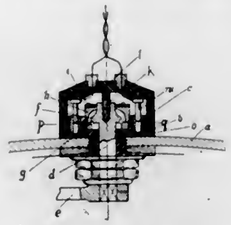
1,503,235. CABLE-END BELL. FRANK E. GETTS, Chicago, Ill., assignor to Electrical Engineers Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 2, 1918. Serial No. 226,168. 10 Claims. (Cl. 247—6.)

9. In a cable end bell, a bell member open at its lower end, a closure for said end of the bell member comprising a metallic sheath supporting socket member having an upwardly and outwardly extending flange, said flange extending into the lower end of the bell member and forming a socket, and a metallic hollow cone forming a circular wedge adapted to embrace the upper end of the lead sheath of the cable and to be forced into the socket, said sheath, cone, socket, and bell being all in



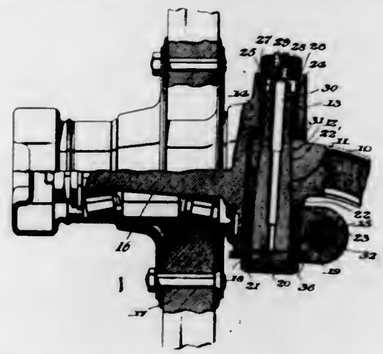
good electrical contact, and a connecting member adapted to be secured to the lower end of the bell, said socket member being held between said connecting member and the end of the bell.

1,503,236. GARMENT HANGER. JOHN GRIMBERG, New York, N. Y. Filed June 26, 1923. Serial No. 647,780. 4 Claims. (Cl. 211—13.)



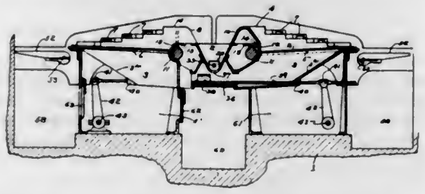
1. In a garment hanger, a pair of longitudinally adjustable members having registering longitudinal slots, a hook for suspending the hanger, pivotally mounted in said slots, and a spring clamping member actuated by pivotal movement of the hook to clamp or release said adjustable members at will.

1,503,237. STRETCHING TOOL. ARTHUR G. G. GUENTHER, Chicago, Ill., assignor to Signode System, Inc., Chicago, Ill., a Corporation of Delaware. Filed June 9, 1920. Serial No. 387,768. 5 Claims. (Cl. 100—15.)



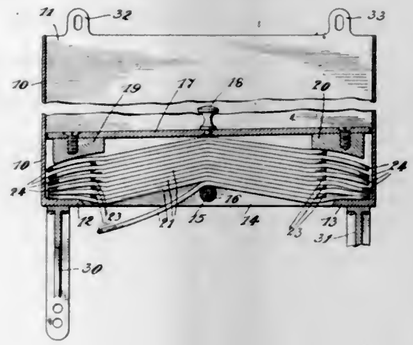
2. In apparatus of the class described, and in combination, a base, a pair of grippers slidably mounted thereon; a lever pivoted on the base, connections between the lever and the grippers, said connections being applied to the lever on opposite sides of the pivot thereof.

1,503,238. ELECTRIC CONNECTING DEVICE FOR FLOATING OR SUBMARINE VESSELS. FRIEDRICH GALL, Kiel, Germany. Filed Aug. 31, 1921. Serial No. 497,424. 3 Claims. (Cl. 173—338.)



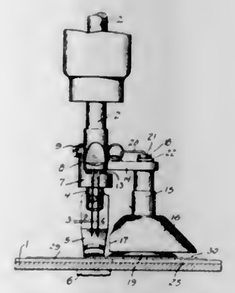
1. In an electrical connecting device for floating or submarine vessels, a fixed contact member attached to the wall of the vessel, an exterior detachable contact member adapted to cooperate with the fixed contact member, and means for detaching the exterior detachable member from the fixed member by a manipulation performed in the interior of the vessel.

1,503,239. MOTOR VEHICLE. EARL G. GUNN, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Nov. 14, 1919. Serial No. 338,107. 3 Claims. (Cl. 280—96.1.)



1. A steering knuckle comprising in combination a knuckle member, a pin engaging said knuckle member, a second knuckle member, means carried by said second knuckle member for supporting said pin, a steering knuckle arm carried by said second knuckle member and single means for securing said arm on said knuckle member and for locking said pin supporting means on said second knuckle member.

1,503,240. UNDERFEED STOKER. EDWARD J. HART, Philadelphia, Pa. Filed Oct. 20, 1921. Serial No. 508,982. 11 Claims. (Cl. 110—47.)



10. In an under feed stoker, the combination with a furnace of a main retort from which extend branch retorts and movable grates between adjacent branch retorts.

1,503,241. DISPENSER FOR PAPER TOWELS AND LIKE ARTICLES. PAUL H. HORWITT, Brooklyn, N. Y., assignor to Independent Paper Mills Inc., Brooklyn, N. Y., a Corporation of New York. Filed May 25, 1923. Serial No. 641,304. 7 Claims. (Cl. 211—29.)

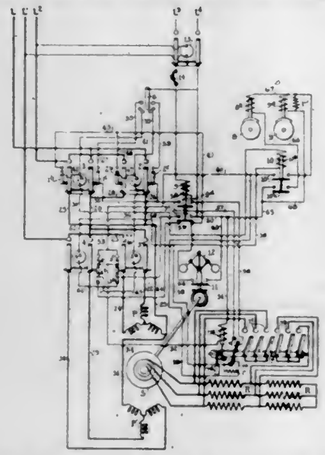
4. A dispenser for paper towels and the like, comprising a casing, means within the casing for supporting opposite ends of a bundle of towels placed therein, and a transverse support placed intermediate of the said means providing openings on either side thereof and between the same and the said means so that succeeding lowermost towels or other articles placed in the receptacle may be drawn therefrom alternately first through one of the said openings and then through the other.

1,503,242. CIRCULAR-FEED ATTACHMENT. THOMAS B. HUESTIS, Bristol, R. I., assignor to National India Rubber Company, a Corporation of Rhode Island. Filed Feb. 26, 1921. Serial No. 447,944. 2 Claims. (Cl. 112—203.)

1. In a sewing machine, stitch forming mechanism, straight line work feeding mechanism including a presser bar, a rotatable work gripping member movably carried by the presser bar and having a central recess on its under side, a circular rotatable work gripping member coacting therewith and having a roughened portion adjacent its periphery, and a pin disposed centrally of said second member and adapted to enter said recess.

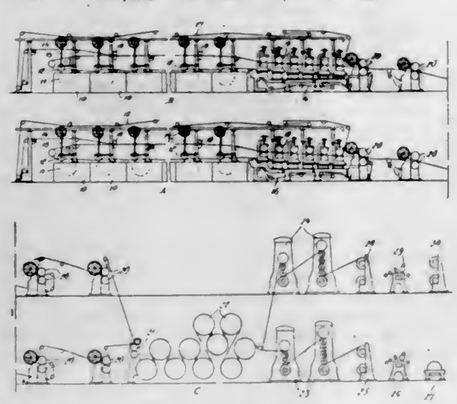
1,503,243. TELEPHONE RECEIVER. OSCAR M. LEICH, Genoa, Ill., assignor to Leich Electric Co., Genoa, Ill., a Corporation of Illinois. Filed June 2, 1922. Serial No. 565,406. 2 Claims. (Cl. 179—182.)

2. In a telephone receiver, a metal shell, a metal cap and a rubber cover member for said cap, said cap and cover having aligning openings and said cover being thickened at said opening.



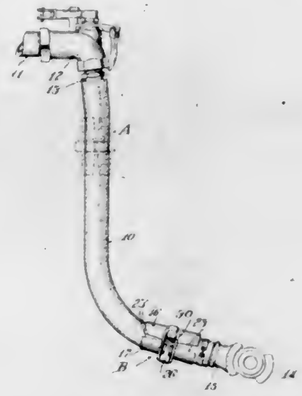
1,503,244. MAGAZINE PENCIL. ROMOLO NARDI, Camden, N. J. Filed June 6, 1923. Serial No. 643,726. 5 Claims. (Cl. 120—14.)

5. In a pencil, a body having a tapered tip at one end, an enlargement at the other end forming a groove, a plate fixed in said groove, rods fixed to said plate, lead holders slidably mounted in said plate, guides carried by the lead holders and coacting with the rods, springs on said rods engaging the guides to normally hold the lead holders in contracted positions, lugs formed from the side walls of the body and projecting beyond the outer surfaces thereof, a barrel having a restricted end producing a shoulder for coaction with the enlargement on the body to limit the movement of the barrel relative to said body in one direction, grooves in the restricted portion of the barrel for coaction with the lugs to position the barrel relative to the body for telescopic movement, a disc fixed in the outer end of the barrel, a pusher rod carried by the disc and adapted to be moved into endwise alignment with any one of the lead holders by the rotation of the barrel, said pusher rod projecting the selected lead holder beyond the tip of the pencil as the barrel is telescoped, a spring within the barrel between the plate and disc for returning said barrel to its normal position and a cap enclosing the outer end of the barrel.



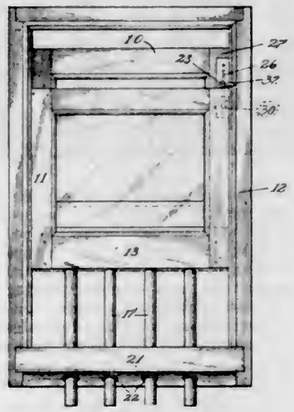
1,503,245. MOTOR CONTROLLER. HARRISON P. REED, Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Mar. 23, 1917. Serial No. 156,830. 18 Claims. (Cl. 172—152.)

1. In a controller for a motor having separate slow speed and high speed windings, in combination, means to connect such windings in circuit selectively and to insure connection of the slow speed winding prior to the connection of the high speed winding, and means to effect



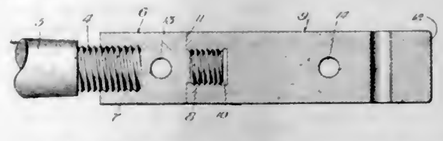
acceleration of the motor, said last-mentioned means including means whereby it acts until subjected to a predetermined accelerating operation to delay connection of the high speed winding.

1,503,246. PAPER-MAKING APPARATUS. CHARLES G. ROBINSON, Buffalo, N. Y., assignor, by mesne assignments, to The Beaver Products Company, Inc., a Corporation of New York. Filed Nov. 24, 1919. Serial No. 340,296. 1 Claim. (Cl. 92—38.)



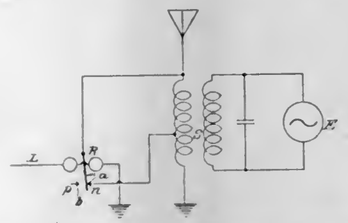
In a paper making apparatus, the combination of a plurality of web forming mechanisms, each provided with a plurality of forming cylinders, said cylinders co-operating with one another to form an integral wet paper web on a felt common to them all; each forming mechanism having means including pressers to reduce the moisture content of the paper webs to an appropriate degree; said forming mechanisms being relatively long and being arranged one above the other to reduce the longitudinal space occupied by the entire apparatus and having their dry ends adjacent; a single set of drying cylinders over which the webs of paper from each of said forming mechanisms travel together; said pressing means being adjusted to remove sufficient moisture from said webs to prevent sticking together when passing over the drying cylinders; and means beyond said drying cylinders for separating and for separately calendering and winding the resultant paper webs.

1,503,247. REPAIR DEVICE FOR TRAIN-PIPE HOSE. CHARLES A. ROUZER and GEORGE N. FLAUGH, Fort Wayne, Ind. Filed Mar. 23, 1922. Serial No. 545,919. 4 Claims. (Cl. 24—19.)



1. A device for temporarily repairing a railway car train line hose comprising, in combination, a pair of members having smooth substantially semi-cylindrical inner surfaces, a single, centrally arranged hinge connecting the members, said members and hinge formed so that the members may be spread apart at one end of the device and brought closer together at the other end, and means for holding said members in clamped relation upon a hose.

1,503,248. BARRED WINDOW. GEORGE C. RUDMAN, Clinton, Iowa. Filed June 29, 1923. Serial No. 648,451. 7 Claims. (Cl. 20—71.)

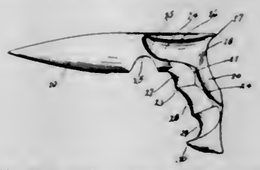


1. In combination with a window frame comprising a window sill and side guideways, a window sash slidably mounted in the guideways, and provided with sockets in its base rail, bars entered through the window sill and into the sockets, the bars being adapted to be removed from the sockets when the sash is lifted to a position to permit the bars to clear the window sill, and a locking pin for arresting the upward movement of the window sash before it has reached said position, substantially as described.

1,503,249. TOOL FOR REMOVING WHEELS FROM AXLE SHAFTS OF MOTOR VEHICLES AND THE LIKE. ERNEST L. RUMSFIELD, Chicago, Ill. Filed Apr. 9, 1923. Serial No. 630,702. 2 Claims. (Cl. 29—85.)

1. A tool for the purpose specified comprising in combination a handle member in the form of a cylindrical bar of steel or the like having at one end an inwardly reaching internally threaded socket, the other end being adapted for operation by a suitable pounding tool, and a cap member of cylindrical form of substantially the same diameter as the handle member, said cap member having on one end an externally threaded lug of size and threads adapted to thread into the socket of the handle member, said lug being of less elevation than the depth of the socket of the handle member, whereby the cap member may be threaded flush against the end portion of the handle member, and there being an inwardly extending internally threaded socket in the end of the cap member opposite to its lug aforesaid, the cap member socket being of size and thread according to the size and thread of the axle shaft with which it is intended to be used, there being a transverse socket in the handle member and a transverse socket in the cap member, said socket being for the reception of pins or tools to engage and disengage the cap member with the handle member, substantially as described.

1,503,250. APPARATUS FOR AND METHOD OF RAPID TRANSMISSION OF TELEGRAPHIC MESSAGES. PAUL E. SABINE and WILLIAM F. FRIEDMAN, Geneva, Ill., assignors to said Paul E. Sabine, as trustee. Filed Aug. 7, 1920. Serial No. 401,935. 17 Claims. (Cl. 250—8.)

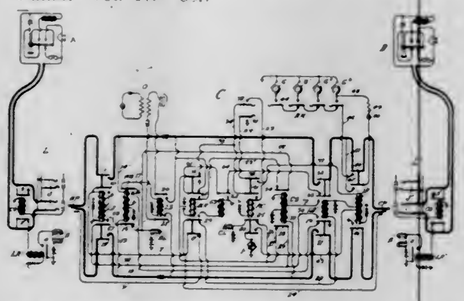


8. In an apparatus for transmitting messages comprising sending and receiving devices, said sending means having means for transmitting electrical energy to the receiving device by means of a suitable medium capable of transmitting electro-magnetic oscillations, means operating with two different kinds of electrical impulses to suppress one thereof and to impress the other thereof upon the transmitted energy, and means to cause the receiving device to supply impulses corresponding to two kinds of impulses operating in the sending device, the last named means having means for substantially synchronizing the receiving device with the sending device, and means for automatically adjusting the synchronizing means to effect exact synchronism with the sending device.

1,503,251. IMPLEMENT HANDLE. WILLIAM SCHOOF, Milwaukee, Wis. Filed June 8, 1922. Serial No. 566,879. 14 Claims. (Cl. 55—67.)

1. A tool handle shaped to conform to a clasped hand and to accommodate the fleshy portions of the palm while supporting the intermediate portions thereof.

4. A handle for tools operated by exerting manual pressure thereon, said handle comprising a piece of material tapered in conformity with the decreasing length of the fingers, ridges thereon adapted to conform to the depressions of the clasped hand of the operator, hollow portions adapted to receive the elevated portions of the palm of the operator, and ridges so positioned as to define the position of the clasped fingers of the operator.

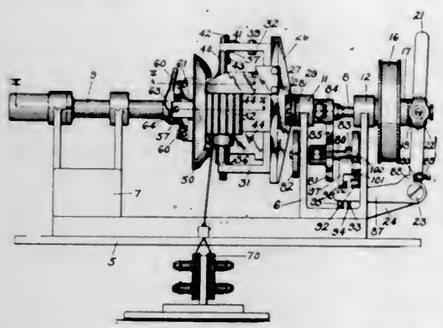


5. A handle for tools operated by exerting intermittently manual pressure thereon, said handle comprising a handle roughly tapered toward its outer end, ridges formed thereon adapted to provide support for the depressions in the hand of an operator, the depression portions of the handle being adapted to receive the raised portions of an operators hand, means for defining the normal position of the fingers of a hand clasping the handle, and flanges at each end of the handle arranged to confine the hand of an operator against movement with respect thereto.

9. A dibble comprising a pointed body portion provided with a laterally projecting fin, a handle projecting laterally from the body portion at a different angle from the fin and adapted to conform to the hand of an operator, and means for accommodating the forefinger of the operator upon said handle in a partially closed and in an extended position.

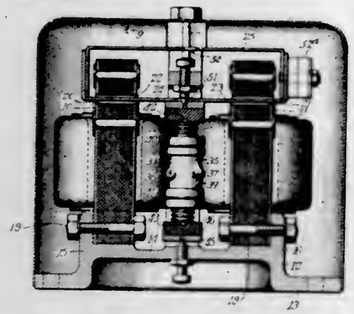
14. A dibble including a sharpened body portion and a fin projecting laterally therefrom, the surface of the fin being merged with those of the body portion to create a substantially ovoid cross section, and an abrupt shoulder portion at the upper end of the fin, the fin being tapered in thickness toward said shoulder portion.

1,503,252. TELEPHONE SYSTEM. WILLIAM G. SHULL, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 29, 1921. Serial No. 440,854. 12 Claims. (Cl. 179—38.)



1. A telephone system including a pair of telephone lines connected for conversation by means of a link circuit applied to multiple terminals of said lines, means controlled by the subscribers jointly to operatively free both lines from said link circuit while applied to said terminals, said means including a pair of relays one for each line energized during conversation, each to close a switch contact in the talking circuit between said lines.

1,503,253. CLEANING COMPOSITION. HARRY M. SINCLAIR, Toledo, Ohio. Filed Feb. 13, 1922. Serial No. 536,345. 2 Claims. (Cl. 87—5.)

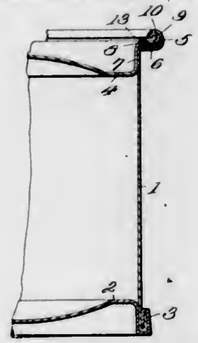


1. A cleaning composition consisting of sodium bisulfate, and a water-soluble pine oil.

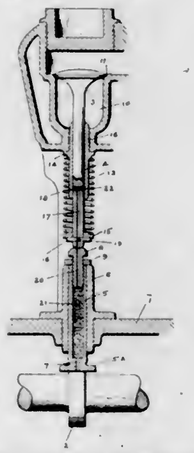
1,503,254. ARMATURE-WINDING MACHINE. ERNEST H. SIPPEL and HAROLD H. HAGER, Toledo, Ohio, assignors, by mesne assignments, to The Electric Auto-Lite Company, Toledo, Ohio, a Corporation of Ohio. Filed Aug. 14, 1920. Serial No. 403,605. 2 Claims. (Cl. 242—13.)

1. In an armature winding machine, the combination of means for rotatably mounting a slotted armature core on an axis at right angles to the axis of the core, a shaft coaxial with said first axis, a guide plate carried thereby, means for moving said guide plate axially into contact with said core, wire spacing and rounding fingers mounted in said guide plate and means for moving said fingers relative thereto.

1,503,255. INDUCTION RELAY. ERWIN R. STOEKLE, Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed May 17, 1920. Serial No. 381,793. 17 Claims. (Cl. 200—91.)



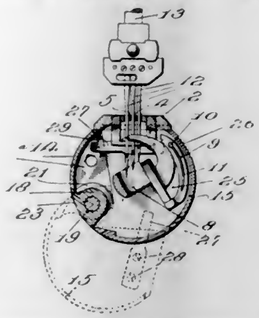
1. In combination, a pair of electromagnets having air gaps to be traversed by magnetically independent fluxes of unlike phase and a continuously looped armature having parts to be subjected to direct influence of such fluxes for effecting a torque upon said armature.



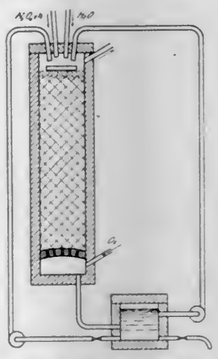
17. The combination with a support having a projecting boss and spaced flanges and a lateral arm carried by said boss, of electromagnets having individual air gaps and means for securing said electromagnets to said flanges with said air gaps in alignment with one another, said arm having a projecting portion arranged parallel to an opposing portion of said boss, pivot bearings carried by said parallel arranged elements, a contacting device carried by said bearings and an armature member secured to said contacting device and having aligned parts arranged within said air gaps.

1,503,256. STRIP-SEALED CONTAINER. FRANK A. ASSMANN, Jr., Chicago, Ill., assignor to Continental Can Company, Syracuse, N. Y., a Corporation of New York. Filed Apr. 16, 1920. Serial No. 374,447. 1 Claim. (Cl. 220—61.)

A container comprising a body portion having a flange extending outwardly therefrom, a container end for closing one end of the body portion, said container end having a flange parallel with the flange on the body portion, the outer edge of said flange on the container end being rolled in a curl, the upper surface of which is continuously curved from the outer portion thereof to the extreme inner portion thereof, and a split metal sealing strip adapted to engage the under surface of the flange on the container body, to extend across the edge of the flange on said container body and about the curled curved edge of the container end, the inner edge of said sealing strip being curved to conform to the curled edge of the container end and terminating short of the outer surface of the flange on the container end, whereby the drawing of the sealing strip about the curved surface of the curled edge of the container end will draw the container end into tight sealing contact with the can body, the inner edge of the curled portion of the container end terminating short of the flange on the end, whereby a hollow curl is formed giving an elasticity to the curled edge which aids in holding the parts in sealed contact when the sealing ring is drawn about the same.



1,503,257. LUBRICATING SYSTEM FOR VALVE STEMS. FRANK B. PARKER and CHARLES U. AUSTIN, Rochester, N. Y. Filed Mar. 13, 1922. Serial No. 543,513. 8 Claims. (Cl. 123—90.)

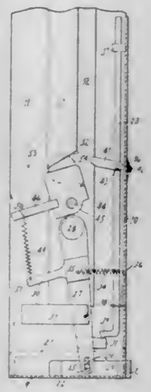


8. The method of lubricating the wall of a guide sleeve for a valve stem which consists in providing for the escape of a small but continuous quantity of oil from the crank case of an engine, creating a partial vacuum around the valve stem and allowing the partial vacuum to draw the escaped oil through a duct in the valve stem into the guide sleeve by locating the end of the duct in the valve stem over the escaped oil from the crank case.

1,503,258. WORK-SUPPORTING ARM FOR SEWING MACHINES. JOSEPH BERGER, Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed May 23, 1921. Serial No. 471,750. 5 Claims. (Cl. 112—258.)

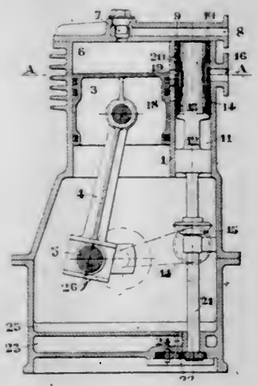
1. The combination of a work supporting arm having a throat plate and shaft extending longitudinally of said arm and disposed centrally therein, a thread carrying looper mounted on said shaft, said arm beneath a portion of the said throat plate being formed in two sections, one of which is rigid with the arm and the other of which is mounted to swing about an axis parallel with the longitudinal axis of the arm, said movable section extending from a point at one side of the throat plate to a point substantially diametrically opposite thereto, whereby when said movable section is swung downwardly the looper at both the heel and the point will be exposed to facilitate the threading thereof.

1,503,259. PROCESS FOR THE PRODUCTION OF CONCENTRATED NITRIC ACID. EINAR BERGVE, Skoien, near Christiania, Norway, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Filed Oct. 14, 1921. Serial No. 507,719. 3 Claims. (Cl. 23—1.)



1. A process for the production of highly concentrated nitric acid, comprising the steps of reacting upon an excess quantity of liquid nitrogen oxides with oxygen and an aqueous liquid, removing the aqueous layer of the resulting reaction product, and returning the non-aqueous layer of the said reaction product into the process.

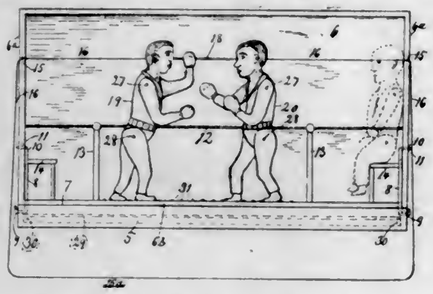
1,503,260. VENDING MACHINE. WILLIAM JOHN BOUSQUET, Springfield, Mass., assignor, by mesne assignments, to Samuel Sisisky, Thompsonville, Conn. Filed May 13, 1922. Serial No. 560,646. 12 Claims. (Cl. 194—70.)



1. The combination, in a vending machine, with a sliding delivery member for the objects dispensed, a spring-pressed oscillatory operating member pivotally

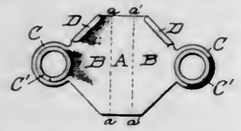
connected with said delivery member, a longitudinally reciprocating latch for said oscillatory member, a lever pivotally connected with said latch, and a coin chute adapted to deliver a coin in an approximately vertical

position at the outlet end of said chute, of means to receive said coin in such position from said chute and with the edge of said coin operate said lever to actuate said latch out of engagement with said oscillatory member.



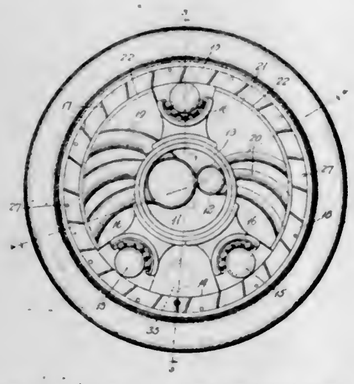
1,503,261. COMPRESSOR OF AIR AND OTHER FLUIDS. FERNAND LOUIS BROUSSOUSE, Paris, France, assignor, by mesne assignments, to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Sept. 15, 1921. Serial No. 500,951. 13 Claims. (Cl. 230—34.)

1. In a fluid compressor, the combination with a fluid compressing cylinder, a piston therein, and a fluid inlet port positioned to be covered by said piston before said piston has moved to the end of its compression stroke, of a valve chamber into which said inlet port opens and a rotating valve for controlling said port.



1,503,262. MECHANICAL TOY. CHARLES J. BROWN, River Falls, Wis. Filed Feb. 9, 1922. Serial No. 535,216. 5 Claims. (Cl. 46—40.)

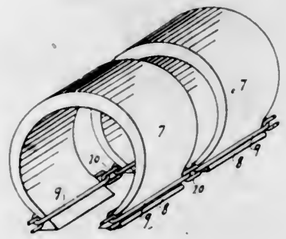
1. A base having two spaced uprights or upright end portions, two combatant figures movable upon the base and having pivoted arms and legs, an elastic cord connecting the figures by their heads and tending to pull the figures toward each other, a non-elastic cord guided to slide in each upright and having one end connected with the head of the adjacent figure and its other end extending forward of the base to be there pulled and



slackened by hand, to alternately move the figures apart and by slackening the cords allow the elastic cords to pull the figures toward each other whereby their arms are caused to swing in simulation of boxing.

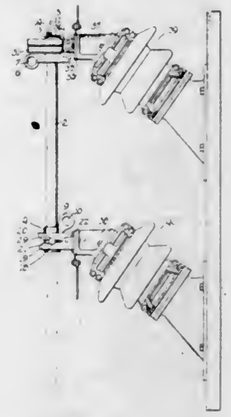
1,503,263. SHEET-METAL ROCKER ARM AND METHOD OF MAKING THE SAME. HJALMAR G. CARLSON, Worcester, Mass., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass., a Corporation of Massachusetts. Filed Jan. 17, 1921. Serial No. 438,055. 3 Claims. (Cl. 113—116.)

1. The method of making a rocker arm or the like of a piece of sheet metal which consists in forming a blank to form a back section and two side sections, pressing circular bosses on the two side sections, forming passages through the bosses, bending the blank on two lines to bring the side sections into parallel position and butt said bosses together by said bending operation to form a bearing hub.



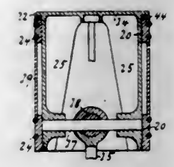
1,503,264. PNEUMATIC VEHICLE DRIVE. GEORGE A. CASE, Joplin, Mo. Filed Feb. 27, 1923. Serial No. 621,691. 1 Claim. (Cl. 253—81.)

A driving wheel for pneumatically impelled vehicles, comprising a rim, turbine blades mounted upon said rim, an annular bearing member upon said rim intersecting said blades, a tubular dead axle, an inner non-revoluble



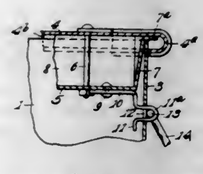
member mounted thereon, bearing devices upon said non-revoluble member contacting with said bearing member, and pressure fluid tubes within said dead axle and nozzles communicating with said tubes and directed toward the blades.

1,503,265. TIRE PROTECTOR. BARNEY GOLDMAN, New York, N. Y. Filed Mar. 27, 1923. Serial No. 627,950. 3 Claims. (Cl. 152—16.)



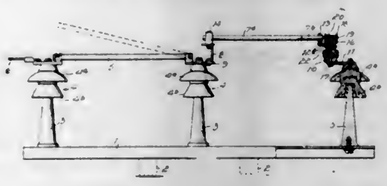
1. In a tire protector the combination with a plurality of spaced tread segments made to embrace a tire, of an endless link looped about each segment near its end, and a second endless link of smaller length forming a spacer between each segment coacting with the looped portion of the segment link so that a segment will universally adjust itself to the periphery of the tire independent of the other sections.

1,503,266. FUSE AND MOUNTING. ERNEST H. JACOBS, Chicago, Ill., assignor to Electrical Engineers Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed May 22, 1919. Serial No. 298,905. 36 Claims. (Cl. 200—114.)



1. In combination, a fuse having a sleeve, a contact at one end of the sleeve, a lug projecting forward from said contact, a stationary spring contact member for engaging said contact, a trunnion member mounted on the other end of the sleeve, a stationary bearing member for mounting the trunnion and a lug on said sleeve projecting from the rear of said trunnion member.

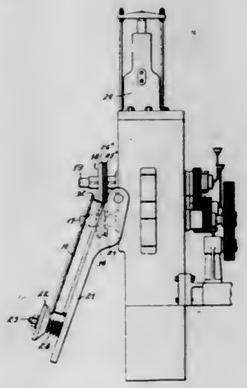
1,503,267. EXPLOSIVE ENGINE. THOMAS KEENAN, Brooklyn, N. Y., assignor to Keenan Piston Sleeve and Engine Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 10, 1921. Serial No. 506,641. 1 Claim. (Cl. 74—108.)



An engine piston comprising a tubular headed member with flanged and threaded ends, said member having its interior longitudinally grooved, a cylindrical sleeve inserted on the member with a boss at the top and bottom to coact with the periphery of the member and form an annular space, and a nut engaging the threaded member to force the end of the sleeve against the flange.

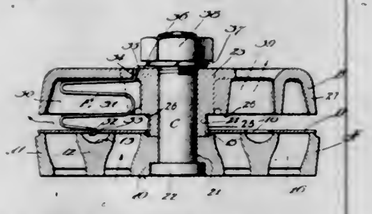
1,503,268. DETACHABLE COVER FOR COLLAPSIBLE OVEN CASINGS. HENRY KIELBERG, Martins Ferry, Ohio, assignor to Whitaker-Glessner Company, Wheeling, W. Va., a Corporation of West Virginia. Filed Oct. 11, 1922. Serial No. 593,806. 7 Claims. (Cl. 126—275.)

1. The combination with a collapsible oven casing, of a cover for said casing comprising a sheet metal member adapted for mounting within the upper portion of said casing, said member having upwardly and outwardly inclined flanges for seating in interiorly bracing relation to the walls of said casing, and resilient members carried by said cover adapted to be sprung into and out of interlocking relation to said casing.



1,503,269. AUTOMATIC CIRCUIT-MAKING SWITCH FOR HIGH-POTENTIAL CIRCUITS. LAURENCE M. KLAUBER, San Diego, Calif. Filed Mar. 15, 1922. Serial No. 544,054. 3 Claims. (Cl. 200—126.)

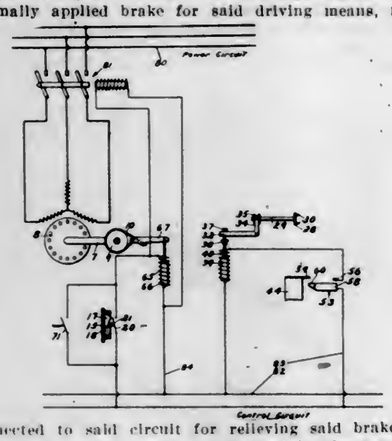
1. An automatic circuit-making switch to operate in high-potential circuits, comprising the combination of a switch lever, a contact to cooperate with the switch lever to form a new circuit, a spring consisting of a part distinct from the switch lever and engaging the switch lever to move the same into engagement with the contact, and a dielectric resistance device located between the switch lever and the contact constructed so as to disrupt under a potential higher than a predetermined limit, and permit the spring to move the switch lever against the contact, said switch member and spring cooperating



to carry the current to the contact, and said switch lever having a sectional area sufficient to carry the current to the contact without subjecting the spring to injury due to the current.

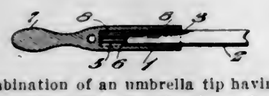
1,503,270. RIM-ROLLING MACHINE. FRED R. KLAUS, Cleveland, Ohio, assignor to The Hydraulic Pressed Steel Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 23, 1919. Serial No. 299,261. 6 Claims. (Cl. 153—29.)

1. In a machine of the kind described the combination with an inclined table for supporting a rim having a grooved side, of a pair of flange bending rolls, means associated with the table for holding the rim in operative position with respect to the rolls, said rolls being shaped to fit the groove of the rim, one of said rolls having a surface adapted to engage the edge of said groove and change the position of the same.



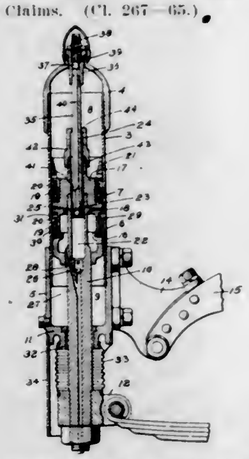
1,503,271. VALVE FOR COMPRESSORS. CHARLES H. LEINERT, Chicago, Ill. Filed Sept. 10, 1920, Serial No. 409,369. Renewed Dec. 14, 1923. 9 Claims. (Cl. 251—144.)

1. In a valve of the kind described, the combination of an open member formed to provide a valve seat, a valve disk adapted to rest upon the valve seat, a stop plate connected with the valve seat, and spring means interposed between the valve disk and the stop plate, there being openings formed in the valve disk and in the stop plate through which the ends of the spring means may pass, the ends of the spring means being turned to lie upon the remote side of the disk and stop plate to lock therewith, substantially as described.



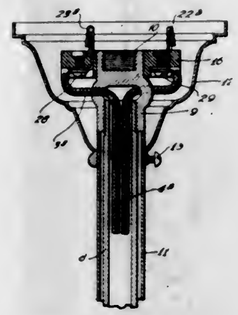
1,503,272. COIL-WINDING MACHINE. JOHN A. LEWELLYN, Toledo, Ohio, assignor, by mesne assignments, to The Electric Auto-Lite Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 28, 1919. Serial No. 293,269. 9 Claims. (Cl. 242—10.)

2. In a coil winding machine having a form upon which a conductor is adapted to be wound, driving means for rotating said form, a circuit for controlling said driving means, a switch in said circuit, a cam in operative connection with said form for actuating said switch, a normally applied brake for said driving means, means



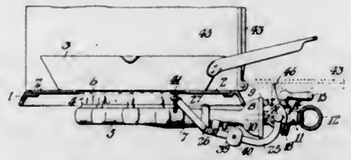
connected to said circuit for relieving said brake and a manually operable switch connected in shunt to said switch.

1,503,273. MEANS FOR FASTENING TIPS TO UMBRELLA RIBS. JOHN LUTZ and WAYNE S. EVANS, Philadelphia, Pa., assignors to S. W. Evans & Son, Philadelphia, Pa., a Firm composed of Samuel W. Evans, Wayne S. Evans, and Morton E. Evans. Filed Feb. 12, 1924. Serial No. 692,225. 4 Claims. (Cl. 135—31.)



3. The combination of an umbrella tip having a hole of substantially uniform diameter therein, and an umbrella rib having the end thereof formed into two different sections, the terminal section being the smaller diameter, and there being a longitudinally extending slot in said sections to permit compression of the latter, so as to hold said tip in position on said rib by frictional contact.

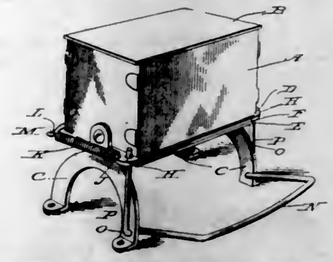
1,503,274. AUTOMATIC AIR SPRING. JOHN J. MCELROY, New Haven, Conn., assignor to The Westinghouse Air Spring Company, New Haven, Conn., a Corporation of Pennsylvania. Filed Dec. 19, 1921. Serial No. 523,397. 6 Claims. (Cl. 267—65.)



1. In an air spring, a variable volume cushion chamber, an internal pump for forcing air into said chamber, a spring loaded relief valve for said chamber and means operating upon extension movements of said spring for opening said relief valve.

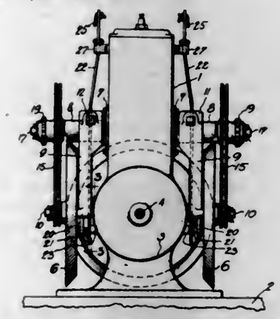
1,503,275. INTERCHANGEABLE SUPPORT FOR ELECTRIC FIXTURES. HARRISON D. MCFADDIN, East Orange, N. J. Filed Mar. 7, 1921. Serial No. 450,186. 3 Claims. (Cl. 173—330.)

1. A separable outlet for electrical fixtures embodying a threaded supporting member adapted to be screwed on to the fixture stud of an outlet box, an insulating element carried on and supported by the supporting member, annular contact rings carried by said insulating element and coaxial with the supporting member, in combination with a fixture adapted to be screwed on to the supporting member, an insulating element carried by said fixture and contacts mounted on and carried by the second mentioned insulating element and spaced at substantially the same distance from the axis of the fixture as the annular contacts are spaced from the axis of the supporting member, whereby the fixture may be screwed on to the supporting member to bring the corresponding contacts of the fixture insulating element into cooperative relation with the contacts of the insulating element of the supporting member.



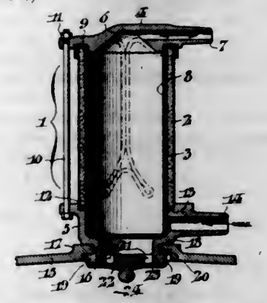
1,503,276. AUTOMATICALLY-OPERATIVE CONTROLLING MECHANISM FOR HEATERS. EDWARD WILLEY MARVEL, Philadelphia, Pa. Filed May 26, 1920, Serial No. 384,250. Renewed June 12, 1923. 3 Claims. (Cl. 126—52.)

1. The combination with a gas burning heater having a support for removable articles to be heated; of a burner extending beneath said support; a rotary valve constructed and arranged to control the flow of gas to said burner, in accordance with its turning movement; and means, including a tappet lever operatively related to said valve and normally projecting from said support, but capable of being displaced to open said valve, by an article placed on said support in position to be heated; and an oven, having a door arranged to close said valve when said door is opened.



1,503,277. SINGLE-ARTICLE-DELIVERY DEVICE. BRADEN N. MULFORD, Fountain Head, Tenn. Filed Dec. 5, 1923. Serial No. 678,692. 3 Claims. (Cl. 206—24.)

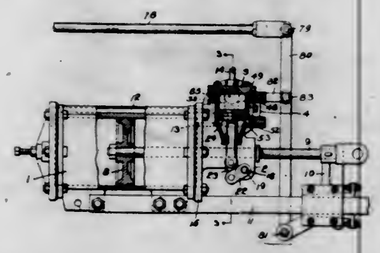
1. A single article delivery device, consisting of a container, a pair of hooks secured to the lower portion of said container, a single article delivery plate mounted in said container, a pair of ears on said plate, springs connected with said plate for retaining and returning it to normal position, said springs having their ends connected



to the hooks on the container and the ears of the delivery plate and a pivoted hand operated lever connected with said plate for sliding it to delivery position.

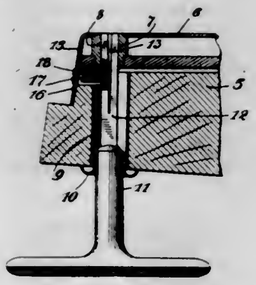
1,503,278. FARM TRACTOR. CORNELIUS MURNANE, Balaclava, Victoria, Australia, assignor to Murnane Tractor Ltd., Melbourne, Australia, a Corporation of Australia. Filed June 19, 1922. Serial No. 569,221. 6 Claims. (Cl. 180—17.)

1. In a device of the character described the combination of a prime mover, a pair of flywheels at opposite ends of the prime mover, a pair of friction wheels at opposite sides of the prime mover, supports for said friction wheels oscillatably carried with respect to the prime mover, and means for bringing said friction wheels independently and collectively into engagement with either one of said fly-wheels.



1,503,279. PULSATOR. LEROY NIXON, Easton, Pa. Filed Nov. 17, 1922. Serial No. 601,517. 7 Claims. (Cl. 103—44.)

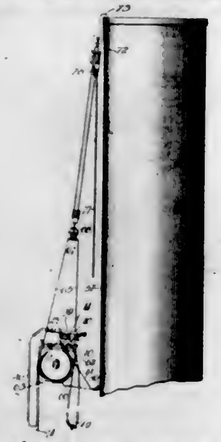
1. A device of the character described including a displacment chamber adapted for connection to a pneumatic actuator and also to the supply soure of fluid to be pumped, and a complemental flexible member spanning



said chamber and serving to open and close the air and fluid lines and having capacity to respond to the pneumatic actuator in the performance of a pumping action.

1,503,280. POWER-REVERSE GEAR. ALFRED S. OSBOURNE, Ingram, Pa. Filed June 21, 1920. Serial No. 390,329. 7 Claims. (Cl. 121—40.)

1. A power reverse gear comprising in combination, a fluid pressure motor, a reversing rod operated thereby, a source of fluid pressure supply, a fluid pressure controlled lock arranged to normally hold the rod against movement, a valvular mechanism controlling the flow of fluid to and from the motor and to and from the lock and comprising a fixed stationary seat and a single rotatable valve member capable of rotative movement only cooperating with the seat and arranged when in normal position to maintain the lock applied and to connect both sides of the motor to the supply source, manual means for rotating said valve member in either direction to exhaust one side of the motor and simultaneously release the lock including a floating lever pivotally connected at one end to and movable with the reversing rod, said rotatable valve member being operatively connected to the said floating lever and actuated thereby to reconnect both sides of the motor to the supply source and reapply the lock.

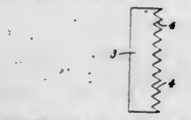


1,503,281. HANDLE-ATTACHING MEANS FOR DOOR LATCHES. LEON OTTINGER, New York, N. Y. Filed Aug. 10, 1923. Serial No. 656,660. 8 Claims. (Cl. 292—350.)

1. In combination, an actuating member having a shaft receiving bore, an operating shaft for said member having a split expansible end portion adapted to be fitted within said bore, and adjustable means engaged with the split end of said shaft exteriorly of said bore to expand the parts of the shaft end into frictional binding engagement with the walls of said bore.

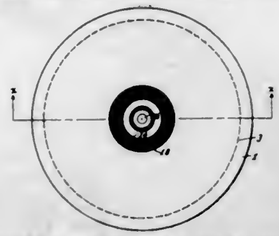
1,503,282. PNEUMATIC PAINTING APPARATUS. JENS A. PAASCHE, Chicago, Ill. Filed July 19, 1919. Serial No. 311,945. 11 Claims. (Cl. 91—45.)

2. A pneumatic painting apparatus comprising, in combination, a receptacle adapted to contain paint, an operator's seat fastened to said receptacle, a pneumatic brush connected to said receptacle by flexible tubes, and



hoisting tackle adapted to raise and lower said receptacle, seat and brush and to support them at any desired elevation.

1,503,283. GAME APPARATUS. GEORGE S. PAGE, Chatham, N. J. Filed Sept. 20, 1922. Serial No. 589,305. 2 Claims. (Cl. 46—61.)

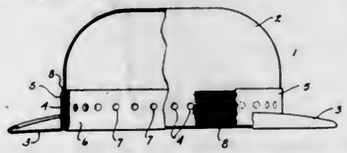


1. The combination, in a lawn game to be played with a golf ball and club, of a series of successive marks spaced apart in a substantially circular group and a central finish mark, said marks variously consisting of upright stakes, countersunk cups, and fixed wickets, said wickets being of a width approximately equaling twice the diameter of the ball.

1,503,284. HIGH-POTENTIAL-ELECTRICITY ARRESTER. FREDERICK R. PARKER, Chicago, Ill. Original application filed Mar. 8, 1907, Serial No. 361,354. Renewed Jan. 8, 1920, Serial No. 350,249. Patent No. 1,350,329, dated Aug. 24, 1920. Divided and this application filed July 23, 1920. Serial No. 398,580. 6 Claims. (Cl. 175—30.)

1. A dielectric member for a high-potential electricity arrester, having a row of relatively small teeth along an edge thereof.

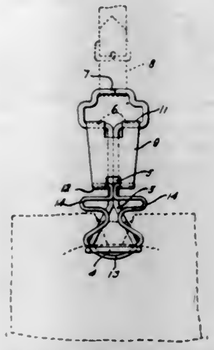
1,503,285. PROCESS OF PRODUCING UNIFORM VOLTAIC CELLS. FREDERICK R. PARKER, Chicago, Ill. Original application filed May 8, 1916, Serial No. 96,066. Divided and this application filed Dec. 20, 1920. Serial No. 432,027. 12 Claims. (Cl. 204—38.)



1. The process of constructing a voltaic cell comprising compressing the assembled cell, measuring the internal resistance of the cell while it is being compressed, to determine where the compression shall stop, stopping the compression of the cell at the proper value of its internal resistance, and permanently sealing the parts of the cell in such compressed relation while the pressure maintaining the proper value of the internal resistance is applied.

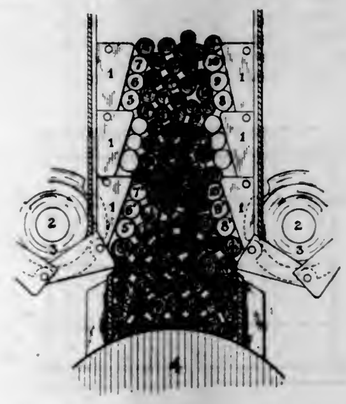
1,503,286. SHUTTLE. LUIGI PAVIA, Allentown, Pa. Filed Feb. 8, 1923. Serial No. 617,821. 2 Claims. (Cl. 139—208.)

1. In combination, a shuttle body, a carrier member arranged therein and having a bore and also a slot communicating with the bore, the bore and slot extending longitudinally of the shuttle body, a spindle in said bore confined thereby to move longitudinally thereof, means in the carrier member to yieldingly oppose said movement of the spindle, and a screw screwed into and projecting laterally from the spindle and having a faceted portion in the slot confined by the latter against turning, said screw preventing the spindle from turning in the bore.



1,503,287. HAT. LEOPOLD PIZZUTIELLO, New York, N. Y. Filed Apr. 5, 1924. Serial No. 704,333. 2 Claims. (Cl. 2—182.)

1. A new article of manufacture comprising a felt hat provided with ventilating holes extending through the crown, a flat sweat band provided with registering ventilating holes, a foraminous woven ventilating fabric extending around the exterior of the hat over the ventilating holes to give support to the hat band and prevent the sagging of the hat band into the holes, and a closely woven hat band mounted over the foraminous woven ventilating fabric and concealing the ventilating holes.

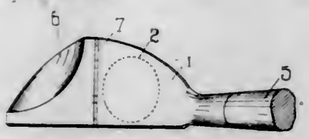


1,503,288. COVER-FASTENING CLASP. AMOS R. POOLE, New York, N. Y., assignor to William R. Chappell, New York, N. Y. Filed Nov. 15, 1923. Serial No. 674,993. 2 Claims. (Cl. 24—248.)

1. In a clasp for blankets and the like, the combination with a one-piece, stiff wire body having an upturned jaw portion at one end and a fastener retaining loop at its other end, said loop having aligned bearing shoulders, of a toggle joint comprising a plate pivoted to said bearing

shoulders and a spring link pivoted to the plate and including a jaw portion cooperating with the jaw portion of the said body and reversely bowed spring portions between the jaw and the plate.

1,503,289. WOOD GRINDER. PAUL PRIEM, Heidenheim-on-the-Brenz, Germany, assignor to American Voith Contact Company, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 20, 1923. Serial No. 681,815. 5 Claims. (Cl. 83—75.)

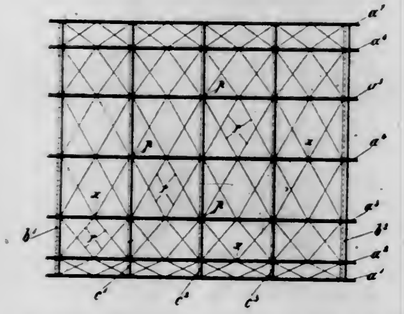


1. A wood grinder of the continuously working type comprising the combination of a grinding element and endless feed chains for positively feeding a charge of wood blocks against the stone, said feed chains consisting of wedge shaped links with their inclined surfaces directed toward the stone.

1,503,290. SHUTTLE FOR CARPET-WEAVING LOOMS. LUIGI QUARESIMA, Amsterdam, N. Y. Filed Nov. 22, 1923. Serial No. 676,331. 4 Claims. (Cl. 139—195.)

1. In a shuttle of the type described, a body portion comprising spaced top and bottom walls, a bobbin positioned between said walls, and a guide member carried by the edge of one of said walls projecting outwardly therefrom and offset from the plane occupied by said wall.

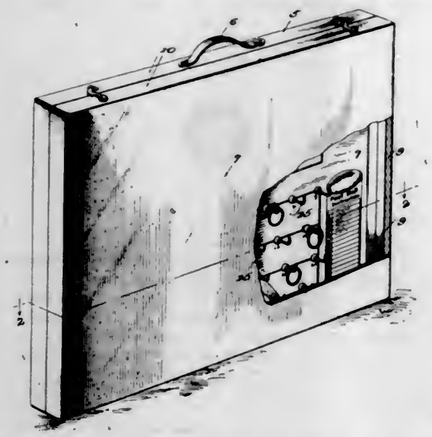
1,503,291. GOLF PUTTER. ROBERT RIMMER, Wigan, England. Filed July 5, 1923. Serial No. 649,094. 4 Claims. (Cl. 46—4.)



1. A golf putter comprising a shaft and a head connected thereto, said head being loaded by a fixed weight situated wholly between the shaft connection to the head and the center of the head, the center of gravity of the weight being behind the line of the shaft.

1,503,292. TIRE CHAIN. SALVATORE ANGELILLO, Plantsville, Conn. Filed Dec. 20, 1923. Serial No. 681,829. 1 Claim. (Cl. 152—14.)

In an anti-skid tire chain, a cross chain section comprising two auxiliary links passing through each corresponding link of two cross tire chains.



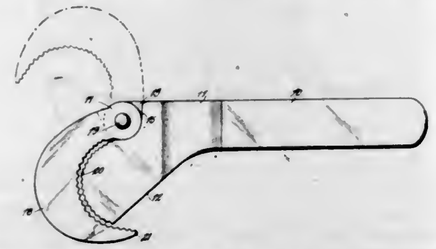
1,503,293. SKELETON FRAMEWORK CONSTRUCTION FOR AIRSHIPS AND THE LIKE. KARL ARNSTEIN, Friedrichshafen, Germany, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed Apr. 8, 1922. Serial No. 550,886. 6 Claims. (Cl. 244—3.)

1. In a skeleton frame for aircraft and the like in combination, intersecting members in spaced relation to each other and connected at the points of juncture and tensional stiffening members fixed to a point of intersection and extending across one of said intersecting members to another point of intersection, said stiffening members being fixed to said intersecting member also in the crossing point.

1,503,294. GAME. WILLIAM G. BISHOP, Oklahoma City, Okla. Filed Aug. 11, 1922. Serial No. 581,204. 1 Claim. (Cl. 46—59.)

In a game device for playing mimic baseball and football simultaneously which comprises a board having overlying baseball and football fields within the same area, numbered hooks connected to the board within the fields of play and adapted for use both during the playing of baseball and football, said board having baseball and foot ball columns on opposite sides of the field of play, and bearing numbered baseball and football plays corresponding to the numbered hooks, said board also being provided with separate baseball and football score divisions into which is written the scores during simul-

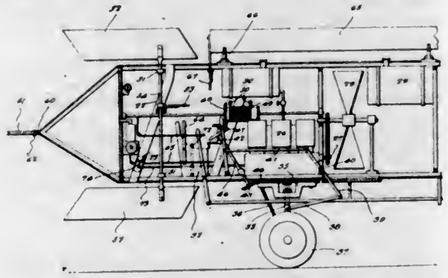
taneous playing of both games, and hooks carried by the board outside the fields of play for supporting tally elements, said board consisting of a pair of hingedly connected sections.



1,503,295. HAIRDRESSING APPLIANCE. ARNOLD H. BONGERS, London, England, assignor of one-half to Gaston Boudou, London, England. Filed Apr. 10, 1923. Serial No. 631,161. 12 Claims. (Cl. 132—36.)

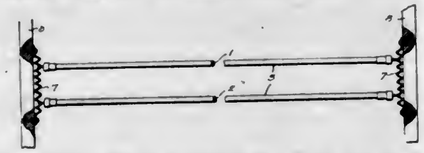
1. An appliance of the kind set forth comprising a heating chamber adapted to receive a coiled strand of hair, a cap adapted to cover the mouth of said chamber, link means connecting said cap to the body of said appliance and permitting lateral movement of same in regard to the mouth of the appliance, and means for moving said cover to seal said mouth.

1,503,296. PIPE WRENCH. EDWARD BRADLEY, Ogden, Ill. Filed Nov. 18, 1921. Serial No. 516,158. 1 Claim. (Cl. 81—99.)



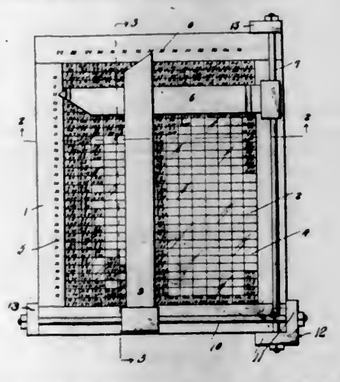
A pipe wrench comprising a handle having a relatively thickened portion at one end provided with an integral extension disposed below the plane of the handle to present a rigid jaw, said handle being cut-out at a place along the upper edge where the handle and jaw meet to provide a centrally projecting tongue and circular

sockets on opposite sides of the tongue, the said rigid jaw being cam shaped and provided with a gripping face extending forwardly of the cut out in the arc of a circle, and a movable jaw pivotally engaged with the said central tongue of the cut out and having circular bear-



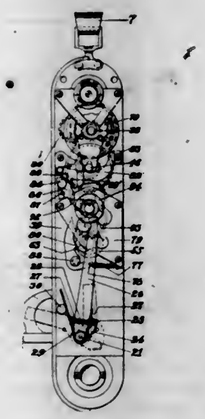
ing ends engaging in the said sockets, the said movable jaw being arched to engage over the gripping face of the rigid jaw and being of such length that when the jaws are fully closed the end of the movable jaw extends over beyond the end of the rigid jaw, providing a lip for a useful purpose.

1,503,297. AEROPLANE. WILLIE CALAGANS, Gary, Ind. Filed Sept. 25, 1922. Serial No. 590,452. 2 Claims. (Cl. 244—2.)



1. In an aeroplane, landing gear consisting of wheel like structure journaled beneath the body, steering mechanism for turning said wheel like structure, an arch pivotally connected with each wheel member, a coil spring connected with the body and the arch for normally holding the latter at one limit of its movement and for opposing movement in the other direction, and link and lever mechanism mounted on the body and connected with the arch for swinging the same upwardly to dispose the wheels at the sides of the body, said mechanism consisting of a link pivotally connected with the arch, a lever pivoted on the body and pivotally connected with said link, a rearwardly extending reach rod pivotally connected with the other end of the lever, and a control lever pivoted on the body and connected with said reach rod.

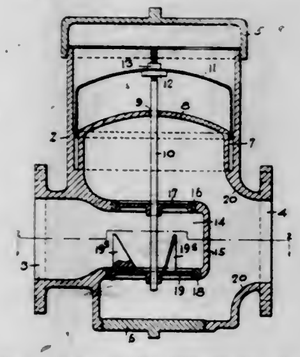
1,503,298. HATRACK FOR AUTOMOBILES. JOHN A. CAMPBELL, Carbondale, Ill. Filed Sept. 13, 1923. Serial No. 662,567. 2 Claims. (Cl. 45—13.)



1. A hat rack for automobiles having a top portion, which includes a pair of coiled springs extending across the car beneath the top, a flexible fabric covering said springs, a hook at each end of each spring loosely connected thereto, a metal bar connected to each side of the top portion of the automobile, and means on said bar whereby the hooks on the end of the spring can be adjustably connected thereto.

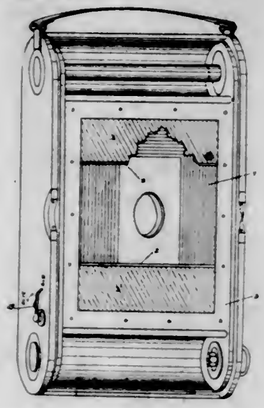
1,503,299. CALCULATOR. GLEN L. CANON, Carson, Iowa. Filed Dec. 14, 1922. Serial No. 606,902. 2 Claims. (Cl. 235—89.)

1. A calculator having a frame provided with indications, said frame having members forwardly offset with respect to said indications and themselves bearing indications, a hand slidable along the frame coacting with the first mentioned indications and overlapping one of said members to coact with the indications thereof, said hand being depressed intermediate its ends, and a hand cooperating with the first indications slidable in a path at a right angle to and over said depressed portion and at one end overlapping the other member to coact with the indications thereof.



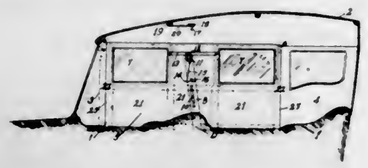
1,503,300. AUTOMATIC FILM-WINDING CAMERA. EZRA C. CLARK, Binghamton, and JOHN F. POLHEMUS, Johnson City, N. Y., assignors, by mesne assignments, to Ansco Photoproducts, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 15, 1922. Serial No. 607,246. 10 Claims. (Cl. 242—71.)

1. In combination with a camera a film take up spool therein, a motor within said camera for rotating said spool, a train of gears connecting said motor and said spool, a stop mechanism operating upon said gear train for automatically stopping said motor after a predeter-



mined rotation of said spool, a compensator controlling said stop mechanism comprising an internal gear ring having unevenly spaced notches in the outer periphery thereof with which said stop engages.

1,503,301. GAS REGULATOR. THOMAS J. CLEARY and GEORGE F. QUINN, Pittsburgh, Pa.; Irene Cleary Treacy administratrix of said Thomas J. Cleary, deceased. Filed Feb. 23, 1921. Serial No. 447,272. 1 Claim. (Cl. 50—28.)

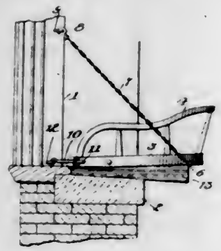


In a gas regulator, the combination with a casing having inlet and outlet ports, of an inlet chamber formed therein between said ports and having an opening communicating with each of said ports, the internal diameter of said chamber increasing in cross sectional area throughout the distance from the opening thereof which communicates with the inlet port to the opening which communicates with the outlet port.

1,503,302. PHOTOGRAPHIC APPARATUS. SILVIO COCANARI, Antwerp, Belgium, assignor to Gevaert Photo-Producten, N. V., Oude-God, near Antwerp, Belgium. Filed Dec. 20, 1922. Serial No. 608,025. 5 Claims. (Cl. 95—31.)

1. In a camera, the combination, with the exposure frame, of a pair of coacting screens disposed at opposite sides of the exposure aperture of said frame and movable toward or from each other to vary the size of the aperture, springs connected at opposite ends to the mutually-adjacent front edges of said screens to pull the same toward each other, and means operable from the outside of the camera for moving said screens away from each other in unison against the action of said springs; substantially as described.

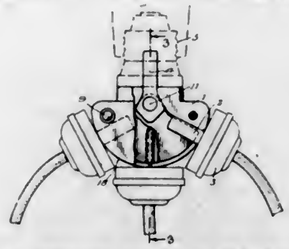
1,503,303. VEHICLE SIDE CURTAIN. DAVID H. COLLIER, Nevins Township, Vigo County, Ind. Filed June 7, 1922. Serial No. 566,484. 1 Claim. (Cl. 296—140.)



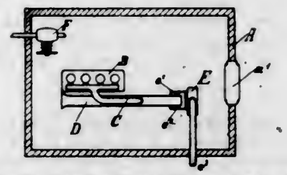
For a vehicle having a body part and a canopy top, a side-curtain comprising an upper member and a lower member, a hinge connection between the upper member and the canopy top and a hinge connection between the two said members, an elastic bar connected to and forming a mechanically integral part of said lower member and adapted to normally serve as an aiming post to hold the two of said members in one plane when unfolded for use, releasable means to anchor the lower end of said bar on the vehicle body, and manually controlled means on said bar for locking said curtain in a folded position under and adjacent to the canopy.

1,503,304. BRIQUETTING. GEORGE B. DAMON, Belvidere, N. J., assignor of one-half to Vulcan Iron Works, Wilkes-Barre, Pa., a Corporation of Pennsylvania. Filed Feb. 25, 1922. Serial No. 539,304. 8 Claims. (Cl. 44—15.)

1. In a briquetting process, the step of mixing coal fines and a vegetable binder containing digested vegetable matter of approximately sawdust size, shaping said agglomerate into briquettes while moist, and simultaneously subjecting the same to heavy pressure to express from the vegetable matter the colloidal adhesive material contained therein and force it into the interstitial spaces between the coal fines.



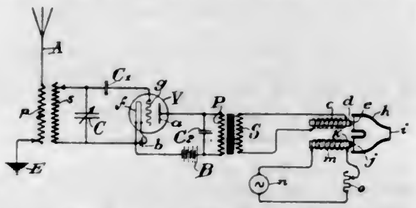
1,503,305. WINDOW-CLEANER'S SCAFFOLD AND CHAIR. BENJAMIN B. DOLARO, New York, N. Y. Filed Apr. 11, 1923. Serial No. 631,404. 4 Claims. (Cl. 304—24.)



1. A combined window scaffold and chair seat having tapered strips secured thereto for supporting the same on a window sill, said strips having means for interlocking engagement with a stool, whereby said seat may be converted from a window scaffold into an ordinary chair when desired.

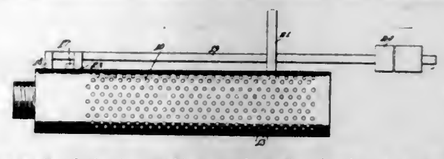
1,503,306. PLUG ATTACHMENT. FRANKLIN DOMINICK, New York, N. Y. Filed Mar. 23, 1922. Serial No. 546,185. 1 Claim. (Cl. 173—334.)

In an attachment or connector of the character described, a body formed with a pair of parallel slots, each slot having a plurality of notches extending at right angles to the respective slots, the notches of one slot being opposite the notches in the other slot, a pair of contact plates for each of said slots, one plate on each slot being formed with laterally extending portions fitting into the respective notches of said slots whereby contact prongs set parallel to each other or at right angles to each other may be readily inserted, and a terminal for each pair of plates.



1,503,307. MOTOR-TESTING CHAMBER. LUDWIG DÜRR, Friedrichshafen, Germany, assignor to the Firm: Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed July 2, 1920. Serial No. 393,754. 2 Claims. (Cl. 73—51.)

1. In a motor testing plant in combination, a closed chamber designed to take up the motor to be tested a high power exhausting device in said chamber having openings in the exhaust piping for establishing a communication betwen the interior of said piping and the interior of said chamber and means for establishing a connection between the exhaust side of said motor and the intake of said exhausting device.

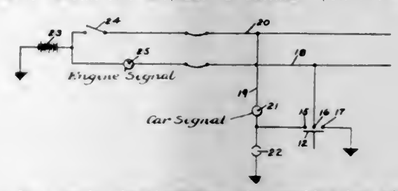


1,503,308. METHOD OF AND APPARATUS FOR ELECTRICALLY TRANSMITTING INTELLIGENCE. CORNELIUS D. EHRET, Philadelphia, Pa. Filed Oct. 22, 1920. Serial No. 418,678. 19 Claims. (Cl. 250—8.)

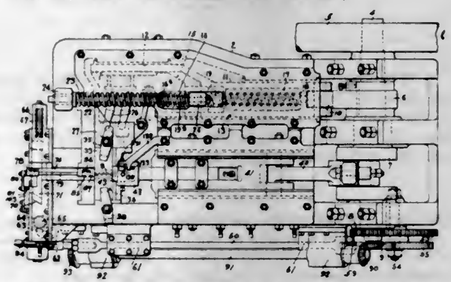
1. The method which consists in converting alternating current energy into an electric current vibrating at lower frequency, producing sound waves in a quiescent sound transmitting medium under control of said current of lower frequency, and impressing on said medium independently produced sound waves of different frequency interfering with said first named sound waves to produce in said medium sound wave beats.

1,503,309. VALVE. ALBERT E. ELLIS, Marion, Ill. Filed Nov. 1, 1923. Serial No. 672,213. 1 Claim. (Cl. 137—103.)

A sump valve including a cylindrical body the bore of which extends from a point adjacent one end through the other end, the body having openings leading from the exterior into the bore, a valve slidable in the body and transversely of the bore adjacent the open end, a float lever mounted on the body and connected with the valve, the wall of the bore adjacent the valve having a groove, and a removable apertured plate disposed in said groove and against which said valve slides.



1,503,310. BAND-SAW JOINT AND METHOD OF MAKING THE SAME. CARL L. ERICSON, Longmeadow, Mass., assignor to American Saw and Manufacturing Company, Springfield, Mass., a Corporation of Massachusetts. Filed June 28, 1923. Serial No. 648,208. 3 Claims. (Cl. 76—112.)



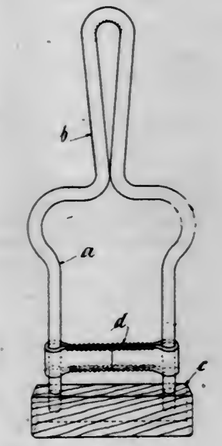
1. In a band saw, a butt-welded elementally homogeneous joint which is oblique to the longitudinal edges of the saw, whereby is produced a long and proportionately strong joint, with a comparatively large distribution of the weakened parts of the saw adjacent to said joint.

1,503,311. CAR DISCHARGE VALVE AND SIGNAL SWITCH. CLYDE C. FARMER, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 31, 1921. Serial No. 457,322. 2 Claims. (Cl. 177—352.)

1. In a train signal system, the combination with an electric signal train wire, of a signal controlling device having a valve the operation of which produces a pneumatic signal, a switch for controlling the circuit through the train wire, and manually operated means for first operating said valve and then said switch.

1,503,312. HEADING MACHINE. CHARLES FASSINGER, Carrick, Pa., assignor to Oliver Iron & Steel Corporation, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Sept. 23, 1920. Serial No. 412,231. Renewed Oct. 24, 1923. 30 Claims. (Cl. 10—12.)

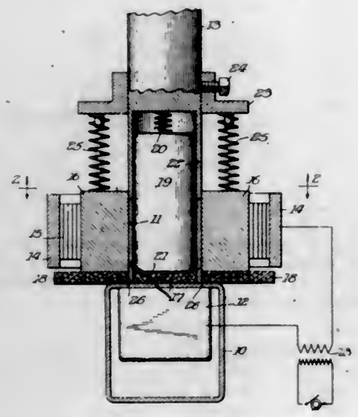
1. A heading machine comprising an upsetting die, a carrier for clasping the shank of a blank and for presenting the said blank to the said die, the said carrier being



arranged to retain its hold on the said blank during the operation of said die, and to thereafter release the headed article.

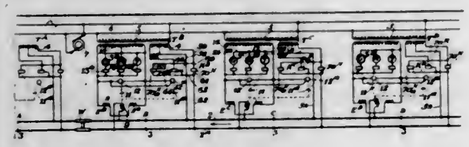
1,503,313. ARTIFICIAL TOOTH. WILLIAM B. FLOYD, Denver, Colo. Filed Aug. 5, 1919. Serial No. 315,518. 1 Claim. (Cl. 32—12.)

1. Artificial teeth including two or more cusps hollowed out on the back, this hollowed out portion enlarged and deepened at the edges of each cusp, and a metal backing facing this entire hollowed portion, whereby the latter is of greater width at the edges of the teeth and at the point of juncture of the metal between teeth, thereby affording a maximum of strength at the point where the greatest strain upon the teeth comes.



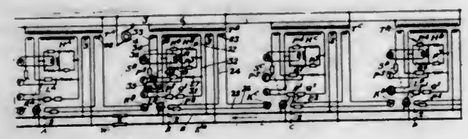
1,503,314. APPLIANCE FOR TENSIONING OR TIGHTENING SEAT WEBBING AND THE LIKE. GEORGE FREDERICK FRENCH, Manchester, England. Filed Jan. 23, 1924. Serial No. 688,109. 3 Claims. (Cl. 254—51.)

1. Web strainers comprising a frame like lever, a gripping member fitted across at least one end of said lever, at least one cross bar slidably mounted on the lever and adapted in conjunction with said gripping member to grip the web, substantially as described.



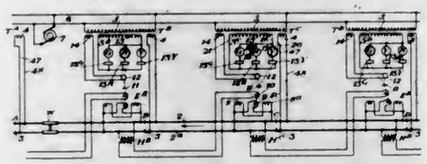
1,503,315. ELECTRIC WELDING. JOHN F. GAIL, Evanston, Ill., assignor to Simmons Company, Kenosha, Wis., a Corporation of Delaware. Filed Apr. 28, 1919. Serial No. 293,092. 8 Claims. (Cl. 219—10.)

1. In an apparatus for welding two parts together, the combination of means for forcing the two parts together and maintaining welding current therebetween so as to melt the metal at the juncture line, a mold adapted to receive and form the extruded metal so as to provide



a reinforcement extending along the juncture line of the two parts, and means for holding the mold against relative movement with respect to one of said parts.

1,503,316. RAILWAY SIGNALING. LARS O. GRONDAHL, Pittsburgh, and LEMUEL F. HOWARD, Edgewood Borough, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 16, 1921, Serial No. 461,750. Renewed May 18, 1923. 8 Claims. (Cl. 246—34.)

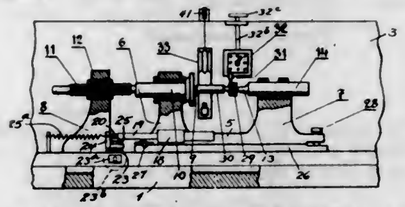


8. In combination, a section of railway track, means for supplying the rails of said section with current of one polarity or the other, light-responsive cells, means responsive to the polarity of the current supplied to said rails for selectively illuminating said cells, and traffic governing means controlled by said cells.

1,503,317. RAILWAY SIGNALING SYSTEM. LARS O. GRONDAHL, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 16, 1921. Serial No. 461,781. 36 Claims. (Cl. 246—34).

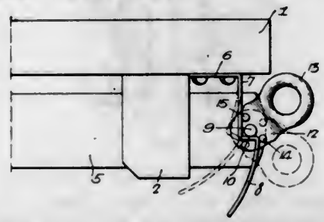
13. In combination, a track circuit including an electric lamp, and a railway signal located in the trackway and controlled by said lamp.

1,503,318. RAILWAY SIGNALING. LARS O. GRONDAHL, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 16, 1921, Serial No. 461,782. Renewed May 20, 1924. 21 Claims. (Cl. 246—34.)



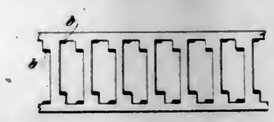
1. In combination, a track circuit comprising track rails, a source of current and an electro-responsive device; a lamp, a light-responsive cell, means controlled by said device for illuminating said cell from said lamp, and a signal controlled by said light-responsive cell.

1,503,319. PROCESS OF PRODUCING MIXTURES OF NITROGEN AND HYDROGEN. BIRGER FJELD HALVORSEN, Christiania, Norway, assignor to Norsk Hydroelektrisk Kvaelstofaktieselskab, Christiania, Norway. Filed May 13, 1920. Serial No. 381,183. 1 Claim. (Cl. 23—10.)



1. The process of producing nitrogen bearing gas suitable for a synthetic production of ammonia, comprising in combination the steps of passing air in contact with a metal sulphide at an elevated temperature, removing sulphur dioxide from the resulting gas mixture by reaction with ammonia so as to obtain ammonium sulphite, and removing oxygen from the so treated gas by reacting upon the gas with the ammonium sulphite so obtained.

1,503,320. ACCURATE THREAD CUTTING AND GRINDING MACHINE. JEAN AMEDEE HARDEL, Paris, France. Filed Apr. 29, 1920. Serial No. 377,700. 3 Claims. (Cl. 82—5.)



1. An accurate thread cutting and grinding machine, comprising a bench, a slide thereon, a headstock and a tailstock mounted on said slide and movable in unison, a lead screw, a slide supporting the latter, a double armed lever between the two slides, and a pivot for the said lever movable transversely to the slides.

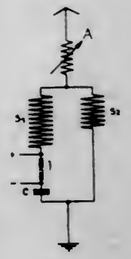
1,503,321. LOCK SWITCH. HENRY W. HARTEL, Philadelphia, Pa. Filed June 22, 1921. Serial No. 479,539. 15 Claims. (Cl. 200—169.)

1. In an electric switch, the combination with a relatively fixed element, of a movable element adapted to be shifted into and out of engagement therewith, a projection upon said movable element, a relatively fixed locking member including movable means for engaging and retaining said projection when the said movable element is shifted into engagement with the said fixed element, and means mounted upon the said projection for shifting said retaining means to release the projection.

1,503,322. BELT FASTENER. HANS HAUPT, Berlin-Charlottenburg, Germany. Filed Mar. 23, 1922. Serial No. 546,116. 6 Claims. (Cl. 24—36.)

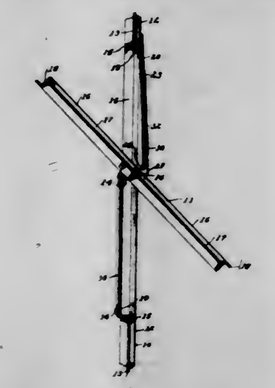
4. In a belt fastener a flexible skeleton strip, transversely disposed, endwise oppositely shouldered parallel bars on said strip, and lengthwise extending outwardly projecting prongs upon parallel sides of the shouldered parts, and additional rows of longitudinally extending prongs in parallel staggered relation to the other prongs and transversely spaced from each other.

1,503,323. COMBINATION TOOL. JACOB M. HEASLEY, Pittsburgh, Pa. Filed Sept. 2, 1922. Serial No. 585,928. 4 Claims. (Cl. 7—9.)



1. A tool of the character substantially as described, comprising a body member forming an operating lever, a claw head at one end of said body member and extending laterally from a side thereof, a cutting blade extending laterally from the opposite side of said body member adjacent said claw head, and the said claw head formed with a convex outer surface forming a fulcrum for operation of said claw head, the said cutting blade providing a supplemental fulcrum and edged material engaging member for operation of the said claw head.

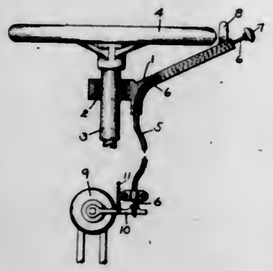
1,503,324. MEANS FOR PRODUCING ELECTRIC OSCILLATIONS BY AN ELECTRIC ARC. ROBERT HERZOG, Berlin, Germany, assignor to C. Lorenz Aktiengesellschaft, Lorensweg-Berlin-Tempelhof, Germany. Filed July 12, 1920. Serial No. 395,810. 2 Claims. (Cl. 250—36.)



1. An improved connection for the production of electric oscillations with the aid of the light arc, comprising in combination with the oscillatory antenna circuit and with the light arc, a circuit which does not oscillate in-

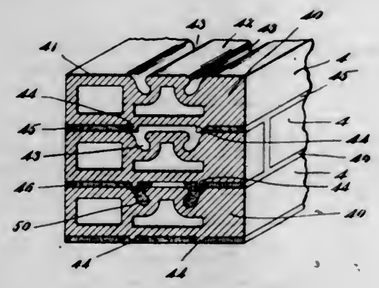
dependently situated on the high frequency side of said light arc between the arc and the oscillating circuit, a large self-inductance in said circuit, and a second self

inductance coupled with said first self inductance in such a manner that the effect of said first self inductance upon the oscillatory antenna circuit is entirely or nearly neutralised.



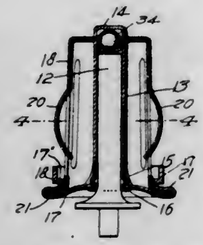
1,503,325. SCREEN FOR PIVOTED WINDOW SASHES. ALFRED M. LANE, St. Louis, Mo. Filed Apr. 29, 1920. Serial No. 377,577. 5 Claims. (Cl. 156—14.)

4. The combination with a window having a sash whose middle portion is mounted therein to turn on horizontal pivots, of a screen for the upper half of said sash opening, said screen being arranged opposite the upper half of said sash opening with its upper edge terminating above the upper edge of said sash opening when said sash is in closed position and with its lower edge terminating a short distance above the sash pivots when in said position, a connection between the lower edge of said screen and the adjacent portion of said sash for covering the space between said sash and screen in all positions of said sash, said connection comprising a member secured to the sash having a socket portion and a member secured to said screen having a bead portion fitting into the socket portion of said first mentioned member, and a guide strip secured to the window at each side of the screen and having a portion lapping the side margins of said screen to retain the same in position.



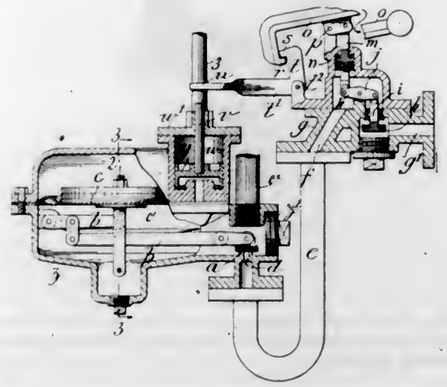
1,503,326. VEHICLE BRAKE CONTROL DEVICE. GEORGE S. LANE, San Francisco, Calif., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed July 8, 1921. Serial No. 483,357. 5 Claims. (Cl. 74—39.)

1. In a motor vehicle brake, the combination with a steering wheel and a device for controlling the brakes, of a hollow arm movable with the steering wheel, a push wire operatively connected to said device and extending



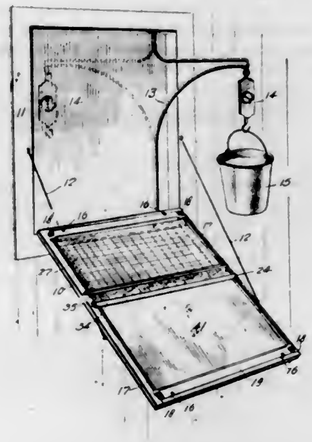
through said arm, and manually operated means for actuating said push wire, said wire extending from said manually operated means to said device.

1,503,327. BRICK AND WALL CONSTRUCTION. GRAFTON E. LUCE, Chicago, Ill. Filed June 7, 1920. Serial No. 387,066. 5 Claims. (Cl. 72—41.)



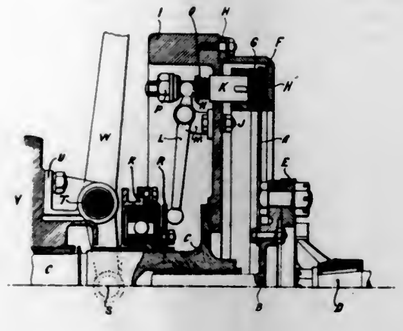
4. A building unit eccentrically weighted and having a handhold positioned eccentrically with regard to the unit, but directly over its center of gravity.

1,503,328. CASTER SOCKET. WILLIAM H. MCALLISTER, Linden, Pa. Filed Apr. 26, 1923. Serial No. 634,722. 6 Claims. (Cl. 16—39.)



1. A caster socket comprising a tubular member having a groove at its lower end, a body-supporting centrally perforated plate, having its perforation engaged in the groove and means provided by the plate for engagement with a body to be supported.

1,503,329. MEANS FOR CONTROLLING FLOW AND PRESSURE OF FLUID IN FLUID-DISTRIBUTING SYSTEMS. EDWARD ALBERT MITCHELL, London, England. Filed Aug. 8, 1922. Serial No. 580,549. 3 Claims. (Cl. 50—11.)

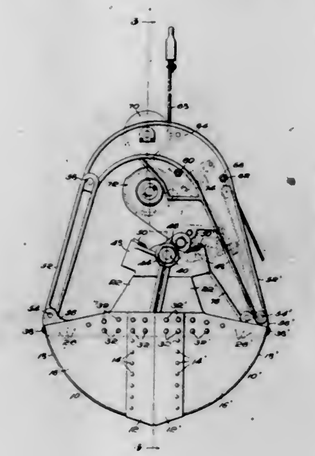


1. For controlling the flow of fluid in a distributing system, a governor embodying a pressure reducing valve, a stop valve through which the high pressure fluid passes before reaching the pressure reducing valve, mechanical means set normally to hold the stop valve open, and tripping means, responsive to pressure in excess of a predetermined value in the governor, adapted to permit the stop valve to close and remain closed.

1,503,330. RECORD CABINET. MIKE A. MOUSEL, Elmwood, Wis. Filed Mar. 7, 1923. Serial No. 623,522. 10 Claims. (Cl. 45—61.)

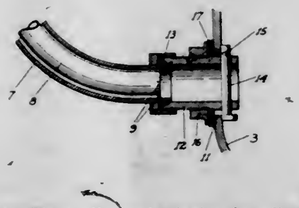
1. A record cabinet embodying a desk closure, sheet clamps at the opposite ends of the closure, guide rods at opposite sides of the closure, means whereby the clamps and guide rods each hold the other in operative positions, and a chart mounted to slide upon the rods.

1,503,331. CLUTCH AND FLYWHEEL COMBINATION FOR MOTOR-VEHICLE ENGINES. THOMAS BLACKWOOD MURRAY, Liphook, England. Filed Sept. 20, 1923. Serial No. 663,813. 2 Claims. (Cl. 192—110.)



1. A clutch and engine crank shaft and flywheel combination comprising a flywheel, a clutch carried thereby, a clutch operating muff located on the crank shaft between the flywheel and the engine casing, a clutch-pedal cross-shaft, brackets on the engine casing carrying the shaft, stirrup levers on the shaft and operating the muff, levers pivoted on the flywheel and engaged at their inner ends by the muff, and operative connections between the outer ends of these levers and the clutch.

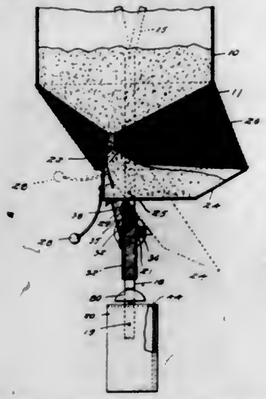
1,503,332. HYDROMETER SYRINGE. JENNINGS NELSON, Chicago, Ill. Filed Nov. 5, 1923. Serial No. 672,756. 2 Claims. (Cl. 265—45.)



1. In a hydrometer syringe, the combination of the central transparent body of the syringe, and a plurality of longitudinal bars integrally connected together by end rings of a flat band form adapted for frictional holding contact with the inner surface of said transparent body.

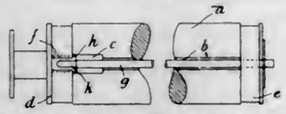
1,503,333. GRAB. ALMON E. NORRIS, Brookline, Mass. Original application filed Sept. 9, 1921, Serial No. 499,395. Divided and this application filed May 23, 1923. Serial No. 640,892. 6 Claims. (Cl. 37—184.)

1. In a grab bucket, the combination of a shell, a unitary frame presenting a reinforcement for the upper margin of said shell at all sides thereof, and means by which said shell is secured to said frame but may be removed and replaced.



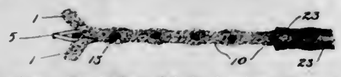
1,503,334. OIL RESERVOIR FOR MOTORS. ROLLA V. NORRIS, Porterville, Calif. Filed Jan. 10, 1923. Serial No. 611,826. 4 Claims. (Cl. 184—103.)

2. In an auxiliary oil supply device for oil reservoirs, an oil pipe, an air pipe extending inside the same, and terminating adjacent the lower end thereof, a sleeve member to the outer end of which the oil pipe is attached, a pin extending transversely through the sleeve adjacent its inner end, said pin being arranged to be inserted diagonally through an enlarged orifice in the wall of the reservoir, and to then bear against the inner face thereof on both sides of the sleeve, and a nut screwed on the sleeve outside the wall and adapted to be moved into frictional engagement therewith and to then close the wall orifice.



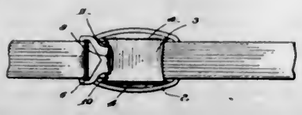
1,503,335. CHICKEN FEEDER. FAY E. ROSE, Montague, Mich. Filed Mar. 19, 1923. Serial No. 626,067. 3 Claims. (Cl. 161—10.)

1. A chicken feeder comprising a tank, a supporting means on said tank, a dump pan pivotally mounted on said supporting means, below said tank, a clock mounted on said supporting means, electrical contacts on the face of said clock and cooperating with said contacts, an electric circuit adapted to be closed by said hands and including said contacts, an electric bell in said circuit, two sets of magnets on said supporting means and included in said circuits, means operated by one of said magnets



for releasing said dump pan when said circuit is complete and said other magnet adapted to hold said pan in dumping position.

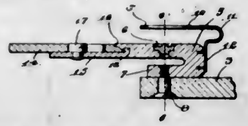
1,503,336. ROLLER BLIND AND THE LIKE. ROBERT COUPAR ROSS, Dundee, Scotland. Filed June 6, 1923. Serial No. 643,607. 4 Claims. (Cl. 156—25.)



2. Apparatus wherein a length of material is attached to a roller comprising at least one loop on the material, a rod adapted to pass through said loop, a groove in said roller in which said rod is adapted to lie, an end cap on each end of said roller under which said rod is secured, a sleeve on said rod adapted to lie in said groove and to pass under one of said end caps to retain the rod in the groove and means to facilitate the operation of said sleeve to release said rod.

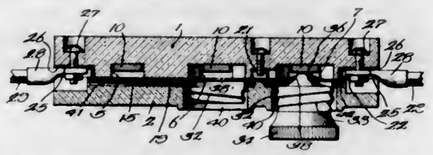
1,503,337. INSULATION FABRIC. WILLIAM R. SEIGLE, New York, N. Y. Filed Jan. 6, 1920. Serial No. 349,734. 10 Claims. (Cl. 154—28.)

1. A sheet insulation fabric having therein between and everywhere spaced from its superficial faces a thin and flexible textile strengthening component having interstices therein, and having a thin, homogeneous waterlaid, mineral-fibre-paper insulating substance free from organic inclusions occupying all of the remaining space between said superficial faces, including said interstices.



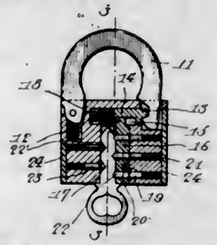
1,503,338. BUCKLE. LOWELL W. SHIELDS, Rochester, N. Y., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y., a Corporation of New York. Filed June 23, 1923. Serial No. 647,325. 6 Claims. (Cl. 24—191.)

1. In a buckle, a buckle frame comprising a front plate having marginal rearwardly and inwardly turned portions, and a back member embodying a back plate



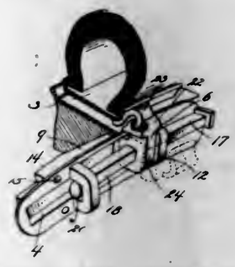
having side flanges along two edges formed with outwardly turned lips abutting the rear face of the front plate and received under the marginal inwardly turned portions.

1,503,339. WORK-HOLDING MEANS FOR STAPLING MACHINES OR THE LIKE. LOWELL W. SHIELDS, Rochester, N. Y., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y., a Corporation of New York. Filed Oct. 19, 1923. Serial No. 669,595. 2 Claims. (Cl. 1—4.)



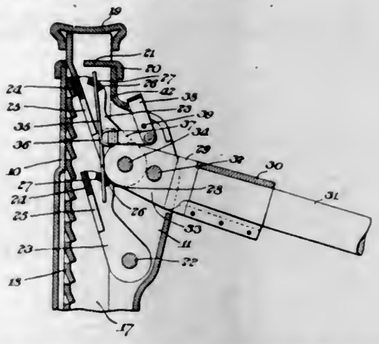
2. A work holding means for stapling machines or the like comprising a base portion, an anvil overhanging the base portion about which the loop forming piece is adapted to be passed, a die in the upper surface of the anvil, an extension on the free end of the anvil provided with a projection, an overhanging portion at the inner end of said extension, and a receiving member for receiving a plurality of stapled loops having an opening receiving said projection, and an end extending under the overhanging portion.

1,503,340. PANEL BOARD. HERMON L. VAN VALKENBURG, Milwaukee, Wis. Filed Oct. 14, 1922. Serial No. 594,472. 6 Claims. (Cl. 175—371.)



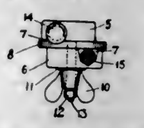
2. A panelboard for electric distribution having units consisting of two blocks of insulating material and a parting sheet lying between them, one of the blocks having channels for accommodating the bus bars, and screw sockets overlying the parting sheet and provided with conductors adapted to be connected to the consumption circuits, the second block having apertures for accommodating said screw sockets and for permitting screw plugs to penetrate the upper block to reach the screw sockets, the parting sheet having apertures at the center of the screw socket through which the center contacts of the plugs may reach the bus bars.

1,503,341. PADLOCK. JACQUES ALLAIN, Montreal, Quebec, Canada. Filed June 14, 1923. Serial No. 645,425. 1 Claim. (Cl. 70—96.)



A lock comprising a body and a shackle, a bolt adapted to lock the shackle within the body, a movable element within the body adapted to draw said bolt out of engagement with the shackle, said element having a longitudinal key slot, pins, slidably mounted in the movable element and adapted to extend into the body and into one edge of the slot, spring pressed followers mounted in the body and adapted to act on said pins, additional spring pressed followers mounted in the body and adapted to extend to the opposite edge of the said slot, and balls mounted in the movable element and engaged by the last named followers.

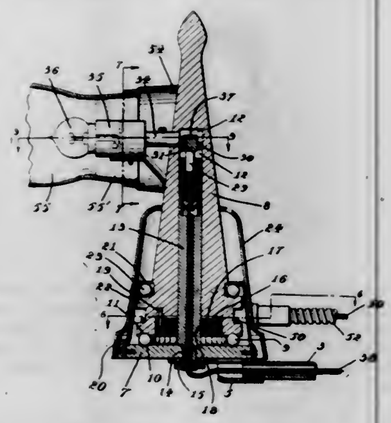
1,503,342. DEMOUNTABLE-RIM LUG. WILLIAM A. ANTILOTTI and EDGAR C. JONES, Atlanta, Ga. Filed June 21, 1921. Serial No. 479,289. 24 Claims. (Cl. 301—11.)



1. In combination a felly, a demountable rim therefor, a plurality of lugs for securing said rim mounted on said felly and constructed to swing outwardly in a plane at right angles to the longitudinal plane of said felly, means slidable longitudinally in either direction to respectively tighten and loosen said lugs.

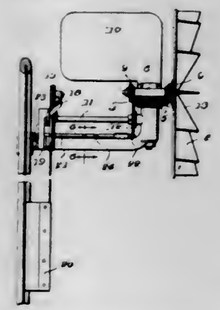
1,503,343. LIFTING JACK. WALTER G. ARMSTRONG, Bridgeport, Conn., assignor to The American Tube and Stamping Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Sept. 23, 1921. Serial No. 502,731. 10 Claims. (Cl. 254—111.)

1. A device of the class described comprising a casing, a lifting rack slidably mounted therein, a lever pivoted in said casing, and a hollow lifting pawl carried by said lever and engaging the teeth of said rack, said pawl having a front wall, side walls and an ear projecting from one side wall toward the other and perforated to receive an actuating spring.



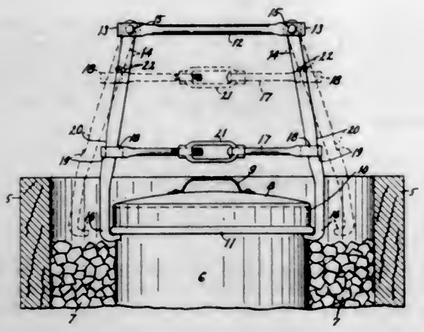
1,503,344. UNIVERSAL CLAMP. ANDREW HAMILTON BAIRD, Edinburgh, Scotland. Filed Mar. 10, 1922. Serial No. 542,717. 2 Claims. (Cl. 287—14.)

1. A universal clamp comprising the combination of a bolt, a head on said bolt, a block loose on said bolt, notches in the opposing inner faces of said bolt head and



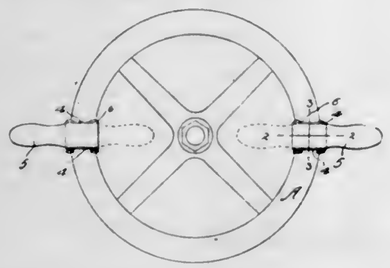
block, an unnotched loose rotatable disc between said bolt head and block and providing bearing surfaces common to both the head and block and a nut on said bolt for clamping the parts together.

1,503,345. INDICATOR. TOM BINGHAM, Montreal, Quebec, Canada. Filed July 22, 1922. Serial No. 576,732. 3 Claims. (Cl. 116—46.)



1. A direction indicator comprising a base, a rotatable supporting element superposed on said base, said element having a longitudinal bore and a recess formed in its lower face, a bushing fitted in said bore, a spring within said recess and having its ends secured to said bushing and supporting element, said spring being normally under tension, a signal device carried by said supporting element, and means for retaining said element in adjusted positions against the action of the spring.

1,503,346. WINDSHIELD CLEANER. EDWARD BLUMER, Dayton, Ohio. Filed Apr. 19, 1923. Serial No. 633,181. 2 Claims. (Cl. 15—253.)

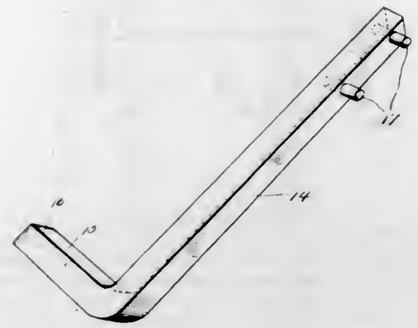


2. A device of the class described comprising a frame, a vertical shaft journaled therein, a horizontal bearing connected with the top of the shaft, a gear loosely mounted on the shaft and resting against a part of the frame, a horizontal shaft passing through the bearing, a wind wheel attached to said shaft, a gear connected with the horizontal shaft and engaging the first mentioned gear, a crank wheel, means for connecting the same with the first mentioned gear, an oscillating arm, a pitman connecting the same with the crank of the wheel, a wiper carried by said arm and means for preventing the rotation of the wind wheel when desired.

1,503,347. ICE-CREAM-CAN LIFTER. AUGUST BRUNES, Pequot, Minn. Filed June 7, 1923. Serial No. 643,980. 5 Claims. (Cl. 294—115.)

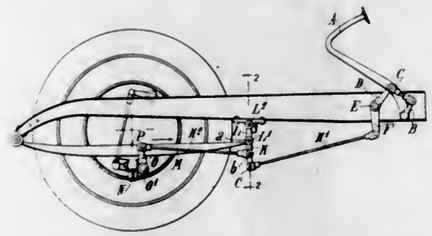
1. In a lifting device of the class described, a horizontal handle bar, two arms pivotally suspended one from each end of the handle bar and having its lower end formed with one or more hooks turned inward toward a similar hook or hooks on the other arm, a second horizontal bar below the handle bar and having its ends formed with loops slidable on the arms and adapted to spread them when raised and close them when lowered.

1,503,348. ATTACHMENT FOR TRACTORS. HENRY F. BRUHN, Herndon, Kans. Filed Aug. 20, 1923. Serial No. 658,405. 1 Claim. (Cl. 74—33.)



In combination with a steering wheel, a pair of blocks recessed to receive a portion of the rim of the wheel between them, bolts for connecting the blocks together, flanges on the upper block, a handle pivoted to the flanges and said handle and flanges having holes therein for receiving a pin to lock the handle in operative position.

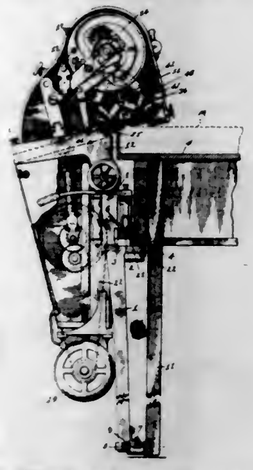
1,503,349. AUTOMOBILE WRENCH. JOHN ALLEN CLAY, Miami, Fla., assignor of one-half to Robert H. Hull, Miami, Fla. Filed May 31, 1923. Serial No. 642,634. 1 Claim. (Cl. 81—90.)



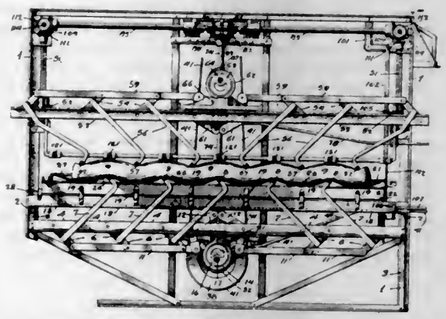
A combined spanner wrench and hand crank adapted for specific use in rotating a crank shaft which has a flange provided with bolt holes, to which flange a removable portion is bolted, and which flange has a polygonal socket in its outer end, both before and after removal of said removable portion, said wrench comprising a handle having a plurality of spaced pins extending laterally in the same direction adjacent one end thereof for engagement with a pair of said bolt holes, and the other end

of said handle being bent angularly in the opposite direction from said pins and being polygonal shaped at its bent extremity for engaging said socket, said angularly

bent end being also adapted to act as a crank when said pins are in engagement with a pair of said bolt holes for turning the flanged portion of said crank shaft.



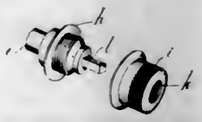
1,503,350. BRAKE-ACTUATING MECHANISM. ROBERT EMILE CHARLES DELEVOYE, Paris, and EMILE ALBERT FRANÇOIS DUMAINE, Neuilly-sur-Seine, France, assignors to Société Anonyme des Anciens Etablissements Hotchkiss & Cie., Levallois-Perret, Seine, France. Filed Jan. 3, 1923. Serial No. 610,493. 4 Claims. (Cl. 188—190.)



4. A brake actuating mechanism comprising in combination with a chassis: a suspension spring for an axle, a brake pedal, a movable arm connected to said chassis and to which the free end of said spring is connected, a brake operating lever, a link pivoted to said arm, a rod having its ends connected to said link and to said brake-operating lever, and a second rod connecting said brake pedal and said link, the ratio between the distance of the point at which the link is pivoted and the point thereof at which the first rod is connected, and the distance between this latter point and the point where the second rod is connected being equal to the ratio between the total length of said spring and the length thereof comprised between its point of direct connection to the chassis and the point where said spring is fixed to the axle.

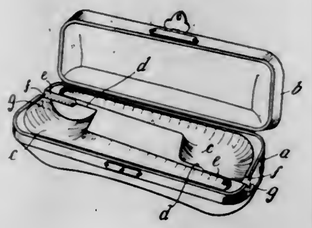
1,503,351. MATTRESS-ROLL-FORMING MECHANISM. JOSEPH W. DROLL, Chicago, Ill., assignor to Droll Patents Corporation of Delaware, a Corporation of Delaware. Filed July 18, 1922. Serial No. 575,813. 18 Claims. (Cl. 112—3.)

1. In a mattress stitching machine, a roll forming mechanism comprising a pair of pivotally mounted packing needle guides; a pair of packing needles slidably mounted upon said guides; means for moving said needles longitudinally along said guides to enter a mattress adjacent a corner thereof; and means for pivotally moving the guides and the needles carried thereby to pack stuffing into said corner to form a roll therealong.



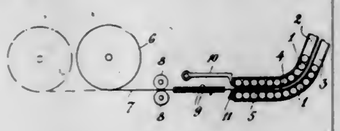
1,503,352. MATTRESS-BEATING MACHINE. JOSEPH W. DROLL, Chicago, Ill., assignor to Droll Patents Corporation of Delaware, a Corporation of Delaware. Filed May 28, 1923. Serial No. 642,060. 28 Claims. (Cl. 226—43.)

1. A mattress beating machine comprising upper and lower beating elements; and means for suspending a mattress between said elements whereby both sides of said mattress may be engaged simultaneously by said beating elements.



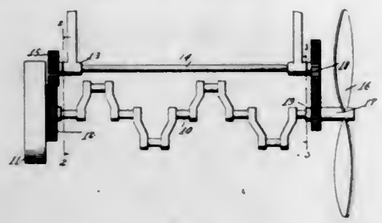
1,503,353. RECORDING PRESSURE GAUGE, INDICATOR, AND OTHER MEASURING INSTRUMENT. ALEXANDER L. DUGON, London, England. Filed July 26, 1922. Serial No. 577,586. 2 Claims. (Cl. 234—1.)

1. In a recording device, the combination of a spindle, clock mechanism including a main spring connected to said spindle, a pawl and ratchet mechanism connected to said spindle and operated thereby, whereby the spindle is rotated under influence of the main spring, said



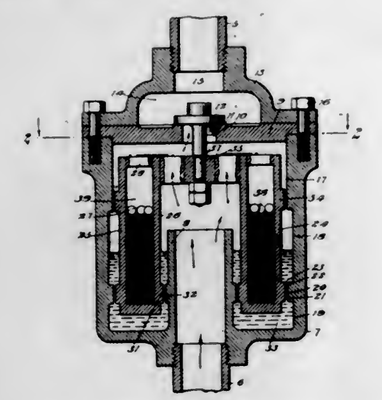
spindle being rotatable in the poposite direction to wind up the spring, means mounted on the outer end of the spindle for clamping and holding a chart directly to and on the spindle so that the chart will rotate with the spindle, and means engaging with the arbor through the nut and independent of said clamping and holding means, whereby the outer end of said spindle may be engaged to wind the clock mechanism without tightening or otherwise affecting the said clamping and holding means.

1,503,354. CASE FOR PIPES AND FOR CIGAR AND CIGARETTE HOLDERS. ALFRED DUNHILL, London, England. Filed Aug. 25, 1921. Serial No. 495,251. 1 Claim. (Cl. 206—41.)



A pipe case comprising a pair of opposed hingedly connected portions adapted to be closed together for housing a pair of pipes, a mold block fitting in one of said portions of the case and having longitudinal recesses at its opposite longitudinal edges for accommodating the stems of the pipes, said mold block also having at each end a cavity conforming in contour to the side of a pipe bowl and each cavity opening at its bottom portion into the adjacent end of the adjacent longitudinal recess, said pipe bowl cavities overlapping and said mold block having a partition wall between the outer end of each bowl cavity and the adjacent end of the pipe stem recess for nesting the pipes in the case, said partition walls of the mold block having venting recesses therein with a recess in the inner side of the partition opening into the bowl cavity and extending to approximately the central portion of the outer end of the cavity, said venting recesses extending outwardly in opposite directions through the ends of the mold block, and the adjacent portion of the case having vent openings therethrough in registry with said recesses in the partition wall.

1,503,355. ASSEMBLING APPARATUS FOR CARDS AND GROUPED CIGARETTES. GUNNAR CHRISTIAN EKSTRÖM, Stockholm, BROR ANDERS EMIL JOHNSON, Appelviken, near Stockholm, and GUSTAF ÖBSTRÖM, Stockholm, Sweden, assignors to Aktiebolaget Gerh. Arehns Mekaniska Verkstad, Stockholm, Sweden, a Corporation of Sweden. Filed Nov. 5, 1923. Serial No. 673,038. 2 Claims. (Cl. 226—2.)

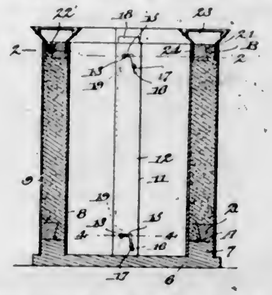


1. In a device for supplying cards to portions of a matter to be packeted the combination of means for cutting cards from a band, a holder for the portion to be packeted, and means positively moving the card portion of the band into its proper place for being incorporated with the said portion.

1,503,356. PROPELLER DRIVE. SAMUEL T. ELLIOTT, Big Cabin, Okla. Filed Nov. 11, 1922. Serial No. 600,325. 1 Claim. (Cl. 244—25.)

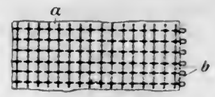
In combination, a crank shaft, a propeller having a hub rotatably mounted on said crank shaft at one end thereof, a fly wheel secured to the crank shaft at the opposite end thereof, a jack shaft rotatably supported in bearings in spaced relation to the crank shaft, gears of different ratios secured to the opposite ends of the jack shaft, a relatively large gear fixed on said crank shaft and meshing with the smallest gear secured to the jack shaft, and a relatively small gear fixed on the hub of the propeller and meshing with the largest gear secured to the jack shaft.

1,503,357. GOVERNOR VALVE. WILLIAM B. ENSIGN, New York, N. Y. Filed Apr. 7, 1922. Serial No. 550,508. 8 Claims. (Cl. 137—53.)



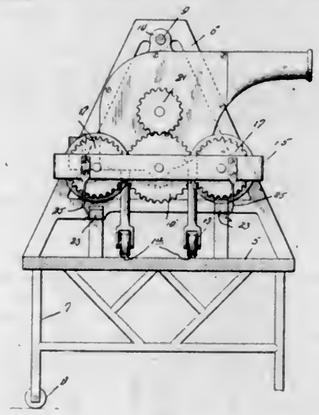
1. A constant pressure valve, comprising a valve seat, a valve member adapted to rest on said seat, a weight for normally holding said valve member on said seat and for causing the same to be re-seated, a casing enclosing said weight, valve member and seat, said casing being provided with an inlet on one side of said seat and an outlet on the opposite side and means co-acting with said casing for receiving oil and part of said weight whereby a dash-pot structure will be provided, which dash-pot structure acts to make the action of said valve more smooth.

1,503,358. CONCRETE MOLD. ALFRED H. EVANS, Bronx, N. Y. Filed Dec. 9, 1922. Serial No. 605,891. 10 Claims. (Cl. 25—127.)



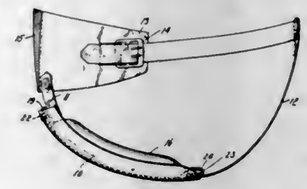
1. A mold embodying a platform having an annular collar, a split outer wall embracing the collar, an inner split wall embraced by the collar, means for contracting the outer wall against said collar, means for expanding the inner wall against said collar, split expansible annular means resting upon the collar and spaced from one of said walls, and a split ring interposed between the

walls at the opposite ends thereof and spaced from the wall adjacent to which the said split expansible annular means is arranged; the inner face of the said annular



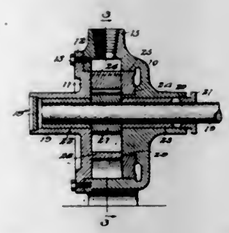
means and the outer face of the ring each being inclined so that the spaces between said faces and the walls adjacent thereto are gradually restricted.

1,503,359. ABSORBENT PAD. EJNAR FABRICIUS-BJERRE, Fredericksberg, near Copenhagen, Denmark. Filed Feb. 20, 1924. Serial No. 694,113. 3 Claims. (Cl. 128—296.)



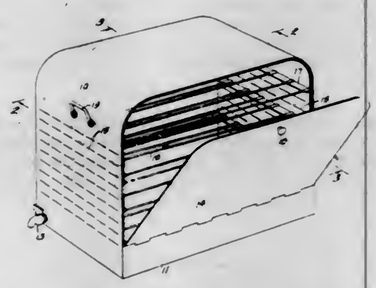
1. A device of the character described including a pad-like body formed of absorbent fibrous material of suitable shape and thickness, and a gauze-like covering of cross threads arranged on one side only of the pad-like body with threads of the covering entering into an inseparable connection with the pad-like body.

1,503,360. AUTOMATIC LAWN-WATERING MACHINE. WILLIAM P. GARDNER, Governors Island, N. Y. Filed Nov. 30, 1923. Serial No. 677,727. 3 Claims. (Cl. 299—49.)



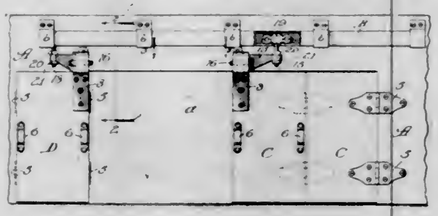
1. In an automatic watering machine of the character set forth, a stand, a fluid discharge nozzle rectilineally movable in opposite directions upon said stand and adapted for connection with a source of fluid supply, a water wheel within said nozzle and adapted to be rotated by the passage of the fluid therethrough, means operatively connected to said water wheel whereby said nozzle is automatically rectilineally moved in opposite directions upon said stand, said means comprising a gear frame pivotally connected to said nozzle and within which is journaled a central and a pair of end gears, said central gear being operatively connected to the water wheel within the nozzle, worm gears carried by said end gears, longitudinal rack bars carried by said stand and supported at different elevations and adapted to be engaged by said worm wheel, and means for automatically swinging said gear frame upon its pivot for alternately engaging said worm wheels with their respective rack bars.

1,503,361. CATAMENIAL APPLIANCE. CHRISTOS GIMURTSINA, New York, N. Y., assignor, by mesne assignments, to Sphinx Sanitary Appliance Co., New York, N. Y., a Firm. Filed Mar. 17, 1923. Serial No. 625,787. 1 Claim. (Cl. 128—291.)



An appliance of the character described comprising an apron, a pad of absorbent material thereon, a flap on the front portion of said pad, a flap on the rear portion of said pad, each flap being provided with a button-hole, and two buttons on said apron for engagement with said button-holes, said flaps being folded back onto themselves, thereby covering said buttons when the holes therein are engaged with said buttons.

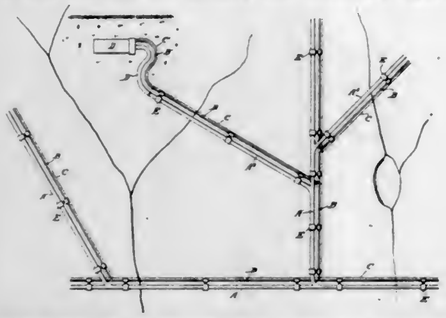
1,503,362. ROTARY PUMP. HIRAM H. HAIGHT, Milwaukee, Wis. Filed Mar. 23, 1922. Serial No. 546,069. 1 Claim. (Cl. 103—126.)



A rotary pump of the class described including a casing presenting spaced heads forming a cylindrical chamber having an inlet and an outlet, said casing having an annular groove in one of said heads of said chamber, bearings in the opposite heads of the casing, said groove being concentric and said bearings eccentric to said chamber, the said groove being radially outward of the eccentrically disposed bearing surfaces, a pair having an annular body revoluble in said groove and the teeth of said gear projecting from the face of said annular body and presenting interdental spaces, the teeth and spaces extending across said cylindrical chamber and the spaces extending from the interior to the exterior of the teeth to communicate with said cylindrical chamber at the interior and exterior of the teeth, a drive shaft supported in said eccentric bearings and therefore eccentric to said gear said shaft being supported in both heads of the casing, a pinion fixed on said shaft in said chamber and with in said gear teeth and meshing with said teeth at one side of the pinion, and a crescentic element disposed between the opposite side of the pinion and said gear.

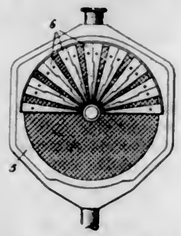
1,503,363. SERVER. REBECCA A. HALL, Cincinnati, Ohio, assignor of one-half to Ruth E. Hall, Cincinnati, Ohio. Filed June 6, 1923. Serial No. 643,817. 1 Claim. (Cl. 53—2.)

1. A server of the class described, comprising a casing having a closed top and adapted to contain water in the lower portion thereof, a door on the body at the front and hingedly connected at its lower edge to the casing above the water level of the latter, a superimposed series of skeleton racks spaced apart in the casing, and said casing having openings in its end walls distributed throughout substantially their entire area above the water level and permitting unobstructed communication between the interior of the casing and the atmosphere.



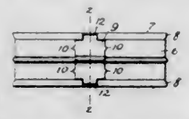
1,503,364. DOOR-HANGER MECHANISM. JOHN B. HOWAT, Sharon, Pa., assignor to Sharon Hardware Manufacturing Company, Sharon, Pa., a Corporation. Filed Dec. 6, 1918. Serial No. 265,505. 3 Claims. (Cl. 20—20.)

1. In a door structure, the combination with a track and a trolley mounted thereon, of a connecting link pivoted at its inner end to said trolley, a connecting bar adapted to be attached to the door and to project above the upper edge thereof, said connecting bar extending outside of and over the outer end of said link, and a pivot pin extending inside of said connecting bar and through the outer end of said link, said pivot pin having a downwardly extended upper end adapted to engage the connecting bar and to limit the swinging movement of the connecting link.



1,503,365. METHOD AND APPARATUS FOR HANDLING AND TRANSPORTING SUGAR CANE. SIMES T. HOYT, Honolulu, Territory of Hawaii, assignor to Hawaiian Pineapple Company, Limited, Honolulu, Territory of Hawaii, a Corporation of Hawaii. Filed Apr. 28, 1923. Serial No. 635,371. 4 Claims. (Cl. 302—24.)

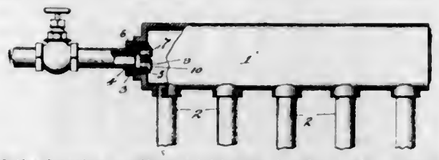
1. The method of conveying chopped cane or similar material to a mill, through a conduit leading from the harvesting field to the mill, which consists in adding a fluid to the said cane, leading the mixed cane and fluid to the receiving end of the conduit, dividing the mixture of cane and fluid into sections, and directing a blast of



compressed air against the separate sections, whereby to impel them towards the discharge end of the conduit, substantially as described.

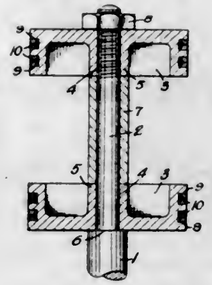
1,503,366. RADIATOR COVERING. PAUL JARAY, Friedrichshafen, Germany, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed June 28, 1920. Serial No. 392,568. 2 Claims. (Cl. 257—132.)

2. In a device of the kind described in combination, a radiator, a plurality of streamlined shutters in two parts hinged together disposed radially in front of said radiator and means for spreading said shutters apart and for closing them.



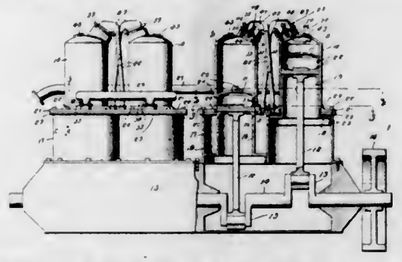
1,503,367. HINGE FOR VANITY CASES. WILLIAM G. KENDALL, Newark, N. J. Filed Dec. 13, 1922. Serial No. 606,659. 2 Claims. (Cl. 220—32.)

1. A device of the character described comprising a receptacle, a plurality of covers therefor, each of said covers being formed with a bead and a flange, a plate carried by the receptacle and having a tongue on each of its ends, and a wire carried by the bead on each of said covers and adapted for engagement with its respective tongue of said plate to pivotally secure the covers to the receptacle.



1,503,368. HEATING APPARATUS AND METHOD OF OPERATING SAME. HENRY A. KIESELBACH, Montclair, N. J., assignor to Johns-Manville, Inc., a Corporation of New York. Filed Jan. 20, 1922. Serial No. 530,706. 6 Claims. (Cl. 257—154.)

2. In a heating apparatus, the combination of a header; a plurality of pipes extending laterally therefrom; a bushing mounted in an opening at one end of the header; and a plurality of deflecting vanes carried by the bushing, said vanes serving to prevent the formation of any jet

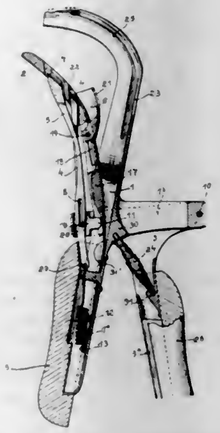


of the heating medium within the header and to effect a substantially even distribution of the medium throughout the length of the header and consequently to the pipes.

1,503,369. PISTON. JOSEPH PIERRE LAVOIE, Montreal, Quebec, Canada. Filed Apr. 21, 1921. Serial No. 463,175. Renewed Dec. 17, 1923. Serial No. 679,767. 1 Claim. (Cl. 74—108.)

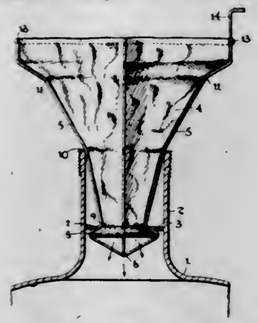
A piston, comprising a rod having a reduced portion providing a circumferential shoulder at the point where such portion begins; a cup-shaped head abutting against said shoulder and formed with a central bearing collar through which said reduced portion passes; a spacing sleeve of substantially the same external diameter as said collar fitted on said reduced portion and abutting at one end directly against the free end of the collar, the said reduced portion projecting beyond the other end of said sleeve and having a threaded terminal; a second cup-shaped head disposed in inverted relation to the first head and formed with a central bearing collar of the same external diameter as the first collar which rests directly upon the adjacent end of the spacing sleeve and through which the said reduced portion of the piston rod projects; and a fastening nut threaded on the terminal of said portion and tightened against the outer face of the second head.

1,503,370. INTERNAL-COMBUSTION ENGINE. FRANK C. MARTIN, Plattsmouth, Nebr., assignor to Mathew F. Martin, Omaha, Nebr. Filed May 16, 1921. Serial No. 469,791. 1 Claim. (Cl. 123—59.)



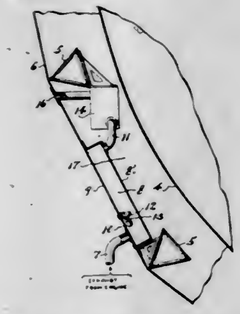
An internal combustion engine of the two-cycle type having twin cooperating units each comprising main and auxiliary cylinders and main and auxiliary pistons operative respectively in the main and auxiliary cylinders, the pistons in the twin units moving in opposing relation and connected to a common crank shaft, the auxiliary cylinders being coaxial with and of greater diameter than the main cylinders to provide an annular ledge engaged by the bases of the main cylinders, an intake manifold arranged at one side of the main cylinders and above the auxiliary cylinders and having branches leading into the auxiliary cylinders through openings in said bases and ledges, the openings in said ledges each having an annular flange, valve cages positioned in said openings having annular ribs resting on packing rings carried by the flanges, flanges on the ends of the branches of the intake manifold which extend into the openings, packing nuts clamping said branches and valve cages in place and holding the intake manifold to the engine block, conductors connected with openings in the ledges and having valved communication with the outer ends of the main cylinder, said conductors crossing and leading from the auxiliary cylinder of one unit to the main cylinder of the other unit, and exhaust ports in the sides of the main cylinders and adapted to be uncovered when the main pistons descend a predetermined distance in the cylinders.

1,503,371. ATTACHMENT FOR GAS ENGINES. JOSEPH P. MEYER, Mapleton, Iowa. Filed July 23, 1923. Serial No. 653,280. 2 Claims. (Cl. 48—180.)



1. An attachment for a gas engine comprising a plate interposed between the carburetor and intake manifold of the engine and provided with a plurality of conical openings having their smaller ends directed toward the said manifold, and valved air intakes in the edge portion of the plate.

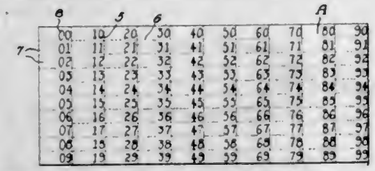
1,503,372. APPARATUS FOR KILLING POULTRY. OTTO CARL PACHOLKE, Brooklyn, N. Y. Filed Apr. 16, 1923. Serial No. 632,513. 12 Claims. (Cl. 17—1.)



1. In an apparatus for killing poultry, the combination, with an outer member bent into the form of a hook and formed with a depression and adapted to receive the head of the animal, of an inner member jointed to said outer member and adapted to be moved towards the same, piercing and cutting tools guided within said inner member, and an operating member adapted to operate said piercing and cutting members.

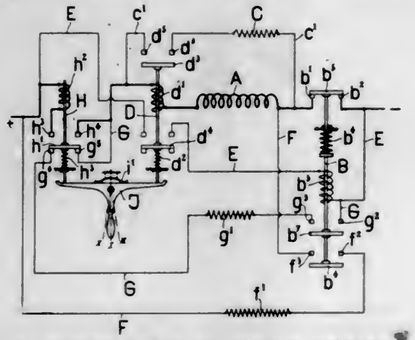
1,503,373. FUNNEL. HERSCHEL G. PARKER, Philipsburg, Pa. Filed June 30, 1923. Serial No. 648,819. 2 Claims. (Cl. 226—38.)

1. A funnel adapted for use in a filling spout, comprising an expansible and contractile flaring frame, consisting of substantially V-shaped members, the apex of one member within and resting upon the other at its apex and disposed transversely thereto, said frame being shiftable lengthwise of the filling spout for assuming its open or closed position, a body of compressible material open at each end and surrounded by and connected to the frame, an annulus surrounding said frame and adapted to be secured within a filling spout, a shoulder formed in each arm of each frame member adjacent the apex of each member for coacting with said annulus to prevent the withdrawal of the funnel from the spout when the funnel is in open position, and a grasping member, extending from one of said arms above the upper edge of the funnel.



1,503,374. HEAT-TRANSFER SYSTEM FOR AIRCRAFT. HUMPHREY F. PARKER, New York, N. Y. Filed Apr. 28, 1922. Serial No. 557,229. 9 Claims. (Cl. 244—31.)

6. A method of water recovery for ballasting aircraft consisting in passing engine exhaust gases against the inner surface of an exterior wall of said aircraft the outer surface of said exterior wall being exposed to the air stream, whereby water is condensed from said exhaust gases on said inner surface, and then collecting said condensation for delivery to ballast tanks.

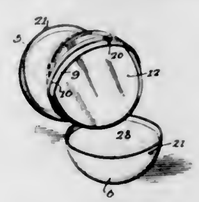


1,503,375. PROCESS OF PRINTING CONSECUTIVE NUMBERS. OVERTON W. PENDERGAST, Terre Haute, Ind. Filed Aug. 17, 1921. Serial No. 493,036. 3 Claims. (Cl. 101—426.)

1. Those steps in the method of printing numerals in succession on an ordinary printing press, consisting of taking a plurality of sheets containing a plurality of forms, printing consecutive digits in units on the forms, taking different groups of the sheets and prefixing digits of consecutive valuations on each group of sheets before the digits previously formed, whereby numerals on the

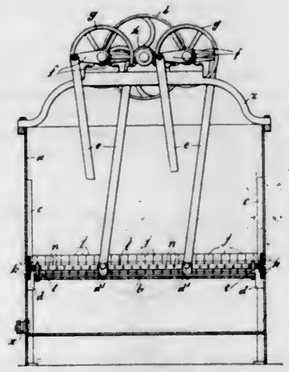
sheets of consecutive valuation, starting from units and terminating in thousands will be formed.

1,503,376. DEVICE FOR CUTTING AN INDUCTIVE RESISTANCE OUT OF CIRCUIT WITHOUT SPARKING. JAKOB PFRETZSCHNER, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Sept. 26, 1921. Serial No. 503,251. 10 Claims. (Cl. 175—294.)



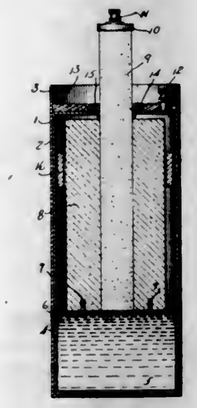
1. In combination with an inductive resistance connected in a main circuit, a resistance element connected in shunt with said inductive resistance, a switch in said shunt circuit, an electro-magnetically controlled switch in said main circuit, means for exciting the windings of said electro-magnetically controlled switch from said main circuit, a switch for controlling said excitation and common means for controlling said last named switch and said shunt circuit switch whereby they being closed, said main circuit switch is opened.

1,503,377. UNDERREAMER. JOHN WILLIAM PIPPIN, Oklahoma City, Okla. Filed Sept. 24, 1920. Serial No. 412,457. 16 Claims. (Cl. 255—75.)



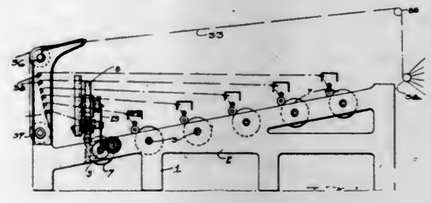
1. In an underreamer, the combination with the body and the bits supporting mandrel in the body, of means for slidably connecting the mandrel to the body, said means comprising oppositely arranged keyways extending longitudinally of the body, the mandrel having an opening registering with the keyways, and a key passing through said opening and keyways, the body and the key having inter-engaging mechanism for permitting longitudinal movement of the key with respect to the body and for preventing longitudinal movement of the key, said means comprising ribs at the ends of the key and portions of the key-ways of the body being cut away to permit movement of the key vertically with respect to the body.

1,503,378. TOILET CASE. ALBERT T. REID, Leavenworth, Kans. Filed June 9, 1923, Serial No. 644,384. Renewed May 23, 1924. 3 Claims. (Cl. 132—83.)



2. A toilet case comprising casing sections, a hinge connecting the same, a locking ring adapted for engagement with both casing sections, a reflecting element pivotally mounted within the locking ring, a leaf spring mounted upon the locking ring within the same and between it and the reflecting element, and bolts carried by the leaf spring for engagement with the casing sections.

1,503,379. APPARATUS FOR MIXING, GRINDING, REFINING, OR TREATING LIQUID MATERIAL, SUCH AS LIQUID CHOCOLATE. JOHN CALDWELL ROBINS, Birmingham, England. Filed Mar. 20, 1923. Serial No. 626,334. 5 Claims. (Cl. 259—112.)

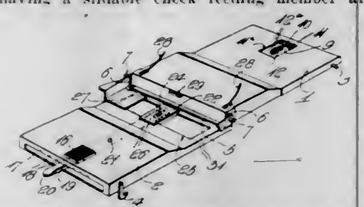


1. Apparatus for mixing, grinding, refining or treating liquid or semiliquid material such as liquid chocolate, comprising a receptacle, a pair of horizontal beater plates located side by side within the receptacle, means for imparting a simultaneous and opposite vertical reciprocating movement to said beater plates, means provided upon said beater plates for grinding the solid ingredient of the material by rubbing contact with the walls of the receptacle, and a series of grinder plates secured along one side and across both ends of each beater plate, each grinder plate being of a flexible character.

1,503,380. BATTERY CONSTRUCTION. DAVID ROSEN, New York, N. Y., and CONRAD SCHICKERLING, Weehawken, N. J.; said Schickerling assignor to Samuel Rubinsky, New York, N. Y. Filed Nov. 10, 1921. Serial No. 514,299. 4 Claims. (Cl. 204—38.)

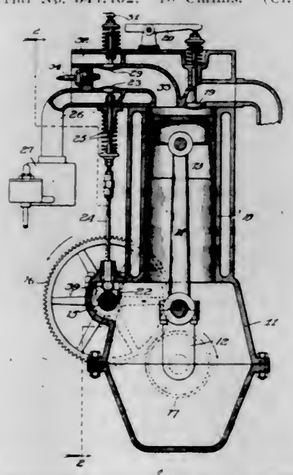
1. A battery comprising a container forming one pole of the battery, a second pole of the battery disposed within said container, a spacing ring between said pole to hold the inner pole in position within the container, a portion of the inner pole extending out of the battery through the container, and an insulating sleeve around this portion of said pole to insulate the two poles.

1,503,381. MACHINE FOR FORMING YARN PACKAGES. ARTHUR L. REMINGTON, Worcester, Mass., assignor to Warp Compressing Machine Company, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 23, 1922. Serial No. 538,643. 6 Claims. (Cl. 292—37.)



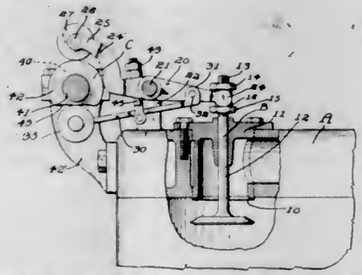
1. In a machine of the class described, the combination with a rotating shaft having a plurality of yarn carriers mounted thereon, of a member adapted to lead yarn to each of said carriers, and means for imparting a traversing movement to said member to form a separate yarn package on each carrier, the said member being attached to slides cooperating with guides, and adapted to be moved directly away from the center of said yarn carriers by the building of yarn on said carriers.

1,503,382. CHECK PROTECTOR. BEDRI SAAD, Yakima, Wash. Filed June 27, 1923. Serial No. 648,129. 4 Claims. (Cl. 197—6.4.)



2. In a check printing device the combination of an upper casing, a disk revoluble in the casing and having numerals thereon, an inking pad arranged to bear on the numerals, a second casing secured to the first

casing, a plate secured to the hinging element of the casings, springs adapted to bear on the plate, a lever having a slidable check feeding member arranged

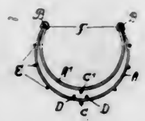


on one end thereof, and a platen mounted on the second casing and adapted to receive and bear against the numerals.

1,503,383. INTERNAL-COMBUSTION ENGINE. CHARLES E. SARGENT, Rock Island, Ill. Filed Mar. 17, 1922. Serial No. 544,452. 10 Claims. (Cl. 123—76.)

1. In an internal combustion engine, a cylinder, a piston movable therein, means for admitting air only to the cylinder during the first part of the suction stroke, and for admitting a combustible mixture only during the last part of said stroke, said means including a pocket into which said combustible mixture passes and means in said pocket for igniting said mixture.

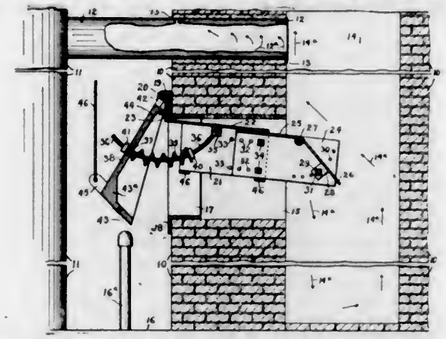
1,503,384. VALVE GEAR FOR INTERNAL-COMBUSTION ENGINES. EDGAR S. SEWELL, West Scarboro, Me. Filed Nov. 28, 1921. Serial No. 518,337. 5 Claims. (Cl. 123—90.)



1. In an operating mechanism, a rocker arm, means for rockably supporting the arm intermediate its ends, a single cam shaft, a cam mounted upon the shaft having a projecting throw portion thereon, spaced cams mounted upon the shaft having indentations formed therein and disposed diametrically opposite the throw of the first mentioned cam, a roller carried by the outer end of the rocker arm for engaging the first mentioned cam, a resilient stub arm secured to the rocker arm at one side of its pivot point, and rollers carried by said stub arm for engaging the spaced cams.

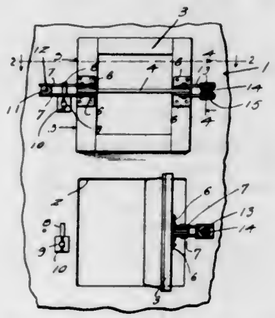
1,503,385. MOP. PHILIP H. SIMON, Huntington, Ind. Filed Jan. 2, 1924. Serial No. 684,633. 2 Claims. (Cl. 15—138.)

1. A mop comprising a tubular handle, a hand-grip having a threaded connection with the rear end of said handle for movement along the same when rotated, a rod extending longitudinally through said handle and connected to said hand-grip for movement bodily therewith, and mop cloth gripping means carried by the front end of said handle and operatively associated with the front end of said rod to be actuated thereby.



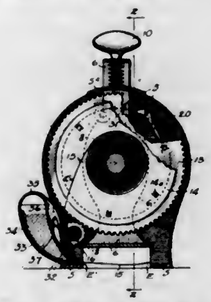
1,503,386. SHOCK ABSORBER FOR AERIAL VEHICLES. KARL STAHL, Friedrichshafen, Germany, assignor to Luftschiffbau Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany, a German Corporation. Filed June 28, 1920. Serial No. 392,597. 4 Claims. (Cl. 244—2.)

2. The combination with an airship gondola, of a shock absorbing resilient skeleton structure formed substantially like a boat's hull and mounted below and in contact with the bottom of the gondola and a second skeleton structure of smaller volume inserted in and connected with said first structure with a clearance between the bottom portions of said structure.



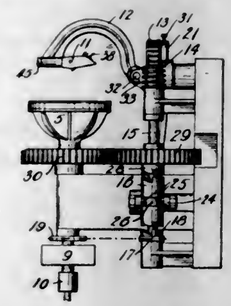
1,503,387. FUEL-SAVING DEVICE. ARTHUR H. STURGES, Omaha, Nebr. Filed Mar. 24, 1924. Serial No. 701,593. 6 Claims. (Cl. 126—285.)

1. In a fuel economizer, a frame adapted to be mounted in the wall of a chimney, a door hinged to the frame for regulating draft through the frame, and a deflector connected to the door and projecting through the frame,



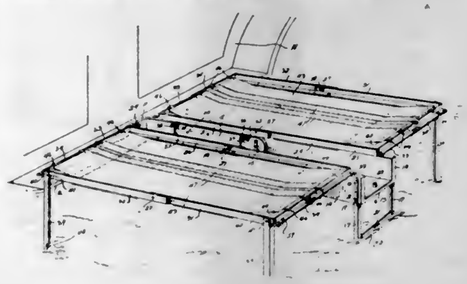
said deflector being adjustable simultaneously with the door as the latter is opened and closed.

1,503,388. SILO. LURI TABOR, Detroit, Mich. Filed June 16, 1923. Serial No. 645,785. 3 Claims. (Cl. 20—1.4.)



1. A silo having an opening in a side thereof, a door for closing said opening, a crossbar secured to the outer side of the door, spaced straps secured to an end portion of the crossbar, means for pivotally connecting said straps to the body of the silo at one side of the door opening, a member pivotally connected to the opposite end of the crossbar, and means mounted upon the silo and engaging the pivoted member and coacting therewith to hold the door in closed position.

1,503,389. STAMP-AFFIXING DEVICE. MATTHEW ARNOLD TAYLOR, Los Angeles, Calif. Filed Feb. 9, 1923. Serial No. 618,081. 11 Claims. (Cl. 216—25.)

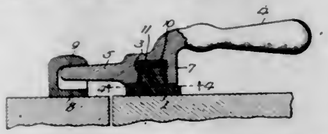


1. In a device of the kind described, the combination of means for feeding a strip of stamps, an actuator movable to operate such means to feed such strip to dispose a portion thereof in position to be severed and affixed to a piece of mail matter, means for moistening such portion during the feeding operation, means for severing such portion, means for affixing the severed portion to said piece, and means for controlling the feeding means, whereby to prevent any feeding at all of such strip on a movement of such actuator less than a predetermined minimum and for insuring the complete feeding of a single stamp on a movement of such actuator greater than such minimum and less than the full movement of the actuator required to affix a stamp.

1,503,390. PARING MACHINE. DWIGHT TENNEY, New York, N. Y., assignor to Franklin Baker Company, Philadelphia, Pa. Filed Apr. 1, 1922. Serial No. 548,882. 20 Claims. (Cl. 146—43.)

17. In a machine for paring coconuts, a rotatable chuck for supporting a coconut from one end, a rotatable shaft having driving connection with said chuck, a paring device having driving connection with the rotatable shaft and means associated with the shaft and driving connection for the paring device for reversing the direction of movement of the paring device.

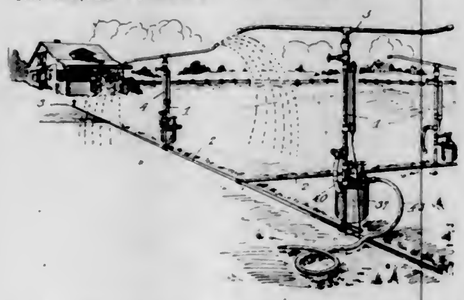
1,503,391. FOLDING BED FOR AUTOMOBILES. JULIUS F. TESKE, Mobridge, S. Dak. Filed Apr. 16, 1923. Serial No. 632,506. 7 Claims. (Cl. 5—119.)



1. A folding bed structure of the character described comprising a box formed in two sections and adapted to be permanently hinged to the running board of an automobile, the sections of the box being adapted to be folded out into a horizontal position and aligned relation, the outer section of the box having folding legs at both ends whereby it may be supported from the ground, a foldable bed frame operatively mounted within the box adapted to be shifted to a horizontal position at right angles to one wall of the box, and a webbing constituting a bed operatively connected at its sides to the sides of the foldable bed frame and adapted to be operatively connected at its ends to the ends of the foldable bed frame.

1,503,392. COLD-MOLDING PROCESS AND PRODUCT THEREOF. VICTOR H. TURKINGTON, Chicago, Ill., assignor to Bakelite Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 24, 1923. Serial No. 634,389. 5 Claims. (Cl. 18—55.)

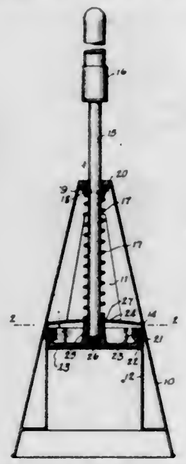
2. The hereindescribed process of making shaped articles containing a filling material and an infusible phenol resin binder, comprising cold-molding a composition containing a filling material, a potentially reactive phenol resin, and furfural; and thereafter heating the shaped article to a temperature sufficient to effect transformation of the potentially reactive resin but insufficient to vaporize a material proportion of the furfural, whereby the transformation is accomplished without substantial shrinkage or surface alteration of the article.



3. A cold-molded article comprising a filling material, an infusible phenol resin, and a high-boiling aldehyde.

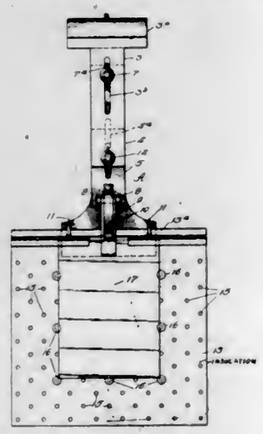
1,503,393. DOOR LATCH. JOHN TWARDOWSKY, Chicago, Ill., assignor to Universe Corporation, Chicago, Ill., a Corporation of Illinois. Filed May 31, 1923. Serial No. 642,513. 5 Claims. (Cl. 292—241.)

1. A door latch comprising a stationary pivot plate having a threaded stem, a lever threaded upon and rotatable on the stem, friction means interposed between the stem and the lever to retard movement of the lever, a stationary latch plate having a cam ledge adapted to be engaged by one end of the lever, and stop means carried conjointly by the pivot plate and the lever for positively limiting the movement of the lever.



1,503,394. SPRAYER. CLÉMENT VACHER, Kelowna, British Columbia, Canada. Filed Jan. 29, 1923. Serial No. 615,724. 3 Claims. (Cl. 137—139.)

1. In combination with a fluid conveying standard, a valve for controlling the flow to said standard, a cylinder in fluid communication with the standard, a spring pressed piston in said cylinder, an operative connection between said piston and valve, a pin adapted to engage said connection and retain it against the action of the spring pressed piston; a gravity operable device for maintaining said pin in locking position and adapted to support a receptacle, and a drip cock associated with the standard and adapted to discharge into said receptacle.

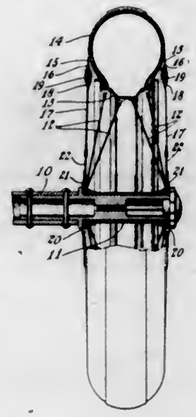


1,503,395. CLOTHES POUNDER. CON JAMES VASGREEN, Mogollon, N. Mex. Filed Mar. 7, 1923. Serial No. 623,456. 3 Claims. (Cl. 68—5.)

1. A device of the character described, comprising a casing the shape of a truncated cone and having lateral air inlet openings in its upper portion, a cylinder having a top wall provided with a relatively large central opening therethrough, and located near the bottom of

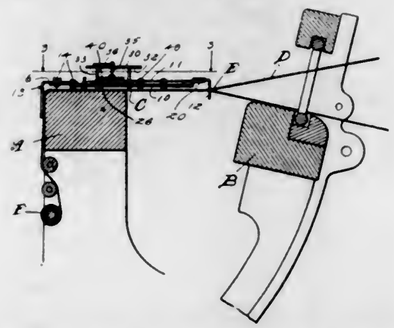
said casing, a piston having an expansible piston ring mounted thereon and loosely and slidably mounted in the cylinder, and means for operating the piston.

1,503,396. ELECTROLYSIS SUSPENSION HOOK. EDMUND VOIGT, Chicago, Ill. Filed Feb. 12, 1923. Serial No. 618,618. 8 Claims. (Cl. 204—5.)



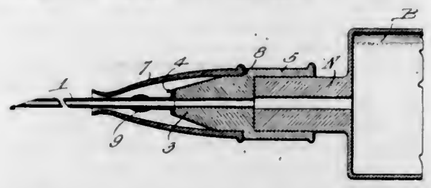
1. A suspension-hook of the character described, comprising an electro-conductive stem formed of a series of sections adjustable longitudinally for lengthening and shortening it, the lowermost section being composed of insulating material and provided with case-hanging means, and a spring-pressed electrical contact-shoe on the last-named section.

1,503,397. FACING COVER FOR WHEEL ASSEMBLIES. HENRY WACKER, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Oct. 20, 1923. Serial No. 669,705. 5 Claims. (Cl. 301—37.)



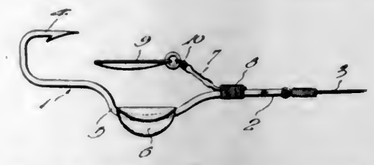
2. A facing for a wheel assembly, said facing comprising a durable, annular, disk-like member adapted to

be secured, about its outer margin, to a pneumatic tire, and an annular structure of elastic material secured,



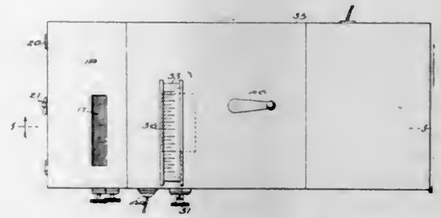
about its outer margin, to the inner margin of said member and centrally apertured to accommodate an axle or a hub.

1,503,398. STARTING GAUGE FOR LOOMS. JOHN F. WAY, Yantic, Conn. Filed Dec. 22, 1922. Serial No. 608,488. 7 Claims. (Cl. 139—1.)



1. A starter gauge for looms including a base, a retractile follower slidable on said base engageable with so as to be positioned by the line of the cloth, indicating means on said base operable for setting at zero according to the position of said line, and means to actuate said indicator means through movement of said follower.

1,503,399. HYPODERMIC NEEDLE. JOHN E. WEBB, McGregor, Iowa. Filed Apr. 14, 1922. Serial No. 552,494. 7 Claims. (Cl. 128—221.)

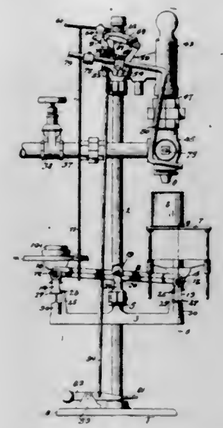


1. In a structure of the character described, a needle carrier, a needle fitting against and readily breakable from the end of said carrier, and abutment means carried by the needle adjacent its rear end.

1,503,400. FISHHOOK. JOHN EVERETT WEBB, McGregor, Iowa. Filed June 11, 1923. Serial No. 644,809. 1 Claim. (Cl. 43—27.)

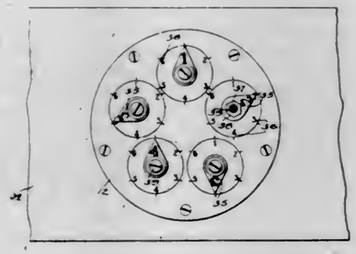
A fish hook having a horizontally elongated shank provided with an upwardly and forwardly turned hook at its rear end, said shank being depressed between its ends in front of said hook and having a sinker carried fixedly by its depressed portion, a spinner support secured to said shank in front of its depressed portion and extending rearwardly, and a spinner connected with said support over said depressed portion and in front of said hook.

1,503,401. PHOTOGALVANOGRAPH. DAVID WECHSLER, New York, N. Y. Filed Aug. 17, 1922. Serial No. 582,513. 3 Claims. (Cl. 234—1.5.)



3. A photogalvanograph which includes a box having a partition disposed across the same near one end thereof, a removable cover over the larger portion of said box, a pivoted cover over the smaller portion of said box, a film in said smaller portion, means for moving said film, said partition having an aperture, a screen in said aperture adjacent which the film moves, said screen having a slit therein and a plurality of small apertures, a galvanometer in the larger portion of the box having a movable mirror, a lamp in said box adapted to throw a beam of light on said mirror, the beam of light being reflected from said mirror on the slit in said screen, a partition between the lamp and the screen to prevent light from being projected thereon, a second mirror disposed in the path of the beam of light from the first mirror to the screen, said second mirror adapted when moved to a definite position to reflect a portion of said beam of light, a translucent screen in the top of the main cover portion adapted to receive the image of the beam of light reflected from said second mirror, a second translucent screen in the top of the pivoted cover portion and disposed therein adjacent a portion of the film so that the position and movement of the film can be observable at any instant, a separate independent lamp associated with each of the apertures in the screen, and means whereby at the will of the operator these separate lamps can be illuminated to project a beam of light through the apertures on to the film for the purpose of recording said characteristics thereon.

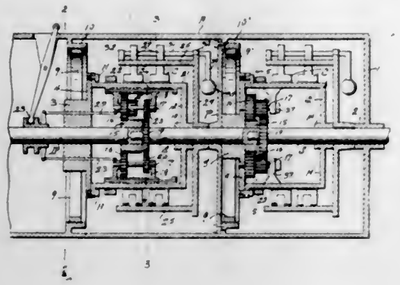
1,503,402. APPARATUS FOR FILLING AND WEIGHING CANS. CASPER WEIFFENBACH, Buffalo, N. Y., assignor to Harvey-Hanes Machine Corporation, Buffalo, N. Y., a Corporation of New York. Filed Oct. 19, 1922. Serial No. 595,670. 20 Claims. (Cl. 249—58.)



1. In a machine of the character described, a valve, means tending to hold said valve in its closed position, a detent member operatively connected with said valve so

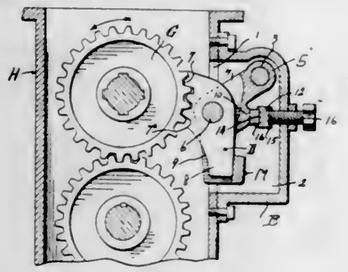
as to move therewith, holding means having a wedging engagement with said detent member for holding said

valve in its open position, and releasing means for releasing said wedging engagement between said detent and said holding means.



1,503,403. ELECTRIC PERMUTATION LOCK. HARRY DORNIN WETHLING, Orange, N. J. Filed Aug. 11, 1922. Serial No. 581,227. 2 Claims. (Cl. 200—43.)

1. A permutation ignition lock including a housing into which one of the conductors of the ignition system extends, a plurality of switches arranged in series in said conductor and located in the housing, each of said switches comprising a rotary switch head having a peripheral bridge piece and a resilient contact interposed between the adjacent switch heads and respectively engaging the peripheries thereof, shafts extending through one of the walls of the housing having the switch heads connected therewith for turning movement in one direction, and complementary means at the outer end of each shaft and on the outer surface of the housing for indicating to the operator the closed and open condition of the switches.

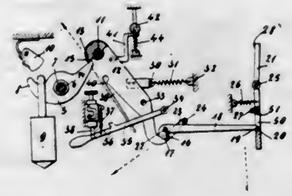


1,503,404. POWER-TRANSMISSION MECHANISM. WILLIAM I. WHEELER, Scottville, Ill. Filed Sept. 15, 1920. Serial No. 410,449. 1 Claim. (Cl. 74—34.)

In a transmission mechanism, a drive shaft, a driven shaft, said driven shaft being divided into a plurality of sections, an automatically actuated variable speed mechanism operatively connecting adjacent sections of the drive shaft, and an automatically actuated variable speed mechanism operatively connecting the drive shaft and one of the sections of the driven shaft, each of said variable speed mechanisms including braking elements, the brak-

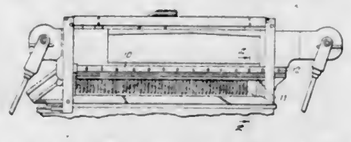
ing element of one of such speed mechanisms having greater leverage than the braking elements of the second speed mechanism.

1,503,405. SAFETY DEVICE FOR VEHICLES. WILLIAM ISIAH WHEELER, Scottville, Ill. Filed Jan. 7, 1922. Serial No. 527,590. 11 Claims. (Cl. 188—31.)



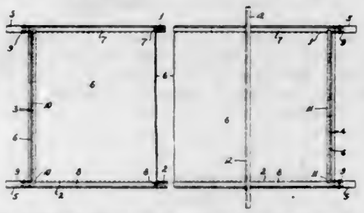
1. The combination with a rotatable member; of a holding member supported for swinging movement and automatically moving in a direction to engage the rotatable member to hold the same against rotation in one direction, said holding member normally offering no obstruction to the rotation of the rotatable member in the opposite direction, the rotatable member being toothed, the holding member having an arcuate toothed portion in mesh with the rotatable member, the end tooth of the holding member being shorter than the remainder of such teeth.

1,503,406. TEMPLATE. WILLIAM ISIAH WHEELER, Scottville, Ill. Filed Apr. 9, 1923. Serial No. 630,917. 8 Claims. (Cl. 29—14.)



1. A template for assembling a plow share and its bar and point comprising a bar adapted to be secured to the bar of the share, a member carried by the template bar against which the share is fitted, and means for securing said member to the share.

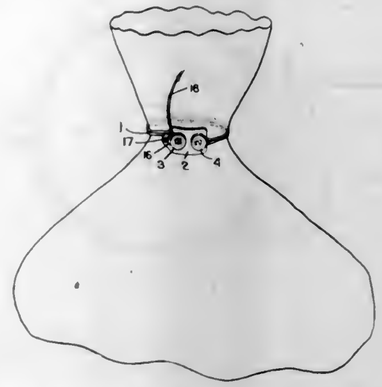
1,503,407. BOMB-THROWING DEVICE. OSCAR WILCKE, Friedrichshafen, Germany, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed June 28, 1920. Serial No. 392,577. 6 Claims. (Cl. 244—1.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. In a device of the kind described in combination, a bomb carrying lever, means for holding said lever in operative position, electric means for influencing the operative position of said holding means and resilient means for automatically carrying said holding means back into operative position.

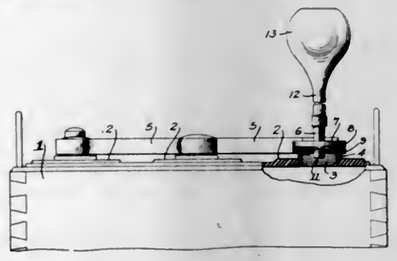
1,503,408. PAPER-CUTTTING MACHINE. HORACE S. WILLIAMS, Brooklyn, N. Y. Filed Dec. 5, 1922. Serial No. 605,069. 7 Claims. (Cl. 164—55.)

1. In a paper cutting machine, a knife, a knife bar to which the knife is adapted to be attached, a vertically movable clamp having recesses, means for securing the knife temporarily to said clamp to move the knife to position to be secured to the knife bar, and means for securing said knife to said knife bar.



1,503,409. PROCESS OF MANUFACTURING TILES, SHEETS, AND OTHER ARTICLES OF PRODUCTS FROM ASBESTOS OR LIKE MATERIALS. SAMUEL SCOTT WILSON, Meyerton, Transvaal, South Africa, assignor to John Wilson and Sons, Limited, Johannesburg, Transvaal, South Africa. Filed Sept. 10, 1920. Serial No. 409,432. 3 Claims. (Cl. 25—42).

1. The process of manufacturing sheets from a plastic mixture of asbestos, cement and water, which consists in spreading the mixture upon a surface provided by a slab made of plaster of Paris, as set forth.

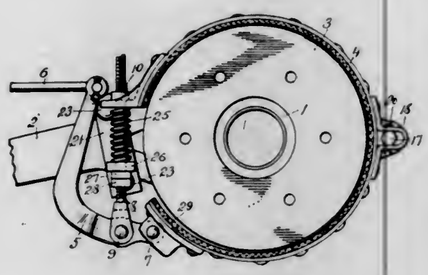


1,503,410. COMBINED CLOSURE AND MARKER FOR BAGS. THOMAS J. YATES, Salem, Mass., assignor to Yates Machine Company, Salem, Mass., a Corporation of Massachusetts. Filed Apr. 25, 1923. Serial No. 634,572. 2 Claims. (Cl. 24—365.)

1. A device of the character described comprising a flexible cord, a metal plate curved on an axis transverse of its ends with one free end and one end secured to the cord, two undercut bosses with distinguishing indicia thereon projecting from said plate, one boss being adjacent each end of the plate, whereby when the free end of the cord is wrapped around the neck of a bag, then about the undercut portion of the boss on the free end of

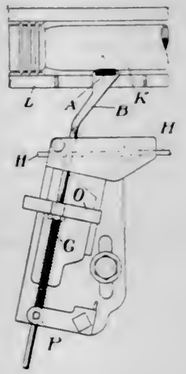
the plate, then back around the neck of the bag and a half hitch taken around a boss on that end of the plate to which the cord is secured, the neck of the bag will be retained in closed position and the metal plate will lie against and conform to the shape of the neck with the indicia exposed to view.

1,503,411. APPARATUS FOR TESTING BATTERY JARS. FRANK JACON ZIMMERMAN, Modesto, Calif. Filed June 8, 1923. Serial No. 644,289. 4 Claims. (Cl. 73—51.)



1. A testing device for application to the filling orifice of a battery jar, comprising a compressible bulb, a closing and sealing means to span and make a tight joint with said orifice, and a tubular connection between said means and said bulb, said connection discharging beneath said closing and sealing means, the whole forming a light structure which may be applied and removed as a unit to said orifice by grasping the bulb.

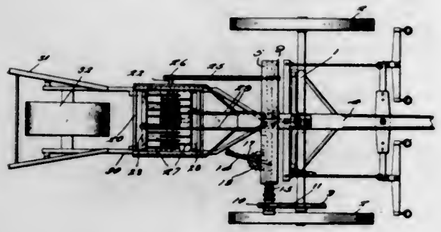
1,503,412. AUTOMOBILE BRAKE. JOHN E. BEARD, Kansas City, Mo. Filed June 11, 1923. Serial No. 644,582. 3 Claims. (Cl. 188—77.)



1. In an automobile brake, the combination with an axle housing, a radius rod attached thereto, a brake band support rigidly attached to said axle housing, a brake band adjustable forwards and backwards on said support and held by the latter from sidewise tipping, a brake lever pivoted to said brake band, a screw pivoted to said brake lever and extending through and slidably mounted in the brake band, and a nut mounted on said screw and bearing on said brake band, of a supporting member in which said screw is longitudinally slidably

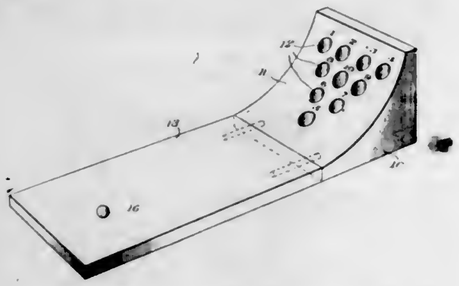
mounted, a spring encircling said screw and having its ends bearing respectively against said brake band and said supporting member, and adjustable means for fas-

tening said supporting member to said radius rod arranged to permit the forward and backward adjustment of said supporting member on said radius rod, substantially as set forth.



1,503,413. WEFT FEELER FOR LOOMS. CARL D. BROWN, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed May 6, 1921. Serial No. 467,379. 6 Claims. (Cl. 139—287.)

1. A slide slipping feeler having a feeler arm with separated prongs at its rear end which approach each other with a gap between them and spaced rearwardly beyond the rear wall of the feeler arm, in combination with a helically coiled resilient wire feeler tip loosely encircling said prongs and maintained under normal endwise compression.

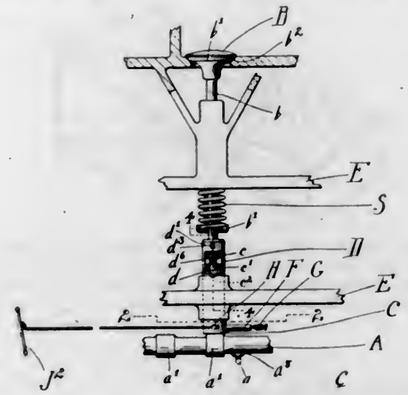


1,503,414. CULTIVATOR ATTACHMENT. JAMES T. CRAWFORD, Merigold, Miss., assignor of one-half to Wm. I. Bowman, Bogue Chitto, Miss. Filed Apr. 25, 1923. Serial No. 634,594. 1 Claim. (Cl. 83—6.)

The combination of a hopper having a discharge spout, a wheel mounted in the hopper, a driving connection for said wheel, oscillatory sets of swinging knives pivotally mounted in the hopper, the driving connection for the wheel including a shaft, and the knives of the sets being fulcrumed at intermediate points of their lengths of the said shaft, and some of the knives of both sets being arranged at one side of the wheel and other knives of both sets being arranged at the opposite side of the

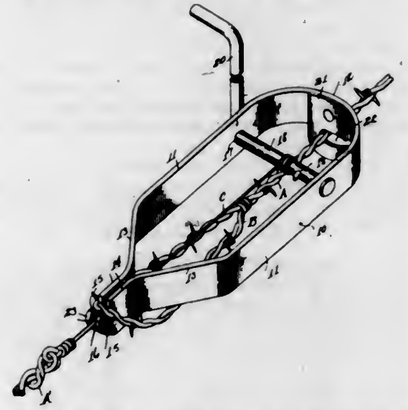
wheel, a crank shaft spaced from the hopper, and rods interposed between and connecting said shaft and the upper ends of the knives.

1,503,415. GAME. EDWIN C. FOHMANN, Philadelphia, Pa. Filed Jan. 30, 1922. Serial No. 532,777. 2 Claims. (Cl. 46—61.)



1. A game embodying a flat elongated horizontal runway, a horizontally and vertically disposed substantially triangular member at one end thereof, said member having an upwardly extending concaved face with its lowermost portion merging into the upper face of the runway, said member being further provided with vertically disposed openings extending therethrough and defining passages open at each end.

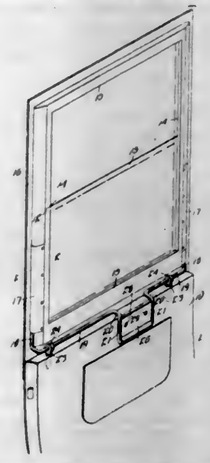
1,503,416. HOLDER FOR STRIPS OF EMERY, CARBORUNDUM, GLASS-COVERED TAPES, CLOTH, OR PAPER. WILLIAM R. K. GANDELL, London, England. Filed Jan. 28, 1922. Serial No. 532,506. 2 Claims. (Cl. 51—187.)



1. An abrasive or absorbent strip holder of the character specified, comprising in combination a bar forming a support for a strip folded transversely near the center of its length over one end of the bar, a sleeve member having a tapering bore and adapted to be slid along the bar, said sleeve member being arranged to encompass the bar and the two ends of the strip at opposite sides of the bar, and a correspondingly tapered wedge member inserted within said bore and capable of longitudinal sliding movement relatively to the sleeve member for the purpose of clamping the ends of the strip to the bar, one of said members being manually adjustable with respect to the bar to render the strip taut.

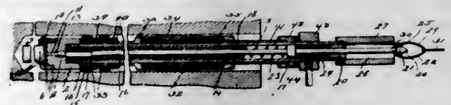
1,503,417. DEVICE FOR AUTOMATICALLY GRINDING VALVES FOR COMBUSTION ENGINES. ISRAEL B. GILBERT, Cincinnati, Ohio, assignor of one-half to Orlin J. Cutler, Cincinnati, Ohio. Filed Apr. 9, 1921. Serial No. 460,020. 18 Claims. (Cl. 123—90.)

14. The combination of a poppet valve and means for oscillating said valve when it is seated.



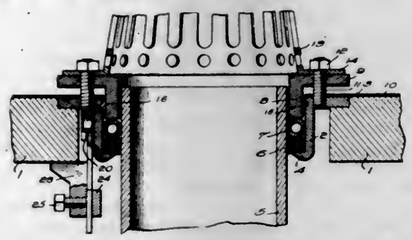
1,503,418. WIRE STRETCHER AND SPLICER. ELMER A. HAYES, Dover, Minn. Filed May 7, 1923. Serial No. 637,339. 1 Claim. (Cl. 254—161.)

In a wire stretcher and splicer, the combination with a yoke, the arms and bight portion of which are formed from a single length of material and the forward ends of the arms of which are provided with spaced transverse notches, of a guide block positioned directly below the notches and extending from the outer ends of the arms to a point inwardly of the notches, a hook carried by the bight portion, and wire reeling means carried by the arms adjacent the bight portion.



1,503,419. CONNECTER FOR DEMOUNTABLE AUTOMOBILE DOORS. MATTHEW R. HULL, Connersville, Ind., assignor to Rex Manufacturing Company, Connersville, Ind., a Corporation of Indiana. Filed June 27, 1923. Serial No. 648,095. 5 Claims. (Cl. 296—139.)

5. A supporting bracket for demountable automobile doors comprising a rod having an intermediate portion for attachment to the permanent door section of an automobile, said rod having a portion extending upward and transversely of said door from each end of said intermediate portion with upward extensions for attach-

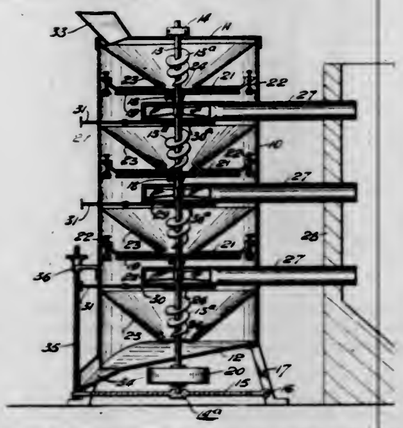


ment to the demountable door section, and means loosely mounted on the transverse sections adapted to be secured to the permanent door sections, substantially as set forth.

1,503,420. BLASTING GUN. ERNEST HUTTON, Fairmont, W. Va. Filed June 2, 1923. Serial No. 643,078. 12 Claims. (Cl. 102—5.)

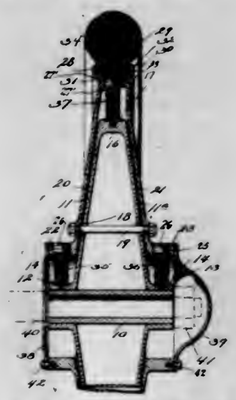
6. A blasting gun comprising a barrel having means to support a blasting cartridge and a percussion primer therefor, a firing pin to strike the primer, a rod reciprocable longitudinally in the barrel and adapted to coact with the firing pin, said rod having a collar fixed thereon, a spring acting on one side of said collar to normally hold said rod out of engagement with the firing pin, and a second spring acting on the opposite side of said collar for impelling the rod against the firing pin.

1,503,421. ROOF CONNECTION. WILLIAM F. INNES, Stoughton, Mass. Filed Sept. 30, 1921. Serial No. 504,515. 4 Claims. (Cl. 285—31.)



4. A roof connection comprising a ring having an upper, outer flange adapted to rest upon the roof deck, said ring being provided with an inner lower flange, a gland ring arranged within said first ring and provided with a flange, overlying said upper flange, fastening means passing through said flanges, said first ring being provided with a circumferential recess on its inner face for the reception of a metal packing, and a packing disposed on said lower flange and engaging the lower edge of the gland ring.

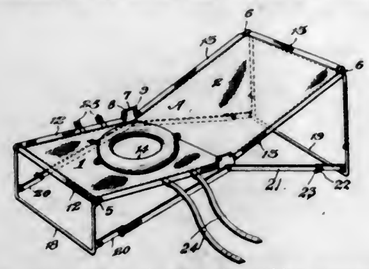
1,503,422. METHOD OF MAKING PUTTY. JULIUS E. LAURILA, Worcester, Mass. Filed June 16, 1922. Serial No. 568,863. 3 Claims. (Cl. 106—8.)



1. A method of making putty, which consists in first combining whiting and linseed oil to form a mixture of dough-like consistency, and then adding fine hot sand to the mixture.

1,503,423. GRAIN HULLER. ROBERT ANSON LITTLE, Woodstock, Va. Filed Apr. 24, 1923. Serial No. 634,373. 16 Claims. (Cl. 83—37.)

1. In a grain huller, a plurality of hoppers located one above the other, a pair of discs beneath each hopper, the adjacent faces of each pair lying in parallel planes and having conical recesses formed therein and one of said discs being rotatable.

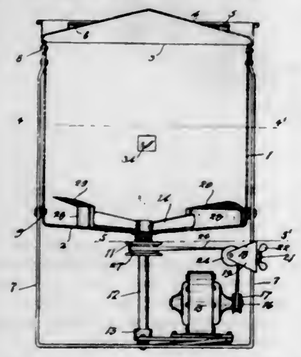


1,503,424. SPRING WHEEL. ROBERT ANSON LITTLE, Hazelton, W. Va. Filed Oct. 13, 1923. Serial No. 668,381. 8 Claims. (Cl. 152—28.)

1. A wheel of the character described having inner and outer pairs of discs arranged to flare toward the hub and having annular flanges at their inner edges, and springs arranged between said flanges.

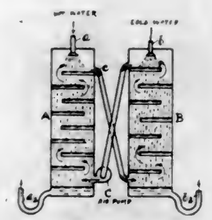
1,503,425. NURSERY ACCESSORY. ULVA R. MARTIN, Faber, Va. Filed June 8, 1923. Serial No. 644,211. 2 Claims. (Cl. 155—31.)

1. In a device of the class described, the combination with a frame structure including opposed end sections, intermediate side sections interposed between the end sections and having pivotal connections with both end sections, a seat carried by one of said end sections and formed with an opening, a back carried by the other end section, said end sections being adapted to be folded one



on the other, and a circular air cushion supported on said seat and surrounding the opening thereof, the distance between the pivots on the intermediate side sections being substantially equal to the height of the air cushion.

1,503,426. WHEEL RIM. JAQUELIN M. MEREDITH, Norfolk, Va. Filed Feb. 6, 1923. Serial No. 617,320. 4 Claims. (Cl. 301—33.)



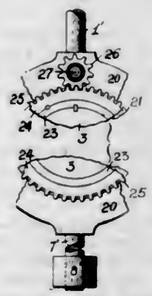
1. A collapsible rim provided with a split joint, said rim being formed with a transverse slot adjacent one side of said joint, a lever having an end thereof passing through said slot and provided with an extension to prevent its withdrawal from the slot when in one position, said slot being so shaped as to permit withdrawal of said lever when in another position, and means on the other side of said joint cooperating in interlocking relation with said lever.

1,503,427. DISHWASHING MACHINE. ALFRED J. MITCHELL, St. Boniface, Manitoba, Canada. Filed Mar. 23, 1922. Serial No. 546,080. 1 Claim. (Cl. 141—9.)

In a dish washing machine, a cylindrical tank having the lower end thereof forming a water well, a propellor rotatably mounted in the well, means for rotating the propellor at a comparatively high speed to cause the water in the well to be thrown outwardly by the respective propellor blades against the wall of the tank and means for deflecting the water so thrown against the wall of the tank inwardly and in a direction such that it will be opposed to the direction of rotation of the blades and will be struck by the blades and deflected upwardly in a spray.

1,503,428. APPARATUS FOR TRANSMITTING HEAT FROM ONE LIQUID TO ANOTHER. IVAR MORTERUD, Christiania, Norway. Filed Mar. 28, 1921. Serial No. 456,140. 3 Claims. (Cl. 261—18.)

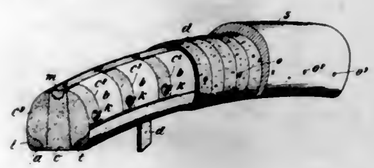
1. An apparatus for transmitting heat from one body of liquid to another, comprising means for causing a relatively cold gas to pass in direct contact with a counter current of hot liquid, and means to cause the gas so heated to pass in direct contact with a counter current of cold liquid.



1,503,429. PROCESS OF ACCELERATING THE VULCANIZATION OF NATURAL OR ARTIFICIAL INDIA RUBBER OR RUBBERLIKE SUBSTANCES. WILLIAM FRASER RUSSELL, Norwalk, Conn., assignor to The Norwalk Tire and Rubber Company, Norwalk, Conn., a Corporation of Connecticut. Filed Aug. 4, 1919. Serial No. 315,306. 9 Claims. (Cl. 18—53.)

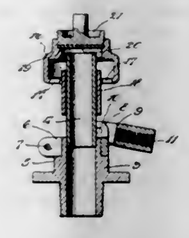
1. The process of accelerating the vulcanization of rubber which process consists in adding urea as an accelerator and sulphur to the rubber and subsequently heating this mixture to a vulcanizing temperature.

1,503,430. ART OF VULCANIZING RUBBER. WILLIAM FRASER RUSSELL, Norwalk, Conn., assignor to The Norwalk Tire & Rubber Company, Norwalk, Conn., a Corporation of Connecticut. Filed June 21, 1922. Serial No. 569,935. 6 Claims. (Cl. 18—53.)



3. The method which consists in adding zinc oxide, sulfur and urea to a rubber responsive to zinc oxide and vulcanizing the resulting mixture.

1,503,431. MEANS FOR BALANCING ROTORS. ALEXANDER E. SCHEIN, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed Jan. 26, 1921. Serial No. 440,054. 5 Claims. (Cl. 73—51.)

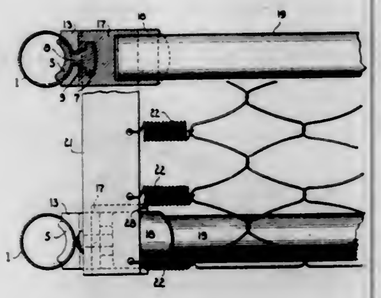


1. In combination with a rotor shaft, a sleeve surrounding said shaft, an annular gear secured to said sleeve, a second sleeve surrounding the first mentioned sleeve and rotatable with respect thereto, a pinion rotatable with respect to said second sleeve and supported thereby, said pinion meshing with said annular gear, and oppositely extending arms secured to said second sleeve.

1,503,432. METHOD OF MANUFACTURING SELF-COOLING TIRES. KUNO SCHRAGIN, Berlin, Germany. Filed Dec. 22, 1923. Serial No. 682,322. 7 Claims. (Cl. 18—55.)

1. The method of manufacturing self-cooling tires, consisting in attaching spaced rubber-pieces to a metallic ring having spaced apertures around its circumference, said rubber-pieces being arranged between said apertures; filling up the spaces between the rubber-pieces with shaping bodies adapted to be removed later on through the apertures of the metal-ring; applying an outer cover onto the rubber pieces and the filling-bodies, vulcanizing it, and removing the said shaping bodies through the said apertures of the metal-ring, as set forth.

1,503,433. FLOAT VALVE. ROBERT R. SHAFFER and JAMES F. SHAFFER, Crawfordsville, Iowa. Filed Jan. 30, 1923. Serial No. 615,891. 1 Claim. (Cl. 137—104.)



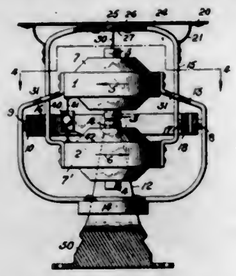
The combination of a water supply element terminating with a nipple, a cap having an annular chamber surrounding the discharge end of said nipple provided with a central opening at the top and discharge openings in its bottom, a sleeve integral with said cap extending downwardly therefrom and slidably engaging said nipple, an annular shoulder around said top opening, a gasket fitting said top opening and seated on said shoulder, a plug threaded in said cap and adapted to secure said gasket, a lever having a forked end spanning and fulcrumed upon the water supply element, a float carried by the opposite end of the lever, and links pivoted respectively to the forked end of the lever and to said cap at diametrically opposite points on the same, said gasket being adapted to close the opening of the nipple upon said lever being operated.

1,503,434. CORNER FASTENING FOR BEDS. LOUIS SLOBIN, Newark, N. J. Filed Mar. 14, 1923. Serial No. 625,071. 7 Claims. (Cl. 5—300.)

1. A hollow post having a longitudinal slot in the wall thereof, a key piece having a base portion located within the post, an elongated tapering key connected to the base portion by a neck and projecting through the slot in the post, said neck being provided with a plurality

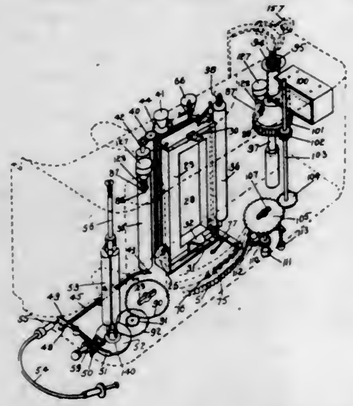
of stepped portions, and a locking member embracing one of the stepped portions and the post for locking

said key piece on the post, leaving a space on each side of the neck between said locking member and key for the reception of a connecting member.



1,503,435. HUB AND SPOKE CONNECTION. LEONARD DEE STEPHENSON, Auburn, Calif. Filed Apr. 9, 1923. Serial No. 631,018. 3 Claims. (Cl. 301—75.)

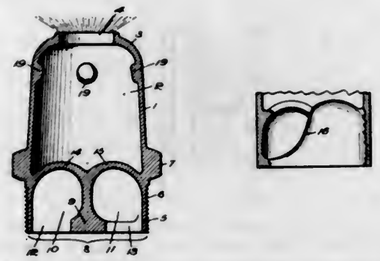
1. In a wheel having a rim and hub, annular flanges formed adjacent the ends of the hub; sockets formed upon the outer sides of the flanges; spokes connected between said sockets and the rim; adjusting elements slidably mounted within the sockets in engagement with the inner ends of the spokes; and a rod threaded into each adjusting element and bearing against the hub whereby a rotation of the rod will move the adjusting element within the socket to vary the pressure against the spoke.



1,503,436. VERTICAL GYROSCOPIC COMPASS. HARRY L. TANNER, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed June 5, 1918. Serial No. 238,252. 12 Claims. (Cl. 33—204.)

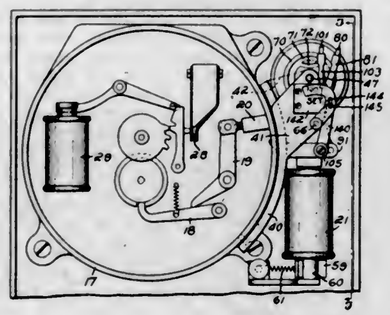
1. A gyroscopic compass comprising a gyroscope, means for pendulously mounting the same for oscillation about a horizontal axis and for spinning upon a normally substantially vertical axis, a compass card rotatably mounted independently of said gyroscope and interconnecting

means between said card and the gyroscope whereby the tilt of the gyroscope in elevation causes angular setting of the card in azimuth.



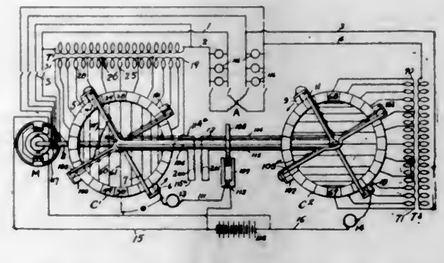
1,503,437. APPARATUS FOR ATTACHMENT TO PHOTOGRAPHIC CAMERAS WHEREBY PANORAMIC-VIEW PHOTOGRAPHS CAN BE PRODUCED. FRANK FREDERICK JAMES, Kensington, near Sydney, New South Wales, Australia. Filed Nov. 27, 1923. Serial No. 677,315. 10 Claims. (Cl. 95—15.)

1. A panoramic photographic camera comprising an adjustable stand, a stationary circular rack on said stand, a rotatable plate on said rack, a housing on said plate, a light tight camera chamber fitted with a lens and shutter detachably secured to said housing, a rotatable scale on the periphery of said rack, a pair of spools for carrying a sensitized film one of which is adapted to receive the said film after exposure thereof through an opening in the front wall of said housing, an adjustable shutter with opening therein in said housing disposed forwardly of said screen, a gate with opening therein associated with said housing opening, a hinged frame with opening therein connected to said gate, the said gate and hinged frame being adapted to receive therebetween the said film in its passage from one spool to the other thereof, means for adjusting the opening in said shutter in relation to the openings in said gate and hinged frame, a spring motor in said housing, gear means connecting said motor with said rack and the receiving spool for said exposed film, gear means connecting the other said spool to governor mechanism, means for manually releasing said governor mechanism, manual means for operating said lens shutter, means whereby the governor mechanism is operated to prevent operation of said motor upon the said plate and parts carried thereon having passed through a predetermined



angular movement, means on said housing for adjusting the said film on said spools, and means associated with said housing and said scale whereby the field of travel of the said lens in photographing panoramic objects is predetermined.

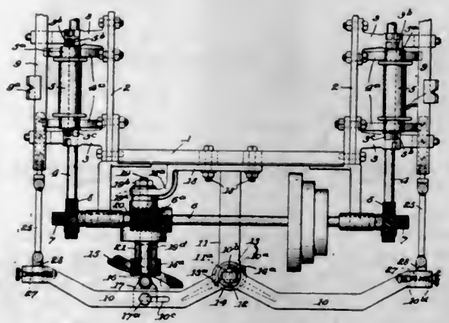
1,503,438. SPRAY NOZZLE. LEE H. PARKER, Boston, Mass., assignor to Spray Engineering Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 6, 1923. Serial No. 611,143. 10 Claims. (Cl. 299—114.)



7. A spray nozzle having a liquid entrance and a liquid exit, said nozzle having at its entrance a transverse partition dividing the entering liquid into a plurality of streams each at its entrance having an area substantially one half of that of the nozzle at such point, said nozzle having inner walls forming the lateral walls and top walls of the said primary chambers and shaped to impart a helical motion to the entire stream, said walls terminating in lines each extending from the wall of the nozzle to the longitudinal axis thereof and providing a relatively large exit from said chambers, said nozzle having a mixing chamber into which the liquid is discharged from both of said primary chambers and from which it is discharged through the said liquid nozzle.

1,503,439. FIRE-ALARM SYSTEM. NATHAN H. SUREN, Needham, Mass., assignor to Gamewell Fire Alarm Telegraph Company, Newton Upper Falls, Mass., a Corporation of New York. Filed Apr. 4, 1919. Serial No. 287,502. 37 Claims. (Cl. 177—369.)

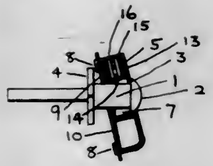
1. In a fire alarm system having a main line circuit and an auxiliary loop on said circuit, a box starting attachment for a main line box provided with a starting magnet the windings of which are included in the main line circuit and shunted by said auxiliary loop, said attachment having means responsive to a temporary break in said auxiliary loop to start the box and also responsive to a continuing break in said loop to transmit a specific signal to the central station indicative of a line fault.



1,503,440. MEANS FOR INTERCONVERTING ALTERNATING AND DIRECT CURRENT. JOSEPH LESTER WOODBRIDGE, Philadelphia, Pa. Filed Nov. 15, 1918. Serial No. 262,731. 10 Claims. (Cl. 171—123.)

1. Apparatus for interconverting direct and alternating currents comprising the combination of a polyphase alternating current circuit, a direct current circuit, a winding operatively connected to each phase of the polyphase circuit and provided with taps, two relatively displaced pairs of brushes, co-operating with the taps of each winding, means for simultaneously shifting the brushes of each pair in opposite directions along the corresponding taps, means for connecting one of said pairs of brushes for each winding in series across the direct current circuit, means electrically independent of the direct current circuit for interconnecting the other brushes in pairs and means for adjusting the relative position of the two pair of brushes for each winding, substantially as described.

9. In apparatus for interconverting direct and alternating currents, the combination of a transformer winding provided with taps, two commutators whose segments are alternately active and dead, and whereof the active segments of each commutator are interconnected in pairs, connections from alternate taps to consecutive pairs of active segments of each commutator respectively, a pair of brushes for each commutator, so located that when one pair is in contact with dead segments of one commutator, the other pair is in contact with active segments of the other, and means for producing relative rotation of commutators and brushes, substantially as described.



1,503,441. TRAVERSE MECHANISM. BYRON E. WOODCOCK, EUGENE F. MONNIA, and ALBERT C. REESE, Scranton, Pa. Filed June 2, 1923. Serial No. 643,019. 20 Claims. (Cl. 242—43.)

1. In apparatus of the class described, the combination with a row of winding spools and a cooperating traverse bar, of a lever fulcrumed on a normally fixed

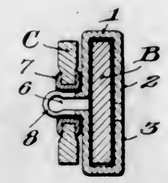
pivot and connected with said traverse bar, a cam located to one side of the pivot of said lever and cooperating with said lever to actuate the same, and means for adjusting said cam lengthwise of said lever.

1,503,442. SEPARABLE FASTENER. GEORGE HENRY ELWELL, Cleveland, Ohio, assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Maine. Filed Dec. 4, 1922. Serial No. 604,875. 9 Claims. (Cl. 24—211.)

1. A separable fastener comprising a stud member including a stud-post and a stud-head, said stud-head having a rearwardly facing abrupt shoulder; and a socket member having a suitable casing, said casing providing a rigid stud-post-engaging element; a yielding element mounted within said casing and diametrically opposing said rigid element, said yielding element having two stud-post-engaging angles, the distance between said angles definitely predetermining the necessary degree of tipping movement of one of the fastener members upon the other by which, by said movement alone, said members are separable when said yielding element is in positive interlocked engagement behind said abrupt shoulder.

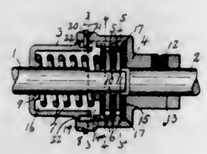
1,503,443. PROCESS AND MATERIAL FOR PREPARING METAL FOR COATING. JAMES H. GRAVELL, Elkins Park, Pa. Filed Jan. 20, 1923. Serial No. 614,044. 9 Claims. (Cl. 148—8.)

1. The method of cleaning metal consisting in subjecting it to the action of an alkali metal compound in the presence of an alcohol which boils at a higher temperature than ethyl alcohol.



6. A composition of matter for cleaning surfaces consisting of an admixture containing hydroxyl ions and an alcohol which boils at a higher temperature than ethyl alcohol.

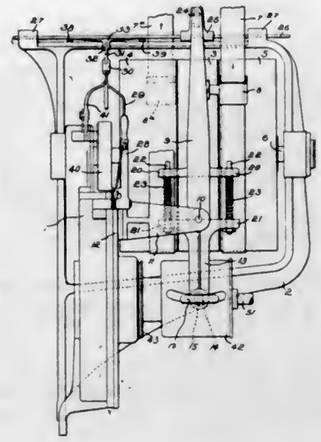
1,503,444. RAILWAY-CROSSING GATE. SILVIA N. HANKS, Okolona, Miss. Filed Feb. 28, 1924. Serial No. 695,794. 3 Claims. (Cl. 246—293.)



2. A crossing gate comprising posts, bars pivoted upon the posts, shafts journalled adjacent the posts and operatively connected with the bars, means operatively connecting the shafts together, a shaft journalled adjacent one of the first mentioned shafts and having a return bend end portion, fingers pivoted upon the last mentioned shafts and operatively connected with the adjacent first mentioned shafts, said return bend portion being disposed between said fingers, the last mentioned shafts having an angularly disposed arm with a roller journalled thereon and which is disposed adjacent a track rail of the crossing.

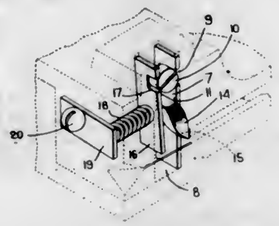
1,503,445. BRACELET. GEORGE D. HARRISON, North Attleboro, Mass., assignor to Providence Stock Company, Providence, R. I. Filed Jan. 15, 1924. Serial No. 686,274. 6 Claims. (Cl. 24—77.)

6. In a bracelet end connector, a slide formed of a band encircling the bracelet and having its ends formed for interengagement and disposed in substantially a common plane, and a removable connection between the slide and the bracelet end.



1,503,446. SHAFT COUPLING. MEAD HEDGLON, Syracuse, N. Y., assignor to Syracuse Washing Machine Corporation, Syracuse, N. Y., a Corporation of New York. Filed July 24, 1922. Serial No. 577,093. 3 Claims. (Cl. 64—106.)

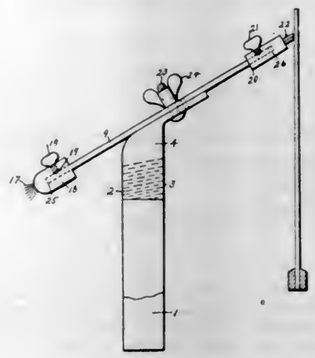
1. The combination with coaxial shaft sections, the inner end of one section being flattened, of a coupling section secured to the other shaft section and provided with a socketed extension surrounding said flattened end and having internal lengthwise ribs, coaxial friction disks surrounding said flattened end and spring pressed toward the end wall of the socket, some of the disks being engaged with the ribs to rotate with said extension, the remaining disks being engaged with the flattened end to rotate therewith, and an additional coupling section having threaded telescopic connection with the first named coupling section for varying the tension of the spring and thereby varying the pressure of the disks against each other and against the end wall of the adjacent socket, the telescopic ends of the coupling sections being provided respectively with a peripheral notch, and a locking pin movable into and out of said notch for preventing and permitting relative rotation of the coupling sections.



1,503,447. REVERSING MECHANISM. FRITZ W. A. HENRICI, Boston, Mass., assignor to Henrici Laundry Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed Sept. 15, 1919. Serial No. 323,845. 16 Claims. (Cl. 64—4.)

1. Reversing mechanism comprising an operating pulley, a plurality of idlers, a driven member, connections between the same and the operating pulley, a belt on each idler running in opposite directions, a belt shipper, a reversing shaft rotated by the driven member, and connections between the shipper and reversing shaft

including a two part yieldingly connected shipper lever, permitting relative retardation of one lever member, to reverse the direction of motion of the operating pulley.

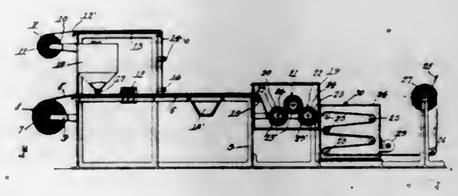


1,503,448. THREAD-CUTTING TEMPLE FOR LOOMS. ALFRED A. HULL, Knoxville, Tenn., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Jan. 3, 1924. Serial No. 684,144. 3 Claims. (Cl. 139—303.)

1. A thread cutting temple for looms comprising a vertical stationary cutter member mounted in the temple head, a backwardly and forwardly movable cutter member cooperating with the stationary cutter member to sever the thread, a metal plate mounted in the temple head to swing laterally at its upper end and engaging the movable cutter member at the side opposite the stationary cutter member, and a spring mounted in the temple head and engaging the metal plate below the axis about which it swings and acting yieldingly to force the metal plate against the removable cutter member and thereby to force the cutting edge of the movable cutter member into engagement with the edge of the stationary cutter member during the cutting stroke.

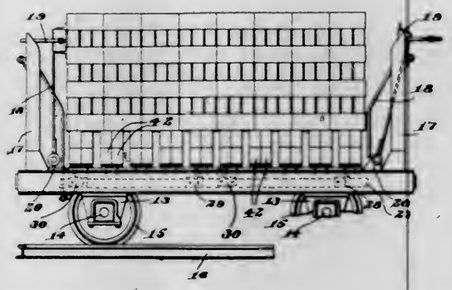
1,503,449. CLEANING IMPLEMENT. JOHN M. BOWEN, Newark, N. J. Filed Feb. 28, 1923. Serial No. 621,852. 2 Claims. (Cl. 15—117.)

1. A device of the kind described comprising a handle, a socket for one end of the handle, said socket being provided with a lug extending at an angle to the handle, a rigid bar having two prongs at each end, and provided with an opening therethrough intermediate the ends thereof, means connected with said lug and extending



through the opening in said bar, means engageable with the last named means to clamp said bar and lug together in selected positions, and cleaning means attached to each pair of said prongs.

1,503,450. CLEANING COMPOUND. WILLIAM KUYKENDALL, Los Angeles, Calif. Filed Sept. 7, 1923. Serial No. 661,521. 2 Claims. (Cl. 87—5.)

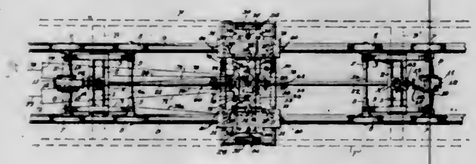


1. A cleaning compound consisting of hydrochloric acid, sodium chloride, vinegar, water and coal oil.

1,503,451. METHOD OF PRODUCING CRINKLED PAPER AND PRODUCT OBTAINED THEREBY. EBERHARD KLEPPER, Crimmitschau, Germany, assignor, by direct and mesne assignments, of three-eighths to Herman Stern, New York, N. Y., and thirty-seven and one-half per cent to John F. Hayes, Washington, D. C., and twenty-five per cent to Samuel B. Sutphin, William F. Ross, and Ralph W. Ross. Filed Dec. 10, 1923. Serial No. 679,790. 4 Claims. (Cl. 154—35.)

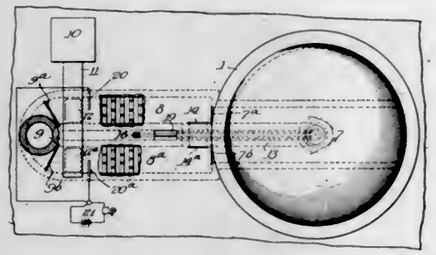
2. The hereindescribed method of producing tapestry paper, comprising effecting the longitudinal travel of the backing sheet upon a relatively long flat support, applying a paste to the upper surface of the backing sheet while thus traveling and supported, feeding a crinkled tissue paper to the upper surface of the backing sheet thus treated whereby the two sheets are united without substantially removing the crinkles from the tissue paper, subjecting the superposed sheets thus treated to the action of a drying heat which progressively increases in the direction of travel of said sheets.

1,503,452. FINGER-COURSE UNIT CAR. CLAUD E. FULLER, New York, N. Y. Filed June 2, 1922. Serial No. 565,378. 6 Claims. (Cl. 214—6.)



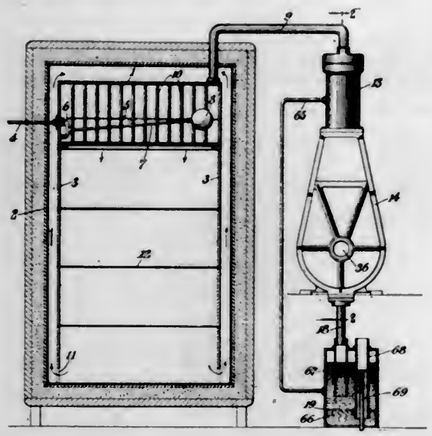
1. In an improved finger course unit car, the combination of a frame, a plurality of parallelly arranged bars or plates extending laterally of said frame, and means for arranging said plates or bars in pairs.

1,503,453. BELT AND METHOD OF MAKING THE SAME. ELMER G. KIMMICH, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Nov. 17, 1921. Serial No. 515,859. 8 Claims. (Cl. 154—4.)



7. A method of making belts that comprises treating a plurality of layers of fabric with a vulcanizable material, superposing the treated layers, treating fabric upon one side with a vulcanizable material, applying it to the superposed layers with its untreated side exposed, vulcanizing the vulcanizable material of the body thus formed and applying a coating of nitrocellulose to the untreated fabric surface.

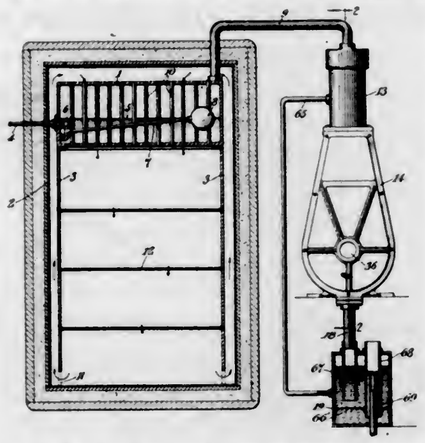
1,503,454. AUTOMOTIVE RAILWAY CAR. HENRY FORD, Dearborn, Mich. Filed May 13, 1921, Serial No. 469,146. Renewed June 30, 1924. 15 Claims. (Cl. 105—62.)



4. In a railway car, the combination with a car frame having a transverse sub-frame hung thereunder intermediate its length, a flexible suspension for the sub-frame, and a power plant mounted on the sub-frame with its driving shaft extending longitudinally of the car frame, of a pair of wheel trucks each having a pair of transverse axles supporting the car frame at one of a pair of longitudinally spaced points disposed one on either side of the sub-frame, a king bolt connection between the car frame and each of the trucks, an axle drive on each of the relatively remote axles of the trucks, and a propeller shaft extending from each end of the driving shaft of the power plant to the corresponding axle drive.

1,503,455. KILN. ENOCH P. STEVENS, Morgan Park, Chicago, Ill.; Mary Ann Stevens executrix of said Enoch P. Stevens, deceased. Filed May 11, 1921. Serial No. 468,646. 12 Claims. (Cl. 25—145.)

1. In a kiln, a hot air flue, a pipe for supplying liquid fuel to the kiln passing through said hot air flue, and a cooling jacket surrounding said pipe within said hot air flue.

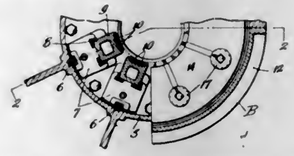


1,503,456. PROCESS OF REFRIGERATING. KENNETH L. CURTIS, New York, N. Y. Filed Feb. 28, 1922. Serial No. 539,881. 1 Claim. (Cl. 62—178.)

Process of refrigerating under regulation by an inherent property of the saturated vapor of the refrigerant to automatically maintain a suitable refrigerating temperature, which comprises, maintaining a body of water at a constant level in a closed space which is to be maintained at a refrigerating temperature above 32° Fah., evaporating the water in said space and removing the vapor by suction, the suction means operating continuously and at a constant speed to remove water vapor at a constant rate volumetrically, the suction means operating at such rate and being so proportioned that it will not freeze the refrigerant under ordinary low temperatures to which household refrigerators are subjected, and will maintain, with the varying density of the vapor, the temperature of said body of water, at approximately the desired point above 32° Fah.

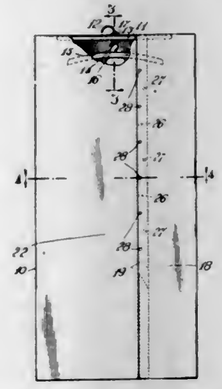
1,503,457. REFRIGERATING APPARATUS. KENNETH L. CURTIS, New York, N. Y. Filed Aug. 12, 1922. Serial No. 581,304. 2 Claims. (Cl. 62—168.)

2. In refrigerating apparatus, the combination of a refrigerating chamber, a refrigerant chamber within said refrigeating chamber and having a number of air passages therethrough for the circulation of air, automatic means for maintaining the level of refrigerant in said refrigerant chamber, a compound suction pump connected with the refrigerant chamber for sucking vapors from the refrigerant to evaporate the latter from the chamber, and



means contolled by pressure in the refrigerant chamber to render the pump single acting at a predetermined pressure in the refrigerant chamber whereby the pump is automatically controlled to prevent excess load thereon due to compound action of the pump at high pressures.

1,503,458. PUMP. KENNETH L. CURTIS, New York, N. Y. Original application filed Feb. 28, 1922, Serial No. 539,881. Divided and this application filed Aug. 16, 1922. Serial No. 582,128. 25 Claims. (Cl. 230—32.)



13. In pumping apparatus, the combination of a cylinder and piston, a valve chamber at one end of the cylinder, a valve seat, an exhaust valve within the chamber adapted to seat on said seat, an inlet port beneath said seat, a sleeve valve controlling said port, a passage leading to the inlet port, a shunt passage around said inlet port and connecting said first passage and valve chamber, an exhaust passage leading from said chamber for communication with suction means, and an automatically operated valve for closing said shunt passage and comprising one or more hermetically sealed expansible containers containing a suitable fluid which will expand responsive to reduction of surrounding pressure to a predetermined point to close said shunt passage.

1,503,459. SHAFT BEARING FOR HYDRAULIC MACHINES. JOHN OVERN, Jr., Philadelphia, Pa., assignor to William Cramp & Sons Ship and Engine Building Company, a Corporation of Pennsylvania. Original application filed May 13, 1921, Serial No. 469,361. Divided and this application filed Nov. 15, 1923. Serial No. 674,908. 12 Claims. (Cl. 64—56.)

1. A bearing for hydraulic machines comprising a plurality of separate adjustable bearing-blocks, each containing a plurality of wearing strips, separated by spaces for the flow of fluid.

1,503,460. PROTECTIVE ENVELOPE FOR GARMENTS. MAURICE D. K. BREMNER, Chicago, Ill. Filed Dec. 17, 1923. Serial No. 681,043. 3 Claims. (Cl. 206—7.)

1. A garment protector of the type described comprising a fabric bag provided with opposed edges adapted to be secured together substantially to seal the bag against the ingress of dust and insects, each of said edges being folded and stitched upon itself to provide a pocket which opens toward the corresponding pocket of the other edge, and means for securing the side walls of one pocket to the adjacent side walls of the other pocket when said walls are disposed in parallelism with each pocket receiving one of the side walls of the other pocket.

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

Abendroth Brothers, Port Chester, N. Y. Soil pipe and fittings for same. 185,952; July 1; Serial No. 189,345; published Apr. 22, 1924.

Abendroth Brothers, Port Chester, N. Y. Coal ranges and gas ranges. 186,212; July 1.

Alford, Harry L., Chicago, Ill. Publications. 186,095; July 1; Serial No. 192,350; published Apr. 8, 1924.

Aliaire, Woodward & Co., Peoria, Ill. Liquid spray to be used against flies, mosquitoes, moths, etc. 186,030; July 1; Serial No. 188,944; published Apr. 1, 1924.

Allen-Rethemeyer Co., St. Louis, Mo. Coffee, tea, cocoa, spice, etc. 186,089; July 1; Serial No. 173,386; published Apr. 22, 1924.

American Agricultural Chemical Company, The, New York, N. Y. Meat and bone scrap poultry feed. 185,975; July 1; Serial No. 193,491; published Apr. 22, 1924.

American Rubbing Stone Company, The, Cincinnati, Ohio. Rubbing stone and rubbing-stone powder. 186,239; July 1.

American Taximeter Company, The, New York, N. Y., assignor to Ohmer Fare Register Company, Dayton, Ohio. Taximeters. 186,111–12; July 1; Serial Nos. 193,374–5; published Apr. 22, 1924.

Animate Toy Company, New York, N. Y. Mechanical animal toys. 186,174; July 1; Serial No. 191,867; published Apr. 22, 1924.

Anzora Perfumery Company, Limited, The, Kilburn, London, England. Preparation for the hair and skin. 186,162; July 1; Serial No. 152,879; published Apr. 22, 1924.

Ardath Tobacco Company, Limited, London, England. Cigarettes. 186,091; July 1; Serial No. 171,977; published Apr. 22, 1924.

Arnold, F. R., & Co., New York, N. Y. Bath salts and toilet powder. 186,047; July 1; Serial No. 191,159; published Apr. 15, 1924.

Art Metal Works, Inc., The, Newark, N. J. Sound devices for toys. 186,115; July 1; Serial No. 193,317; published Apr. 22, 1924.

Artis, Foster, Chicago, Ill. Preparation for the treatment of rheumatism, burns, etc. 185,994; July 1; Serial No. 191,934; published Apr. 8, 1924.

Arvoy, née Renoux, Blanche, doing business as Jovoy, Paris, France. Perfume, toilet water, face powder, talcum powder, rouge, etc. 186,005; July 1; Serial No. 191,139; published Apr. 1, 1924.

Babani, Maurice, Paris, France. Perfume extracts, toilet water, face lotions, etc. 186,003; July 1; Serial No. 191,520; published Apr. 1, 1924.

Babani, Maurice, Paris, France. Perfume extracts, toilet water, face lotions, etc. 186,004; July 1; Serial No. 191,518; published Apr. 1, 1924.

Babcock, Rauldon K., doing business as The Bermudine Company, New York, N. Y. Shampoo powder. 186,032; July 1; Serial No. 185,071; published Apr. 8, 1924.

Baker, Franklin, Company, Philadelphia, Pa. Prepared toasted coconut. 186,136; July 1; Serial No. 172,151; published Apr. 22, 1924.

Baldwin Tool Works, Parkersburg, W. Va. Shovels, spades, scoops, posthole diggers, and wooden handles. 186,094; July 1; Serial No. 166,637; published Apr. 22, 1924.

Baltzly, Stanley M., doing business as The Baltzly Company, Massillon, Ohio. Preparation for removing dandruff and stimulating the growth of the hair, etc. 185,986; July 1; Serial No. 192,002; published Apr. 8, 1924.

Barnett, G. & H., Company, Philadelphia, Pa. Files and rasps. 186,114; July 1; Serial No. 193,319; published Apr. 22, 1924.

Bartley, John T., doing business as John T. Bartley & Co., Beaver Falls, Pa. Paint cleaner. 186,224; July 1.

Barwood, Leon J., doing business as L. J. Barwood Mfg. Co., Stoneham, Mass. Washers, leathers, gaskets, and packings. 186,198; July 1.

Beeler, Clara L., doing business as The Beeler Mills, Pleasant Hill, Mo. Powder used in the manufacture of ice cream and ices. 186,124; July 1; Serial No. 192,660; published Apr. 15, 1924.

Berbecker & Rowland Mfg. Co., The, Waterville, Conn. Furniture nails. 186,117; July 1; Serial No. 193,209; published Apr. 22, 1924.

Berkoline Chemical Co. (See Berkowitz, Annie.)

Berkowitz, Annie, doing business as Berkoline Chemical Co., Brooklyn, N. Y. Preparation for the hair, preparation for the treatment of pyorrhea, and a preparation for foot ailments. 186,000; July 1; Serial No. 191,811; published Apr. 8, 1924.

Bermudine Company, The. (See Babcock, Rauldon K.)

Birch-Field, Charles A., New York, N. Y. Chewing gum. 186,145; July 1; Serial No. 184,635; published Apr. 22, 1924.

American Narrow Fabric Company. (See Hazelton, Carl J., assignor.)

American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)

American Telephone and Telegraph Company. (See Loynes, Owen H., assignor.)

American Voith Contact Company. (See Priem, Paul, assignor.)

American Zeolite Corporation. (See Willcox, Oswin W., assignor.)

Amis, Lewis A., Muskogee, Okla. Oil container. Des. 65,044; July 1.

Anderson, Alfred R., Rock Springs, Wyo. Car brake. 1,499,439; July 1.

Anderson, Eric H., Magna, Utah. Air pan. 1,499,496; July 1.

Anderson, Robert J., assignor to C. H. Washburn, Minneapolis, Minn. Storage-battery cell. 1,499,901; July 1.

Andrews, Russell J., Denver, Colo. Automatic siphon. 1,499,568; July 1.

Ansart, Louis L., assignor to Underwood Computing Machine Company, New York, N. Y. Combined typewriting and computing machine. 1,499,326; July 1.

Armstrong, Claude K., Princeton, W. Va. Mop. 1,500,042; July 1.

Armstrong Siddeley Motors Limited. (See Green, Frederick M., assignor.)

Arnold, Clarence L., Columbus, Ga. Closure for tanks or the like. 1,499,629; July 1.

Aronsson, Karl H., Huvudsta, assignor to E. J. Wiel-Berggren, Morby, Stocksund, Sweden, forester. Portable wall section for house building. 1,499,630; July 1.

Asper, Albert C., Kansas City, Mo. Automobile starting device. 1,500,043; July 1.

Atlee, Edward. (See Rule, William C., assignor.)

Atwell, Lewis E., J. Grant, and C. E. White, Jacksonville, Fla. Shock absorber. 1,500,044; July 1.

Auchstetter, William, Idagrove, Iowa. Shield for vehicle headlights. 1,499,961; July 1.

Augur, Erroll M., New Haven, Conn. Shoe heel. 1,499,601; July 1.

Austin, Ralph W., Quincy, Mass. Fire extinguisher. 1,499,631; July 1.

B. & S. Manufacturing Products Corporation. (See Braden, R. W., and Stern, assignors.)

Babcock, Pearl D., Milford, Conn., assignor to L. Candee & Company. Collapsible last. 1,499,758; July 1.

Bacharach, Herman, Pittsburgh, Pa., assignor to Bacharach Industrial Instrument Company. Gauge. 1,499,759; July 1.

Bacharach Industrial Instrument Company. (See Bacharach, Herman, assignor.)

Badische Maschinenfabrik & Eisengiesserei vorm. G. Sebold and Sebold & Neff. (See Henninger, Ludwig, assignor.)

Badowski, Alfred, assignor, by mesne assignments, to Tiregage Valve Corporation, Charleston, W. Va. Pressure gauge for tires. 1,499,327; July 1.

Badowski, Alfred, assignor, by mesne assignments, to Tiregage Valve Corporation, Charleston, W. Va. Pressure gauge for tires. 1,499,328; July 1.

Badowski, Alfred, assignor to Tirometer Valve Corporation, Charleston, W. Va. Pressure gauge for tires. 1,499,497; July 1.

Bailly, Armand, Paris, France. Pneumatic hammer. 1,499,569; July 1.

Baker, Joseph, Sons & Perkins Company. (See Baker, R. K., and Harber, assignors.)

Baker, Robert E., Bronxville, and L. S. Harber, Katonah, assignors to Joseph Baker Sons & Perkins Company, Inc., White Plains, N. Y. Conveyer for plastic bodies. 1,499,799; July 1.

Bandelier, Alphonse, Lausanne, Switzerland. Dust-laying device for motor vehicles. 1,499,760; July 1.

Banke, Herbert, Maywood, Ill., assignor to American Can Company, New York, N. Y. Clutch ring. 1,499,632; July 1.

Bannister, Bryant, Pittsburgh, Pa., assignor to Bannister Motor Appliance Company. Carburetor. 1,499,800; July 1.

Bannister Motor Appliance Company. (See Bannister, Bryant, assignor.)

Bardern, Jose M., New York, N. Y. Sugar holder. 1,499,902; July 1.

Barman, Louis M., assignor to Ronco Limited, London, England. Inking device or attachment more particularly for use with addressing machines. 1,499,329; July 1.

Barman, Louis M., assignor to Ronco Limited, London, England. Addressing machine or like printing machine. 1,499,330; July 1.

Barnaby, George. (See Spry, William M., assignor.)

Barnes, John, Manistique, Mich. Pipe joint. 1,499,962; July 1.

Barnes, Wilfred, Forest Park, assignor to Edison Electric Appliance Company, Inc., Chicago, Ill. Combined electric-heater casing and standard. Des. 65,045; July 1.

Barnes, Wilfred, Forest Park, assignor to Edison Electric Appliance Company, Inc., Chicago, Ill. Combined electric-heater casing and standard. Des. 65,046; July 1.

Barnes, Wilfred, Forest Park, assignor to Edison Electric Appliance Company, Inc., Chicago, Ill. Combined electric-heater casing and standard. Des. 65,047; July 1.

Bartlett, Robert G., Pleasantville, N. J. Rotary cutter. 1,500,045; July 1.

Batsel, Max C., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Wireless receiving circuit. 1,499,331; July 1.

Baumann, Karl, Urmston, England, assignor, by mesne assignments, to Westinghouse Electric and Manufacturing Company. Fluid-pressure support for bearings. 1,499,332; July 1.

Beck, Adolph, Brooklyn, N. Y. Dish drier. 1,499,903; July 1.

Becker, Hans, Dusseldorf, Germany. Lathe. 1,499,633; July 1.

Beckman, Oswald E., Mediapolis, Iowa. Combination lock for sedans and coupés. 1,499,963; July 1.
Beckwith, Harry H. (See Swett, Charles E., assignor.)
Beckwith, Raymond A., assignor to National Brake & Electric Company, Milwaukee, Wis. Transmission. 1,499,634; July 1.
Becton, William L., Halls, Tenn. Backband buckle. 1,499,333; July 1.
Beers, Burton B. (See Labadie, H. H., Beers, and Brand.)
Belair, Joseph A., and R. M. Scott; said Scott assignor to J. Darcy, Montreal, Quebec, Canada. Oil burner. 1,499,848; July 1.
Bell, Chriss A., administrator. (See La Moree, James H.)
Bell, Raymond T., Chicago, Ill. Pencil. 1,499,440; July 1.
Bell Register Corporation. (See Bell, S. J., Bullard, and Cosgrove, assignors.)
Bell, Samuel J., F. H. Bullard, Springfield, and R. E. Cosgrove, Longmeadow, assignors, by mesne assignments, to Bell Register Corporation, Springfield, Mass. Fare box. 1,499,904; July 1.
Bell, Walter, Hamilton, Ontario, Canada. Material holder and carrier for dyeing yarn on cheeses. 1,500,046; July 1.
Bell, William C., Baltimore, Md. Piston unit. 1,499,964; July 1.
Benckenstein, Charles H., Vinton, La. Tubing spider. 1,499,635; July 1.
Bergman, William G., Toledo, Ohio. Glass-molding machine. 1,499,334; July 1.
Berkins, Clarence A., Minneapolis, Minn. Hydrocarbon burner. No. 1,499,335; July 1.
Bethlehem Steel Company of New York, Inc. (See Abbott, Franklin E., assignor.)
Beyerle, Gottlob W., Denver, Colo. Automatic oyster shucker. 1,499,965; July 1.
Blas, Stanley C., Harrisburg, Pa. Toy. 1,500,047; July 1.
Bibbins Ball Compass, Inc. (See Bibbins, Royal E., assignor.)
Bibbins, Royal E., assignor to Bibbins Ball Compass, Inc., New York, N. Y. Compass. 1,499,602; July 1.
Blenenstok, Edgar A., assignor to Milwaukee Tank Works, Milwaukee, Wis. Welding machine. 1,499,498; July 1.
Blenenstok, Edgar A., assignor to Milwaukee Tank Works, Milwaukee, Wis. Welding machine. 1,499,499; July 1.
Billé, Léon, Nogent-sur-Marne, France. Method of and apparatus for use in the manufacture of pipes, tubes, and the like. 1,499,719; July 1.
Bimler, Joseph J., Michigan, N. Dak. Coal scuttle. 1,500,048; July 1.
Bisaillon, Hector E. (See Mills, W. S., and Bisaillon.)
Bishop, George W., New York, N. Y. Game apparatus. 1,499,905; July 1.
Bissell, Don W., Buffalo assignor to National Aniline & Chemical Co., Inc., New York, N. Y. Production of m-amino-benzaldehyde. 1,499,761; July 1.
Blackburn, Jasper, Webster Groves, Mo. Differential drive clutch for automobiles. 1,499,336; July 1.
Blackman, Samuel, Philadelphia, Pa. Bottle. Des. 65,048; July 1.
Blatchford, Carter, Chicago, Ill. Metal roof for freight cars. 1,499,337; July 1.
Bloom, Edgar J., Tiffin, Ohio. Accelerator mechanism. 1,499,849; July 1.
Bloss, Richard R., assignor to The International Derrick & Equipment Company, Columbus, Ohio. Bull-wheel structure. 1,499,500; July 1.
Blumenthal, Sidney, & Co. (See Kozlay, Clarence V., assignor.)
Bohl, Hugo E., Bayonne, N. J., assignor to Radiant Lighting Fixture Co., Inc. Ring for lighting fixtures. Des. 65,049; July 1.
Bohl, Hugo E., Bayonne, N. J., assignor to Radiant Lighting Fixture Co., Inc. Ring for lighting fixtures. Des. 65,050; July 1.
Bohl, Hugo E., Bayonne, N. J., assignor to Radiant Lighting Fixture Co., Inc. Arm for lighting fixtures. Des. 65,051; July 1.
Boitel, Alexandre, Puteaux, assignor to G. Delmousse, Paris, France. Loom shuttle. 1,499,603; July 1.
Bolstead, Lewveau L., Oconomowoc, Wis. Intermittent feed for machines. 1,499,441; July 1.
Bond, Charles L., Boston, assignor to P. E. Ginn, Jamaica Plain, Mass. Machine for filling containers. 1,499,338; July 1.
Bond, Frank A., Pittsburgh, Pa., assignor to United States Chain & Forging Company. Case-hardening process. 1,499,801; July 1.
Bonnard, Leonard H., London, England. Retort and furnace. 1,499,850; July 1.
Bonneau, Edward W., et al. (See Renstrom, George A., assignor.)
Boonzaier, Gregorio J., et al., executors. (See Boonzaier, Wilhelm G.)
Boonzaier, Wilhelm G., deceased, New Wandsworth, London, England; I. K. Holland and G. J. Boonzaier, executors. Automatic coupling for railway and like vehicles. 1,499,966; July 1.
Booth, Ralph W., Brooklyn, N. Y. Making cork disks. 1,499,636; July 1.
Borck, Michael. (See Convette, George, assignor.)
Bowers, Edward, Paducah, Ky. Vibratory platform. 1,499,967; July 1.
Boykin, Robert O., Rogue River, Oreg. Hammer. 1,499,501; July 1.
Braden, Richard W., New York, N. Y., and C. Stern, assignors to B. & S. Manufacturing Products Corporation, Jersey City, N. J. Attachment for locomotives. 1,499,637; July 1.
Brake, Lloyd A., Crawfordsville, Ind. Car-controlling device. 1,499,638; July 1.
Brand, William M. (See Labadie, H. H., Beers, and Brand.)
Brault, Bruno, Two Rivers, Wis. Time-controlled apparatus. 1,499,968; July 1.
Breneman, Paul E., Philadelphia, Pa., assignor to C. R. Wilson Body Company, Detroit, Mich. Detachable upholstery for metallic bodies of vehicles. 1,499,339; July 1.
Brenkert, Joseph W., San Diego, Calif. Traffic-signaling apparatus for street crossings. 1,499,906; July 1.
Brink, Edward H. (See De Long, Arthur R., assignor.)
Brinton, H., Company. (See Larkin, Walter, assignor.)
Bristow, Francis G. W., Sydney, New South Wales, Australia. Sheep-shearing-machine comb. 1,499,604; July 1.
British Cotton Industry Research Association, The. (See Oxley, Arthur E., assignor.)
Brogan, William. (See McGrath, William H., assignor.)
Brooks, John W., Boise, Idaho. Curtain holder. 1,500,049; July 1.
Brown, John W., jr., Philadelphia, Pa. Swivel joint for pipes. 1,499,851; July 1.
Brown, Ora S., Virginia, Minn. Clothes-washing machine. 1,499,605; July 1.
Brown, Roy R., Glens Falls, N. Y. Dumping wagon. 1,499,969; July 1.
Brown, Samuel H., Cleveland, Ohio. Storage battery. 1,499,907; July 1.
Browning, Howard E., Chester, Ill. Air heater. 1,499,442; July 1.
Brunner Manufacturing Company. (See Parker, George A., assignor.)
Bullard, Frederick H. (See Bell, S. J., Bullard, and Cosgrove.)
Bundy, George T., jr., Far Rockaway, N. Y. Window-shade adjuster. 1,499,340; July 1.
Bunn, Orrice E., Bristol, Tenn. Trap. 1,500,050; July 1.
Burch, Lawrence A., Jamestown, N. Y. Chuck. 1,499,639; July 1.
Burlin, Leslie H., Chicago, Ill. Wood-turning machine. 1,499,802; July 1.
Bush, Clarence, Chicago, Ill. Pilot reamer. 1,499,970; July 1.
Caillois, Pierre G., Paris, France. Safety spring barrel applicable to locks or any key-locking system. 1,499,444; July 1.
Caldwell & Drake Iron Works. (See Clay, James S., assignor.)
Caldwell, John C., Miami, Fla. Power-generating mechanism. 1,500,051; July 1.
California Cedar Products Company. (See Makowski, John F., assignor.)
Callahan, Joseph J., et al., trustees. (See Ormond, John J., assignor.)
Callison, Abner F., Philadelphia, Pa. Coupling device. 1,499,971; July 1.
Cameron, Will J., Chicago, Ill. Dental pulp tester. 1,499,341; July 1.
Camp, Percy B., Maywood, Ill., assignor to Universal Draft Gear Attachment Company. Brake mechanism for railway cars. 1,499,342; July 1.
Candee, L., & Company. (See Babcock, Pearl D., assignor.)
Canfield, Benjamin E., Holton, Kans. Camping Outfit. 1,499,972; July 1.
Canfield, William S. (See Martin, James M., assignor.)
Carmean, James H., Kansas City, Mo. Electric grate. 1,499,502; July 1.
Carr, Daniel C., Chicago, Ill. Collar-attaching device. 1,499,570; July 1.
Castillo, José F. (See Palmer, G. D., and Castillo.)
Caulfield, Carl C. (See Caulfield, Robert J. and C. C.)
Caulfield, Robert J. and C. C., Niles, Ohio. Air compressor. 1,500,052; July 1.
Cayo, Edward L., Buchanan, Mich. Top spinner. 1,499,803; July 1.
Cerini, Peter V., Monroe, Wash. Apparatus for food preparation. 1,499,852; July 1.
Champion, Sandy, Hot Springs, Ark. Wrench. 1,499,804; July 1.
Chaney, Newcomb K., Kew Gardens, N. Y., assignor to National Carbon Company, Inc. Activating carbon. 1,499,908; July 1.
Chapman, Frank C., Modesto, Calif. Fruit dipping and cleaning apparatus. 1,499,443; July 1.
Charland, Frederick A., Lyndonville, Vt. Combined step-ladder and ironing board. 1,499,343; July 1.
Chase Companies, The. (See Recker, Adolph C., assignor.)
Chatterton, Harry B., West Somerville, Mass. Elastic bandage. 1,499,895; July 1.
Chige, Isidor, and I. Zadikow, New York, N. Y. Impression tray. 1,499,344; July 1.
Chett, Edward L., Chicago, Ill. Teeth-cleaning instrument. 1,499,345; July 1.

Chott, Edward L., Chicago, Ill. Teeth-cleaning instrument. 1,499,346; July 1.
Church, Edgar D., and J. W. Van Brunt, assignors to Jackson & Church Company, Saginaw, Mich. Latch. 1,499,909; July 1.
Church, Elliott S., Newton, and F. J. Shepard, jr., Auburndale, Mass. Shock absorber. 1,499,606; July 1.
Cincinnati Car Company, The. (See Elliott, Thomas, assignor.)
Clark, Benjamin J., and J. Huhn, assignors to American Ice Company, Baltimore, Md. Closure for cold-storage compartments. 1,499,503; July 1.
Clark, Charles H. (See Gallor, C. F., and Clark.)
Claus, Emil L., assignor to Milwaukee Gas Specialty Company, Milwaukee, Wis. Ignition device for gas burners. 1,499,854; July 1.
Clay, James S., Indianapolis, assignor to Caldwell & Drake Iron Works, Columbus, Ind. Lamp post. 1,499,445; July 1.
Code, John C., Portland, Oreg. Cock. 1,499,446; July 1.
Coelman, William, Providence, R. I. Trophy cup. Des. 65,052; July 1.
Cohn, Alfred, Milwaukee, Wis. Knitted cap. Des. 65,053; July 1.
Cohn-Hall-Marx Co. (See Marx, Laurence, assignor.)
Cohn, Meyer, and W. F. Probst, Chillicothe, Ohio. Protector for collar buttons. 1,500,053; July 1.
Coltman, James E., Ilford, England. Construction of racket presses. 1,500,054; July 1.
Colton, Max, San Francisco, Calif. Neckwear contrivance. 1,499,504; July 1.
Colt's Patent Fire Arms Manufacturing Company. (See Tansley, G. H., and Pfeiffer, assignors.)
Columbia Phonograph Company. (See Roberts, T. C., and Hinckley, assignors.)
Columbus McKinnon Chain Co., The. (See Demers, Joseph J., assignor.)
Conant, Arthur P., Fort Thomas, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase bow. Des. 65,054; July 1.
Conley, Edwin J., New York, and E. J. Whalen, Howard Beach, assignors to The Conley Foil Company, New York, N. Y. Machine for wrapping and sealing metal foil. 1,499,505; July 1.
Conley Foil Company, The. (See Conley, E. J., and Whalen, assignors.)
Conley, George W., Wheaton, Ill. Smoking pipe. 1,500,055; July 1.
Conover, Claude A., Newburgh, N. Y. Pencil sharpener. 1,500,056; July 1.
Conradi, Harry, Toorak, Australia. Centrifugal manufacture of reenforced-concrete pipes and the like. 1,499,762; July 1.
Consolidated Car-Heating Company. (See Hynes, Lee P., assignor.)
Consolidated Car-Heating Company. (See Hynes, L. P., and Griffin, assignors.)
Consolidated Car-Heating Company. (See Rhodes, Robert S., assignor.)
Conte, James, Bloomington, Ill. Bottomer for candy-coating machines. 1,499,347; July 1.
Cook, Orval G., assignor to The Main-Cook Manufacturing Company, Columbus, Ohio. Machine for casting lead seals. 1,499,447; July 1.
Cooke, Arthur B., Macon, Ga. Fresh-air bed. 1,500,093; July 1.
Cooper, John W., Kingston-upon-Hull, England. Trouser press. 1,499,506; July 1.
Copeland, Lucius D., Sawtelle, Calif. Dirigible lamp. 1,499,640; July 1.
Corns, Alfred J. M., Quinnimont, W. Va. Electric-light attachment for beds. 1,500,057; July 1.
Coryell, Charles N., Mamaroneck, N. Y. Vanity case. 1,499,855; July 1.
Coryell, Charles N., Mamaroneck, N. Y. Vanity case. 1,499,856; July 1.
Cosgrove, Robert E. (See Bell, S. J., Bullard, and Cosgrove.)
Courtemanche, Peter C., Claremont, N. H. Mop wringer. 1,500,058; July 1.
Cowette, George, assignor of one-half to M. Borck, Rogers, Minn. Pump jack. 1,500,059; July 1.
Cox, George W., jr., assignor to National Assorting Company, Washington, D. C. Sorting machine. 1,499,641; July 1.
Cox, Lon F., Mertens, Tex. Fastener for bolts of cloth, ribbon, and the like. 1,499,910; July 1.
Craig, Hugh, Calgary, Alberta, Canada. Filler, tank. 1,499,642; July 1.
Crane, Frederick D., Montclair, N. J., and W. J. Schieffelin, New York, N. Y. Suppository and making the same. 1,499,348; July 1.
Crawford, Wilber D., Scottsbluff, Nebr. Skate. 1,499,448; July 1.
Creedy, Frederick, Yorkshire, England. Multispeed dynamo-electric machine. 1,499,853; July 1.
Crocker, H. S., Co. (See Harrison, Cecil B., assignor.)
Cross, Frederick J., assignor to Robeson-Rochester Corporation, Rochester, N. Y. Platter. Des. 65,055; July 1.
Crown Shock Absorber Company. (See Segura, Sidney B., assignor.)
Crummett, Richard H., and J. B. Waggoner, Monterey, Va. Brush. 1,499,507; July 1.
Curtiss, George E., assignor to Landers, Frary & Clark, New Britain, Conn. Electric toaster or similar article. Des. 65,056; July 1.
Cutler-Hammer Mfg. Co., The. (See Fernow, Bernhard E., jr., assignor.)
Cutler-Hammer Mfg. Co., The. (See Stevens, William C., assignor.)
Cutler-Hammer Mfg. Co., The. (See Stockle, Erwin R., assignor.)
Dalzell, Earline, Houston, Tex. Protector for bobbed hair. 1,499,911; July 1.
D'Ans, Jean, Berlin, Germany. Oxidizing organic substances in alkaline liquors. 1,499,798; July 1.
Darcy, John. (See Belair, J. A., and Scott, assignors.)
Daudy, Marc H., assignor to North American Lace Company, Philadelphia, Pa. Lace. Des. 65,057; July 1.
David, William J., Farwell, Nebr. Barber's haircloth. 1,499,857; July 1.
Davis, Charles E., assignor to Goodman Manufacturing Company, Chicago, Ill. Apparatus for handling ore and the like. 1,499,912; July 1.
Davis, Kenneth, assignor to R. Peale, St. Benedict, Pa. Power-transmitting and speed-reducing mechanism. 1,499,763; July 1.
Davis, Morris A., Los Angeles, Calif. Piston ring. 1,499,571; July 1.
Davis, William R., Wallace, Idaho. Fishhook holder. 1,499,858; July 1.
Dawson, James H., Brierfield Mills, near Burnley, England. Fiber-treating appliance for drawing and preparing fibers for spinning into yarns. 1,499,607; July 1.
Deane, Herbert C., Shoshone, Idaho. Hypodermic syringe. 1,499,508; July 1.
Deems, Clarence O., San Antonio, Tex. Draft connection. 1,499,859; July 1.
De Groote, Joe, Pecatonica, Ill. Belt buckle. 1,499,453; July 1.
Delas, Albert, Paris, France, assignor to Delas Condenser Corporation, New York, N. Y. Ejector with cooled walls. 1,499,349; July 1.
Delas, Albert, Paris, France, assignor to Delas Condenser Corporation, New York, N. Y. Elastic-fluid ejector. 1,499,350; July 1.
Delas Condenser Corporation. (See Delas, Albert, assignor.)
Delmousee, Georges. (See Boitel, Alexandre, assignor.)
De Long, Arthur R., Peoria, Ill., assignor to E. H. Brink, Cincinnati, Ohio. Flour sifter. 1,499,860; July 1.
Demangeon, Marcel, Amisk, Alberta, Canada. Power-driven sleigh. 1,499,806; July 1.
Demers, Joseph J., East Watertown, Mass., assignor to The Columbus McKinnon Chain Co., Columbus, Ohio. Rim-chain connecter. 1,499,913; July 1.
Denver Rock Drill Manufacturing Company, The. (See Naismith, William G., assignor.)
Detroit Butcher Supply Company. (See Gustus, John A., assignor.)
Deutsche Schweiss-Maschinen Fabrik Becker & Co., A. G. (See Dyhr, Svend, assignor.)
De Vains, Antoine R., Miribel, Ain, France. Continuous chlorluation of ligno- and pecto-cellulose by nascent chlorine for the purpose of obtaining pure cellulose. 1,500,060; July 1.
Dewey, Edson E., Lee, Mass. Automobile brake. 1,499,807; July 1.
Dibrell, James L., Little Rock, Ark. Vehicle pulling device. 1,499,351; July 1.
Diehl, Frederick, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing-machine lighting fixture. 1,499,914; July 1.
Dietsche, Adolph, assignor to American Lithographic Company, New York, N. Y. Envelope. 1,499,352; July 1.
Dietz, Carl V. (See Dietz, Emil, assignor.)
Dietz, Emil, assignor to C. V. Dietz, Indianapolis, Ind. Corner iron for trucks. 1,500,092; July 1.
Dimm, Chandos R., assignor to Robinson Manufacturing Company, Muncy, Pa. Batch mixer. 1,500,061; July 1.
Dingfeld, Albert. (See Strauss, F., and Dingfeld.)
Distin, Edward H., assignor to Kalamazoo Paper Box Company, Kalamazoo, Mich. Package for roll paper. 1,499,808; July 1.
Di Tosto, Carlo, Fairmont, W. Va. Milk-bottle opener. 1,500,015; July 1.
Doerr, Albert W., Vineland, N. J. Bottle. Des. 65,058; July 1.
Doherty Research Company. (See Allinson, John J., assignor.)
Dorey, George B., Montreal, Quebec, Canada, assignor to W. H. Miner, Chazy, N. Y. Friction draft rigging. 1,499,353; July 1.
Dorman, Harley A. (See Weiske, W. C., and Dorman.)
Dorn, Carl C., J. L. Smith, and W. P. Leister, Walhalla, S. C. Stop mechanism for looms. 1,499,449; July 1.
Dornier, Claudius, Friedrichshafen-on-the-Bodensee, assignor of one-half to the Firm: Dornier, Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Mounting of parachutes. 1,499,643; July 1.
Dornier, Metallbauten Gesellschaft mit beschränkter Haftung. (See Dornier, Claudius, assignor.)
Douglass, Samuel E., Raleigh, N. C. Dental tray attachment. 1,499,973; July 1.

Dowrello, Antone, Crockett, Calif. Automatic hose reel. 1,499,644; July 1.

Dressler, Conrad, assignor to American Dressler Tunnel Kilns, Inc., Cleveland, Ohio. Twin-tunnel kiln and operating the same. 1,499,354; July 1.

Duke, Harold H., Rockdale, Sydney, New South Wales Australia. Disk wheel for motor and other road vehicles. 1,499,809; July 1.

Dunn, Irwin L., Marietta, Ohio. Method of and apparatus for removal of fluids from wells. 1,499,509; July 1.

Dura Company, The. (See Nicholson, Stanley W., assignor.)

Dura Flim Protector Co. (See Lichte, Heinrich, assignor.)

Dutcher, Pierpont E., Upper Montclair, N. J. Digging and loading machine. 1,499,764; July 1.

Dyhr, Svend, Berlin-Charlottenburg, assignor to Deutsche Schweiss-Maschinen-Fabrik Becker & Co., A. G., Berlin-Schoneberg, Germany. Electric welding. 1,499,645; July 1.

Earles, J. R., jr. (See Merritt, Charles W., assignor.)

Eaton, William N., Washington, D. C. Measuring instrument. 1,499,861; July 1.

Ebelling, August, Berlin-Schoneberg, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Telegraphy. 1,499,646; July 1.

Eckerle, Charles E., Birmingham, Ala. Hydrocarbon-oil burner. 1,499,355; July 1.

Eddy, Howard E. (See Williston, B. T., and Eddy.)

Edison Electric Appliance Company. (See Barnes, Wilfred, assignor.)

Egg, Andrew, New York, N. Y. Nonpneumatic tire. 1,499,810; July 1.

Eichenberg, William J., assignor to Industrial Research Corporation, Toledo, Ohio. Driving mechanism. 1,499,862; July 1.

Elder, John R., Fort Edward, N. Y. Implement for folding hose. 1,499,811; July 1.

Eldridge, Leonard L., San Antonio, Tex. Slab form. 1,499,572; July 1.

Elgin, Alice M., Cabool, Mo. Sifter. 1,500,062; July 1.

Elliott, Thomas, assignor to The Cincinnati Car Company, Cincinnati, Ohio. Railway car. 1,499,510; July 1.

Elstein, William, New York, N. Y. Porcelain wall fitting. 1,499,511; July 1.

Elzey, Edgar P., Parkersburg, W. Va. Emergency traction or antiskid chain. 1,499,974; July 1.

Emsley, Annie, Providence, R. I. Combination drawers and abdominal support for men. 1,499,647; July 1.

Endres, Nickolas, Selo, Oreg. Lamp support. 1,499,450; July 1.

Ennis, Andrew C., Smithfield, N. C. Valve silencer. 1,499,573; July 1.

Enterprise Manufacturing Company. (See Pflueger, C. T., and Adams, assignors.)

Erdey, Joseph, New York, N. Y., assignor, by mesne assignments, to The Safelock Co., Inc., Cleveland, Ohio. Lock for automobile steering wheels. 1,499,356; July 1.

Erickson, Frederic W., Pelham Manor, N. Y. Pipe cutting or sawing machine. 1,499,812; July 1.

Erickson, Frederic W., Pelham Manor, N. Y. Method and machine for sawing metal articles. 1,499,813; July 1.

Erickson, Frederic W., Larchmont, N. Y. Machine for sawing metal articles. 1,499,814; July 1.

Etzenhouser, Fred H., Mount Washington, Mo. Drain valve. 1,499,451; July 1.

Evans, Arthur H., Tulsa, Okla. Barrel tongs. 1,499,574; July 1.

Evans, Frank H., Beconsfield, and H. A. Evans, South Harrow, assignors to G. S. Walpole, London, England. Embossing apparatus. 1,499,608; July 1.

Evans, Harold A. (See Evans, Frank H. and H. A.)

Evans, Henry P., Abbotsford, near Sydney, and H. S. Standen, Waverley, near Sydney, New South Wales, Australia. Fuel economizer for gas-fired stoves and the like. 1,500,063; July 1.

Falck, Johan K. B., Larvik, Norway. Speed-controlling apparatus for automobiles and the like. 1,499,765; July 1.

Farbwerke vorm. Meister Lucius & Bruning. (See Thiess, K., and Miller, assignors.)

Farley, Thomas J. (See Spurgeon, J. L., and Farley.)

Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Slack adjuster. 1,499,357; July 1.

Fehlberg, Walter F. (See Schmitt, C. O., and Fehlberg.)

Felardo, Alfred, New York, N. Y. Aeroplane kite. 1,500,064; July 1.

Feldman, Abraham G., Chicago, Ill. Bassinet or crib. Des. 65,059; July 1.

Ferguson, Herman B., New Rochelle, N. Y. Undergarment. 1,499,915; July 1.

Ferguson, Thomas T. H., Bilthoven, Netherlands. Indicator. 1,500,065; July 1.

Fernow, Bernhard E., jr., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Lifting magnet. 1,499,358; July 1.

"Ferrum" Giesserei & Maschinenfabrik, A. G. (See Hausberg, Carl, assignor.)

Field, Joseph C., Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Switching system. 1,499,766; July 1.

Filkins, Arthur J., Riverside, Ill. Smokejack. 1,499,512; July 1.

Flukesteln, Hans, Uerdingen-on-the-Rhine, Germany. Impregnating wood. 1,500,066; July 1.

Fischl, Julius, New York, N. Y. Button. 1,499,513; July 1.

Fisk Rubber Company, The. (See Marquette, Melvon A., assignor.)

Fisk Rubber Company, The. (See Midgley, Thomas, assignor.)

Floresta, John G., and J. Zanghi, Tyrone, Pa. Shoe stretcher. 1,499,815; July 1.

Fleming, James R. (See McNamara, Matthew J., assignor.)

Fletcher, Harold W., assignor to Hughes Tool Company, Houston, Tex. Well packer. 1,499,916; July 1.

Foderaro, Edward, Scranton, Pa. Electric toy. 1,499,816; July 1.

Fokker, Anthony H. G., Amsterdam, Netherlands. Arrangement and disposition of fuel tanks in flying machines. 1,499,817; July 1.

Foley, Hugh, Sourlake, Tex. Valve-seat-removing mechanism. 1,499,917; July 1.

Ford, James E., Green Bay, Wis. Artificial bait. 1,499,975; July 1.

Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Combined frequency changer and phase converter. 1,499,359; July 1.

Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Frequency-converter method and system. 1,499,560; July 1.

Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Combined phase converter and frequency changer. 1,499,918; July 1.

Foster, S. H. (See Holmes, Frederick J., assignor.)

Frahm, Frederick W., Los Angeles, Calif. Separator for storage batteries. 1,499,863; July 1.

France, Alexander, Mars, Pa. Derrick structure. 1,499,514; July 1.

Francis, Earl, Minot, N. Dak. Tire-chain shoe. 1,499,648; July 1.

Franconetti, August, Washington, D. C. Gem-seat-grooving tool. 1,499,818; July 1.

Fraser, George H., Brooklyn, N. Y. Air and other separator. 1,499,515; July 1.

Fraser, George H., Brooklyn, N. Y. Pulverizing mill. 1,499,516; July 1.

Fraser, George H., Brooklyn, N. Y. Separator. 1,499,517; July 1.

Fraser, George H., Brooklyn, N. Y. Separator. 1,499,720; July 1.

Fraser, George H., Brooklyn, N. Y. Separator. 1,499,721; July 1.

Fraser, George H., Brooklyn, N. Y. Air separator. 1,499,722; July 1.

Fraser, George H., Brooklyn, N. Y. Air separator. 1,499,723; July 1.

Fraser, George H., Brooklyn, N. Y. Fluid-current separator. 1,499,724; July 1.

Fraser, George H., Brooklyn, N. Y. Fluid-current separator. 1,499,725; July 1.

Freund Bros. & Co. (See Freund, Max, assignor.)

Freund, Joseph A., Newtonville, Mass., assignor to The Keystone Watch Case Company, Philadelphia, Pa. Watch winding device. 1,499,609; July 1.

Freund, Max, assignor to Freund Bros. & Co., Inc., New York, N. Y. Vanity box. 1,499,361; July 1.

Friderichsen, Peter C. C., Independence, Mo. Heating system. 1,499,976; July 1.

Friedmann, Firm, Alex. (See Hajek, Otto, assignor.)

Friend, Thomas S., Chicago, Ill. Can. 1,499,919; July 1.

Frisk, Frederick, assignor to Frisk Manufacturing Company, San Francisco, Calif. Auto golf-bag carrier. 1,500,067; July 1.

Frisk Manufacturing Company. (See Frisk, Frederick, assignor.)

G. & G. Fixture Co., The. (See Walker, Ernest A., assignor.)

Gailor, Chester F., Brooklyn, N. Y., and C. H. Clark, Cleveland, Ohio. Railway-track construction. 1,499,767; July 1.

Gay, Ira A., Chicago, Ill. Cigar holder and ash receiver. 1,499,452; July 1.

Gemmer, George A., Newark, N. J. Vehicle spring. 1,499,768; July 1.

General Baking Company. (See Kolb, George O., assignor.)

General Electric Company. (See Macmillan, Campbell, assignor.)

General Electric Company. (See Schade, Paul, assignor.)

Gerace, Giuseppe, Lebanon, Pa. Ice-cream-cone-baking machine. 1,499,649; July 1.

Gibbs, Joshua, and C. M. Ingram, Porter, Okla. Game rack and shell pouch. 1,499,977; July 1.

Gillis & Geoghegan, Inc. (See Hayes, Charles, assignor.)

Gillman, Herbert A., et al., trustees. (See Ormond, John J., assignor.)

Gilmore, Alfred A., Preston, Ontario, Canada. Automatic ventilator. 1,499,978; July 1.

Gilmore, John L., Holdredge, Neb. Grain shocker. 1,499,726; July 1.

Ginn, Percy E. (See Bond, Charles L., assignor.)

Glass, Arnold F., Birmingham, Ala. Gas stove. 1,499,362; July 1.

Glaudel, George, Los Angeles, assignor of forty-two and one-half per cent to G. L. Mitchell, Santa Monica, and fifteen per cent to H. Miller, South Pasadena, Calif. Glass-plate holder. 1,499,575; July 1.

Glover, Ralph V., assignor of one-half to F. H. Mathes, Rochester, N. H. Automatic safety device for vehicles. 1,499,576; July 1.

Goble, Bert G., Tulsa, Okla. Artificial fish bait. 1,499,819; July 1.

Godden, Harry M., Jamaica Plain, assignor to Norfolk Iron Company, Norfolk Downs, Mass. Conveyer. 1,499,920; July 1.

Godefroy, Marcel, New York, N. Y. Fabricated beadwork. 1,499,769; July 1.

Goetz, Leo R., Wexford, Pa. Spark plug. 1,499,921; July 1.

Goldsmith, Byron B., New York, N. Y. Mechanical pencil. 1,499,610; July 1.

Goldsmith, Byron B., New York, N. Y. Smoker's pipe. 1,499,518; July 1.

Goodel, Edward G., Stevens Point, Wis. Extracting certain valuable constituents, as by-products, from the cooking liquors, derived from the production of wood pulp to be converted into paper. 1,499,363; July 1.

Goodman Manufacturing Company. (See Davis, Charles E., assignor.)

Goodman Manufacturing Company. (See Pray, Thomas E., assignor.)

Goodman, Meyer, Brooklyn, N. Y. Combined table and ironing board. 1,500,068; July 1.

Goodrich, B. F., Company, The. (See Robertson, Samuel B., assignor.)

Goodrick, Edward W., Buffalo, N. Y. Cooking vessel. 1,499,364; July 1.

Gordon Electric Mfg. Co., The. (See Seltzer, Ira R., assignor.)

Gordon, John A., Kansas City, Mo. Air cleaner. 1,499,864; July 1.

Gossner, Joseph, New York, N. Y. Smoker's set. 1,499,650; July 1.

Gould, Courtie E., Clay, W. Va. Auger. 1,500,069; July 1.

Gooding, George E. (See Robinson, J. T., and Gooding.)

Graesser, Carl H. (See Heise, O. W., and Graesser.)

Grant, James. (See Atwell, L. E., Grant, and White.)

Gravell, James H., Elkins Park, Pa. Phosphoric acid in dehydrated form and making the same. 1,499,611; July 1.

Gray, Coleman M., Del Mar, Calif. Tuning device for wireless receiving circuits. 1,499,979; July 1.

Grebel, Stephen, Paris, France. Searchlight. 1,499,651; July 1.

Green, Fredrick M., assignor to Armstrong Siddeley Motors Limited, Park Side, Coventry, England. Framework for aircraft and other structures. 1,499,980; July 1.

Griesslieck, Robert J., St. Louis, Mo. Hood attachment for automobiles. 1,499,820; July 1.

Griffin, Percy M. (See Hynes, L. P., and Griffin.)

Griffin, Samuel P., North Judson, Ind. Clutch. 1,499,652; July 1.

Griffiths, David R., Langside, Glasgow, Scotland. Fastening means for securing fabric to a base of woodwork or other material. 1,499,821; July 1.

Grimes, Thaddeus S., assignor to Lummus Cotton Gin Company, Columbus, Ga. Cotton tramper. 1,500,070; July 1.

Groeger, John, Lincoln, Ill. Electric pencil sharpener. 1,499,519; July 1.

Gruenfeldt, Emil, Cleveland, Ohio. Electric-arc welding. 1,499,770; July 1.

Guenther, Arthur G. G., assignor to Signode System, Inc., Chicago, Ill. Box-strapping machine. 1,499,454; July 1.

Gumina, Angelo J. (See Hughes, Charles B., assignor.)

Gusdorf, Harold M., Indianapolis, Ind. Pulley. 1,499,520; July 1.

Gustafson, Adolph P., assignor to M. Schulz Company, Chicago, Ill. Drum. 1,500,095; July 1.

Gustus, John A., assignor to Detroit Butcher Supply Company, Detroit, Mich. Counter inclosure. 1,499,365; July 1.

Gutschow & Co., G. m. b. H. (See Reiss, Paul, assignor.)

Guy, Henry W., Kansas City, Mo. Automatic mail-box signal. 1,499,771; July 1.

Gwinn, George W., Brooklyn, and J. W. Leary, Hollis, N. Y., assignors to American Machine & Foundry Company. Stamp or label applying machine. 1,499,822; July 1.

H. S. & S. Manufacturing Co. (See Hartmann, Richard A., assignor.)

Habermann, Albert A. (See Neuner, M. J., and Habermann.)

Hadaway, William S., jr., New Rochelle, N. Y. Electric-arc furnace. 1,499,922; July 1.

Hadsel, Alvah D., assignor of one-half to F. N. Woods, jr., San Francisco, Calif. Impeller for rock crushers. 1,499,455; July 1.

Hagadorn, Emmett G., Buffalo, N. Y. Nutcracker. 1,499,653; July 1.

Hagemann Waldemar, Berlin-Litchterfelde, assignor to Vox Maschinen-Aktiengesellschaft, Berlin, Germany. Magnetic phonograph. 1,499,521; July 1.

Hajek, Otto, Vienna, Austria. Lubricating pump with sight feed. 1,500,071; July 1.

Hajek, Otto, assignor to the Firm Alex. Friedmann, Vienna, Austria. Lubricating device. 1,500,072; July 1.

Hall, Robert F., Moseley, near Birmingham, England. Machine for the manufacture of glass articles. 1,499,522; July 1.

Hall, Robert F., Moseley, near Birmingham, England. Machine for the manufacture of glass articles. 1,499,523; July 1.

Hall, Robert F., Moseley, near Birmingham, England. Machine for the manufacture of glass articles. 1,499,524; July 1.

Hall, Robert F., Moseley, near Birmingham, England. Machine for the manufacture of glass articles. 1,499,525; July 1.

Hall, Robert F., Moseley, near Birmingham, England. Machine for the manufacture of glass articles. 1,499,526; July 1.

Hall, Samuel N. (See Layne, M. E., and Hall.)

Hall, Samuel N., assignor to M. E. Layne, Los Angeles, Calif. Clutch device for pumps. 1,499,923; July 1.

Hallborg, Henry E., Washington, D. C. High-speed signaling system. 1,499,865; July 1.

Hammer, Charles, Hollis Court Boulevard, N. Y. Glass container. 1,499,612; July 1.

Hampden Glazed Paper & Card Company. (See Stone, Thomas L., assignor.)

Hancock, Joseph H., Scottsboro, Ala. Boll-weevil collector. 1,499,981; July 1.

Hansen Canning Machinerey Corporation. (See Hansen, Oswald H., assignor.)

Hansen, Oswald H., Fort Washington, Wis., assignor to Hansen Canning Machinery Corporation. Can-filling machine. 1,499,366; July 1.

Hanson, Bengt M. W., Hartford, Conn. Collet mechanism. 1,499,727; July 1.

Hanson, Bengt M. W., Hartford, Conn. Chuck. 1,499,728; July 1.

Hanson, Bengt M. W., Hartford, Conn. Screw-threaded-gauge device. 1,499,729; July 1.

Hanson, Bengt M. W., Hartford, Conn. Gauge instrument. 1,499,730; July 1.

Hanson, Bengt M. W., Hartford, Conn. Tolerance gauge for tapered threads. 1,499,731; July 1.

Hanson, Bengt M. W., Hartford, Conn. Chuck. 1,499,772; July 1.

Hanson, Bengt M. W., Hartford, Conn. Work driver for lathes. 1,499,773; July 1.

Harber, Laurence S. (See Baker, R. E., and Harber.)

Hargis, Harry W., Charlotte, N. C. Smoothing planes. 1,499,655; July 1.

Harper, Allen B., Tipton, Ind. Automatic railway signal. 1,499,982; July 1.

Harper, Neville C. T. (See Lamplough, F., and Harper.)

Harrison, Cecil B., assignor to H. S. Crocker Co., Inc., Los Angeles, Calif. Foldable posting tray. 1,499,527; July 1.

Hartman Brake Corporation. (See Hartman, Richard B., assignor.)

Hartman, Richard B., Cordell, Okla., assignor to Hartmann Brake Corporation. Brake band and lining. 1,499,528; July 1.

Hartman, Richard B., Cordell, Okla., assignor to Hartman Brake Corporation. Brake band and lining. 1,499,529; July 1.

Hartmann, Richard A., assignor to H. S. & S. Manufacturing Co., Hartford, Conn. Drill-press table. 1,499,456; July 1.

Haselherst, William, Baltimore, Md. Vehicle spring. 1,499,654; July 1.

Hass, Hans, Bergedorf, near Hamburg, Germany. Device for favorably guiding the propeller water of ships. 1,500,073; July 1.

Hatch, Harvey B. (See Nashlund, Axel, assignor.)

Hauseberg, Carl Brugg, assignor of one-half to "Ferrum" Giesserei & Maschinenfabrik, A. G., Rapperswil, Switzerland. Plaiting and braiding machine. 1,499,732; July 1.

Hausheer, Emil M., Schenectady, assignor to Mica Insulator Company, New York, N. Y. Machine for cutting tubular stock into continuous strips. 1,499,924; July 1.

Hayes, Charles, Brooklyn, assignor to Gillis & Geoghegan, Inc., New York, N. Y. Hoisting mechanism. 1,499,613; July 1.

Hazelton, Carl J., assignor to American Narrow Fabric Company, Worcester, Mass. Hose supporter. Re15,868; July 1.

Hegemann, Paul, Geneva, N. Y. Climbing shoe. 1,499,733; July 1.

Headson, Frank A., Milwaukee, Wis., assignor to Johns-Manville, Incorporated. Making heat-insulating coverings for pipes or similar articles and covering made thereby. 1,499,774; July 1.

Heidrich, Stephen L., Brooklyn, N. Y. Sleeper support. 1,499,983; July 1.

Heidrich, Stephen L., Brooklyn, N. Y. Support. 1,499,984; July 1.

Hein, Richard, Witkowitz, Czechoslovakia. Means for supporting the rolls of rolling mills. 1,499,656; July 1.

Heinzel, Joseph, Grantwood, N. J. Oil burner. 1,499,734; July 1.

Heise, Otto W., and C. H. Graesser, Bridgeport, Conn., assignors to Manning, Maxwell & Moore, Inc., New York, N. Y. Pressure gauge. 1,499,657; July 1.

Hejda, Joseph W., Virginia, Minn. Device for freeing points of a perforating rule from paper or any material being perforated. 1,499,457; July 1.

Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,499,775; July 1.

Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Fan and dial pendulum scale. 1,499,776; July 1.

Hemco Electric Manufacturing Company. (See McKinley, Benjamin P., assignor.)

Henderson, John W., Tunica, Miss. Truck. 1,499,330; July 1.

Henninger, Ludwig, assignor to Badische Maschinenfabrik & Eisengiesserei vorm. G. Sebold and Sebold & Neff, Durlach, Germany. Match-box-filling machine. 1,499,614; July 1.

Henter, Leo A., assignor to Nu-Comb Manufacturing Company, Hot Springs, Mont. Comb. 1,499,577; July 1.

Hera, Robert A., Connersville, Ind. Stop and check valve. 1,499,578; July 1.

Herr, Park A., Hillside, N. J., assignor to The Singer Manufacturing Company. Bobbin-winding machine. 1,499,925; July 1.

Herring, Frank D., assignor of one-half to J. W. Herring, Cuero, Tex. Thread cutter. 1,499,823; July 1.

Herring, John W. (See Herring, Frank D., assignor.)

Herrman, Paul E., New York, N. Y. Apparatus for hair waving. 1,499,367; July 1.

Herzog, C. J., et al. (See Loughridge, Howard R., assignor.)

Herzog, L. W., et al. (See Loughridge, Howard R., assignor.)

Hickey, James L., Milwaukee, Wis. Jack. 1,499,777; July 1.

Hill, George R., Michigan City, Ind. Envelope. 1,500,074 July 1.

Hinckley, Frank C. (See Roberts, T. C., and Hinckley.)

Hipp, Charles H., Camp Lewis, Wash., and S. L. Kiser, Hutchinson, Kans. Glare shield for headlights. 1,500,075; July 1.

Höchstädter, Martin, 's Gravenhage, assignor to N. V. Lyn-Protectie, The Hague, Netherlands. Means for indicating and disconnecting defective branches from electric-current network. 1,499,368; July 1.

Hodges, Edward G., Milwaukee, Wis. Carburetor. Re15,869; July 1.

Hoeregott, Carl M., Alvin, Tex. Cultivator sweep. 1,499,531; July 1.

Hoff, Carlton L., York, Pa. Tread grip. 1,499,779; July 1.

Hoffay, Joseph, New York, N. Y. Phonograph reproducer. 1,499,658; July 1.

Holland, Andrew W., Sherborn, Mass., assignor, by mesne assignments, to Walter M. Lowney Company. Candy package. 1,499,369; July 1.

Holland, Irene K., et al., executors. (See Boonzaier, Wilhelm G.)

Holland, Walter E., assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Battery plate and process of making same. 1,500,076; July 1.

Holmes, Frederick J., assignor of one-third to S. H. Foster, Toledo, Ohio. Clutch mechanism. 1,499,659; July 1.

Holmgren, Torsten A. F., Stockholm, Sweden. Electrical heat treatment of material. 1,499,615; July 1.

Hooper, Logan H. (See Murray, R. A., and Hooper.)

Houdaille, Maurice, Levallois-Perret, France. Liquid shock absorber. 1,499,660; July 1.

Howe, Fred M., Wellsboro, Pa. Piston ring. 1,499,580; July 1.

Huber, Charles J., Baltimore, Md. Furnace. 1,499,732; July 1.

Hughes, Charles B., assignor of one-half to A. J. Gumina, New Orleans, La. Crutch. 1,499,458; July 1.

Hughes Tool Company. (See Fletcher, Harold W., assignor.)

Huhn, John. (See Clark, B. J., and Huhn.)

Hull, Clarence E., Santa Barbara, Calif. Internal-combustion engine. 1,499,824; July 1.

Hunt, John O., Brooklyn, N. Y., assignor, by mesne assignments, to Independent Paper Mills Inc. Sheet of folded material. 1,499,926; July 1.

Huntington, Spencer H., Kerrville, Tex. Coding device. 1,500,077; July 1.

Hurst, George S., assignor to The J. B. Williams Company, Glastonbury, Conn. Advertising display screen. 1,499,661; July 1.

Hurst, George S., assignor to The J. B. Williams Company, Glastonbury, Conn. Advertising display device. 1,499,927; July 1.

Hutt, Albert E., Aromore, Pa. Valve-stem silencer. 1,499,928; July 1.

Hydraulic Steel Company, The. (See Klaus, F. R., and Kranz, assignors.)

Hymans, Frederick. (See Lindquist, D. L., and Hymans.)

Hynes, Lee P., assignor to Consolidated Car-Heating Company, Albany, N. Y. Car-door-operating mechanism. 1,499,735; July 1.

Hynes, Lee P., and P. M. Griffin, assignors to Consolidated Car-Heating Company, Albany, N. Y. Safety switch. 1,499,736; July 1.

Hyslop, Samuel, Newton, Mass. Thread clearer. 1,499,9-9; July 1.

Ikerman, Frederick, et al. (See Ikerman, Wayne E., assignor.)

Ikerman, Wayne E., assignor of forty one-hundredths to B. Reinike and five one-hundredths to F. Ikerman, Long Beach, Miss. Aerial train. 1,499,825; July 1.

Independent Paper Mills Inc. (See Hunt, John O., assignor.)

Industrial Research Corporation. (See Eichenberg, William J., assignor.)

Ingersoll Milling Machine Company, The. (See Sproul, William C., assignor.)

Ingram, Clifton M. (See Gibbs, J., and Ingram.)

Inland Steel Company. (See Jones, Harold C., assignor.)

International Derrick & Equipment Company. (See Bloss, Richard R., assignor.)

International Nitrogen Co. (See Reid, James H., assignor.)

International Silver Company. (See Leech, John, assignor.)

Ives, Frederic E., Philadelphia, Pa. Photographic process. 1,499,930; July 1.

Jackson & Church Company. (See Church, E. D., and Van Brunt, assignors.)

Jacobson, Edward B., Pittsfield, Mass. Induction or ignition coil. 1,499,931; July 1.

Jacobson, Sidney D., New York, N. Y. Antiskidding device. 1,499,932; July 1.

James, Henry D., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Push-button switch. 1,499,370; July 1.

Jenkins, D. C., Glass Company. (See Adams, Edwin B., assignor.)

Johns-Manville, Incorporated. (See Headson, Frank A., assignor.)

Johns-Manville Incorporated. (See Pilliod, Frederic L., assignor.)

Johnson, Albert E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heating apparatus. 1,499,616; July 1.

Johnson, Carroll C., Hickman Mills, Mo. Statuette. Des. 65,060; July 1.

Johnson, John, Iron River, Mich. Dump car. 1,499,459; July 1.

Jointless Firebrick Co. (See Schaefer, William A. L., assignor.)

Jolls, Le Roy E., assignor to Packard Motor Car Company, Detroit, Mich. Grinding. 1,500,078; July 1.

Jones, Corwin S. (See Landahl, E. E., and Jones.)

Jones, Harold C., assignor to Inland Steel Company, Chicago, Ill. Metallic fencepost. 1,499,933; July 1.

Jubé, Louis, Paris, France. Valveless suction and force syringe. 1,499,662; July 1.

Kaiser, William O., Oakland, Calif. Lock for valves. 1,499,663; July 1.

Kalamazoo Paper Box Company. (See Distin, Edward H., assignor.)

Kaminski, Paul, Berlin-Pankow, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Fire-control arrangement. 1,499,664; July 1.

Kasley, Alexander T., Essington, Pa., assignor to Westinghouse Electric and Manufacturing Company. Universal joint. 1,499,371; July 1.

Kasley, Alexander T., Essington, Pa., assignor to Westinghouse Gear and Dynamometer Company. Reduction gearing. 1,499,617; July 1.

Kasley, Alexander T., Essington, Pa., assignor to Westinghouse Gear and Dynamometer Company. Shaft coupling. 1,499,618; July 1.

Kassabaum, Charles H., Atchison, Kans. Nail. 1,499,826; July 1.

Katzenmeyer, John A., Ellwood City, Pa. Reducing cylindrical bodies. 1,499,533; July 1.

Katzenmeyer, John A., Ellwood City, Pa. Reducing cylindrical bodies. 1,499,534; July 1.

Katzenmeyer, John A., Ellwood City, Pa. Manufacturing tubes and a continuous mill therefor. 1,499,535; July 1.

Kauffman, Charles W., Kansas City, Mo. Radiator-cap ornament. Des. 65,061; July 1.

Kaufman, Jonas, New Castle, Pa. Collapsible rubbish burner. 1,499,665; July 1.

Kee, Green T., Kansas City, Mo. Clothes drier. 1,500,094; July 1.

Keller, John R., Glenshaw, Pa. Bowl or similar article. Des. 65,062; July 1.

Kellermann, Jacques, by J. Kellermann, geb. Schmul, conservatrix, Berlin, Germany. Toy pistol. 1,500,079; July 1.

Kellermann, Johanna, geb. Schmul, conservatrix. (See Kellermann, Jacques.)

Kelly, Moyne L., Waco, Tex. Disk-plow mounting. 1,499,536; July 1.

Kelvinator Corporation. (See Kolbe, Frederick H., assignor.)

Kennedy, Hugh A., Newport, Wash. Bearing for rifles. 1,499,460; July 1.

Kennedy, John J., Chicago, Ill. Automatic stop for sound-reproducing machines. 1,499,666; July 1.

Kernaul, Rudolph, Pullman, Mich. Attachment for lamp chimneys. 1,499,372; July 1.

Key, Orville E., Little York, Ill. Timing device for internal-combustion engines. 1,499,737; July 1.

Keystone Watch Case Company, The. (See Freund, Joseph A., assignor.)

Kibele, Otto B., Los Angeles, Calif. Rotary well-boring pipe coupling. 1,499,581; July 1.

Kiefer, Kenneth H., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Bottle-capping machine. 1,499,619; July 1.

Kies, Fred C., Moscow, Mich. Combined tire-chain tightener and fastener. 1,499,667; July 1.

King, Frank B., Wakefield, Mass. Chain hook. 1,499,738; July 1.

King, Walter G., and F. E. Maynard, Brisbane, Queensland, Australia. Lath blind. 1,499,827; July 1.

Kinsey, Al., Longfellow, assignor of one-half to O. E. Schupbach, Sanderson, Tex. Pipe clamp. 1,499,828; July 1.

Kirk, Kittie M., Minneapolis, Minn. Doll. Des. 65,063; July 1.

Kirsch, Charles W., assignor to Kirsch Manufacturing Company, Sturgis, Mich. Sheet steel article and making same. 1,499,985; July 1.

Kirsch, Charles W., assignor to Kirsch Manufacturing Company, Sturgis, Mich. Channeled strip such as curtain rods or the like. 1,499,986; July 1.

Kirsch Manufacturing Company. (See Kirsch, Charles W., assignor.)

Kiser, Sherman L. (See Hipp, C. H., and Kiser.)

Klaus, Fred R., and H. W. Kranz, Cleveland, Ohio, assignors to The Hydraulic Steel Company. Automobile wheel rim. 1,499,739; July 1.

Klein, Benjamin W., Mount Vernon, N. Y. Power-transmission device. 1,499,934; July 1.

Klein, Max, assignor to Shapiro & Aronson, Inc., New York, N. Y. Candlestick. Des. 65,064; July 1.

Klein, Max, assignor to Shapiro & Aronson, Inc., New York, N. Y. Lighting-fixture bracket. Des. 65,065; July 1.

Klein, Max, assignor to Shapiro & Aronson, Inc., New York, N. Y. Dining-room lighting fixture. Des. 65,066; July 1.

Kloppenburg, Carolus A., Tjepoe, Dutch East Indies, assignor to Naamlooze Vennootschap de Bataafsche Petroleum Maatschappij, The Hague, Netherlands. Process and device for preparing alcohols and aldehydes from hydrocarbons. 1,500,080; July 1.

Knickerbocker Case Company. (See Labadie, H. H., Beers, and Brand, assignor.)

Knight, Frank, Cuckfield, England. Chicken hover, brooder, or foster mother. 1,500,081; July 1.

Knight, Frederick T. (See Sargent, Nelson, assignor.)

Koch, Bert V., St. Paul, Minn. Display stand. Des. 65,067; July 1.

Kohlhase, Frank L. (See Wyzenbeck, Andrew, assignor.)

Kohse, Otto, Chehalis, Wash. Stump burner. 1,499,373; July 1.

Kolb, George O., West Hartford, Conn., assignor to General Baking Company, New York, N. Y. Wrapping paper. Des. 65,068; July 1.

Kolb, Louis J. (See Shuman, Victor, assignor.)

Kolbe, Frederick H., Detroit, Mich., assignor to Kelvinator Corporation, Wilmington, Del. Compressor for refrigerating machinery. 1,499,740; July 1.

Kops Brothers. (See Kops, Waldemar, assignor.)

Kops, Waldemar, assignor to Kops Brothers, New York, N. Y. Apparel garment. 1,499,935; July 1.

Kotowski, Frank, Ensley, Ala. Rivet-setting tool. 1,499,668; July 1.

Kozlay, Clarence V., assignor to Sidney Blumenthal & Co. Inc., New York, N. Y. Pile fabric. Des. 65,069; July 1.

Krantz, Hubert K., Brooklyn, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Switch-box. 1,499,374; July 1.

Kranz, Harry W. (See Klaus, F. R., and Kranz.)

Kreutzer, George A., and K. L. Long, Lincoln, Nebr.; N. C. Long executrix of said K. L. Long, deceased; said Kreutzer assignor to N. C. Long. Commutator. 1,499,829; July 1.

Krissiep, Max, assignor to Textile Machine Works, Wyomissing, Pa. Braiding machine. 1,499,830; July 1.

Krueger, August H., Luray, Kans. Tractor hitch. 1,499,669; July 1.

Kruppa, Anthony J., Chicago, Ill. Air vent. 1,499,461; July 1.

Kuhn, Evelyn L., Brooklyn, assignor to The White Tar Company, New York, N. Y. Mortuary candle. Des. 65,070; July 1.

Kuhn, Evelyn L., Brooklyn, assignor to The White Tar Company, New York, N. Y. Mortuary candle. Des. 65,071; July 1.

Kuno, Shichigoro, Denver, Colo. Frying pan. 1,499,670; July 1.

Kurkowski, Joseph, Pittsburgh, Pa. Tie-plate machine. 1,499,537; July 1.

Kurnick, Peter E., San Francisco, Calif. Couch armchair. 1,499,831; July 1.

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,499,936; July 1.

Labadie, Harry H., B. B. Beers, and W. M. Brand; said Beers and Brand assignors of their entire interest to Knickerbocker Case Company, Chicago, Ill. Sample case. 1,499,741; July 1.

Lacy, John H., Boston, Mass. Automobile brake guard. 1,499,375; July 1.

Lacy, John H., Boston, Mass. Automobile brake guard. 1,499,376; July 1.

Lacy, John H., Boston, Mass. Automobile brake guard. 1,499,377; July 1.

Ladd, James B., Ardmore, Pa., assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Retractable pipe support. 1,499,620; July 1.

Ladd, James B., Ardmore, Pa., assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Mechanism for drawing cast pipes from molds. 1,499,621; July 1.

Lagulonie, Joseph, Paris, France. Typewriting machine. 1,499,582; July 1.

Lake, Simon, Milford, Conn. Submersible vessel for navigation under ice. 1,500,000; July 1.

Lamb, Joseph F., assignor to Landers, Frary & Clark, New Britain, Conn. Positively-actuated clutch for washing machines. 1,499,742; July 1.

La Moree, James H., deceased, Portland, Oreg.; W. M. La Moree, administratrix, and C. A. Bell, administrator, assignors of one-third to W. M. La Moree and of two-thirds to W. M. La Moree, trustee for H. M. La Moree and A. E. La Moree. Friction clutch. 1,499,538; July 1.

La Moree, Winnie M., administratrix. (See La Moree, James H.)

La Moree, Winnie M., trustee. (See La Moree, James H., assignor.)

Lamplough, Frederick, Feltham, England, and N. C. T. Harper, Durban, Natal, South Africa. Retort or still. 1,499,378; July 1.

Landahl, Eugene E., Oak Park, and C. S. Jones, Maywood, assignors to The Webster Manufacturing Company, Chicago, Ill. Conveying apparatus. 1,499,832; July 1.

Landers, Frary & Clark. (See Curtiss, George E., assignor.)

Landers, Frary & Clark. (See Lamb, Joseph F., assignor.)

Landon, Ernest E., Washington, D. C. Sounding toy. 1,499,539; July 1.

Landreth, Clarence P. (See Moerk, Frank N., assignor.)

Landsdale Silk Hosiery Co. (See Mendelsohn, Edward, assignor.)

Lang, James S., Watertown, Mass. Shock absorber. 1,499,379; July 1.

Langdon-Davies, Walter, and A. Soames, London, England. Electric-current regulator. 1,500,082; July 1.

Lanphere, Frank L., Salina, Kans. Treating trees. 1,499,671; July 1.

Larkin, Walter, assignor to H. Brinton Company, Philadelphia, Pa. Yarn changer. 1,500,083; July 1.

Larmignat, René, Paris, France. Hauling windlass for the loading of vehicles. 1,499,380; July 1.

Larsen, Lars, T. 132 N., R. 106 W. of the fifth principal meridian, N. Dak. Fluid-current motor. 1,499,462; July 1.

Larson, Frederick J., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Reversing mechanism for thread-milling machines. 1,499,381; July 1.

Lawton, Mark A., Newton, Mass. Locking closure for containers. 1,499,988; July 1.

Layne, Mahlon E. (See Hall, Samuel N., assignor.)

Layne, Mahlon E., Los Angeles, Calif. Well screen. 1,499,382; July 1.

Layne, Mahlon E., and S. N. Hall, Los Angeles, Calif.; said Hall assignor to said Layne. Well mechanism. 1,499,383; July 1.

Lea, William C., Los Angeles, Calif. Window construction. 1,499,540; July 1.

Leary, James W. (See Gwinn, G. W., and Leary.)

Lease, Warren R., Wyoming, Pa. Match-box holder. 1,500,084; July 1.

Leathers, Ward, Haworth, N. J. Vacuum cleaner for inclosed passenger vehicles. 1,499,937; July 1.

Leavitt, James Q., Ogden, Utah. Tomato corer. 1,500,085; July 1.

Lederer, David A. (See Ullman, L. M., and Lederer.)

Lee, Henry B., assignor to The D. E. Whiton Machine Co., New London, Conn. Direct-reading pressure-difference indicator. 1,499,384; July 1.

Leech, John, assignor to International Silver Company, Bridgeport, Conn. Spoon or similar article. Des. 65,072; July 1.

Leedom, Randolph, Clifton, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Earth-boring machine. 1,499,938; July 1.

Lehmann, Franz, Altstetten, Switzerland. Vise for use with machine tools. 1,499,989; July 1.

Leis, Roland, Francesville, Ind. Furniture polish. 1,499,463; July 1.

Leister, William P., et al. (See Dorn, C. C., Smith, and Leister.)

Lennox Chemical Company, The. (See Miller, M. P., and Reche, assignors.)

Leroy, Jules, La Garenne Colombes, Seine, France. Construction of stuffing boxes for revolving shafts of all kinds, and especially of turbine shafts and the like. 1,499,583; July 1.

Lewis Manufacturing Company. (See Sewall, Dana O., assignor.)

Lezert, Erastus A., Cincinnati, Ohio. Amusement device. 1,499,672; July 1.

Libbey-Owens Sheet Glass Company, The. (See Moller, John H., assignor.)

Libbey-Owens Sheet Glass Company, The. (See Rowley, Clifford A., assignor.)

Lichte, Heinrich, Berlin, Germany, assignor to Dura Film Protector Co., New York, N. Y. Method of and device for applying a protective layer to films. 1,499,833; July 1.

Liebender, Gottlieb, Oelsnitz, Germany. Manufacture of chenille preliminary fabrics. 1,500,086; July 1.

Linders, William Z., assignor to Northwestern Machine Corporation, St. Louis, Mo. Shaft-turning tool. 1,499,939; July 1.

Lindquist, David L., Hartsdale, White Plains, and F. Hymans, Yonkers, N. Y., assignors to Otis Elevator Company, Jersey City, N. J. Car-leveling apparatus. 1,499,385; July 1.

Litchfield, Isaac W., Newtonville, Mass. Tool for drilling or boring metals. 1,499,584; July 1.

Litton, Everett, Woodhull, Ill. Distance control mechanism for tractors. 1,499,990; July 1.

Lobl, Frederick, Middleboro, Mass. Nail clipper. 1,499,673; July 1.

Long, Kenneth L. (See Kreutzer, G. A., and Long.)

Long, Natalie C. (See Kreutzer, G. A., and Long, assignors.)

Long, Natalie C., executrix. (See Kreutzer, G. A., and Long.)

Long, Ramon, New York, N. Y., assignor to American Liquolift Corporation. Chain pump. 1,499,386; July 1.

Long, Ramon, New York, N. Y., assignor to American Liquolift Corporation. Chain pump. 1,499,387; July 1.

Louden, Henry W., jr., Beaumont, Tex. Drill. 1,499,991; July 1.

Loughridge, C. H., et al. (See Loughridge, Howard R., assignor.)

Loughridge, Howard R., assignor of one-tenth to W. B. McCrory, Pittsburgh, two-tenths to C. J. Herzog, Wilkinsburg, Pa., two-tenths to L. W. Herzog, Troy, N. Y., two-tenths to C. H. Loughridge, Cleveland, Ohio, and one-tenth to N. F. Loughridge, Pittsburgh, Pa. Conveying apparatus. 1,499,778; July 1.

Loughridge, N. F., et al. (See Loughridge, Howard R., assignor.)

Lovejoy, Ralph M., Boston, Mass. Antifriction bearing mechanism for spring shackles. 1,499,388; July 1.

Lowe, Dea G., et al. (See Renstrom, George A., assignor.)

Lowney, Walter M., Company. (See Holland, Andrew W., assignor.)

Lownes, Owen H., Woodridge, N. J., assignor to American Telephone and Telegraph Company. Transmission-regulating circuits. 1,499,464; July 1.

Lummus Cotton Gin Company. (See Grimes, Thaddeus S., assignor.)

Lutz, William H., Sugar Grove, Ohio. Shears. 1,500,024; July 1.

Lux, Henry A., Brooklyn, N. Y. Thermostat for type-casting machines. 1,499,834; July 1.

Lynch, Gilbert W., Morgantown, W. Va. Explosion-engine piston. 1,499,992; July 1.

Macmillan, Campbell, Schenectady, N. Y., assignor to General Electric Company. Power system. 1,499,542; July 1.

Main-Cook Manufacturing Company, The. (See Cook, Orval G., assignor.)

Makowski, John F., assignor to California Cedar Products Company, Stockton, Calif. Plaster lath. 1,499,465; July 1.

Mandel, Alexander S., New York, N. Y. Soda-water fountain. 1,499,466; July 1.

Maney, Thomas, Louisville, Ky. Guard-rail fixture for railway tracks. 1,500,087; July 1.

Manuing, Maxwell & Moore, Inc. (See Heise, O. W., and Graesser, assignors.)

Manning, Maxwell & Moore, Inc. (See Williston, B. T. and Eddy, assignors.)

Manning, Maxwell & Moore, Inc. (See Williston, Belvin T., assignor.)

Manu, John, Detroit, Mich. Pattern construction for the numbering of castings. 1,499,744; July 1.

Marcé, Jean J. P., Paris, France. Heating device for explosion motors. 1,499,586; July 1.

Marette, Jacques, Vincennes, assignor to Pathe Cinema, Anciens Etablissements Pathe Freres, Paris, France. Cinematographic band. 1,499,941; July 1.

Markwalder, Hermann, Wurenlos, Switzerland. Disk commutator for electro motors and dynamos. 1,499,622; July 1.

Markey, Peter L., Chicago, Ill. Necktie holder. 1,499,389; July 1.

Marquette, Melvon A., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Bias-cutting machine. 1,499,676; July 1.

Martin, Harry S. (See Willett, A. H., and Martin.)

Martin, Ira V. (See Pine, W. B., and Martin.)

Martin, James M., Hartley, assignor of one-half to W. S. Capeheart, Vandervoort, Ark. Wire stretcher. 1,499,993; July 1.

Marx, Laurence, New Rochelle, assignor to Cohn-Hall-Marx Co., New York, N. Y. Special textile-fabric package. 1,499,994; July 1.

Mason, John M., North Williamstown, Victoria, Australia. Piston for use in cylindrical valve chambers and cylinders. 1,499,677; July 1.

Mathes, Fannie H. (See Glover, Ralph V., assignor.)

Matheson, Kenneth J., Washington, D. C., dedicated, by mesne assignments, to the People of the United States of America. Manufacturing Swiss cheese. 1,499,390; July 1.

Mathieu, Marius, Paris, France. Automatic weighing apparatus. 1,499,623; July 1.

Maurer, Herman W., Cleveland, Ohio. Folding partition. 1,499,678; July 1.

Mayer, Alvin L., Long Island City, N. Y. Lantern slide. 1,500,025; July 1.

Maynard, Farnham E. (See King, W. G., and Maynard.)

McCarroll, Walker W., New Haven, Conn. Platen for stereotype drying tables. 1,499,779; July 1.

McCarthy, John J., Middleboro, Mass. Pipestem cleaner. 1,499,541; July 1.

McComish, John J., New York, N. Y., assignor of one-third to F. J. Reinecke, Hoboken, N. J. Penholder. 1,499,940; July 1.

McCool, John, Lilly, Pa. Mine-car brake. 1,499,674; July 1.

McCoy, Elijah, assignor to E. C. Nagel, Detroit, Mich. Lubricator. 1,499,468; July 1.

McCrory, W. B., et al. (See Loughridge, Howard R., assignor.)

McCrosky Tool Corporation. (See Skeel, Lewis, assignor.)

McDonald, George E., and T. E. Traynor, Jersey City, N. J. Fire extinguisher. 1,499,866; July 1.

McDougal, Donald J., Ottawa, Ontario, Canada. Automobile suspension. 1,499,675; July 1.

McDowell, Edward C. (See Sherman, C. W., and McDowell.)

McGrath, William H., Roselle Park, assignor of forty-nine per cent to W. Brogan, Elizabeth, N. J. Boiler. 1,499,585; July 1.

McKinley, Benjamin P., Brooklyn, assignor to Hemco Electric Manufacturing Company, Inc., New York, N. Y. Combined lamp-socket cluster and connection plug. Des. 65,073; July 1.

McLaren, William W., Birmingham, Ala. Automobile wheel. 1,499,835; July 1.

McMinn, John E., assignor to Peerless Manufacturing Company, Louisville, Ky. Coal chute. 1,499,469; July 1.

McNamara, Matthew J., assignor of one-half to J. R. Fleming, Scranton, Pa. Railway-guard-rail supplement. 1,499,743; July 1.

McNulty, Gregory F. (See Snyder, F. C., Steen, and McNulty.)

Mead, Clarence F., Los Angeles, Calif. Differential mechanism. 1,499,467; July 1.

Megary, Charles T. (See Megary, Harry H. and C. T.)

Megary, Harry H. and C. T., New York, N. Y. Folding couch. 1,499,745; July 1.

Meister, Andrew G., Copeland, Kans. Metal feed-trough end. 1,499,543; July 1.

Mélotte, Alfred, Remicourt, Belgium. Cream separator. 1,499,391; July 1.

Melton, John L., Portsmouth, Va. Pneumatic vehicle tire. 1,499,392; July 1.

Mendelsohn, Edward, New York, N. Y., assignor to Lansdale Silk Hosiery Co., Inc., Lansdale, Pa. Treating silk stockings. 1,500,026; July 1.

Merritt, Charles W., assignor to J. R. Earle, jr., Walhalla, S. C. Quill-can support. 1,499,995; July 1.

Mettras, Alexander, De Beque, Colo. Rail joint. 1,499,836; July 1.

Meyer, William, Gladbrook, Iowa. Cement-block-making machine. 1,499,587; July 1.

Mica Insulator Company. (See Hausheer, Emil M., assignor.)

Michie, David, Irwin, Pa. Electric iron. 1,499,746; July 1.

Middelboe, Kristian, Frederiksberg, near Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y. Grinding machine. 1,499,624; July 1.

Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Machine for applying endless bands to ring cores. 1,499,679; July 1.

Miller, Herman, et al. (See Glaudel, George, assignor.)

Miller, Max P., and M. F. Roche, assignors to The Lennox Chemical Company, Cleveland, Ohio. Making nitrous oxide. 1,499,544; July 1.

Miller, Rebekah D., New York, N. Y. Doll. Des. 65,074; July 1.

Miller, Rebekah D., New York, N. Y. Doll. Des. 65,075; July 1.

Miller, William C. J., and V. P. Rumely, Detroit, Mich. Setting fasteners. 1,499,625; July 1.

Mills, William S., and H. E. Bisaillon, Bridgeport, Conn. Stop-motion device. 1,499,867; July 1.

Mills, William S., and H. E. Bisaillon, Bridgeport, Conn. Stop-motion device. 1,499,868; July 1.

Milwaukee Gas Specialty Company. (See Claus, Emil L., assignor.)

Milwaukee Tank Works. (See Bienenstok, Edgar A., assignor.)

Miner, William H. (See Dorey, George B., assignor.)

Minerals Separation North American Corporation. (See Price, Frederick G., assignor.)

Mitchell, George L., et al. (See Glaudel, George, assignor.)

Mittel, Henry, Sonora, Tex. Float valve. 1,499,837; July 1.

Moerk, Frank N., assignor of one-half to C. P. Landreth, Philadelphia, Pa. Method of and apparatus for treating nitrogenous waste materials. 1,499,626; July 1.

Moller, John H., Charleston, W. Va., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Cracking-off device for sheet glass. 1,499,393; July 1.

Moore, Mary A., Hayden Lake, Idaho. Hand cleaner. 1,499,594; July 1.

Morch, Anthony, Brooklyn, N. Y. Battery. 1,500,027; July 1.

Morehead, James F., Wytheville, Va. Drill attachment. 1,499,680; July 1.

Morin, Frank A., Lewiston, Me., assignor, by mesne assignments, to Universal Winding Company, Boston, Mass. Winding machine. 1,499,681; July 1.

Morrison, Francis G., Washington, D. C. Card container. 1,500,028; July 1.

Muehleisen, Adolph and G. C., San Diego, Calif. Tent-supporting apparatus. 1,499,395; July 1.

Muehleisen, Glover C. (See Muehleisen, Adolph and G. C.)

Mueller, Henry, assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Apparatus for feeding pulverized fuel. 1,499,396; July 1.

Müller, Carl J. (See Thiess, K., and Müller.)

Mullinix, Elmer E., Burlington, Kans. Fire escape. 1,499,588; July 1.

Murphy, Bertrand P., Donnybrook, N. Dak. Dumping mechanism. 1,499,682; July 1.

Murray, George C., Chicago, Ill. Filler block for draft-gear yokes. 1,499,942; July 1.

Murray, Richard A., and L. H. Hooper, Muskogee, Okla. Classification box. 1,499,838; July 1.

Myers, Solomon B., assignor to American Cement Tile Manufacturing Company, Pittsburgh, Pa. Roofing tile. 1,499,397; July 1.

Myers, Solomon B., assignor to American Cement Tile Manufacturing Company, Pittsburgh, Pa. Tile roofing. 1,499,398; July 1.

N. V. Lyn-Protectie. (See Höchstädter, Martin, assignor.)

Naamlooze Vennootschap de Bataafsche Petroleum Maatschappij. (See Kloppenburg, Carolus A., assignor.)

Nagel, Edwin C. (See McCoy, Elijah, assignor.)

Nalsmith, William G., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Throttle valve. 1,499,470; July 1.

Nashlund, Axel, assignor of one-half to H. B. Hatch, Marquette, Mich. Muffler. 1,499,683; July 1.

National Aniline & Chemical Co. (See Bissell, Don W., assignor.)

National Assorting Company. (See Cox, George W., jr., assignor.)

National Brake & Electric Company. (See Beckwith, Raymond A., assignor.)

National Carbon Company. (See Chaney, Newcomb K., assignor.)

Navin, Frank, Los Angeles, Calif. Method and apparatus for extracting oil from wells. 1,499,589; July 1.

Nelson, Otto, Hollywood, Calif. Soft-tire alarm. 1,499,590; July 1.

Neuner, Martin J., and A. A. Habermann, North Bergen, N. J. Ignition indicating and detecting device. 1,500,088; July 1.

New Haven Clock Co. (See Porter, Wilson E., assignor.)

Nichols, John C., Sheboygan, Wis. End buckle. 1,499,747; July 1.

Nicholson, Stanley W., assignor to The Dura Company, Toledo, Ohio. Window-control mechanism. 1,499,545; July 1.

Nicholson, Victor R., Colchester, England. Flow meter. 1,499,839; July 1.

Niles-Bement-Pond Company. (See Sears, W. T., and Rausch, assignors.)

Niles-Bement-Pond Company. (See Sears, Willard T., assignor.)

Nolet, Wilfrid, Montreal, Quebec, Canada. Mop. 1,499,684; July 1.

Nordin, Josef A., assignor to Aktiebolaget Stille-Werner, Stockholm, Sweden. Friction lock for meat holders in meat-slicing machines. 1,499,685; July 1.

Norfolk Iron Company. (See Godden, Harry M., assignor.)

North American Lace Company. (See Dandy, Marc H., assignor.)

Northrup, William, Middleport, N. Y. Towline take-up. 1,499,686; July 1.

Northwestern Machine Corporation. (See Linders, William Z., assignor.)

Norwalk Tire & Rubber Company, The. (See Russell, W. F., and Stevens, assignors.)

Novelty Products, Inc. (See Winder, Samuel E., assignor.)

Nowosielski, Edward B., Bloomfield, assignor to Splitdorf Electrical Company, Newark, N. J. Circuit breaker. 1,500,089; July 1.

Nu-Comb Manufacturing Company. (See Henter, Leo A., assignor.)

Oberlander, Felix R., Salt Lake City, Utah. Safety switch box. 1,499,996; July 1.

O'Connell, Patrick P., St. James, Minn. Pneumatically-operated railway gate. 1,499,687; July 1.

Ohler, Albert A., Painesville, Ohio. Indicator for alarm clocks. 1,499,399; July 1.

Oliver, Harry C., Naperville, Ill. Handle. 1,500,029; July 1.

Olson, William A. (See Peck, L. H., and Olson.)

Oprean, Sabin, New York, N. Y. Roasting coffee. 1,499,780; July 1.

Ormond, John J., et al., trustees. (See Ormond, John J., assignor.)

Ormond, John J., Mattapan, Boston, Mass., assignor to J. J. Ormond, J. J. Callahan, and H. A. Gillman, as trustees of The Ormond Multicolor Printing Company. Method and apparatus for printing multicolor optical slides. 1,499,997; July 1.

Ormond, John J., Mattapan, Boston, Mass., assignor to J. J. Ormond, J. J. Callahan, and H. A. Gillman, as trustees of The Ormond Multicolor Printing Company. Method of and machine for printing by transfer. 1,499,998; July 1.

Oswald, Alfred E., Bogota, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Exhibition device. 1,499,400; July 1.

Otis Elevator Company. (See Lindquist, D. L., and Hymans, assignors.)

Ott, Harvey N., assignor to Spencer Lens Co., Buffalo, N. Y. Microscope. 1,500,030; July 1.

Oxley, Arthur E., assignor to The British Cotton Industry Research Association, Didsbury, Manchester, England. Testing machine. 1,499,546; July 1.

Oxley, Herbert D., Chicago, Ill. Continuous brine purifier. 1,500,096; July 1.

Packard Motor Car Company. (See Jolls, Le Roy E., assignor.)

Packer, Alonzo E., New Philadelphia, Ohio. Combined shade roller and curtain pole bracket. 1,499,401; July 1.

Page, Samuel H., Stratford, assignor to The American Fabrics Company, Bridgeport, Conn. Lace. Des. 65,076; July 1.

Paine, Arthur P., assignor to Winchester Repeating Arms Company, New Haven, Conn. Handlamp. 1,499,591; July 1.

Palmer, Guillermo D., and J. F. Castillo, Buenos Aires, Argentine. Luminous reflection sign. 1,499,688; July 1.

Papouchis, Christ, Far Rockaway, N. Y. Game apparatus. 1,499,748; July 1.

Parker, Elo E. (See Ruhmann, G. C., and Parker.)

Parker, George A., assignor to Brunner Manufacturing Company, Utica, N. Y. Safety or relief valve. 1,499,840; July 1.

Pathe Cinema, Anciens Etablissements Pathe Freres. (See Marette, Jacques, assignor.)

Peale, Rembrandt. (See Davis, Kenneth, assignor.)

Peck, Lewis H., and W. A. Olson, Delta, Utah. Ore concentrator. 1,499,471; July 1.

Peerless Manufacturing Company. (See McMinn, John E., assignor.)

Penn, John F., Baltimore, Md. Aeroplane. 1,499,943; July 1.

People of the United States of America. (See Matheson, Kenneth J.)

Pepper, William A., Tulsa, Okla. Insect trap. 1,499,841; July 1.

Perkins, Alonson D., New York, N. Y. Windshield for automobiles. 1,499,869; July 1.

Persons, Lawrence M., Quincy, Ill., assignor, by mesne assignments, to H. B. Sherman Manufacturing Co., Battle Creek, Mich. Motor-starting switch. 1,499,842; July 1.

Petersen, Fred, Longmont, Colo. Plowpoint. 1,499,402; July 1.

Peterson, Herbert A. R., Mankato, Minn. Valve-spring lifter. 1,499,843; July 1.

Pfeiffer, Christian. (See Tansley, G. H., and Pfeiffer.)

Pflueger, Charles T., and W. L. Adams, assignors to The Enterprise Manufacturing Company, Akron, Ohio. Artificial bait. 1,499,689; July 1.

Philadelphia Storage Battery Company. (See Holland, Walter E., assignor.)

Phillips, Jack, New York, N. Y. Auxiliary air intake for internal-combustion engines. 1,500,031; July 1.

Phillips, Percy G., Rye, N. Y. Garment clamp and the like. 1,499,592; July 1.

Pickering, Samuel, Bellevue, Wash. Driving mechanism for geared locomotives. 1,499,870; July 1.

Pillod, Frederic L., Plainfield, N. J., assignor to Johns-Manville, Incorporated. Pipe covering and making same. 1,499,781; July 1.

Pine, William B., and I. V. Martin, Okmulgee, Okla. Pumping equipment for wells. 1,499,690; July 1.

Pinto, George. (See Williamson, L. A., and Pinto.)

Pitney, Arthur H., assignor to Pitney-Bowes Postage Meter Company, Stamford, Conn. Postmark stamp. Des. 65,077; July 1.

Pitney-Bowes Postage Meter Company. (See Pitney, Arthur H., assignor.)
Poehner, Conrad, Cincinnati, Ohio. Ventilating window. 1,500,032; July 1.
Pollman, Arthur, New York, N. Y. Toy horse. 1,500,033; July 1.
Pool, Elmer C., New Castle, Pa., assignor to Toledo Scale Company, Toledo, Ohio. Weighing mechanism. 1,499,782; July 1.
Porter, Wilson E., assignor to New Haven Clock Co., New Haven, Conn. Clock. 1,499,783; July 1.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,499,871; July 1.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. System and device for battery charging. 1,500,034; July 1.
Pratt, Hazen C., Cambridge, Mass. Airplane landing mechanism. 1,499,472; July 1.
Pratt & Whitney Company. (See Larson, Frederick J., assignor.)
Pray, Thomas E., assignor to Goodman Manufacturing Company, Chicago, Ill. Cutter chain. 1,499,944; July 1.
Pressley, Ernest M., Kansas City, Mo. Individual coffee maker. Des. 65,078; July 1.
Price, Albert O., Coshocton, Ohio. Radiocabinet. Des. 65,079; July 1.
Price, David, Buffalo Center, Iowa. Flower box. 1,499,473; July 1.
Price, Frederick G., London, England, assignor to Minerals Separation North American Corporation, New York, N. Y. Treatment of coal. 1,499,872; July 1.
Price, Ralph H., Crooksville, Ohio. Crank. 1,499,474; July 1.
Priem, Paul, Heidenheim A. Brenz, Germany, assignor to American Voith Contact Company, New York, N. Y. Machine for grinding wood into pulp. 1,499,547; July 1.
Priess, William H., Belmont, assignor to Wireless Specialty Apparatus Company, Boston, Mass. Electrical condenser. 1,499,403; July 1.
Priess, William H., Belmont, assignor to Wireless Specialty Apparatus Company, Boston, Mass. Electrical condenser. 1,499,404; July 1.
Prince John H., Valliant, Okla. Turbine water wheel. 1,499,475; July 1.
Probst, William F. (See Cohn, M., and Probst.)
Quinan, George E., Seattle, Wash. Means indicating average rate flow of energy. 1,499,476; July 1.
Radiant Lighting Fixture Co. (See Bohl, Hugo E., assignor.)
Ramelow, Henry, Springfield, Ill. Trolley harp and means for effectively operating the same. 1,499,548; July 1.
Rand, James H., North Tonawanda, N. Y. Index. 1,500,035; July 1.
Ratigan, James P., Los Angeles, Calif. Crosshead. 1,499,549; July 1.
Rausch, Roswell H. (See Sears, W. T., and Rausch.)
Ravier, Léopold, Paris, France. Lock nut. 1,499,873; July 1.
Ray, Alfred, Spring Valley, Wis. Dirigible headlamp. 1,500,036; July 1.
Rea, John T., Los Angeles, Calif. Material-testing appliance for well-drilling apparatus. 1,499,550; July 1.
Rebold, Jennings B., Slick, Okla. Pump for wells. 1,499,691; July 1.
Recker, Adolph C., Oakville, assignor to The Chase Companies Inc., Waterbury, Conn. Lip-stick holder. 1,499,784; July 1.
Reed, Willis A., Dinuba, Calif. Watch. 1,499,692; July 1.
Rees-Russell Manufacturing Company. (See Russell, Robert C., assignor.)
Reguoif de Vains, Antoine. (See De Vains, Antoine R.)
Regula, Mathias, New York, N. Y. Leather and rubber article. 1,499,785; July 1.
Rehländer, Paul, Berlin-Charlottenburg, Germany. Composition for toning photographic silver images. 1,499,749; July 1.
Reichard, Harold D., Akron, Ohio. Tire tread. Des. 65,080; July 1.
Reid, James H., Readsboro, Vt., assignor to International Nitrogen Co., Cleveland, Ohio. Producing gas. 1,499,750; July 1.
Reilly, James F., Philadelphia, Pa. Cable attachment. 1,499,477; July 1.
Reinecke, Frank J. (See McComish, John J., assignor.)
Reinhart, John, Chicago, Ill. Paper-hanger's straightedge. 1,499,874; July 1.
Reinike, Bernhard, et al. (See Ikerman, Wayne E., assignor.)
Reiss, Paul, assignor to Firm Gutschow & Co., G. m. b. H., Danzig (Free City of). Calculating machine. 1,499,593; July 1.
Reisz, Eugen, Zehlendorf-Mitte, Germany. Method and apparatus for producing moving pictures and sound waves at the same time. 1,500,037; July 1.
Renstrom, George A., Bremerton, Wash., assignor of one-fourth to D. G. Lowe, one-fourth to R. L. Totten, and one-fourth to E. W. Bonneau, county of Kitsap, Mich. Soldering instrument. 1,499,945; July 1.
Reynolds Machine Company, The. (See Snyder, F. C., Steen, and McNulty, assignors.)
Reynolds, Robert W., Darlinghurst, near Sydney, New South Wales, Australia. Electrical-heater resistance element. 1,499,693; July 1.
Reynolds, William C., assignor of one-half to F. J. Young, Los Angeles, Calif. Pipe tong. 1,499,552; July 1.
Rhodes, Robert S., Brooklyn, assignor to Consolidated Car-Heating Company, Albany, N. Y. Safety switch. 1,499,751; July 1.
Rickett, S. S., et al. (See Robinson, James K., assignor.)
Rieber, Frank, Berkeley, Calif. Alternating-current system. 1,499,551; July 1.
Riley, Ellsworth B., Philadelphia, Pa. Spark plug. 1,499,594; July 1.
Ritchie, Robert H. (See Ritchie, Thomas, assignor.)
Ritchie, Thomas, Cedar, assignor to R. H. Ritchie, Oskaloosa, Iowa. Stock-watering device. 1,499,999; July 1.
Robeson-Rochester Corporation. (See Cross, Frederick J., assignor.)
Roberts, Hyle N., Globe, Ariz. Can opener and seal. 1,499,405; July 1.
Roberts, Theodore C., New York, N. Y., and F. C. Hinckley, Stratford, Conn., assignors, by mesne assignments, to Columbia Phonograph Company, Inc. Sound box. 1,499,946; July 1.
Robertson, C. C., et al. (See Robinson, James K., assignor.)
Robertson, Samuel B., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Pneumatic tire. Des. 65,081; July 1.
Robinson, Banner J., Prairieville, Mich. Henhouse poultry release. 1,500,038; July 1.
Robinson, James K., assignor of one-fourth to S. S. Rickett and one-fourth to C. C. Robertson, Jacksonville, Fla. Valve. 1,499,478; July 1.
Robinson, John T., and G. E. Gooding, assignors to John T. Robinson Company, Boston, Mass. Guard for corner-cutting machines. 1,499,595; July 1.
Robinson, John T., Company. (See Robinson, J. T., and Gooding, assignors.)
Robinson Manufacturing Company. (See Dimm, Chandos R., assignor.)
Roche, Maurice F. (See Miller, M. P., and Roche.)
Roe, Frank L., Chicago, Ill. Display box. 1,499,987; July 1.
Rogers, Morrise E., Norwood, La. Removable end crank for automobiles. 1,499,694; July 1.
Rogers, Walter J., Houston, Tex. Well-boring tool. 1,500,001; July 1.
Rollman, Michael A., Mount Joy, Pa. Shipping package. 1,499,553; July 1.
Ronco Limited. (See Barman, Louis M., assignor.)
Rosenheim, Joseph, Coney Island, N. Y. Race-game apparatus. 1,499,875; July 1.
Rotermund, William F., Seattle, Wash. Window-sash opener. 1,499,876; July 1.
Rowley, Clifford A., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Drawing and flattening sheet glass. 1,499,406; July 1.
Rüdenberg, Reinhold, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Electric machine. 1,499,695; July 1.
Rüdenberg, Reinhold, Berlin-Grunewald, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Cooling electric machinery. 1,499,696; July 1.
Ruhmann, Grover C., and E. E. Parker, Kenedy, Tex. Fuel economizer and carbin reducer. 1,499,786; July 1.
Rule, William C., Godstone, assignor of one-half to E. Atlee, London, England. Permutation lock. 1,499,554; July 1.
Rumely, Vincent P. (See Miller, W. C. J., and Rumely.)
Rusiuski, András, Fenton, Mich. Boiler. 1,500,002; July 1.
Russell, Robert C., assignor to Rees-Russell Manufacturing Company, Dallas, Tex. Fastening devices. 1,499,596; July 1.
Russell, William F., and M. K. Stevens, assignors to The Norwalk Tire & Rubber Company, Norwalk, Conn. Splicing of pneumatic tubes, etc. 1,499,752; July 1.
Ruths, Johannes K., Djursholm, assignor to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Steam-accumulator apparatus for steam plants. 1,499,697; July 1.
Ryan, Bernard, New York, N. Y. Thermostatic controller for gas water heaters. 1,499,947; July 1.
Sachs, Herbert, Bronx, N. Y. Auto brake safety catch. 1,499,948; July 1.
Safelock Co., The. (See Erdey, Joseph, assignor.)
Safetee Glass Company. (See Shuman, Victor, assignor.)
Safstrom, Gustaf A., Chicago, Ill. Electrical timing device. 1,499,479; July 1.
Salbach, Otto, Stockton, Calif. Axle set. 1,499,555; July 1.
Salsich, Neil E., Bethlehem, Pa. Rail. 1,499,597; July 1.

Sargent, Nelson, assignor of one-half to F. T. Knight, Pictou, Ontario, Canada. Cylinder grinder. 1,499,556; July 1.
Savoie, Eugene J., Woousocket, R. I. Pool-ball tray. 1,499,407; July 1.
Sawyer, Edward A. (See Sturtevant, T. J., and Sawyer.)
Sawyer, Willard N., assignor to Baxter D. Whitney & Son, Inc., Winchendon, Mass. Spindle-lubricating means. 1,499,949; July 1.
Scammell, Charles H., Company. (See Scammell, Charles H., assignor.)
Schade, Paul, Hermsdorf, near Berlin, Germany, assignor to General Electric Company. Arrangement for localizing disturbed areas in electric mains. 1,500,003; July 1.
Schaefer, William A. L., assignor to Jointless Firebrick Co., Chicago, Ill. Wall construction. 1,499,787; July 1.
Scammell, Charles H., assignor to Charles H. Scammell Company, New York, N. Y. Waterproofed lathing. 1,499,408; July 1.
Sebaumberg, Otto, Pittsburgh, Pa. Electric heating element. 1,499,409; July 1.
Schieffelin, William J. (See Crane, F. D., and Schieffelin.)
Schmidling, Joseph L., Milwaukee, Wis. Gasoline reserve supply. 1,499,877; July 1.
Schmidt, Henry F., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Combining tube for ejectors. 1,499,878; July 1.
Schmidt, Hugo F., Milwaukee, Wis. Tractor. Re15,870; July 1.
Schmidt, Wilhelm, Cassel-Wilhelmshohe, Germany. Device for discharging combustion gases from submarines. 1,499,598; July 1.
Schmitt, Charles O., and W. F. Fehlberg, Sioux Falls, S. Dak. Etching apparatus. 1,499,879; July 1.
Schoenenberg, Wilhelm, Cologne-Deutz, Germany. Device for typewriting machines for feeding, cutting off, and removing forms. 1,499,410; July 1.
Schoenert, Carl, Newark, N. J. Safety-razor blade. 1,499,698; July 1.
Schroeder, Giulio, Hale, England. Means for carrying off heat generated in electrical apparatus. 1,499,411; July 1.
Schuette, Robert W., Munhall Borough, Pa. Flexible coupling. 1,499,880; July 1.
Schultz, J. W. (See Altman, Jacob, assignor.)
Schulz, M., Company. (See Gustafson, Adolph P., assignor.)
Schupbach, O. E. (See Kinsey, Al., assignor.)
Schüttler, Paul. (See Seppeler, E., and Schüttler.)
Schweiter, Hans, Horgen, Switzerland. Apparatus for the coating of thread with liquid. 1,499,699; July 1.
Scott, Russell M. (See Belair, J. A., and Scott.)
Sears, Willard T., Montclair, and R. H. Rausch, Plainfield, N. J., assignors to Niles-Bement-Pond Company, New York, N. Y. Drilling machine. 1,499,412; July 1.
Sears, Willard T., Montclair, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Combined saddle traversing and locking mechanism. 1,499,413; July 1.
Sedivec, Joseph M., May, Idaho. Cotter-pin expander and puller. 1,500,004; July 1.
Seeck, Ferdinand W., Lebanon, Oreg. Differential mechanism. 1,499,480; July 1.
Seguin, Augustin, Paris, France. Apparatus for measuring speed. 1,499,881; July 1.
Segura, Sidney B., assignor to Crown Shock Absorber Company, Houston, Tex. Shock absorber for automobiles. 1,499,882; July 1.
Seltzer, Ira R., Waterbury, assignor to The Gordon Electric Mfg. Co., Waterville, Conn. Screw-plug flush receptacle. 1,499,788; July 1.
Seppeler, Eduard, Berlin-Neukolln, and P. Schüttler, Berlin-Halensee, Germany. Air supply for internal-combustion engines. 1,499,599; July 1.
Sewall, Dana O., assignor to Lewis Manufacturing Company, Walpole, Mass. Bandage. 1,499,789; July 1.
Seyfferth, Eugen, Berlin, Germany. Producing copying foils. 1,499,844; July 1.
Shapiro & Aronson, Inc. (See Klein, Max, assignor.)
Sharp, Albert and G., Bayonne, N. J. Kneading machine. 1,499,790; July 1.
Sharp, George. (See Sharp, Albert and G.)
Shaw Edward, Toronto, Ontario, Canada. Apparatus for the treatment of fluids. 1,499,481; July 1.
Sheer, H. M., Company. (See Sheer, Henry M., assignor.)
Sheer, Henry M., assignor to H. M. Sheer Company, Quincy, Ill. Burney attachment. 1,500,005; July 1.
Shepard, Frederick J., jr. (See Church, E. S., and Shepard.)
Sherman, Clifton W., and E. C. McDowell, Hamilton, Ontario, Canada; said McDowell assignor to said Sherman. Draft gear. 1,499,700; July 1.
Sherman, George C., Geneva, N. Y. Window cleaner. 1,500,006; July 1.
Sherman, H. B., Manufacturing Co. (See Persons, Lawrence M., assignor.)
Shipley, Grant B., Pittsburgh, Pa. Preservative treatment for timbers. 1,499 791; July 1.
Shodin, Albin E., Los Angeles, Calif. Roof truss. 1,499,557; July 1.
Shuman, Victor, assignor, by mesne assignments, to L. J. Kolb, trading as Safetee Glass Company, Philadelphia, Pa. Indicator plate. 1,500,039; July 1.
Sibbald, Henrietta G. Duluth, Minn. Receptacle. 1,500,007; July 1.
Siemens & Halske Aktiengesellschaft. (See Ebeling, August, assignor.)
Siemens & Halske Aktiengesellschaft. (See Kaminski, Paul, assignor.)
Siemens-Schuckertwerke Geschlschaft mit beschränkter Haftung. (See Rüdenberg, Reinhold, assignor.)
Signode System, Inc. (See Guenther, Arthur G. G., assignor.)
Silurium Manufacturing Company. (See Stebbins, George C., assignor.)
Silvernail, Howard, Binghamton, N. Y. Riveting device for automobile brake bands. 1,499,883; July 1.
Simmons, Henry C., Atlanta, Ga. Dental tray. 1,499,482; July 1.
Simms, James H., Beverly Hills, Calif. Wall construction. 1,499,483; July 1.
Singer Manufacturing Company, The. (See Diehl, Frederick, assignor.)
Singer Manufacturing Company, The. (See Herr, Park A., assignor.)
Singer, Max, Newark, N. J. Figure velocipede. 1,499,884; July 1.
Skeel, Lewis, assignor to McCrosky Tool Corporation, Meadville, Pa. Stud driver. 1,499,701; July 1.
Skeen, Samuel T., assignor of one-half to C. E. Stead, Centralia, Ill. Drill. 1,499,558; July 1.
Skoog, Carl F., South Bend, Ind. Clinker tongs. 1,499,753; July 1.
Slepian, Joseph, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrolyte for electrolytic cells. 1,499,414; July 1.
Slight, George W., Brooklyn, N. Y. Sound reproducer. 1,500,008; July 1.
Smaldone, Pompilio, New York, N. Y. Crib. 1,500,009; July 1.
Smidth, F. L., & Co. (See Middelboe, Kristian, assignor.)
Smith, Abner L., Goose Creek, Tex. Back-pressure valve for oil and artesian wells. 1,499,702; July 1.
Smith, Carolyn S., Brooklyn, N. Y. Making colloidal suspensions. 1,499,600; July 1.
Smith, Fred P., Glassboro, N. J. Gas governor. 1,499,885; July 1.
Smith, Henry J., Minneapolis, Minn. Potato-cutting machine. 1,499,950; July 1.
Smith, Jesse A. B., Stamford Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,499,415; July 1.
Smith, John H., Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company. Air ejector. 1,499,886; July 1.
Smith, John L. (See Dorn, C. C., Smith, and Leister.)
Smith, Rosalie J., Washington, D. C. Gravity basket. 1,499,559; July 1.
Smith, Tracy M., and J. F. Werhosek, Morris, Ill. Piston rod. 1,500,010; July 1.
Smith, Webb L., San Francisco, Calif. Fuse plug. 1,499,484; July 1.
Smith, William H., Lavalle, Wis. Handle. 1,500,011; July 1.
Snow, Barton S., Batavia, assignor to T. W. Snow Construction Co., Chicago, Ill. Material-elevating apparatus. 1,499,792; July 1.
Snow, T. W., Construction Co. (See Snow, Barton S., assignor.)
Snyder, Floyd C., J. C. Steen, and G. F. McNulty, assignors to The Reynolds Machine Company, Massillon, Ohio. Screw-driving machine. 1,499,887; July 1.
Soames, Alfred. (See Langdon-Davies, W., and Soames.)
Society of Tammany or Columbian Order, The. (See Voorhis, John R., assignor.)
Sonora, Inc. (See Wolff, Joseph, assignor.)
Sosoka, John, Cleveland, Ohio. Burglar alarm. 1,499,951; July 1.
Spahlinger, Henry, Carouge-Geneve, Switzerland. Ampul syringe. 1,499,952; July 1.
Spangler, William I., Tarlton, Ohio. Target trap. 1,499,845; July 1.
Spatz, Daniel B., Reading, Pa. Direction indicator. 1,499,888; July 1.
Spencer Lens Co. (See Ott, Harvey N., assignor.)
Spiegelglas, Naum, New York, N. Y. Dental appliance. 1,499,889; July 1.
Splitdorf Electrical Company. (See Nowosielski, Edward B., assignor.)
Sproul, William C., assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Milling machine. 1,499,754; July 1.
Spry, William M., assignor of one-half to G. Barnaby, Revere, Mass. Machine for packaging articles. 1,499,703; July 1.
Spurgeon, Joseph L., and T. J. Farley, Bloomfield, Iowa. Furnace. 1,499,953; July 1.
Standen, Henry S. (See Evans, H. P., and Standen.)
Stangeland, Peder O., Los Angeles, Calif. Jack. 1,499,560; July 1.
Staples, Earle L., New York, N. Y. Liquid-fuel burner. 1,500,012; July 1.
Stead, Charles E. (See Skeen, Samuel T., assignor.)

Stebbins, George C., Ashtabula, assignor to Silurium Manufacturing Company, Cleveland, Ohio. Battery box. 1,499,704; July 1.
Stebbins, James H., Waterloo, Iowa. Adjustable post. 1,499,755; July 1.
Stech, Joseph G., Berwyn, assignor to Woodrow Nipple Mfg. Co., Chicago, Ill. Compound tool. 1,499,416; July 1.
Steckelmacher, Adolf, Eppingen, Germany. Artificial tooth. 1,499,417; July 1.
Steen, James C. (See Snyder, F. C., Steen, and McNulty.)
Stefanich, Barney. (See Stefanich, Peter, assignor.)
Stefanich, Peter, assignor of one-half to B. Stefanich, Indiana Harbor, Ind. Drill. 1,499,561; July 1.
Stern, Charles. (See Braden, R. W., and Stern.)
Stevens-Aylsworth Company. (See Stevens, William N., assignor.)
Stevens, Maurice K. (See Russell, W. F., and Stevens.)
Stevens, William C., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Transmission mechanism. 1,499,418; July 1.
Stevens, William C., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Clutch mechanism. 1,499,419; July 1.
Stevens, William N., assignor to Stevens-Aylsworth Company, New York, N. Y. Mixing machine. 1,499,890; July 1.
Stiles, A. B. (See Stiles, Clifton, assignor.)
Stiles, Clifton, assignor of one-half to A. B. Stiles, Calhoun, Ky. Drain pipe. 1,499,954; July 1.
Stoddard, Charles J., Washington, D. C. Identification tag and making same. 1,499,955; July 1.
Stoekle, Erwin R., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Thermally-controlled circuit interrupter. 1,499,420; July 1.
Stoekle, Erwin R., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Electromagnetic switch. 1,499,421; July 1.
Stone, Thomas L., Newark, N. J., assignor to Hampden Glazed Paper & Card Company, Holyoke, Mass. Paper. Des. 65,082; July 1.
Storer, Sidney A., New York, N. Y. Display device. 1,499,891; July 1.
Strauss, Ferdinand, New York, and A. Dingfeld, Brooklyn, N. Y., assignors, by mesne assignments, to said Strauss. Mechanical toy. 1,499,485; July 1.
Strauss, Henry J., Stratford, Conn. Attachment for vehicle wheels. 1,499,705; July 1.
Street, Louis H., Olean, N. Y. Sawmill. 1,499,756; July 1.
Stricker, William, Kansas City, Mo. Sash fastener. 1,499,486; July 1.
Stromberg-Carlson Telephone Manufacturing Company. (See Powell, Winfred T., assignor.)
Sturtevant Mill Company. (See Sturtevant, T. J., and Sawyer, assignors.)
Sturtevant Mill Company. (See Sturtevant, Thomas J., assignor.)
Sturtevant, Thomas J., Wellesley, assignor to Sturtevant Mill Company, Boston, Mass. Separator. 1,500,050; July 1.
Sturtevant, Thomas J., Wellesley, and E. A. Sawyer, Swampscott, assignors to Sturtevant Mill Company, Boston, Mass. Separator. 1,499,892; July 1.
Sutcliffe, Edgar R., Leigh, England. Machine for compressing or briquetting coal or other material. 1,499,487; July 1.
Swanson, John E., Jamaica Plain, Mass. Cast-metal cutting die and producing the same. 1,499,422; July 1.
Swett, Charles E., Boston assignor of one-half to H. H. Beckwith, Brookline, Mass. Shoe-stiffening material. 1,499,488; July 1.
Sykes, Wilfred, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of ventilation and operating means therefor. 1,499,423; July 1.
Tampier, René J. C., Boulogne-sur-Seine, France. Cock. 1,499,562; July 1.
Tansley, George H., and C. Pfeiffer, assignors to Colt's Patent Fire Arms Manufacturing Company, Hartford, Conn. Automatic machine gun. 1,499,846; July 1.
Taylor, Eli J., Toronto, Ontario, Canada. Mold for the manufacture of resilient tires. 1,499,793; July 1.
Telsen, Theodor, Birmingham, England. Crucible and like furnace. 1,499,706; July 1.
Terzaghi, Karl, Vienna, Austria. Protection of buildings or weirs against hollowing out or washing away. 1,499,956; July 1.
Textile Machine Works. (See Krisslep, Max, assignor.)
Thatcher, Walter C., Govans, Baltimore, Md. Lathe. 1,499,707; July 1.
Thelen, Rolf, Madison, Wis. Reversible circulation internal-fan kiln. 1,499,627; July 1.
Thiess, Karl, Lindlingen, near Hochst-on-the-Main, and C. J. Müller, assignors to Farbwerke vorm. Meister Lucius & Bruning, Hochst-on-the-Main, Germany. Indigoid vat dyestuff and making same. 1,500,013; July 1.
Thomas, Ivor D., Cleveland Heights, assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Door-shifting mechanism. 1,499,424; July 1.
Thurber, Edward J., New Orleans, La. Curtain for automobiles. 1,500,014; July 1.
Tibbals, Lee. (See Weissbeck, P., and Tibbals.)
Tibbetts, Raymond W., Pawtucket, R. I. Refrigeratingg apparatus. 1,499,989; July 1.
Tiregage Valve Corporation. (See Badowski, Alfred, assignor.)
Tireometer Valve Corporation of America. (See Badowski, Alfred, assignor.)
Toledo Scale Company. (See Hem, Halvor O., assignor.)
Toledo Scale Company. (See Pool, Elmer C., assignor.)
Tomasello, Joseph, Chicago, Ill. Shower-bath arrangement. 1,499,425; July 1.
Totten, Robert L., et al. (See Renstrom, George A., assignor.)
Townsend, John S., assignor to Whiting Corporation, Harvey, Ill. Sand cutting and screening machine. 1,499,426; July 1.
Trayhorn, Richard C., Binghamton, N. Y. Berry picker. 1,500,016; July 1.
Traynor, Thomas E. (See McDonald, G. E., and Traynor.)
Tullar, William E., Chicago, Ill. Controlling means for motor-driven vehicles. 1,499,427; July 1.
Turner, Charles G., Atlanta, Ga. Oven or display device. 1,499,957; July 1.
Tuten, Laurence R., Columbia, S. C. Signal device and circuit closer therefor. 1,499,708; July 1.
Tyler, George W., Washington, D. C. Window-cleaning device. 1,499,563; July 1.
Ullman, Louis M., and D. A. Lederer, New Haven, Conn. Reducing garment. 1,499,564; July 1.
Underwood Computing Machine Company. (See Ansart, Louis L., assignor.)
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Oswald, Alfred E., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Underwood Typewriter Company. (See Waldheim, John, assignor.)
United Engineering and Foundry Company. (See Mueller, Henry, assignor.)
United Shoe Machinery Corporation. (See Johnson, Albert E., assignor.)
United States Cast Iron Pipe & Foundry Company. (See Ladd, James B., assignor.)
United States Chain & Forging Company. (See Bond, Frank A., assignor.)
U. S. Industrial Alcohol Co. (See Kiefer, Kenneth H., assignor.)
Universal Draft Gear Attachment Company. (See Camp, Percy B., assignor.)
Universal Winding Company. (See Morin, Frank A., assignor.)
Urban, Joseph, Los Angeles, Calif. Pruning shears. 1,499,565; July 1.
Van Brunt, Jackson W. (See Church, E. D., and Van Brunt.)
Volz, Charles A., Pigeon, Mich. Rim. 1,499,566; July 1.
Voorhis, John R., assignor to The Society of Tammany or Columbian Order, New York, N. Y. Badge or similar article. Des. 65,083; July 1.
Vox Maschinen-Aktiengesellschaft. (See Hagemann, Waldemar, assignor.)
Wadsworth Watch Case Company, The. (See Conant, Arthur P., assignor.)
Waggoner, Joseph B. (See Crummett, R. H., and Waggoner.)
Wagner, Ira D., St. Louis, Mo. Garment fastener. 1,499,428; July 1.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,499,709; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Bracket backplate for lighting fixtures. Des. 65,084; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Bracket backplate for lighting fixtures. Des. 65,085; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Bracket backplate for lighting fixtures. Des. 65,086; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Banding for lighting fixtures. Des. 65,087; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Husk rosette for lighting fixtures. Des. 65,088; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Arm for lighting fixtures. Des. 65,089; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Body for lighting fixtures. Des. 65,090; July 1.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Body for lighting fixtures. Des. 65,091; July 1.
Walpole, George S. (See Evans, Frank H. and H. A., assignors.)
Walter, Robert A. O., Mangawhare, Auckland, New Zealand. Shield for suspenders of trousers. 1,500,017; July 1.
Warner, Sterling W., Westfield, N. J., assignor to The Aeolian Company. Tracking device for music sheets and the like. 1,499,893; July 1.

Washburn, Charles H. (See Anderson, Robert J., assignor.)
Waterman, Waldo D., Los Angeles, Calif. Air circulator and heater. 1,499,894; July 1.
Webster Manufacturing Company, The. (See Landahl, E. E., and Jones, assignors.)
Weil, Edward, Brooklyn, N. Y. Fan. 1,499,490; July 1.
Weisgerber, Edwin C., Long Beach, Calif. Gas and oil separator. 1,499,710; July 1.
Weisiger, Jesse W., Rocky Mount, N. C. Gauge. 1,499,958; July 1.
Weiske, William C., and H. A. Dorman, Detroit, Mich.; said Weiske assignor to said Dorman. Visor for automobile windshields. 1,500,091; July 1.
Weissbeck, Pete, and L. Tibbals, Kansas City, Mo. Screw driver. 1,499,491; July 1.
Wellman-Seaver-Morgan Company, The. (See Thomas, Ivor D., assignor.)
Wennerby, Arthur O. L., Halmstad, Sweden. Combined air valve and fuel pump for internal-combustion engines. 1,499,794; July 1.
Werhosek, Jacob F. (See Smith, T. M., and Werhosek.)
Wernet, Frederick C., Albrightsville, Pa. Plate lifter. 1,499,959; July 1.
Western Electric Company. (See Field, Joseph C., assignor.)
Western Union Telegraph Company, The. (See Leedom, Randolph, assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Allcutt, Chester T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Batsel, Max C., assignor.)
Westinghouse Electric and Manufacturing Company. (See Baumann, Karl, assignor.)
Westinghouse Electric & Manufacturing Company. (See Fortescue, Charles L., assignor.)
Westinghouse Electric & Manufacturing Company. (See James, Henry D., assignor.)
Westinghouse Electric and Manufacturing Company. (See Kasley, Alexander T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Krantz, Hubert K., assignor.)
Westinghouse Electric and Manufacturing Company. (See Schmidt, Henry F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Slepian, Joseph, assignor.)
Westinghouse Electric & Manufacturing Company. (See Smith, John H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Sykes, Wilfred, assignor.)
Westinghouse Electric Products Company. (See Woodson, James C., assignor.)
Westinghouse Gear and Dynamometer Company. (See Kasley, Alexander T., assignor.)
Whalen, Edward J. (See Conley, E. J., and Whalen.)
Wherry, James B., Ardmore, S. Dak. Preparing exchange silicates for industrial purposes. 1,499,795; July 1.
Wherry, John A., New Orleans, La. Colinted work sheet. 1,499,711; July 1.
Whitaker, John R., Norton, Va. Holder. 1,500,018; July 1.
White, Curtis E. (See Atwell, L. E., Grant, and White.)
White, John F., assignor to White Products Co., Chicago, Ill. Hood latch. 1,499,895; July 1.
White Products Co. (See White, John F., assignor.)
White Tar Company, The. (See Kuhn, Evelyn L., assignor.)
Whitehorn, Homer A., Port Washington, N. Y. Cutting implement. 1,499,896; July 1.
Whiting Corporation. (See Townsend, John S., assignor.)
Whitney, Baxter D., & Son, Inc. (See Sawyer, Willard N., assignor.)
Whiton, D. E., Machine Co., The. (See Lee, Henry B., assignor.)
Wiedeke, Gustav, assignor to Gustav Wiedeke & Company, Dayton, Ohio. Tube cutter. 1,499,429; July 1.
Wiedeke, Gustav, & Company. (See Wiedeke, Gustav, assignor.)
Wiel-Berggren, Einar J. (See Aronsson, Karl H., assignor.)
Wiemels, Herbert B., West Park, Ohio. Clothes stick. 1,499,430; July 1.
Wiesner, Joseph F., Ellis, Kans. Measuring and cutting machine. 1,500,019; July 1.
Wilburger, William, Brooklyn, N. Y. Disk-record folio. 1,499,712; July 1.
Wilkinson, Harris C., Los Angeles, Calif. Imprinting machine. 1,499,796; July 1.
Willcox, Oswin W., Ridgewood, N. J., assignor to American Zeolite Corporation, Paterson, N. J. Preparation of artificial base-exchanging bodies. 1,499,492; July 1.
Willett, Alfred H., West New York, and H. S. Martin, Ridgewood, N. J., assignors to American Arch Company, New York, N. Y. Fire-box structure. 1,499,431; July 1.
Williams, Charles J., Croydon, England. Ore-concentrating machine. 1,499,847; July 1.
Williams, David C., Benton, Ill. Spool holder. 1,500,020; July 1.
Williams, J. B., Company, The. (See Hurst, George S., assignor.)
Williamson, Lozelia A., and G. Pinto, Hammonton, N. J. Twin-gear locomotive drive. 1,499,713; July 1.
Williston, Belvin T., Somerville, Mass., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y. Throttling valve. 1,499,433; July 1.
Williston, Belvin T., Somerville, Mass., and H. E. Eddy, East Orange, N. J., assignors to Manning, Maxwell & Moore, Inc., New York, N. Y. Rod-securing means. 1,499,432; July 1.
Wilson, C. R., Body Company. (See Breneman, Paul E., assignor.)
Wilson Fastener Company, The. (See Wilson, Frank E., assignor.)
Wilson, Frank E., East Cleveland, assignor to The Wilson Fastener Company, Cleveland, Ohio. Lingerie clasp. Des. 65,092; July 1.
Wilson Process, Incorporated. (See Wilson, Sidney C., assignor.)
Wilson, Sidney C., assignor to Wilson Process, Incorporated, Rochester, N. Y. Insole. 1,499,714; July 1.
Wilson, Walter G., Farningham, England. Rivet or clip. 1,500,021; July 1.
Winchester Repeating Arms Co. (See Paine, Arthur P., assignor.)
Winder, Samuel E., assignor to Novelty Products, Inc., Chicago, Ill. Feeding mechanism. 1,499,493; July 1.
Winder, Samuel E., assignor to Novelty Products, Inc., Chicago, Ill. Molding and baking machinery. 1,499,494; July 1.
Windsor Charles H., Palmyra, N. J. Sanitary bathing appliance. 1,499,495; July 1.
Wireless Specialty Apparatus Company. (See Priess, William H., assignor.)
Wishon, Evia L., Picher, Okla. Pulling and lifting device. 1,499,715; July 1.
Wolf, Daisy K., Louisville, Ky. Combined corset and brassière. 1,499,897; July 1.
Wolf, Robert B., New York, N. Y. Method of and apparatus for absorbing gases in liquids. 1,499,898; July 1.
Wolfe, Allan S., Washington, D. C. Surgical syringe. 1,499,899; July 1.
Wolff, Joseph, Brooklyn, N. Y., assignor to Sonora, Inc. Radio loud speaker. Des. 65,093; July 1.
Wood, Herbert, Sydney, New South Wales, Australia. Gas retort. 1,499,567; July 1.
Woodrow Nipple Mfg. Co. (See Stech, Joseph G., assignor.)
Woods, Frederick N, jr. (See Hadsel, Alvah D., assignor.)
Woods, Norman E., Paterson, N. J. Making twist drills. 1,499,797; July 1.
Woodson, James C., Mansfield, Ohio, assignor to Westinghouse Electric Products Company. Tubing-head heater. 1,499,434; July 1.
Woodward, David J., San Antonio, Tex. Curtain fastener. 1,500,022; July 1.
Worcester, James, Waltham, Mass. Propelling mechanism for ships. 1,499,716; July 1.
Wright, Lee O., Betsy Layne, Ky. Wrench. 1,499,717; July 1.
Wurzlow, Calvin, Houma, La. Garbage receptacle. 1,500,023; July 1.
Wyzenbeck, Andrew, assignor to F. L. Kohlhase, Chicago, Ill. Electric toaster and heater. 1,499,757; July 1.
Young, Franklin J. (See Reynolds, William C., assignor.)
Yount, Miles F., Beaumont, Tex. Tongs. 1,499,435; July 1.
Zadikow, Israel. (See Chige, I., and Zadikow.)
Zanghi, Joseph. (See Floresta, J. G., and Zanghi.)
Zeman, Mathew, Cleveland, Ohio. Double-hung steel sash. 1,499,436; July 1.
Zucker, Gottlieb F., Chicago, Ill. Means for steadying ships. 1,499,900; July 1.
Zykin, John New York, N. Y. Dishwashing machine. 1,499,718; July 1.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 1ST DAY OF JULY, 1924.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accelerator mechanism. E. J. Bloom. 1,499,849; July 1.
Acid in dehydrated form and making the same, Phosphoric. J. H. Gravell. 1,499,611; July 1.
Addressing machine or like printing machine. L. M. Barman. 1,499,330; July 1.
Addressing machines, Inking device or attachment for use with. L. M. Barman. 1,499,329; July 1.
Adjustable post. J. H. Stebbins. 1,499,755; July 1.
Advertising display device. G. S. Hurst. 1,499,927; July 1.
Advertising display screen. G. S. Hurst. 1,499,661; July 1.
Aerial train. W. E. Ikerman. 1,499,825; July 1.
Aeroplane. J. F. Penn. 1,499,943; July 1.
Air and other separator. G. H. Fraser. 1,499,515; July 1.
Air circulator and heater. W. D. Waterman. 1,499,894; July 1.
Air cleaner. J. A. Gordon. 1,499,864; July 1.
Aircraft and other structures, Framework for. F. M. Green. 1,499,980; July 1.
Air heater. H. E. Browning. 1,499,442; July 1.
Air pan. E. H. Anderson. 1,499,496; July 1.
Airplane landing mechanism. H. C. Pratt. 1,499,472; July 1.
Air separator. G. H. Fraser. 1,499,722–3; July 1.
Air vent. A. G. Kruppa. 1,499,461; July 1.
Alarm: *See*—
Burglar alarm. Tire alarm.
Alcohols and aldehydes from hydrocarbons, Process and device for preparing. C. A. Kloppenburg. 1,500,080; July 1.
Alternating current system. F. Rieber. 1,499,551; July 1.
Amusement device. E. A. Lezert. 1,499,672; July 1.
Antiskidding device. S. D. Jacobson. 1,499,932; July 1.
Auger. C. E. Gould. 1,500,069; July 1.
Auto brake safety catch. H. Sachs. 1,499,948; July 1.
Auto golf-bag carrier. F. Frisk. 1,500,067; July 1.
Automatic ventilator. A. A. Gilmore. 1,499,978; July 1.
Automobile brake. E. E. Dewey. 1,499,807; July 1.
Automobile brake bands, Riveting device for. H. Silvernail. 1,499,883; July 1.
Automobile brake guard. J. H. Lacy. 1,499,375–7; July 1.
Automobile curtain. E. J. Thurber. 1,500,014; July 1.
Automobile shock absorber. S. B. Segura. 1,499,882; July 1.
Automobile starting device. A. C. Asper. 1,500,043; July 1.
Automobile steering-wheel lock. J. Erdey. 1,499,356; July 1.
Automobile suspension. D. J. McDougal. 1,499,675; July 1.
Automobile wheel. W. W. McLaren. 1,499,835; July 1.
Automobile windshields, Visor for. W. C. Weiske and H. A. Dorman. 1,500,091; July 1.
Automobiles, Differential drive clutch for. J. Blackburn. 1,499,336; July 1.
Automobiles, Hood attachment for. R. J. Griesedieck. 1,499,820; July 1.
Automobiles, Removable end crank for. M. E. Rogers. 1,499,694; July 1.
Automobiles, Speed-controlling apparatus for. J. K. B. Falck. 1,499,765; July 1.
Automobiles, Windshield for. A. D. Perkins. 1,499,869; July 1.
Axle set. O. Salbach. 1,499,555; July 1.
Badge or similar article. J. R. Voorhis. Des. 65,083; July 1.
Bait, Artificial. J. E. Ford. 1,499,975; July 1.
Bait, Artificial. C. T. Pflueger and W. L. Adams. 1,499,689; July 1.
Bandage. D. O. Sewall. 1,499,789; July 1.
Bandage, Elastic. H. B. Chatterton. 1,499,805; July 1.
Bassinet or crib. A. G. Feldman. Des. 65,059; July 1.
Batch mixer. C. R. Dimm. 1,500,061; July 1.
Battery: *See*—
Storage battery.
Battery. A. Morch. 1,500,027; July 1.
Battery box. G. C. Stebbins. 1,499,704; July 1.
Battery charging, System and device for. W. T. Powell. 1,500,034; July 1.
Battery plate and making same. W. E. Holland. 1,500,076; July 1.
Beadwork, Fabricated. M. Godefroy. 1,499,769; July 1.
Bearing mechanism for spring shackles, Antifriction. R. M. Lovejoy. 1,499,388; July 1.
Bearings, Fluid-pressure support for. K. Baumann. 1,499,332; July 1.
Bed, Fresh-air. A. B. Cooke. 1,500,093; July 1.
Berry picker. R. C. Trayhorn. 1,500,016; July 1.
Bias-cutting machine. M. A. Marquette. 1,499,676; July 1.
Blind lath. W. G. King and F. E. Maynard. 1,499,827; July 1.
Bobbin-winding machine. P. A. Herr. 1,499,925; July 1.
Boiler. W. H. McGrath. 1,499,585; July 1.
Boiler. A. Rusinski. 1,500,002; July 1.
Boll-weevil collector. J. H. Hancock. 1,499,981; July 1.
Boring machine, Earth-. R. Leedom. 1,499,938; July 1.
Boring tool, Well-. W. J. Rogers. 1,500,001; July 1.
Bottle. S. Blackman. Des. 65,048; July 1.
Bottle. A. W. Doerr. Des. 65,058; July 1.
Bottle-capping machine. K. H. Kiefer. 1,499,619; July 1.
Bowl or similar article. J. R. Keller. Des. 65,062; July 1.
Box: *See*—
Battery box. Flower box.
Classification box. Sound box.
Display box. Switch box.
Fare box. Vanity box.
Box-strapping machine. A. G. G. Guenther. 1,499,454; July 1.
Braiding machine. M. Krissiep. 1,499,830; July 1.
Brake: *See*—
Automobile brake. Car brake.
Brake band and lining. R. B. Hartman. 1,499,528–9; July 1.
Brine purifier, Continuous. H. D. Oxley. 1,500,096; July 1.
Brush. R. H. Crummett and J. B. Waggoner. 1,499,507; July 1.
Buckle, Backband. W. L. Becton. 1,499,333; July 1.
Buckle, Belt. J. De Groote. 1,499,453; July 1.
Buckle, End. J. C. Nichols. 1,499,747; July 1.
Building, Portable wall section for house. K. H. Aronsson. 1,499,630; July 1.
Buildings or weirs against hollowing out or washing away, Protection of. K. Terzaghi. 1,499,956; July 1.
Bull-wheel structure. R. R. Bloss. 1,499,500; July 1.
Burglar alarm. J. Sosoka. 1,499,951; July 1.
Burner: *See*—
Hydrocarbon burner. Rubbish burner.
Liquid-fuel burner. Stump burner.
Oil burner.
Burner attachment. H. M. Sheer. 1,500,005; July 1.
Button. J. Fischl. 1,499,513; July 1.
Buttons, Protector for collar. M. Cohn and W. F. Probst. 1,500,053; July 1.
Cable attachment. J. F. Reilly. 1,499,477; July 1.
Calculating machine. P. Reiss. 1,499,593; July 1.
Camping outfit. B. E. Canfield. 1,499,972; July 1.
Can. T. S. Friend. 1,499,919; July 1.
Candle, Mortuary. E. L. Kuhn. Des. 65,070–1; July 1.
Candlestick. M. Klein. Des. 65,064; July 1.
Candy-coating machines, Bottomer for. J. Conte. 1,499,347; July 1.
Can-filling machine. O. H. Hansen. 1,499,366; July 1.
Can opener and seal. H. N. Roberts. 1,499,405; July 1.
Cap, Knitted. A. Cohn. Des. 65,053; July 1.
Car brake. A. R. Anderson. 1,499,439; July 1.
Car-brake mechanism, Railway-. P. B. Camp. 1,499,342; July 1.
Car brake, Mine-. J. McCool. 1,499,674; July 1.
Car-controlling device. L. A. Brake. 1,499,638; July 1.
Car-door-operating mechanism. L. P. Hynes. 1,499,735; July 1.

Stock-watering device. T. Ritchie. 1,499,999; July 1.
Stockings, Treating silk. E. Mendelsohn. 1,500,026; July 1.
Stop-motion device. W. S. Mills and H. E. Bisaillon. 1,499,867–8; July 1.
Storage battery. S. H. Brown. 1,499,907; July 1.
Storage-battery cell. R. J. Anderson. 1,499,901; July 1.
Storage batteries, Separator for. F. W. Frahm. 1,499,863; July 1.
Stove. W. F. Allen. Des. 65,042; July 1.
Stove, Gas. A. F. Glass. 1,499,362; July 1.
Stud driver. L. Skeel. 1,499,701; July 1.
Stuffing boxes for revolving shafts of all kinds, and especially of turbine shafts, Construction of. J. Leroy. 1,499,583; July 1.
Stump burner. O. Kohse. 1,499,373; July 1.
Sugar holder. J. M. Bardera. 1,499,902; July 1.
Support. S. L. Heidrich. 1,499,984; July 1.
Suppository and making same. F. D. Crane and W. J. Schieffelin. 1,499,348; July 1.
Suspenders of trousers, Shield for. R. A. O. Walter. 1,500,017; July 1.
Switch: *See*—
Electromagnetic switch. Push-button switch.
Motor-starting switch. Safety switch.
Switch box, Safety. F. R. Oberlander. 1,499,996; July 1.
Syringe, Ampul-. H. Spahlinger. 1,499,952; July 1.
Syringe, Hypodermic. H. C. Deane. 1,499,508; July 1.
Syringe, Surgical. A. S. Wolfe. 1,499,899; July 1.
Syringe, Valveless suction and force. L. Jubé. 1,499,662; July 1.
Switch box. H. K. Krantz. 1,499,374; July 1.
Switching system. J. C. Field. 1,499,766; July 1.
Table: *See*—
Drill-press table.
Table and ironing board, Combined. M. Goodman. 1,500,068; July 1.
Tables, Platen for stereotype drying. W. W. McCarroll. 1,499,779; July 1.
Tank filler. H. Craig. 1,499,642; July 1.
Tanks or the like, Closure for. C. L. Arnold. 1,499,629; July 1.
Target trap. W. L. Spangler. 1,499,845; July 1.
Teeth-cleaning instrument. E. L. Chott. 1,499,345–6; July 1.
Telegraphy. A. Ebeling. 1,499,646; July 1.
Telephone system, Automatic. W. T. Powell. 1,499,871; July 1.
Tent-supporting apparatus. A. G. C. Muehlsiepen. 1,499,395; July 1.
Testing machine. A. E. Oxley. 1,499,546; July 1.
Textile-fabric package, Special. L. Marx. 1,499,994; July 1.
Thermostat for typecasting machines. H. A. Lux. 1,499,834; July 1.
Thread clearer. S. Hyslop. 1,499,929; July 1.
Thread cutter. F. B. Herring. 1,499,823; July 1.
Thread-milling machines, Reversing mechanism for. F. J. Larson. 1,499,381; July 1.
Threads, Tolerance gauge for tapered. B. M. W. Hanson. 1,499,731; July 1.
Tile-plate machine. J. Kurkowski. 1,499,537; July 1.
Tile, Roofing. S. B. Myers. 1,499,397; July 1.
Timbers, Preservative treatment for. G. B. Shipley. 1,499,791; July 1.
Time-controlled apparatus. B. Brault. 1,499,968; July 1.
Tire alarm, Soft-. O. Nelson. 1,499,590; July 1.
Tire-chain shoe. E. Francis. 1,499,648; July 1.
Tire-chain tightener and fastener, Combined. F. C. Kies. 1,499,667; July 1.
Tire, Nonpneumatic. A. Egg. 1,499,810; July 1.
Tire, Pneumatic. S. B. Robertson. Des. 65,081; July 1.
Tire, Pneumatic vehicle-. J. L. Helton. 1,499,392; July 1.

Tire pressure gauge. A. Badowski. 1,499,327–8; July 1.
Tire tread. H. D. Reichard. Des. 65,080; July 1.
Tires, Mold for the manufacture of resilient. E. J. Taylor. 1,499,793; July 1.
Tires, Pressure gauge for. A. Badowski. 1,499,497; July 1.
Toaster and heater, Electric. A. Wyzenbeek. 1,499,757; July 1.
Toaster or similar article, Electric. G. E. Curtiss. Des. 65,056; July 1.
Tongs. M. F. Yount. 1,499,435; July 1.
Tractors, Distance control mechanism for. E. Litton. 1,499,990; July 1.
Tongs, Barrel. A. H. Evans. 1,499,574; July 1.
Tongs, Clinker. C. F. Skoog. 1,499,753; July 1.
Tongs, Pipe. W. C. Reynolds. 1,499,552; July 1.
Tool, Compound. J. G. Stech. 1,499,416; July 1.
Tooth, Artificial. A. Steckelmacher. 1,499,417; July 1.
Top spinner. E. L. Cayo. 1,499,803 July 1.
Towline take-up. W. Northrup. 1,499,686; July 1.
Toy. S. C. Blas. 1,500,047; July 1.
Toy, Electric. E. Foderaro. 1,499,816; July 1.
Toy horse. A. Pollman. 1,500,033; July 1.
Toy, Mechanical. F. Strauss and A. Dingfeld. 1,499,485; July 1.
Toy pistol. J. Kellermann. 1,500,079; July 1.
Toy, Sounding. E. E. Landon. 1,499,539; July 1.
Tractor. H. F. Schmidt. Re15,870; July 1.
Tractor hitch. A. H. Krueger. 1,499,669; July 1.
Traffic-signaling apparatus for street crossings. J. W. Brenkert. 1,499,906; July 1.
Transmission. R. A. Beckwith. 1,499,634; July 1.
Transmission mechanism. W. C. Stevens. 1,499,418; July 1.
Trap: *See*—
Insect trap. Target trap.
Trap. O. F. Bunn. 1,500,050; July 1.
Tray, Foldable posting. C. B. Harrison. 1,499,527; July 1.
Tray, Impression. I. Chige and I. Zndikow. 1,499,344; July 1.
Trend grip. C. L. Hoff. 1,499,579; July 1.
Tree treating. F. L. Lanphere. 1,499,671; July 1.
Trolley harp and means for effectively operating the same. H. Ramelow. 1,499,548; July 1.
Trough end, Metal feed-. A. G. Meister. 1,499,542; July 1.
Trouser press. J. W. Cooper. 1,499,506; July 1.
Truck. J. W. Henderson. 1,499,530; July 1.
Trucks, Corner iron for. E. Dietz. 1,500,092; July 1.
Tube cutter. G. Wiedeke. 1,499,429; July 1.
Tubes and a continuous mill therefor, Method of manufacturing. J. A. Katzenmeyer. 1,499,535; July 1.
Tubes, etc., Splicing of pneumatic. W. F. Russell and M. K. Stevens. 1,499,752; July 1.
Tubing-head heater. J. C. Woodson. 1,499,434; July 1.
Tubing spider. C. H. Benckenstein. 1,499,635; July 1.
Tumbler or similar article. E. B. Adams. Des. 65,041; July 1.
Turbine water wheel. J. H. Prince. 1,499,475; July 1.
Typewriting and computing machine, Combined. L. L. Ansart. 1,499,326; July 1.
Typewriting machine. A. G. F. Kurowski. 1,499,936; July 1.
Typewriting machine. J. Lagulonie. 1,499,582; July 1
Typewriting machine. J. A. B. Smith. 1,499,415; July 1.
Typewriting machine. J. Waldheim. 1,499,709; July 1.
Typewriting machines for feeding, cutting off, and removing forms, Device for. W. Schoenenberg. 1,499,410; July 1.
Undergarment. H. B. Ferguson. 1,499,915; July 1.
Universal joint. A. T. Kasley. 1,499,371; July 1.
Vacuum cleaner for inclosed passenger vehicles. W. Leathers. 1,499,937; July 1.
Valve. J. K. Robinson. 1,499,478; July 1.
Valve chambers and cylinders, Piston for use in cylindrical. J. M. Mason. 1,499,677; July 1.
Valve, Drain. F. H. Etzenhouser. 1,499,451; July 1.
Valve, Float. H. Mittel. 1,499,837; July 1.
Valve lock. W. O. Kaiser. 1,499,663; July 1.
Valve, Safety or relief. G. A. Parker. 1,499,840; July 1.
Valve-seat-removing mechanism. H. Foley. 1,499,917; July 1.
Valve silencer. A. C. Ennis. 1,499,573; July 1.
Valve-spring lifter. H. A. R. Peterson. 1,499,843; July 1.
Valve-stem silencer. A. E. Hutt. 1,499,928; July 1.
Valve, Stop and check. R. A. Hern. 1,499,578; July 1.
Valve, Throttle. W. G. Naismith. 1,499,470; July 1.
Valve, Throttling. B. T. Williston. 1,499,433; July 1.
Vanity box. M. Freund. 1,499,361; July 1.
Vanity case. C. N. Coryell. 1,499,855–6; July 1.
Vehicle bodies, Detachable upholstery for metallic. P. E. Breneman. 1,499,339; July 1.
Vehicle pulling device. J. L. Dibrell. 1,499,357; July 1.
Vehicle spring. G. A. Gemmer. 1,499,768; July 1.
Vehicle spring. W. Haselherst. 1,499,654; July 1.
Vehicles, Automatic safety device for. R. V. Glover. 1,499,576; July 1.
Vehicles, Controlling means for motor-driven. W. E. Tullar. 1,499,427; July 1.
Vehicles, Dust-laying device for motor. A. Bandelier. 1,499,760; July 1.

Vehicles, System of communication with moving. H. A. Affel. 1,499,438; July 1.
Velocipede, Figure. M. Singer. 1,499,884; July 1.
Ventilation and operating means therefor, System of. W. Sykes. 1,499,423; July 1.
Ventilator: *See*—
Automatic ventilator.
Vessel for navigation under ice, Submersible. S. Lake. 1,500,000; July 1.
Vise for use with machine tools. F. Lehmann. 1,499,989; July 1.
Wagon, Dumping. R. R. Brown. 1,499,969; July 1.
Wall construction. W. A. L. Schaefer. 1,499,787; July 1.
Wall construction. J. H. Simms. 1,499,483; July 1.
Washing machines, Positively-actuated clutch for. J. F. Lamb. 1,499,742; July 1.
Watch. W. A. Reed. 1,499,692; July 1.
Watch winding device. J. A. Freund. 1,499,609; July 1.
Watchcase bow. A. P. Conant. Des. 65,054; July 1.
Water heaters, Thermostatic controller for gas. B. Ryan. 1,499,947; July 1.
Weighing apparatus, Automatic. M. Mathieu. 1,499,623; July 1.
Weighing mechanism. E. C. Pool. 1,499,782; July 1.
Welding, Electric. S. Dyhr. 1,499,645; July 1.
Welding, Electric-arc. E. Gruenfeldt. 1,499,770; July 1.
Welding machine. E. A. Bienenstok. 1,499,498-9; July 1.
Well-drilling apparatus, Material-testing appliance for. J. T. Rea. 1,499,550; July 1.
Well mechanism. M. E. Layne and S. N. Hall. 1,499,383; July 1.
Well packer. H. W. Fletcher. 1,499,916; July 1.
Well screen. M. E. Layne. 1,499,382; July 1.
Wells, Back-pressure valve for oil and artesian. A. L. Smith. 1,499,702; July 1.
Wheel: *See*—
Automobile wheel. Turbine water wheel.
Wheel attachment, Vehicle. H. J. Strauss. 1,499,705; July 1.
Wheel for motor and other road vehicles, Disk. H. H Duke. 1,499,809; July 1.
Wheel rim, Automobile. F. R. Klaus and H. W. Kranz. 1,499,739; July 1.
Winding machine. F. A. Morin. 1,499,681; July 1.
Windlass for the loading of vehicles, Hauling. R. Larmignat. 1,499,380; July 1.
Window cleaner. G. C. Sherman. 1,500,006; July 1.
Window-cleaning device. G. W. Tyler. 1,499,563; July 1.
Window construction. W. C. Lea. 1,499,540; July 1.
Window-control mechanism. S. W. Nicholson. 1,499,545; July 1.
Window-sash opener. W. F. Rotermund. 1,499,876; July 1.
Window, Ventilating. C. Poehner. 1,500,032; July 1.
Wire stretcher. J. M. Martin. 1,499,993; July 1.
Wireless receiving circuit. M. C. Batsel. 1,499,331; July 1.
Wireless receiving circuits, Tuning device for. C. M. Gray. 1,499,979; July 1.
Wood, Impregnating. H. Finkelstein. 1,500,066; July 1.
Wood into pulp, Machine for grinding. P. Priem. 1,499,547; July 1.
Wood pulp to be converted into paper, Extracting certain valuable constituents as by-products from the cooking liquors derived from the production of. E. G. Goodell. 1,499,363; July 1.
Wood-turning machine. L. H. Burlin. 1,499,802; July 1.
Work sheet, Collated. J. A. Wherry. 1,499,711; July 1.
Wrench. S. Champion. 1,499,804; July 1.
Wrench. L. O. Wright. 1,499,717; July 1.
Wringer: *See*—
Mop wringer.
Yarn changer. W. Larkin. 1,500,083; July 1.

CLASSIFICATION OF PATENTS

ISSUED JULY 1, 1924.

2— 29: 1,499,564
42: 1,499,897
1,499,935
50: 1,499,857
144: 1,499,915
236: 1,499,647
4— 154: 1,499,425
166: 1,499,495
5— 27: 1,499,745
97: 1,500,093
109: 1,500,009
8— 2: 1,500,060
17: 1,500,046
10— 154: 1,499,381

American Safety Razor Corporation. (See Kaufman, Joseph, assignor.)
American Steel Foundries. (See Williams, William E., assignor.)
American Telegraph Typewriter Company. (See Cardwell, Allen D., assignor.)
American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)
Amzler, Stefan, assignor of one-fourth to W. C. Sumner, Ogden, Utah. Crude-oil burner. 1,500,175; July 8.
Anderson, Albert S., Schenectady, N. Y., assignor to General Electric Company. Turbine rotor. 1,500,787; July 8.
Anderson, Charles H. (See Torresson, A., and Anderson.)
Anderson, Frank C., Cincinnati, Ohio. Switch-rail guard. 1,500,176; July 8.
Anderson, Harley E., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Hand brake. 1,500,009; July 8.
Anderson, Harley E., assignor of one-half to W. L. Kellogg, Chicago, Ill. Brake rigging for railway cars. 1,500,217; July 8.
Anderson, Harold N., Cleveland, Ohio. Die for rolling gears. 1,500,567; July 8.
Anderson, Henry J., assignor to E-Z Manufacturing Co., Minneapolis, Minn. Piston ring. 1,500,357; July 8.
Anderson, Hilmer S., Belmont, Mass. Amusement apparatus. 1,500,788; July 8.
Anderson, Robert C., and F. F. Rike, assignors to Buckeye Iron & Brass Works, Dayton, Ohio. Exhaust whistle. 1,500,100; July 8.
Annin & Co. (See Chandler, Digby W., jr., assignor.)
Antoni, Guido and U., Florence, Italy. Aeroplane. 1,500,358; July 8.
Antoni, Ugo. (See Antoni, Guido and U.)
Antonuitis, Joseph. (See Ozerowicz, Alexander, assignor.)
Aoyagi, Eiji, Kyoto, Japan. Electrometallurgical process for manufacture of ductile bodies of high-fusing metals and alloys of same. 1,500,789; July 8.
Arcas Brass and Iron Company Inc. (See Ross, Thomas H., assignor.)
Armstrong, Joseph, Malden, assignor to American Moistening Company, Boston, Mass. Humidifying system. 1,500,481; July 8.
Arnot, Robert, Bushey, England. Dye and making same. 1,500,915; July 8.
Arrow Electric Company, The. (See Nero, Arvid H., assignor.)
Associated Silver Company. (See Lashar, Thomas B., assignor.)
Auld, John F., Santa Monica, Calif. Frame construction for windows, doors, and the like. 1,500,359; July 8.
Ausherman, William S., Talmage, Kans. Automatic liquid pump. 1,500,177; July 8.
Ayliffe, Harry, London, assignor to Caribonum Limited, Leyton, Essex, England. Attaching labels or the like. 1,500,432; July 8.
Bacharach, Herman, Pittsburgh, Pa., assignor to Bacharach Industrial Instrument Company. Gauge. 1,500,790; July 8.
Bacharach Industrial Instrument Company. (See Bacharach, Herman, assignor.)
Bachman, John S., Rome, Ga. Twister. 1,500,296; July 8.
Baer, Abram K., assignor to Strouse-Baer Company, Baltimore, Md. Adjustable garment. 1,500,981; July 8.
Baits, Stuart G. (See Fekete, S. I., and Baits.)
Baker, James B. (See Brougham, Edward, assignor.)
Baker, Joseph W. (See Tackabery, Claud M., assignor.)
Bakken, Tollef O., Bode, Iowa. Oil can. 1,500,791; July 8.
Ball, Albert, Claremont, N. H., assignor, by mesne assignments, to Sullivan Machinery Company, Boston, Mass. Stoneworking machine. 1,500,597; July 8.
Ball, Joseph C., Kinsdale, Va. Method and means for replacing battery posts and threads. 1,500,663; July 8.
Ballard, Milton H., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Press. 1,500,101; July 8.
Barker, Seth S., Bloomfield, Iowa. Coop. 1,500,792; July 8.
Barnhill, William T., Seattle, Wash. Connecting joint. 1,500,569; July 8.
Baron, Charles S., Tiffin, Ohio. Liquid container with detachable top. 1,500,218; July 8.
Barrett, William J., Bridgeport, Conn. Illuminated target. 1,500,482; July 8.
Barron, William L., Oklahoma City, Okla. Spark plug. 1,500,916; July 8.
Bart, Thomas E., Cincinnati, Ohio, assignor to The Murdoch Manufacturing and Supply Company. Bubbler head for drinking fountains. 1,500,178; July 8.
Bauman, A. E. (See Blankenbagen, Albert, assignor.)
Baush Machine Tool Company. (See Hyde, Arthur S., assignor.)
Beggs Engineering Company, Incorporated, The. (See Beggs, Thomas R., assignor.)
Beggs, Thomas R., New York, N. Y., assignor to The Beggs Engineering Company, Incorporated, Hartford, Conn. Flushing device. 1,500,664; July 8.
Bell, Robert J., assignor to Economy Barrel Corporation, Richmond, Va. Barrel construction. 1,500,917; July 8.
Benefield, William G., deceased. (See Robertson, G. W., Hogg, Gorsed, and Benefield.)
Benford, Frank A., Schenectady, N. Y., assignor to General Electric Company. Glass mirror. 1,501,031; July 8.
Benjamin, Chester W. (See Rogers, J. F., Douglas, and Benjamin.)
Benner, Raymond C., Bayside, assignor, by mesne assignments, to The Prest-O-Lite Company, Inc., New York, N. Y. Storage-battery grid. 1,500,219; July 8.

Benner, Raymond C., Bayside, assignor, by mesne assignments, to The Prest-O-Lite Company, Inc., New York, N. Y. Separator and method of making the same. 1,500,220; July 8.

Benner, Raymond C., Bayside, assignor, by mesne assignments, to The Prest-O-Lite Company, Inc., New York, N. Y. Storage cell or battery and electrode therefor. 1,500,221; July 8.

Benner, Raymond C., Bayside, and H. F. French, Flushing, assignors, by mesne assignments, to The Prest-O-Lite Company, Inc., New York, N. Y. Storage cell or battery. 1,500,222; July 8.

Beranger, John G., Cambridge, Mass. Window lock. 1,500,540; July 8.

Berdar, Peter. (See Sonner, Carl, assignor.)

Bernache, George A., Northampton, Mass. Truck scale. 1,500,541; July 8.

Bertsch, Charles C. (See Kallenbach, W. H., and Bertsch.)

Bertsch, Ernest, Haguenau, France. Sensitizing composition for preparing blue-print paper. 1,500,433; July 8.

Best, Frank E., Seattle, Wash. Cylinder lock. 1,500,297. July 8.

Biggert, Florence C., jr., Crafton, assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Shears. 1,500,600; July 8.

Biledeau, William, Montreal, Quebec, Canada. Cheese cutter. 1,500,179; July 8.

Bingay, Robert V., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Transformer-cooling means. 1,500,793; July 8.

Birkin and Company. (See Birkin, C. W., and Sands, assignors.)

Birkin, Charles W., and E. T. Sands, assignors to Birkin and Company, Broadway, Nottingham, England. Lace. Des. 65,094; July 8.

Birkin, Charles W., and E. T. Sands, assignors to Birkin and Company, Broadway, Nottingham, England. Lace. Des. 65,095; July 8.

Bishop, John L., Jackson, Tenn. Garter or sleeve holder. 1,500,223; July 8.

Bjorlin, Harold E., Duluth, Minn. Bread-slicing machine. 1,500,434; July 8.

Blake, Charles, Pontiac, Ill. Rail anchor. 1,500,224; July 8.

Blaker, Ernest, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Vulcanizing. 1,500,700; July 8.

Blanc, Emile. (See Bouvier, M. E., and Blanc.)

Blanké, Herman B., Chicago, Ill. Time-clock dial. 1,500,701; July 8.

Blankenhagen, Albert, assignor to A. E. Bauman, Akron, Ohio. Life preserver. 1,500,665; July 8.

Blauser, Edward S., Basil, Ohio. Corn-husking machine. 1,500,542; July 8.

Bliss, E. W., Company. (See Dieter, William, assignor.)

Blodgett, Charles A. (See Hanson, H. H., Leecock, and Blodgett.)

Bodgar, Bartholomew J., Astoria, N. Y. Trousers. 1,500,570; July 8.

Boehm, Wilhelm, Berlin, Germany. Pocket lamp for high light power. 1,500,180; July 8.

Bolton, Bertha, et al. (See Bolton, P. W., and Minnear, assignors.)

Bolton, Philip W., and W. N. Minnear, assignors of one-fifth to G. D. Minnear, one-fifth to N. G. Ryman, and one-fifth to B. Bolton, Coffeyville, Kans. Outlet valve. 1,500,918; July 8.

Bonaparte, Swan G., St. Paul, Minn. Drier. 1,500,862; July 8.

Bornschein, George D., San Francisco, Calif. Wrecking truck and towing apparatus. 1,500,225; July 8.

Bosch, Robert, Aktiengesellschaft. (See Ingelfinger, Edmund, assignor.)

Bosch, Robert, Aktiengesellschaft. (See Rall, M., and Maier, assignors.)

Bostley, Frank, South Williamsport, Pa. Trigger mechanism for guns. 1,500,666; July 8.

Boston Insulated Wire and Cable Company. (See Burley, Harry B., assignor.)

Bourn, Robert T., Templeton, Mass. Post-office furniture. 1,500,226; July 8.

Bouvier, Maurice E., and E. Blanc, Lyon, assignors to Société Chimique des Usines du Rhone, Paris, France. Catalyst. 1,500,794; July 8.

Bowles, Leonard G., assignor of one-half to B. S. Miller, Columbus, Ohio. Lock. 1,500,435; July 8.

Boyle, Lewis H., Beloit, Ohio. Harness. 1,500,360; July 8.

Bradburn, Curtis E., assignor of one-half to C. Rewerts and one-half to J. Bradburn, Garden City, Kans. Hair curler. 1,500,919; July 8.

Bradburn, Julia, et al. (See Bradburn, Curtis E., assignor.)

Bradley, William F., and J. W. Hulson, assignors to Hulson Grate Company, Keokuk, Iowa. Grate section. 1,500,920; July 8.

Bramhorst, John H., Milwaukee, Wis. Clamp. 1,500,795; July 8.

Bramson, Mogens L., J. Hanson, and T. B. Caldwell, Stafford, England. Flexible pipe line. 1,500,921; July 8.

Bradshaw, Charles E., Waterbury, Conn. Key holder. 1,500,483; July 8.

Bradenburg, Francis C., assignor to The Wood Shovel and Tool Company, Piqua, Ohio. Method and apparatus for simultaneously forming and heat treating shovels. 1,500,571; July 8.

Brann, Harriet L., Des Moines, Iowa. Hair curler. 1,500,922; July 8.

Brantman, Maurice W., Brooklyn, assignor to Republic Knitting Mills, Inc., New York, N. Y. Knitted jacket. Des. 65,096; July 8.

Braun, Philip N., assignor to The Prosperity Co. Inc., Syracuse, N. Y. Shirt-ironing machine. 1,500,543; July 8.

Brawner, Harry O., Baltimore, Md. Making short-neck bottles. 1,500,484; July 8.

Breneman, Joseph T., El Cerrito, Calif. Speculum and dilator. 1,500,227; July 8.

Breune, Arild M., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,500,102; July 8.

Brewster, Guy O., New York, N. Y. Jar or similar article. Des. 65,098; July 8.

Brewster, Harry L., Somersworth, N. H. Traffic signal for motor vehicles. 1,500,601; July 8.

Britton, William M., Alma, Mich. Axle. 1,500,436; July 8.

Broadhead, Roland W., Eliand, England. Bearing for the guidance and lateral support of gas holders. 1,500,796; July 8.

Brockley, Jacob, Newport News, Va. Article carrier and display device. 1,500,544; July 8.

Brockway, Carl P., assignor to Industrial Research Corporation, Toledo, Ohio. Pump lubrication mechanism. 1,500,361; July 8.

Brooks, Charles H. (See Elbelt, W. H., and Brooks.)

Brougham, Edward, Pennant, Saskatchewan, assignor of one-half to J. P. Baker, Henribourg, Saskatchewan, Canada. Yoke-ring lock and rein guard. 1,500,228; July 8.

Brougham, Edward, Pennant, Saskatchewan, assignor of one-half to J. P. Baker, Henribourg, Saskatchewan, Canada. Yoke-ring lock and rein guard. 1,500,229; July 8.

Brown, Leonard. (See Hibler, E. A., and Brown.)

Brown, William, New York, N. Y. Helicopter. 1,500,572; July 8.

Brügger, Xaver, Horgen, Switzerland. Winding frame. 1,500,602; July 8.

Brühl, Paul, assignor to Maschinenfabrik Rheinland A. G., Dusseldorf, Germany. Method and device for grinding balls or rollers. 1,500,485; July 8.

Bryant, Harriett C., New Milford, Conn. Wall paper. Des. 65,097; July 8.

Buchanan, Hugh. (See Moir, D., and Buchanan.)

Buchsbaum, Samuel, Chicago, Ill. Belt buckle. 1,500,362; July 8.

Buchsbaum, Samuel, Chicago, Ill. Three-piece buckle. 1,500,363; July 8.

Buckeye Iron & Brass Works. (See Anderson, R. C., and Rike, assignors.)

Buckley, Joseph L., Trenton, N. J., assignor, by mesne assignments, to Proctor & Schwartz, Incorporated, Philadelphia, Pa. Drying apparatus. 1,500,923; July 8.

Budde & Westermann. (See Burno, Joseph N., assignor.)

Budlington, Lew E., Crawfordsville, Ind. Bread making. 1,500,545; July 8.

Burdon, Matthew M. (See Burdon, W. M. and M. M.)

Burdon, William M. and M. M., assignors to Burdons Limited, Bellsbill, Lanarkshire, Scotland. Fluid-fuel burner. 1,500,103; July 8.

Burdons Limited. (See Burdon, W. M. and M. M., assignors.)

Burger, Clarence W., Washington, D. C. Rotary circuit-controlling device. 1,500,603; July 8.

Burley, Harry B., Brookline, Mass., assignor to Boston Insulated Wire and Cable Company. Manufacture of electric wires. 1,500,546; July 8.

Burno, Joseph N., Chicago, Ill., assignor to Budde & Westermann. Coin-controlled apparatus. 1,500,230; July 8.

Burpee, Frank W., Chicago, Ill. Spring pin. 1,500,667; July 8.

Burton, Charles S., Oak Park, Ill. Soil pulverizer and seeder. 1,500,437; July 8.

Busch-Sulzer Bros.-Diesel Engine Company. (See Zbinden, Eugen, assignor.)

Cadden, Charles C., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Hose-wrapping machine. 1,500,797; July 8.

Caldwell, Thomas B. (See Bramson, M. L., Hanson, and Caldwell.)

California Cotton Mills Company. (See Mitchell, Allister S., assignor.)

Calleson, Amos, Brooklyn, N. Y. Bottle filling and sealing machine. 1,500,364; July 8.

Campodonico, Alcibiades, Lima, Peru. Dental instrument and mirror. 1,500,798; July 8.

Candlish, William C., New Rochelle, assignor to J. R. Palmenberg's Sons, Inc., New York, N. Y. Pedestal for merchandise-display fixtures. Des. 65,099; July 8.

Carbo-Oxygen Company. (See Rose, James R., assignor.)

Cardwell, Allen D., assignor to American Telegraph Typewriter Company, Brooklyn, N. Y. Telegraph transistor and circuits therefor. 1,500,486; July 8.

Cardwell, Thomas, Sedalia, Mo. Lubricator. 1,500,799; July 8.

Caribonum Limited. (See Ayliffe, Harry, assignor.)

Carichoff, Eugene R., and B. W. Jones, Schenectady, N. Y., assignors to General Electric Company. Electromagnetic switch. 1,500,800; July 8.

Carlberg, Walfred F., Sisseton, S. Dak. Excavating shovel or scraper. 1,500,104; July 8.

Carlin, Arvid F., Mamaroneck, N. Y. Combined shelf and bracket. 1,500,487; July 8.

Carlson, Oscar F., assignor to Amalgamated Machinery Corp., Chicago, Ill. Motor vehicle. 1,500,801; July 8.

Carlton, Jack C., assignor to The Carlton Machine Tool Company, Cincinnati, Ohio. Transportable throttle device. 1,500,365; July 8.

Carlton Machine Tool Company, The. (See Carlton, Jack C., assignor.)

Carnation Milk Products Company. (See Ryan, Roger W., assignor.)

Carolyn Laundry. (See Lane, Edwin, assignor.)

Carpenter, Ose F., Brightwood, Va. Gang boring machine. 1,500,231; July 8.

Carr, Lena L. (See Wasia, M. J., and Carr.)

Carroll, Stewart J., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose-ether composition. 1,500,366; July 8.

Carter, William C., St. Louis, Mo. Diaphragm-pumping device. 1,500,105; July 8.

Case, J. I., Threshing Machine Company. (See Caughey, Robert C., assignor.)

Cassell, Louis R., Decatur, Ill. Automatic adjustable automobile camping top. 1,500,573; July 8.

Cassella, Leopold, & Co. Gesellschaft mit beschränkter Haftung. (See Münz, Ferdinand, assignor.)

Castricum, Martin, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Manufacture of cord fabric. 1,500,232; July 8.

Castricum, Martin, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Weighing moving material. 1,500,233; July 8.

Castricum, Martin, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Manufacture of weftless cord fabric. 1,500,234; July 8.

Caughey, Robert C., Dixon, Ill., assignor, by mesne assignments, to J. I. Case Threshing Machine Company, Racine, Wis. Implement frame. 1,500,367; July 8.

Cavanagh, James, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Last. 1,500,106; July 8.

Cender, John, Foosland, Ill. Jack. 1,500,604; July 8.

Chadwick, William E., and J. A. Creighton, assignors to G. E. Westberg, Los Angeles, Calif. Theft-warning signal or wheel lock for vehicles. 1,500,924; July 8.

Chambers, Joseph A., New Orleans, La. System of and apparatus for retailing liquids. 1,500,547; July 8.

Champion, Albert J., assignor to A C Spark Plug Company, Flint, Mich. Double-insulated spark plug. 1,501,021; July 8.

Chandler, Digby W., jr., assignor to Annin & Co., New York, N. Y. Convention banner. Des. 65,100; July 8.

Chandler, Jermain, Toledo, Ohio. Dental appliance. 1,500,107; July 8.

Chantilis, Charles A., Bellevue, Ohio. Cigarette holder. 1,500,802; July 8.

Chapman, Penrose E., St. Louis, Mo. Armature and coil winding machine. 1,500,181; July 8.

Charnock, George H., Buffalo, N. Y. Silencer for gas-engine valve mechanism. 1,500,605; July 8.

Chase, E. A., Granite Company. (See Sanborn, R. G., and Haslam, assignors.)

Chase, Harold M., and G. W. Robertson, Danville, assignors to Riverside and Dan River Cotton Mills, Inc., Pittsylvania County, Va. Long-chain-warp-treating apparatus. 1,500,298; July 8.

Chase, Harold M., and G. W. Robertson, Danville, assignors to Riverside and Dan River Cotton Mills, Inc., Pittsylvania County, Va. Warp-dyeing apparatus. 1,500,299; July 8.

Cherry, Thomas E., Boston, Mass. Adding machine. 1,500,606; July 8.

Chicago Pneumatic Tool Company. (See Sabourin, Guy O., assignor.)

Chisholm, Clifton, assignor to The American Multigraph Company, Cleveland, Ohio. Address-plate holder. 1,500,438; July 8.

Chupa, Alexander, Livingston Manor, N. Y. Ventilator. 1,500,368; July 8.

Church, Harold D., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,500,668; July 8.

Cincinnati Car Company, The. (See Ellis, Charles J., assignor.)

Clark, Sherman D., assignor of one-fourth to J. F. McHugh and 10 per cent to A. De Muth and E. P. Sherman, Seattle, Wash. Buckle. 1,500,439; July 8.

Clark, Virginius E., assignor to Dayton-Wright Company, Dayton, Ohio. Airplane-wing spar. 1,500,235; July 8.

Clark, Walter J. (See Romine, W. M., and Clark.)

Clark, William R., San Diego, Calif. Attachable valve. 1,500,300; July 8.

Clayton, Grace T., Chevy Chase, Md. Shopping or marketing truck. 1,500,108; July 8.

Clement, William H., jr., Palacios, Tex. Trouble-light fixture. 1,500,548; July 8.

Cochran, Clyde E., assignor to The Elwell-Parker Electric Company, Cleveland, Ohio. Industrial truck. 1,500,236; July 8.

Coffey, Alfred L., Seattle, Wash. Light reflector. 1,500,237; July 8.

Colbyson, Hardes M., Minneapolis, and F. J. Mumm, St. Paul, Minn. Dumping vehicle. 1,500,803; July 8.

Coleman, George D., Atlanta, Ga. Moistener. 1,500,925; July 8.

Colley, Harry A., assignor to American Lady Corset Company, Detroit, Mich. Corset. 1,500,109; July 8.

Collingwood, Ronald G. (See Holland, E., and Collingwood.)

Collins, William M., Huntington, Ind. Automobile direction signal. 1,500,440; July 8.

Conant, David J., San Jose, Calif. Pump. 1,500,607; July 8.

Concrete Steel Company. (See Ludwik, Richard G., assignor.)

Congable, Henry F., assignor to Robinson Hardware Company, Oakland, Calif. Garden broom. 1,500,441; July 8.

Conover, Kenneth W., Belmar, assignor to E. H. Thomson, Bradley Beach, N. J. Snowplow. 1,500,671; July 8.

Consolidated Car-Heating Company. (See Hynes, Lee P., assignor.)

Cook, George, Buffalo, N. Y. Steam boiler. 1,500,182; July 8.

Cooney, Nicholas J., Chicago, Ill. Lubricator. 1,500,369; July 8.

Cooper, Albert N., Lodi, Calif. Fly swatter. 1,500,442; July 8.

Cornelius, William R., Nashville, Tenn. Reversible cuff. 1,500,370; July 8.

Corning Glass Works. (See Gage, Henry P., assignor.)

Corning Glass Works. (See Giometti, Lazrus C. and C. J., assignors.)

Cosgrove, Thomas, jr., and N. A. Sponseller, Canton, Ohio. Tire carrier and rim remover. 1,500,371; July 8.

Cossitt, Malcolm L., San Francisco, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Photographic machine. 1,500,372; July 8.

Coullery, Henri, La Chaux-de-Fonds, Switzerland. Portable treadle lathe. 1,500,672; July 8.

Courtaulds Limited. (See Jones, Richard O., assignor.)

Couture, Adelard, Warren, R. I. Oil burner. 1,500,373; July 8.

Cowie, Frederick W., Montreal, Quebec, Canada. Car-unloading device. 1,500,673; July 8.

Cowles, C., and Company. (See Gates, Louis W., assignor.)

Cox, Henry P., and H. D. Daniels, Portland, Oreg. Guyline clamp. 1,500,374; July 8.

Crane, Frank R., jr., assignor to Ryerson Crane, Inc., Chicago, Ill. Oil-burning system. 1,500,574; July 8.

Crawford, Alexander W., Carlinville, Ill. Trousers attachment. 1,500,804; July 8.

Creighton, John A. (See Chadwick, W. E., and Creighton.)

Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)

Crouch, Arthur P. (See Hubbard, John, assignor.)

Crowell, Frank S., assignor to The Edward N. Riddle Co., Toledo, Ohio. Ceiling plate for a lighting fixture. Des. 65,101; July 8.

Crowell, Frank S., assignor to The Edward N. Riddle Co., Toledo, Ohio. Ceiling plate for a lighting fixture. Des. 65,102; July 8.

Cruver Manufacturing Company. (See Madle, Frank, assignor.)

Cudmore, Clifford S., Sault Ste. Marie, Ontario, Canada. Tightener for clotheslines. 1,500,549; July 8.

Culp, John W., Johnstown, Pa. Game device. 1,500,110; July 8.

Cummings, Benjamin F., Reeds Spring, Mo. Container. 1,500,301; July 8.

Cummins, Robert R., and R. W. Kremer, assignors to The Kremer-Cummins Machine Company, Cleveland, Ohio. Belt-shifting mechanism. 1,500,238; July 8.

Cunningham, Herman R., Glendale, Calif. Valve-control mechanism for containers. 1,500,669; July 8.

Curley, Robert S., Lowell, assignor to Saco-Lowell Shops, Boston, Mass. Vertical cotton-opening machine. 1,500,111; July 8.

Curry, Charles M., Tulsa, Okla. Anvil. 1,500,926; July 8.

Curtin, David F., Chicago, Ill. Pocket pencil holder. 1,500,575; July 8.

Cusack, Thos., Company. (See Cusack, Thomas, assignor.)

Cusack, Thomas, assignor to Thos. Cusack Company, Chicago, Ill. Sign. Des. 65,103; July 8.

Cushman, Ernest C., Westerly, R. I. Spindle stop-motion attachment for spinning machines. 1,500,982; July 8.

Cusi, Joaquin, Buenos Aires, Argentina. Pocket protector for checks and the like. 1,500,576; July 8.

Dade, Thomas G., St. Marys, Ohio. Oiler. 1,500,112; July 8.

Dade, Thomas G., St. Marys, Ohio. Wheel. 1,500,113; July 8.

Dahlberg, C. F. (See Shaw, John K., assignor.)

Dailey, Frank L., assignor to Johnson & Johnson, New Brunswick, N. J. Saliva ejector. 1,501,010; July 8.
Dall, David D., Toronto, Ontario, Canada. Golf-practice device. 1,500,183; July 8.
Daniels, Henry D. (See Cox, H. P., and Daniels.)
Dann, Ernest G., Chicago, Ill. Spring bumper for motor vehicles. 1,500,375; July 8.
Darling, Philip G., Bridgeport, Conn., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y. Safety valve. 1,500,374; July 8.
Davies, Frederick A., and C. L. Rogers, Wilkinsburg, Pa. Ear basin. 1,500,927; July 8.
Davis, Arthur P., Far Rockaway, N. Y. Synchronous transmission system for gyroscopes, etc. 1,500,239; July 8.
Davis, John H., Covington, Ky., assignor to R. P. Hargitt, Cincinnati, Ohio. Leather shoehorn. 1,500,928; July 8.
Dayton Engineering Laboratories, The. (See Hunt, John H., assignor.)
Dayton-Wright Company. (See Clark, Virginius E., assignor.)
Deatrick, Edward, Lancaster, Pa. Releasable connecter. 1,500,488; July 8.
Dedi, Arthur L., Oak Park, Ill. Lamp-arm mounting. Des. 65,104; July 8.
Dedi, Arthur L., Oak Park, Ill. Lamp-arm mounting. Des. 65,105; July 8.
Dedi, Arthur L., Oak Park, Ill. Lamp-arm mounting. Des. 65,106; July 8.
Dedi, Arthur L., Oak Park, Ill. Lamp-arm mounting. Des. 65,107; July 8.
Deen, James H., New York, N. Y. Game apparatus. 1,500,983; July 8.
De Groote, Melvin, Pittsburgh, Pa. Making dilute permanent turbid emulsions. 1,500,670; July 8.
Delaney, Michael G., assignor to Delway Heaters, Inc., New York, N. Y. Apparatus for burning liquid fuel. 1,500,376; July 8.
De Laval Separator Company, The. (See Petty, Earl, assignor.)
Delway Heaters, Inc. (See Delaney, Michael G., assignor.)
Delco-Light Company. (See Replogle, James B., assignor.)
De Luxe Brush Company, The. (See Shalkop, Isaac C., assignor.)
De Muth, Anton, et al. (See Clark, Sherman D., assignor.)
Derry, Jasper, Medford, assignor to A. Terkelsen, Boston, Mass. Wrapping machine. 1,500,984; July 8.
Detroit Pressed Steel Company. (See Putnam, Alden L., assignor.)
Det Tekniske Forsøgsaktieselskab. (See Goldschmidt, Rudolf, assignor.)
Deutschmann, Richard, and W. Kotzenberg, Hamburg, Germany. Producing antitoxins. 1,500,985; July 8.
De Ville, Walter, East Liverpool, Ohio, assignor to Palm Fechteler & Co., New York, N. Y. Plate or similar article. Des. 65,108; July 8.
Dewey, Haywood G. (See Jones, J. G., and Dewey.)
D'Hondt, Louis, Dedham, Mass. Eraser. 1,500,550; July 8.
Diamond, Henry, Brooklyn, assignor, by mesne assignments, to Venus Hat Co. Inc., New York, N. Y. Hat-brim construction. 1,500,577; July 8.
Dieperink-Langereis, Willem, Warren, Pa. Artificial Christmas tree. Des. 65,109; July 8.
Dieter, William, Newark, N. J., assignor to E. W. Bliss Company, Brooklyn, N. Y. Depth mechanism for automobile torpedoes. 1,500,114; July 8.
Dieterich, William, assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt-buckle frame. Des. 65,110; July 8.
Digney, Thomas, Bridgeport, Conn. Shade roller. 1,500,608; July 8.
Dixon, H. L., Company. (See Dixon, Henry L., assignor.)
Dixon, Henry L., Dormont, Pa., assignor to H. L. Dixon Company, Carnegie, Pa. Annealing leer. 1,500,609; July 8.
Doane, Frank I. (See Rosener, L. S., and Doane.)
Dodds, Rowan T. F., Stratford, Ontario, Canada. Explosion-preventing device. 1,500,610; July 8.
Dodds, Rowan T. F., Welland, Ontario, Canada. Roller mill. 1,500,115; July 8.
Dodson, David W., Wichita, Kans. Wall construction. 1,500,377; July 8.
Doering, Frank F. W., Hibbing, Minn. Vapor and air intensifier and carburetor attachment. 1,500,443; July 8.
Dorey, George B., Montreal, Quebec, Canada, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Draft attachment for railway cars. 1,500,578; July 8.
Dornier, Claudius, Friedrichshafen, Germany. Flying-machine construction. 1,500,444; July 8.
Douglas, Paul H. (See Rogers, J. F., Douglas, and Benjamin.)
Dover, George W., Cranston, assignor of one-half to J. Montgomery, Woonsocket, R. I. Rain protector for vehicles. 1,500,302; July 8.
Dowd, Bernard J., Hartford, Conn., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,500,116; July 8.
Downs, Joseph H., Fort Wayne, Ind. Signal-control apparatus. 1,500,863; July 8.
Drewsen, Viggo, Brooklyn, assignor to West Virginia Pulp and Paper Company, New York, N. Y. Bleaching fibrous material. 1,500,378; July 8.
Drucker, Aaron P. R., Colorado Springs, Colo. Means for producing perpetual inventories. 1,500,551; July 8.
Drying Systems, Inc. (See Harrison, Burt S., assignor.)
Duffie, John J., Berkeley, Calif. Vault protection system. 1,500,805; July 8.
Dvorak, Wenzel J., Sunset Heights, Tex. Concrete building construction. 1,500,445; July 8.
Dyer, Newell V., Holbrook, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Skiving machine. 1,500,117; July 8.
E-Z Manufacturing Co. (See Anderson, Henry J., assignor.)
Eager, William G., Valdosta, Ga. Tachometer drive. 1,500,579; July 8.
Eastern Manufacturing Company. (See Hanson, H. H., Leecock, and Blodgett, assignors.)
Eastman Kodak Company. (See Carroll, Stewart J., assignor.)
Eastman Kodak Company. (See Hutchings, Charles E., assignor.)
Eastman Kodak Company. (See Jones, J. G., and Dewey, assignors.)
Eastman Kodak Company. (See Speidel, Charles F., assignor.)
Economy Barrel Corporation. (See Bell, Robert J., assignor.)
Edison Electric Appliance Company. (See Rankin, W. A., and Hardin, assignors.)
Elduck, Peter, San Francisco, Calif. Oil injector. 1,500,702; July 8.
Elbelt, William H., and C. H. Brooks, Hurley, N. Mex. Control system for air lifts. 1,500,703; July 8.
Eldon, Albert J., Montclair, N. J. Ball. Des. 65,111; July 8.
Elevator Locks Co. (See McKinney, Samuel L., assignor.)
Elias, Joan M., Banjoemas, Java. Method and machine for digging irrigation and planting furrows. 1,500,864; July 8.
Ellis, Carleton, Montclair, N. J. Making resinous material from paraldehyde. 1,500,303; July 8.
Ellis, Charles J., assignor to The Cincinnati Car Company, Cincinnati, Ohio. Railway car. 1,500,118; July 8.
Ellis, Frank L., Pittsburgh, and J. H. Sennett, Woodlawn, assignors to Jones & Laughlin Steel Company, Pittsburgh, Pa. Pipe mill. 1,500,304; July 8.
Ellsdorf, Robert, Chicago, Ill. Brake for aircraft. 1,500,184; July 8.
Elwell-Parker Electric Company, The. (See Cochran, Clyde E., assignor.)
Elzy, Edward P. (See Roth, E., and Elzy.)
Enax, Otto, and R. D. Zilk, Denver, Colo. Automobile traffic signal. 1,500,489; July 8.
Englund, Anders J., Spokane, Wash. Overhead railway. 1,500,379; July 8.
Enterprise Railway Equipment Company. (See Dorey, George B., assignor.)
Eppler, Andrew, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sewing machine. 1,500,806; July 8.
Espenschied, Lloyd, Hollis, N. Y., assignor to American Telephone and Telegraph Company. Multiplex transmission system. 1,500,552; July 8.
Espenschied, Lloyd, Hollis, N. Y., assignor to American Telephone and Telegraph Company. Harmonic suppressor. 1,500,553; July 8.
Evans Case Company. (See Haslam, Samuel, assignor.)
Evers, William H., Lakewood, assignor of one-third to W. E. Pease and one-third to N. H. Suloff, Cleveland, Ohio. Wave-resisting structure. 1,500,119; July 8.
Evers, William H., Lakewood, assignor of one-third to W. E. Pease and one-third to N. H. Suloff, Cleveland, Ohio. Wave-resisting structure. 1,500,120; July 8.
Ewen, Walter L., Aurora, Ill. Carrier for ice-cream cones and the like. 1,500,611; July 8.
Fageol, Rollie B., Oakland, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn. Bumper mounting. 1,500,380; July 8.
Fairchild, Lawrence G., Glenmary, Tenn. Ironing board. 1,500,554; July 8.
Fairfield Battery Company. (See Warncke, Henry E., assignor.)
Falson, Sherwood B., Cincinnati, Ohio. Roof-flashing. 1,500,675; July 8.
Fanning, Daisy. (See Howard, John R., assignor.)
Farmer, George W. (See Tucker, Stephen C., assignor.)
Fasold, Daniel, Keswick, Iowa. Hook. 1,500,446; July 8.
Faultless Caster Company. (See Noelting, William H., assignor.)
Faultless Rubber Company, The. (See Miller, Thomas W., assignor.)
Fekete, Stephen L., and S. G. Balts, assignors to Hudson Motor Car Company, Detroit, Mich. Pedal for automobiles. 1,500,305; July 8.
Fererro, Matteo, Raton, N. Mex. Magazine feeding device. 1,500,580; July 8.
Filson, Charles L., Cleveland, Ohio. Fuel-feeding mechanism for furnaces. 1,500,581; July 8.
Fish, William J., Rouseville, Pa. Injector. 1,500,986; July 8.

Fisk Rubber Company, The. (See Castricum, Martin, assignor.)
Fisk Rubber Company, The. (See Marquette, Melvon A., assignor.)
Fisk Rubber Company. (See Midgley, Thomas, assignor.)
Fisk Rubber Company, The. (See Scherner, John, assignor.)
Flanigan, David A., Virgin, Utah. Helicopter. 1,500,807; July 8.
Fleming, L. Florence, executrix. (See Fleming, Samuel B.)
Fleming, Samuel B., deceased; L. F. Fleming, executrix, assignor, by mesne assignments, to Gardner Reducing Machine Company, Chicago, Ill. Mechanical massaging device. 1,500,555; July 8.
Fontaine, Daniel J. G., Paris, France. Metal falsework for concrete construction. 1,500,121; July 8.
Forward, Walter L., Oakland, and J. B. Keating, Piedmont, Calif. Deep-well-pump column coupling. 1,500,306; July 8.
Foss, Joseph E., Florence, S. C. Valve tappet. 1,500,865; July 8.
Foss, Olaf H., Maddock, N. Dak. Skin marking. 1,500,987; July 8.
Foster, Theodore W., & Bro. Co. (See Pond, William H., assignor.)
Fowler, Alfred B., Beverly, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Grinding machine. 1,500,122; July 8.
Frank, Emil R., Sioux City, Iowa. Pipe wrench. 1,500,676; July 8.
Frankem, Isaac L., Indianapolis, Ind. Stove top. 1,500,866; July 8.
Franklin Railway Supply Company. (See Roberts, Montague H., assignor.)
French, Harry F. (See Benner, R. C., and French.)
Fried. Krupp Aktiengesellschaft. (See Klingelhöffer, Reinhard, assignor.)
Frink, Fred J. (See Frink, Robert L. and F. J.)
Frink, Robert L. and F. J., Lancaster, Ohio. Method of and apparatus for drawing sheet glass. 1,500,381; July 8.
Fuhrmann, John, Buffalo, N. Y. Building block. 1,500,808; July 8.
Funk, Richard W., Bellefonte, Pa. Press. 1,500,582; July 8.
Gage, Henry P., assignor to Corning Glass Works, Corning, N. Y. Means for increasing the illuminating power for corrugated lenses. 1,500,185; July 8.
Gannon, James E., and M. W. Ward, Erie, Pa. Temperature-controlling system. 1,500,382; July 8.
Gardner Reducing Machine Company. (See Fleming, Samuel B., assignor.)
Garsed, Edward T. (See Robertson, G. W., Hogg, Garsed, and Benefield.)
Gates, John W., Montreal, Quebec, Canada. Furnace arch. 1,500,123; July 8.
Gates, Louis W., assignor to C. Cowles and Company, New Haven, Conn. Spindle-locking device for vehicle doors. 1,500,490; July 8.
Geib, William, assignor to International Silver Company, Meriden, Conn. Vase or similar article. Des. 65,112; July 8.
Geib, William, assignor to International Silver Company, Meriden, Conn. Bowl or similar article. Des. 65,113; July 8.
General Electric Company. (See Alexanderson, Ernst F. W., assignor.)
General Electric Company. (See Anderson, Albert S., assignor.)
General Electric Company. (See Benford, Frank A., assignor.)
General Electric Company. (See Carichoff, E. R., and Jones, assignor.)
General Electric Company. (See Guay, Emile J., assignor.)
General Electric Company. (See Hall, Chester I., assignor.)
General Electric Company. (See Hewlett, Edward M., assignor.)
General Electric Company. (See Langley, Ralph H., assignor.)
General Electric Company. (See Lippincott, Donald K., assignor.)
General Electric Company. (See Macmillan, Campbell, assignor.)
General Electric Company. (See Moody, Walter S., assignor.)
General Electric Company. (See Sargent, Howard R., assignor.)
General Electric Company. (See Scott, Carl F., assignor.)
General Electric Company. (See Yo, Seigo, assignor.)
General Motors Corporation. (See Gibford, Charles, assignor.)
General Motors Corporation. (See Goodspeed, Elvin S., assignor.)
General Motors Corporation. (See Mason, Arthur C., assignor.)
Georgi & Co. (See Opel, Walter, assignor.)
Gibbs, James D., Louisville, Ky. Feeding mechanism for oil drilling. 1,500,186; July 8.
Gibford, Charles, Pontiac, assignor to General Motors Corporation, Detroit, Mich. Valve mechanism. 1,501,022; July 8.
Gilkey, Virginia K., et al., executors. (See Gilkey, William S.)
Gilkey, W. S., Printing Company, The. (See Gilkey, William S., assignor.)
Gilkey, William S., deceased, by V. K. Gilkey, Cleveland Heights, and The Guardian Savings & Trust Company, executors, assignors to The W. S. Gilkey Printing Company, Cleveland, Ohio. Loose-leaf holder. 1,500,612; July 8.
Giometti, Cherubino J. (See Giometti, Lazrus C. and C. J.)
Giometti, Lazrus C. and C. J., assignors to Corning Glass Works, Corning, N. Y. Plate or similar article. Des. 65,114; July 8.
Giometti, Lazrus C. and C. J., assignors to Corning Glass Works, Corning, N. Y. Dish or similar article. Des. 65,115; July 8.
Giufri, Antony, Hartford, Conn. Foot-propelled vehicle. 1,500,809; July 8.
Glanzer, Ludwig, Winkler, Kans. Pneumatic sole. 1,500,583; July 8.
Glasby, Jonathan P., jr., East Orange, N. J. Aircraft-wing construction. 1,500,810; July 8.
Glass, P. R., Company. (See Willis, Sherman, assignor.)
Glidden, Alfred A., assignor to Hood Rubber Company, Watertown, Mass. Sectional cushion tire. 1,500,307; July 8.
Globe Ticket Company. (See McFall, William H., assignor.)
Globe Wernicke Co. (See Ringler, William A., assignor.)
Globe Wernicke Company, The. (See Smiley, Samuel, jr., assignor.)
Glover, Edward T., assignor of one-half to R. E. Glover, Portsmouth, Va. Means for examining X-ray plates and the like. 1,500,867; July 8.
Glover, Robert E. (See Glover, Edward T., assignor.)
Glueck, Charles, Gainesmoore, assignor of one-half to R. E. Vineyard, Wharton, Tex. Plow. 1,500,187; July 8.
Godley, Edwin A., and L. J. Grubman, New York, N. Y. Means for measuring lumber. 1,500,447; July 8.
Goldberg, Max, Detroit, Mich. Gripping device for canning jars. 1,500,308; July 8.
Goldschmidt, Rudolf, Berlin, Germany, assignor to Det Tekniske Forsøgsaktieselskab, Charlottenlund, Denmark. Mechanism for converting rotary into reciprocatory motion. 1,500,988; July 8.
Goldston, Wiley L., Quebeck, Tenn. Fence-wire clamp for fence stretchers. 1,500,309; July 8.
Goodrich, B. F., Company, The. (See Allen, Walter H., assignor.)
Goodrich, B. F., Company, The. (See Blaker, Ernest, assignor.)
Goodrich, B. F., Company, The. (See Cadden, Charles C., assignor.)
Goodrich, B. F., Company, The. (See MacDonald, Frank J., assignor.)
Goodridge Battery Co. (See Goodridge, Victor C., assignor.)
Goodridge, Victor C., Chicago, Ill., assignor to Goodridge Battery Co. Storage battery. 1,500,448; July 8.
Goodspeed, Elvin S., assignor to General Motors Corporation, Detroit, Mich. Process and apparatus for forming metal objects. 1,501,023; July 8.
Goodwin, William M., Central Square, N. Y. Valve-operating means for internal-combustion engines. 1,500,556; July 8.
Gorman, Henry, Manchester, N. H. Bathtub. 1,500,557; July 8.
Goswick, Samuel D., Mineral Wells, Tex. Robber exterminator. 1,500,188; July 8.
Gourie, William J., Philadelphia, Pa. Knitting device. 1,500,383; July 8.
Grader, George L., Brooklyn, N. Y. Gas valve. 1,500,868; July 8.
Graf, Frederick W., Houston, Tex. Piston-ring compressor. 1,500,189; July 8.
Gramlich, Adolph, New York, N. Y. Teapot. Des. 65,116; July 8.
Green, Teddy A. (See Thompson, B. E., and Green.)
Greiner, Carl F., and A. W. Aitken, assignors to The Springfield Motor Sweeper Company, Springfield, Ohio. Street sweeper. 1,500,558; July 8.
Griffith, Raymond E., Philadelphia, Pa. Furnace-roof construction. 1,500,240; July 8.
Griffith, Victor, San Francisco, Calif. Combination lock and emergency brake for internal-combustion engines. 1,500,449; July 8.
Grings, Casper H., assignor to Waterloo Saddlery Company, Waterloo, Iowa. Horse-collar pad. 1,500,242; July 8.
Gronell, George, New York, N. Y. Padlock. 1,500,491; July 8.
Gruber, Clara M. (See Kirn, Arthur J., assignor.)
Grubman, Leo J. (See Godley, E. A., and Grubman.)
Guardian Savings & Trust Company, The, et al., executors. (See Gilkey, William S.)
Guay, Emile J., Swampscott, Mass., assignor to General Electric Company. Noiseless gear and forming the same. 1,501,026; July 8.
Guay, Emile J., Lynn, Mass., assignor to General Electric Company. Blank for gears and making the same. 1,501,027; July 8.

Guay, Emile J., Swampscott, Mass., assignor to General Electric Company. Nonmetallic gear and forming the same. 1,501,028; July 8.
Guggenheim, Ezekiel, Charlotte, N. C. Meat tenderer. 1,500,811; July 8.
Gulf Refining Company. (See McAfee, Almer M., assignor.)
Gum, Francis M., Stockton, Calif. Knife sharpener. 1,500,241; July 8.
Gwozdz, Bronislaw, Warsaw, Poland. Take-up sprocket for motion-picture machines. 1,500,450; July 8.
Gwynne, Alban L., and R. A. Sturgeon, Portsmouth, England. Submarine mine and sinker. 1,500,812; July 8.
Hacheney, Frank C., John Day, Oreg. Wrench. 1,500,310; July 8.
Hacheney, Frank C., John Day, Oreg. Wrench. 1,500,311; July 8.
Hacheney, Frank C., John Day, Oreg. Wrench. 1,500,312; July 8.
Hacheney, Frank C., John Day, Oreg. Wrench. 1,500,313; July 8.
Hacheney, Frank C., John Day, Oreg. Wrench. 1,500,314; July 8.
Hacker, William E., Los Angeles, Calif. Composite pavement and producing same. 1,500,451; July 8.
Hadley, Charles P., Maywood, Ill. Shoe-polishing bench. 1,500,989; July 8.
Hadley, J. H. (See Horton, Fred W., assignor.)
Hagerman, Ralph J., Cedar Rapids, Iowa. Nozzle for paint spraying. 1,500,384; July 8.
Haggerty, Joseph F., Batavia, N. Y., assignor to Universal Gypsum Company, Chicago, Ill. Plaster wall board. 1,500,452; July 8.
Hale, Harry C., Baltimore, Md., assignor to W. E. Hooper and Sons Company. Filter-press cloth. 1,500,124; July 8.
Hall, Chester L., Fort Wayne, Ind., assignor to General Electric Company. Protective device. 1,501,017; July 8.
Hall, Nelson C., Olin, Iowa. Tool. 1,500,315; July 8.
Hall, Wesley F., Matawan, N. J., assignor to A. P. Munning & Co. of New York, New York, N. Y. Cutting material for buffing wheels. 1,500,990; July 8.
Hall, William E., Monroe, Mich., assignor to Fred M. Longnecker, Delta, Ohio. Tray manufacture. 1,500,125; July 8.
Halliburton, Erle P., Duncan, Okla. Method of and apparatus for mixing materials. 1,500,385; July 8.
Halloway, Russell L., Nevada, Iowa. Fish-stringing device. 1,500,613; July 8.
Hamilton Manufacturing Company, The. (See Soddard, Thomas W., assignor.)
Hamlin, William E., Des Moines, Iowa. Animal cover. 1,500,316; July 8.
Hammond, John H., jr., Gloucester, Mass. Submarine sound transmitter. 1,500,243; July 8.
Hammond, Laurence, Spangler, Pa. Dynamite box. 1,500,559; July 8.
Hannifin, Arthur V. (See Vosburg, A. E., and Whitney, assignors.)
Hanson, Hugo H., J. T. Leecock, Bangor, and C. A. Blodgett, Brewer, Me., assignors to Eastern Manufacturing Company, Boston, Mass. Purifying brine for electrolysis. 1,500,126; July 8.
Hanson, James. (See Bramson, M. L., Hanson, and Caldwell.)
Hardin, Luther E. (See Rankin, W. A., and Hardin.)
Hargitt, Robert P. (See Davis, John H., assignor.)
Harley, Bertron G., Arkendale, Va. Rudder. 1,500,584; July 8.
Harris, Henry J., Youngstown, Ohio. Roll grinding and polishing device. 1,500,386; July 8.
Harris, Joseph D., assignor to McCord Manufacturing Company, Detroit, Mich. Tube-cutting apparatus. 1,500,127; July 8.
Harrison, Burt S., assignor to Drying Systems, Inc., Chicago, Ill. Dry filter. 1,500,128; July 8.
Harrison, J. D., administrator. (See Robertson, G. W., Hogg, Garsed, and Benefield.)
Hartmann, Victor, Long Island City, N. Y. Painter's device. 1,500,244; July 8.
Hartung, Edmund, Jersey City, N. J. Vehicle wheel-rim jack. 1,500,813; July 8.
Haseltine, Stacy B., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner Inc. Friction shock-absorbing mechanism. 1,500,129; July 8.
Haslam, Frederick. (See Sanborn, R. G., and Haslam.)
Haslam, Samuel, North Attleboro, assignor to Evans Case Company, Attleboro, Mass. Salt and pepper shaker. Des. 65,117; July 8.
Hayes, Jeremiah, Everett, Wash. Automobile air wheel. 1,500,317; July 8.
Hayslett, Edgar, South Bend, Ind. Spring roller. 1,500,585; July 8.
Heesch, Otto K. (See Madsen, Mathias O. S., assignor.)
Heffner, Harry, Cleveland, Ohio. Sled. 1,500,453; July 8.
Heidbrink, Jay A., Minneapolis, Minn. Anæsthetizing apparatus. 1,500,614; July 8.
Heidbrink, Jay A., Minneapolis, Minn. Anæsthetizing apparatus. 1,500,615; July 8.
Heine Boiler Company. (See Hinman, John H., assignor.)
Heisey, A. H., & Co. (See Sanford, Andrew J., assignor.)
Heitler, Kurt, New York, N. Y. Pocket for shower-bath curtains. 1,500,991; July 8.
Helmond, William F., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,500,190; July 8.
Hemphill Company. (See Lawson, J., and Quint, assignors.)
Henderson, Albert E. L., Charlotte, N. C. Radiator-tube joint. 1,500,560; July 8.
Hendricks, Augustin, Grand Rapids, Mich. Motor-vehicle wheel construction. 1,500,387; July 8.
Henley, Clara A., Waterloo, Iowa. Tension ring. 1,500,616; July 8.
Henry, Louise B., Meadow, Nebr. Combination chair and baby crib. 1,500,318; July 8.
Herbert, Robert P., Rochester, N. Y. Signaling system. 1,500,191; July 8.
Heringer, William, Dogden, N. Dak. Window-sash stop and lock. 1,500,130; July 8.
Hermani, Henry, assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box-hinging machine. 1,500,617; July 8.
Hernu, Henri, Meudon, France. Internal-combustion engine. 1,500,319; July 8.
Herthel, Arthur C., St. Louis, Mo. Cigar moistener. 1,500,704; July 8.
Heslewood, William R., and H. F. Mocine, assignors to M. & H. Piston Ring Co., Oakland, Calif. Piston ring. 1,500,705; July 8.
Heumader, Christian, St. Joseph, Mo. Foldable furniture combination. 1,500,388; July 8.
Heuser, Herman, Evanston, Ill. Dealcoholizing liquids. 1,500,618; July 8.
Hewlett, Edward M., Schenectady, N. Y., assignor to General Electric Company. Link insulator. 1,500,814; June 8.
Heymann, Hans, Darmstadt, Germany. Balance machine. 1,500,454; July 8.
Hibler, Edwin A., and L. Brown, Uniontown, Pa. Fastener for bathtub legs. 1,500,131; July 8.
Hickok Manufacturing Company. (See Dieterich, William, assignor.)
Hickok Manufacturing Company. (See Mabon, Merril, assignor.)
Hickok Manufacturing Company. (See Shields, Lowell W., assignor.)
Hill, Lewis C., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,500,619; July 8.
Hinman, John H., assignor to Heine Boiler Company, St. Louis, Mo. Boiler baffle and constructing same. 1,500,815; July 8.
Hinson, Clara, Sharon, Pa. Toy. 1,500,869; July 8.
Hobbs, John W., assignor to The Home Elevator Company, Indianapolis, Ind. Cable equalizer for elevators and the like. 1,500,816; July 8.
Hoerner, Grant, New York, N. Y. Holder for paper-bound books. 1,500,817; July 8.
Hogbin, Joseph, Pittsburgh, and W. Lehman, Aspinwall; said Lehman assignor of his entire right to W. Martin, Pittsburgh, Pa. Checker brick. 1,500,455; July 8.
Hogg, William T. (See Robertson, G. W., Hogg, Garsed, and Benefield.)
Holdredge, Charles H., Stonington, Conn. Foundation structure. 1,500,870; July 8.
Holland, Edward, and R. G. Collingwood, Cairo, Egypt. Instrument for graphically recording series of observations involving two factors. 1,500,871; July 8.
Holle, Alexander A., Paddington, London, England. Steering gear for motor road vehicles. 1,500,320; July 8.
Hollenbeck, Albert H., Fair View, N. Mex., assignor of one-half to F. E. Vassar, Los Angeles, Calif. Concentrator. 1,500,192; July 8.
Holmes, George A., Newton Center, Mass., assignor to United States Fastener Company. Snap fastener. 1,500,389; July 8.
Holmes, Paul A., Kansas City, Mo. Bank. 1,500,929; July 8.
Holzendorf, Charles, New York, N. Y. Automatically-controlled ventilator or fan. 1,500,492; July 8.
Home Elevator Company, The. (See Hobbs, John W., assignor.)
Hood, Harrison H., Los Angeles, assignor to Thimmeway Titles, Inc., Hollywood, Calif. Character-holding device. 1,500,561; July 8.
Hood Rubber Company. (See Glidden, Alfred A., assignor.)
Hood Rubber Company. (See Perrault, Joseph E., assignor.)
Hooper, James P., Ruxton, assignor to J. P. Hooper Manufacturing Company, Baltimore, Md. Apparatus for forming and twisting threads. 1,500,930; July 8.
Hooper, James P., Ruxton, assignor to J. P. Hooper Manufacturing Company, Baltimore, Md. Centrifugal spinneret. 1,500,931; July 8.
Hooper, James P., Ruxton, assignor to J. P. Hooper Manufacturing Company, Baltimore, Md. Apparatus for producing threads. 1,500,932; July 8.
Hooper, James P., Ruxton, assignor to J. P. Hooper Manufacturing Company, Baltimore, Md. Thread-forming apparatus. 1,500,933; July 8.

Hooper, James P., Ruxton, assignor to J. P. Hooper Manufacturing Company, Baltimore, Md. Spinneret. 1,500,934; July 8.
Hooper, James P., Manufacturing Company. (See Hooper, James P., assignor.)
Hooper, William E., and Sons Company. (See Hale, Harry C., assignor.)
Hoovens, Amasa G., Goshen, Ind. Machine for winding wire upon spools. 1,500,935; July 8.
Hoovens, Amasa G., Goshen, Ind. Machine for manufacturing wire cable. 1,500,936; July 8.
Hopf, Herman, Buffalo, N. Y. Lock for window sashes, etc. 1,500,562; July 8.
Horelick, Samuel, Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Cooling radiator for transformers. 1,500,818; July 8.
Horton, Fred W., Eldora, assignor of one-half to J. H. Hadley, Waterloo, Iowa. Automobile bed. 1,500,872; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Pouring pot for feeders and ingot molds. 1,500,731; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Pouring pot used in connection with hot top feeders. 1,500,732; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,733; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,734; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,735; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,736; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,737; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Method and apparatus for making sectional ingot-mold feeders. 1,500,738; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Method and apparatus for making ingot-mold feeders. 1,500,739; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,740; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,741; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,742; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,743; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,744; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,745; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,746; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,747; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,748; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,749; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,750; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,751; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,752; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,753; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,754; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,755; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,756; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Casting for feeders for ingot molds. 1,500,757; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,758; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,759; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,500,760; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Cover for feeders for ingot molds. 1,500,761; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Hot top feeder for ingot molds. 1,500,762; July 8.
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Hot top feeder for ingot molds. 1,500,763; July 8.
Howard, John R., Redwood City, Calif., assignor of one-fourth to D. Fanning, Cooperstown, N. Y. Plumb bob. 1,500,938; July 8.
Howell, David A., Brooklyn, N. Y. Egg-crate unpacking and repacking apparatus. 1,500,939; July 8.
Howell, Edward B., Butte, Mont. Antiglare device for automobiles. 1,500,563; July 8.
Howle, Kenneth, Norristown, and W. O. Taylor, Limerick, assignors to Wildman Mfg. Co., Norristown, Pa. Punch mechanism for making pattern strips. 1,500,940; July 8.
Hotopp, George F., Cincinnati, Ohio. Knockdown step-ladder. 1,500,937; July 8.
Houpert, Henri J., Mamaroneck, N. Y. Piston. 1,500,245; July 8.
Hoy, Clarence A., assignor to Peerless Husker Company, Buffalo, N. Y. Receptacle-filling machine. 1,500,620; July 8.
Hubbard, John, Seven Kings, England, assignor of one-half to A. P. Crouch, London, England. Means and method for preparing rubber goods for vulcanization. 1,500,621; July 8.
Hudson Motor Car Company. (See Fekete, S. I., and Balts, assignors.)
Hueber, Paul J., Syracuse, N. Y. Concrete-building form. 1,500,564; July 8.
Huffman, Charlie E., Beatrice, Nebr. Wall construction. 1,500,493; July 8.
Hulder, Joseph P., New York, N. Y., assignor to The Unit Player Action Co., Player piano. 1,500,565; July 8.
Hulson Grate Company. (See Bradley, W. F., and Hulson, assignors.)
Hulson, John W. (See Bradley, W. F., and Hulson.)
Hunmelgard, Charles E., Jersey City, N. J. Combination shovel. 1,500,132; July 8.
Hunt, John H., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Suction burner control. 1,500,321; July 8.
Hunt, Ormond E., assignor to Packard Motor Car Company, Detroit, Mich. Radiator cap for motor vehicles. 1,500,622; July 8.
Hunt, Robert W., Company. (See Rush, Donald B., assignor.)
Hunter, Lewis B., Yonkers, N. Y., assignor to Phenix Cheese Company. Packaging machine for plastic materials. 1,500,494; July 8.
Hurd, Hobert J., Plainfield, N. J. Beam compass. 1,500,623; July 8.
Huron Industries, Inc. (See Lundberg, John L., assignor.)
Hussey, Paul H., Indianapolis, Ind. Reel holder for fishing rods. 1,500,390; July 8.
Hutchings, Charles E., assignor to Eastman Kodak Company, Rochester, N. Y. Camera bellows. 1,500,391; July 8.
Hutchinson, Robert H., Dallas, Tex. Lubricating compound. 1,500,193; July 8.
Huth, Walter H., Chicago, Ill. Talking-machine repeater. 1,500,495; July 8.
Huyette, Paul B., Germantown, assignor to The Paul B. Huyette Co., Incorporated, Philadelphia, Pa. Glass-gauge protector. 1,501,011; July 8.
Huyette, Paul B., Co., The. (See Huyette, Paul B., assignor.)
Hyams, John H., Chicago, Ill. Collapsible clothes cabinet. 1,500,677; July 8.
Hyde, Arthur S., Hartford, Conn., assignor to Baush Machine Tool Company. Production of wheels. 1,500,496; July 8.
Hynes, Lee P., assignor to Consolidated Car-Heating Company, Albany, N. Y. Thermostat. 1,500,566; July 8.
Imperial Brass Manufacturing Company. (See Rudolph, Walter J., assignor.)
Incandescent Light & Stove Company, The. (See Stubbers, Joseph, assignor.)
Industrial Research Corporation. (See Brockway, Carl P., assignor.)
Ingelfinger, Edmund, Waiblingen, Germany, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Lubricator device. 1,500,873; July 8.
Ingersoll, Clarence B., Chicago, Ill. Apparatus for conditioning air. 1,500,624; July 8.
International Silver Company. (See Geib, William, assignor.)
Ionides, Philip D., Ipswich, assignor of one-half to Ransome Machinery Company (1920) Limited, London, England. Mixing machine. 1,500,322; July 8.

Ireland, Robert B., Richmond Hill, N. Y., assignor of one-half to G. Seaman, Union Hill, N. J. Glare preventer for headlights. 1,500,941; July 8.
Irwin, Herbert G., Floydada, Tex. Cotton picker. 1,500,992; July 8.
Ishburn, Charles R., Helena, Ark. Automobile tire and tool case. 1,500,874; July 8.
Isom, Byrd B., near Acton, Tenn. Signal. 1,500,706; July 8.
Jackson, Simeon S., Hyde Park, Boston, assignor to The Stafford Company, Readville, Mass. Feeler motion for looms. 1,501,012; July 8.
Jahna, Emil R., Perrysville, Ind. Concrete-roofing-tile machine. 1,500,497; July 8.
Janney, Walter T., Philadelphia, Pa. Centrifugal casting machine. 1,500,707; July 8.
Janney, Walter T., Philadelphia, Pa. Centrifugal casting machine. 1,500,708; July 8.
Janhet, Charles A., Seneca, Kans. Oil burner. 1,500,194; July 8.
Jarmin, James B., Spokane, Wash. Road machine. 1,500,392; July 8.
Jenkins, Robert W., Richmond, Calif. Oil-shale extraction process. 1,500,323; July 8.
Jessup & Moore Paper Co., The. (See Plumstead, Joseph E., assignor.)
Johnson, Albert B., Hartford, Conn. Swimmer's foot aid. 1,500,942; July 8.
Johnson & Johnson. (See Dailey, Frank L., assignor.)
Johnson, Billie, Temple, Tex. Combined tractor and cotton-picking machine. 1,500,324; July 8.
Johnson, Christian J., Colfax, Wis. Riveting machine. 1,500,625; July 8.
Johnson, George E. (See Johnson, James J. and G. E.)
Johnson, James J., San Francisco, and G. E. Johnson, Fowler, Calif. Rubber heel. 1,500,819; July 8.
Johnson, Lonzo, Indianapolis, Ind. Lamp. Des. 65,118; July 8.
Johnson Service Company. (See Otto, Arthur J., assignor.)
Johnson Service Company. (See Otto, Arthur J. and C. A., assignors.)
Johnson, Tomlinson F., jr., Atlanta, Ga. Snap clamp for tapping electric conductors. 1,500,498; July 8.
Johnson, Tomlinson F., jr., Atlanta, Ga. Clamp for electrical conductors. 1,500,499; July 8.
Jolin, Pacific, Le Bret, Saskatchewan, Canada. Chain fastener. 1,500,875; July 8.
Jolkovski, Jean D., New York, N. Y. Fire escape. 1,500,943; July 8.
Jones & Laughlin Steel Company. (See Ellis, F. L., and Sennett, assignors.)
Jones, Benjamin W. (See Carichoff, E. R., and Jones.)
Jones, John G., and H. G. Dewey, assignors to Eastman Kodak Company, Rochester, N. Y. Photographic cartridge and making same. 1,500,393; July 8.
Jones, John L., Birmingham, Ala. Valve. 1,500,820; July 8.
Jones, Richard O., Cricklewood, London, assignor to The Stafford Company, Readville, Mass. Feeler motion for looms. 1,501,012; July 8.
Jahna, Emil R., Perrysville, Ind. Concrete-roofing-tile machine. 1,500,497; July 8.
Janney, Walter T., Philadelphia, Pa. Centrifugal casting machine. 1,500,707; July 8.
Janney, Walter T., Philadelphia, Pa. Centrifugal casting machine. 1,500,708; July 8.
Janhet, Charles A., Seneca, Kans. Oil burner. 1,500,194; July 8.
Jarmin, James B., Spokane, Wash. Road machine. 1,500,392; July 8.
Jenkins, Robert W., Richmond, Calif. Oil-shale extraction process. 1,500,323; July 8.
Jessup & Moore Paper Co., The. (See Plumstead, Joseph E., assignor.)
Johnson, Albert B., Hartford, Conn. Swimmer's foot aid. 1,500,942; July 8.
Johnson & Johnson. (See Dailey, Frank L., assignor.)
Johnson, Billie, Temple, Tex. Combined tractor and cotton-picking machine. 1,500,324; July 8.
Johnson, Christian J., Colfax, Wis. Riveting machine. 1,500,625; July 8.
Johnson, George E. (See Johnson, James J. and G. E.)
Johnson, James J., San Francisco, and G. E. Johnson, Fowler, Calif. Rubber heel. 1,500,819; July 8.
Johnson, Lonzo, Indianapolis, Ind. Lamp. Des. 65,118; July 8.
Johnson Service Company. (See Otto, Arthur J., assignor.)
Johnson Service Company. (See Otto, Arthur J. and C. A., assignors.)
Johnson, Tomlinson F., jr., Atlanta, Ga. Snap clamp for tapping electric conductors. 1,500,498; July 8.
Johnson, Tomlinson F., jr., Atlanta, Ga. Clamp for electrical conductors. 1,500,499; July 8.
Jolin, Pacific, Le Bret, Saskatchewan, Canada. Chain fastener. 1,500,875; July 8.
Jolkovski, Jean D., New York, N. Y. Fire escape. 1,500,943; July 8.
Jones & Laughlin Steel Company. (See Ellis, F. L., and Sennett, assignors.)
Jones, Benjamin W. (See Carichoff, E. R., and Jones.)
Jones, John G., and H. G. Dewey, assignors to Eastman Kodak Company, Rochester, N. Y. Photographic cartridge and making same. 1,500,393; July 8.
Jones, John L., Birmingham, Ala. Valve. 1,500,820; July 8.
Jones, Richard O., Cricklewood, London, assignor to Courtaulds Limited, London, England. Manufacture and production of caustic soda. 1,500,993; July 8.
Jones, Richard O., assignor to Courtaulds Limited, Cricklewood, London, England. Effecting the separation of sodium carbonate from liquors or solutions containing caustic soda. 1,500,994; July 8.
Jones, Richard O., assignor to Courtaulds Limited, London, England. Manufacture of caustic soda. 1,500,995; July 8.
Jordahl, Anders, New York, N. Y. Air filter. 1,500,586; July 8.
Jordan, Raphael. (See Polizzo, Carmin, assignor.)
Junkers, Hugo, Dessau, Germany. Liquid heater. 1,500,456; July 8.
Junkers, Hugo, Dessau, Germany. Valve gear. 1,500,457; July 8.
Kallenbach, Walter H., and C. C. Bertsch, Boston, assignors to A. A. Zeigler, Roxbury, Mass. Self-winding gong. 1,500,325; July 8.
Kasser Egg Process Co. (See Kasser, Morris, assignor.)
Kasser, Morris, assignor to Kasser Egg Process Co., San Francisco, Calif. Egg carrier. 1,500,876; July 8.
Kaufman, Adam W., Milwaukee, Wis. Timer. 1,500,821; July 8.
Kaufman, Adam W., Milwaukee, Wis. Oil-hole cap. 1,500,822; July 8.
Kaufman, Joseph, New York, assignor to American Safety Razor Corporation, Brooklyn, N. Y. Container for safety razors. 1,500,133; July 8.
Kaye, Frederick, Ashton-on-Mersey, England. Paper making. 1,500,500; July 8.
Keating, John B. (See Forward, W. L., and Keating.)
Kee, Robert J., Ottawa, Ontario, Canada. Life-saving device. 1,500,823; July 8.
Keen, Walter R., Birmingham, England. Flexible driving element. 1,500,458; July 8.
Keller, Charles L., Wyoming, assignor to The Richardson Company, Lockland, Ohio. Shingle. 1,500,709; July 8.
Kellogg, William L. (See Anderson, Harley E., assignor.)
Kelly, James M., Portland, Oreg. Level. 1,500,710; July 8.
Kennedy, George C., Waterloo, Iowa. Auxiliary freight carrier for vehicles. 1,500,394; July 8.
Kennedy, George C., Waterloo, Iowa. Auxiliary freight carrier for vehicles. 1,500,395; July 8.
Keuffel, Adolf W., Montclair Township, Essex County, assignor to Keuffel & Esser Company, Hoboken, N. J. Drawing instrument. 1,500,246; July 8.
Keuffel & Esser Company. (See Keuffel, Adolf W., assignor.)
Kimbrell, Marvin R., Charlotte, N. C., assignor, by mesne assignments, of one-half to Memco Engineering & Manufacturing Co., Inc., Long Island City, N. Y. Electric switch. 1,500,944; July 8.
King, Jesse C., Lindley, N. Y. Milk cooler. 1,500,877; July 8.
King, William A., Seattle, Wash. Luggage carrier for vehicles. 1,500,945; July 8.
Kirchman, Marie, Cicero, Ill. Lamp shade. Des. 65,119; July 8.
Kirchman, Marie, Cicero, Ill. Lamp shade. Des. 65,120; July 8.
Kirn, Arthur J., assignor of one-half to C. M. Gruber, Philadelphia, Pa. Brake and transmission band. 1,500,396; July 8.
Klamroth, Wilfried, New York, N. Y. String fastener. 1,500,134; July 8.
Klein, John B., Kansas City, Kans. Brake for motor vehicles. 1,500,397; July 8.
Klein, Max, New York, N. Y., assignor to Shapiro & Aronson, Inc. Lighting-fixture bracket. Des. 65,121; July 8.
Klein, Max, New York, N. Y., assignor to Shapiro & Aronson, Inc. Chandelier. Des. 65,122; July 8.
Kline, Charles E., Cedar Springs, Mich. Frame corner. 1,500,824; July 8.
Klingelhöffer, Reinhard, Werden-on-the-Ruhr, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Water cooler for locomotives. 1,500,996; July 8.
Knopke, Raymond C., Wheaton, Ill. Metal fencepost. 1,500,135; July 8.
Knowlton, Harry N., Chicago, Ill., assignor to Weyerhaeuser Forest Products, St. Paul, Minn. Crate. 1,500,136; July 8.
Knox, Samuel L. G., New York, N. Y. Submarine construction. 1,500,997; July 8.
Koelkebeck, Carl W. A., Pittsburgh, Pa. Adjustable gaff. 1,500,501; July 8.
Kousalik, Arthur R., Philadelphia, Pa. Skylight. 1,500,678; July 8.
Kotzenberg, Wilhelm. (See Deutschmann, R., and Kotzenberg.)
Kraft, Henry P. (See Schweinert, M. C., and Kraft.)
Krauss, Friedrich E., Schwarzenberg, Germany. Portable fire extinguisher. 1,500,946; July 8.
Krell, George, Kansas City, Mo. Casing elevator. 1,500,459; July 8.
Kremer-Cummins Machine Company. (See Cummins, R. R., and Kremer, assignors.)
Kremer, Robert W. (See Cummins, R. R., and Kremer.)
Kroder, John, & Henry Reubel Company, The. (See Kurtz, William E., assignor.)
Kruchten, John F., Philadelphia, Pa. Power transmission. 1,500,878; July 8.
Kuhn, Clarence A., Forks, N. Y. Vehicle signal. 1,500,998; July 8.
Kuhn, John W., Belleville, Kans. Rotary plow. 1,500,502; July 8.
Kunkle, George R., Elyria, Ohio. Electric-motor mechanism. 1,500,825; July 8.
Kunkle, George R., Elyria, Ohio. Speed-regulated motor. 1,500,826; July 8.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,500,137; July 8.
Kurtz, William E., Los Angeles, Calif., assignor to The John Kroder & Henry Reubel Company, Brooklyn, N. Y. Curtain support. 1,500,999; July 8.
Kusnetz, Louis, Chicago, Ill. Sanitary dental supply holder. 1,500,398; July 8.
Kyle, William D., Milwaukee, Wis. Supporting insulator. 1,500,626; July 8.
Lafitte, Théodore, Paris, France. Infantry cannon. 1,500,711; July 8.
Lake, Clair D., Binghamton, assignor to The Tabulating Machine Company, Endicott, N. Y. Hammer control for tabulating machines. 1,501,004; July 8.
Lancaster, James W., Senath, Mo. Churn dasher. 1,500,326; July 8.
Lane, Edwin, assignor to Carolyn Laundry, New York, N. Y. Laundry marker. 1,501,000; July 8.
Lane, Edwin, assignor to Carolyn Laundry, New York, N. Y. Marker. 1,501,001; July 8.
Lane, Edwin, assignor to Carolyn Laundry, New York, N. Y. Laundry marker. 1,501,002; July 8.
Lane, Edwin, assignor to Carolyn Laundry, New York, N. Y. Laundry marker. 1,501,003; July 8.
Lanese, Antonio C., Cleveland, Ohio. Fire-alarm device. 1,500,399; July 8.
Langley, Ralph H., Schenectady, N. Y., assignor to General Electric Company. Coil system. 1,500,827; July 8.
Lantis, Orva V. (See Redding, S. K., and Lantis.)
Larsen, Carl M., Glyndon, Minn. Stool. 1,501,005; July 8.
Larsen, Charles, Denver, Colo. Well-cleaning device. 1,500,400; July 8.

Larson, Christian H., Guffey, assignor of one-fourth to H. A. McDonald, one-fourth to J. L. Young, and one-fourth to H. P. Phillips, Jefferson County, Tex. Tire rack. 1,500,460; July 8.
Larson, Otto C., Brooklyn, N. Y. Automatic safety valve. 1,500,587; July 8.
Lasell, M. C. (See Melton, P. O., and Lasell.)
Lashar, Thomas B., Fairfield, Conn., assignor to Associated Silver Company, Chicago, Ill. Spoon or similar article. Des. 65,123; July 8.
Lauer-Schmaltz, Eugen, Offenbach-on-the-Main, Germany. Grinding machine. 1,500,401; July 8.
Lavole, Alphonse J., Montreal, Quebec, Canada. Power transmission. 1,500,588; July 8.
Lawson, John, Pawtucket, R. I., and E. A. Quint, New Brunswick, N. J., assignors to Hemphill Company, Central Falls, R. I. Method of and means for making spring-beard knitting needles. 1,500,627; July 8.
Lawson, Lindley S., Pittsburgh, Pa. Water heater for stand boilers. 1,500,327; July 8.
Layne, Mahlon E., Houston, Tex. Well screen and making same. 1,500,828; July 8.
Layne, Mahlon E., Houston, Tex. Forming well screens. 1,500,829; July 8.
Layne, Mahlon E., Houston, Tex. Well-screen-forming device. 1,500,830; July 8.
Leas, Bert E., Luverne, Minn. Rake. 1,501,006; July 8.
Le Bel, Joseph I., Montreal, Quebec, Canada. Smoking pipe. 1,500,503; July 8.
Leecock, John T. (See Hanson, H. H., Leecock, and Hodgett.)
Lehman, William. (See Hogbin, J., and Lehman.)
Le Maire, George R., Central City, Ky. Shock absorber. 1,500,138; July 8.
Lenk, Gus F., Dallas, Tex. Thimble. 1,500,504; July 8.
Lenk, Gus F., Dallas, Tex. Vent structure for furnaces. 1,500,505; July 8.
Leonard, David G., Schaghticoke, N. Y. Fruit picker. 1,501,007; July 8.
Leslie, Freeland D., Milton, Mass. Valve-operating device. 1,500,628; July 8.
Lessard, Henry N., Manchester, N. H. Thread guide. 1,500,947; July 8.
Lesslie, James J., Boston, Mass. Lawn mower. 1,500,506; July 8.
Lester, Leonard C., Cranston, R. I. Mechanical warning signal. 1,500,328; July 8.
Levy, Leon, New York, N. Y. Theatrical device. 1,500,507; July 8.
Levy, Louis H., New Haven, Conn. Sphygmomanometer. 1,500,629; July 8.
Lewis, Elias, Terre Haute, Ind. Knife. 1,500,402; July 8.
Lewis, Francis P., Buffalo, N. Y. Means for testing vision. 1,500,247; July 8.
Lewis, Francis P., Buffalo, N. Y. Testing vision. 1,500,248; July 8.
Lima y Boyz, Alejandro. (See Muro, R. D., and Lima y Boyz.)
Lippincott, Donald K., San Francisco, Calif., assignor, by mesne assignments, to General Electric Company. Electric-circuit protective device. 1,501,018; July 8.
Lippincott, Donald K., San Francisco, Calif., assignor, by mesne assignments, to General Electric Company. Electric-circuit protective device. 1,501,019; July 8.
Little, Arthur E., Cleveland, Ohio. Attachable handle for grease-cup caps. 1,500,831; July 8.
Lloyd, Arthur J., and G. A. Olsen, assignors to Accounting Devices Company, Chicago, Ill. Loose-leaf binder. 1,500,630; July 8.
Logan, Henry H., Chicago, Ill. Safety control device. 1,500,403; July 8.
Long, Albert R., Ranshaw, Pa. Gear-shift lock for automobiles. 1,500,948; July 8.
Longnecker, Fred M. (See Hall, William E., assignor.)
Look, Frank L., Pasadena, Calif. Cooling and dispensing device. Des. 65,124; July 8.
Lord, Hugh C., Erie, Pa. Railway tie. 1,500,139; July 8.
Loubet, Enice J., New York, N. Y. Doll. Des. 65,125; July 8.
Love, William R., Armour, N. C. Coin-controlled mechanism for dispensing apparatus. 1,500,195; July 8.
Lovig, Edward. (See Mowry, L. N., and Lovig.)
Lozo, Frank J., Saskatoon, Saskatchewan, Canada. Grease cup. 1,500,404; July 8.
Luce, Grafton E., Chicago, Ill. Collapsible arch form for brickkilns. 1,500,949; July 8.
Ludlow, George M., Evanston, assignor to Sanitary Scale Company, Chicago, Ill. Thermostatically-adjusted scale lever. 1,500,405; July 8.
Ludwik, Richard G., Brooklyn, assignor to Concrete Steel Company, New York, N. Y. Wire tie for reenforcing rods and bars. 1,500,832; July 8.
Lumsden, John, Ottawa, Ontario, Canada. Peat drier and the like. 1,500,461; July 8.
Lundberg, John L., assignor to Huron Industries, Inc., Alpena, Mich. Gasket for rotating kilns. 1,500,589; July 8.
Lusignan, Wilfrid H., Worcester, Mass. Picker rod and stand for looms. 1,500,329; July 8.
Lux, George, Quakertown, Pa. Shuttle spindle and coptube holder therefor. 1,500,508; July 8.
M. & H. Piston Ring Co. (See Heslewood, W. R., and Mocine, assignors.)
Mabon, Merril, assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt-buckle frame. Des. 65,126; July 8.
Mabon, Merril, assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt-buckle frame. Des. 65,127; July 8.
Mabon, Merril, assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt slide. Des. 65,128; July 8.
MacDonald, Frank J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Ornamenting or coating. 1,500,833; July 8.
MacDonald, Murray J., New York, N. Y. Burial casket. 1,500,141; July 8.
Macmillan, Campbell, Schenectady, N. Y., assignor to General Electric Company. Method of and apparatus for modifying the characteristics of asynchronous dynamo-electric machines. 1,500,834; July 8.
Madle, Frank, Berwyn, Ill., assignor to Cruver Manufacturing Company, Chicago, Ill. Receptacle. 1,500,142; July 8.
Madsen, Mathias O. S., assignor to O. K. Heesch, Aarhus, Denmark. Coin-controlled apparatus. 1,500,462; July 8.
Maier, Robert. (See Rall, M., and Maier.)
Malicke, John J., Wisconsin Rapids, Wis. Doctor controller for paper-machine driers. 1,500,952; July 8.
Maloney, Thomas J., Youngstown, Ohio. Bundling table. 1,500,835; July 8.
Mangner, Fred, Deer Park, Md. Attachment for milk bottles. 1,500,251; July 8.
Manheimer, Emanuel. (See Zacharias, F., and Manheimer.)
Manifold Impressions Corporation. (See Cossitt, Malcolm L., assignor.)
Manning, Maxwell & Moore, Inc. (See Darling, Philip G., assignor.)
Mansure, Nellie F., Chicago, Ill. Curtain-rod leader. 1,500,631; July 8.
Marquette, Melvon A., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Method and apparatus for cutting bias strips. 1,500,632; July 8.
Marriott, Robert H., Bremerton, Wash. Telephonic receiver. 1,500,331; July 8.
Marshall, Lewis C., Walpole, assignor to Pressure Proof Piston Ring Company, Boston, Mass. Piston ring. 1,500,252; July 8.
Marshall, William J., East Boston, Mass. Fire-hose nozzle. 1,500,633; July 8.
Martin, Albert S., East Burlington, N. J. Automatic fire alarm. 1,500,408; July 8.
Martin, William. (See Hogbin J., and Lehman, assignors.)
Marx, Louis, New York, N. Y. Figure toy. 1,500,590; July 8.
Maschinenfabrik Rheinland A. G. (See Brühl, Paul, assignor.)
Mason, Arthur C., Flint, assignor to General Motors Corporation, Detroit, Mich. Tractor. 1,501,025; July 8.
Maspons, Albert E., Philadelphia, Pa. Automatic wrapping machine. 1,500,143; July 8.
Masters, Mace L., Mount Ulla, N. C. Safety razor. 1,500,953; July 8.
Matheslus, Hans. (See Mathesius, Walther and H.)
Matheslus, Walther and H., Charlottenburg, Germany. Manufacture of lead alloys. 1,500,954; July 8.
Matson, Carl W., Westport, Oreg. Electric switch. 1,500,512; July 8.
Matson, Francis G., Washington, D. C. Edible food product. Des. 65,129; July 8.
Mattern, William K., Germantown, Pa. Adjustable sinker. 1,500,463; July 8.
Matz, William A., Clinton, Iowa. Dust remover. 1,500,955; July 8.
Mayer, Frederick. (See Mayer, Henry, assignor.)
Mayer, Henry, assignor of one-half to F. Mayer, St. Louis, Mo. Automobile lock. 1,500,836; July 8.
McAfee, Almer M., Port Arthur, Tex., assignor to Gulf Refining Company, Pittsburgh, Pa. Distillation with aluminum chloride. 1,501,014; July 8.
McCabe, Hugh, Lawrence, Mass. Cold flanging irregularly-shaped sheet-metal plates. 1,501,008; July 8.
McCarthy, Joseph J., Cincinnati, Ohio. Ash sifter. 1,500,712; July 8.
McClintock, Lewis G., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Cooling apparatus for transformers. 1,500,764; July 8.
McCord Manufacturing Company. (See Harris, Joseph D., assignor.)
McCracken, Arthur, and W. V. Monroe, Chicago, Ill. Traction grip. 1,500,249; July 8.
McCulloch, Doyle W., Blackwell, Okla. Oil burner. 1,500,509; July 8.
McDonald, H. A., et al. (See Larson, Christian H., assignor.)
McElvar, Carl, and S. Simmons, Nesquehoning, Pa. Carrier for miners' battery boxes. 1,500,510; July 8.
McFadden, Glenn E., Lakewood, Ohio, assignor to Alfred Vester Sons, Inc., Providence, R. I. Plate for lighting fixtures. Des. 65,130; July 8.
McFadden, Glenn E., Lakewood, Ohio, assignor to Alfred Vester Sons, Inc., Providence, R. I. Ring for lighting fixtures. Des. 65,131; July 8.

McFadden, Glenn E., Lakewood, Ohio, assignor to Alfred Vester Sons, Inc., Providence, R. I. Spindle for lighting fixtures. Des. 65,132; July 8.
McFall, William H., assignor to Globe Ticket Company, Philadelphia, Pa. Check-notching device. 1,500,950; July 8.
McGhee, John A., McKees Rocks, Pa. Pouring spout. 1,500,951; July 8.
McHugh, John F., et al. (See Clark, Sherman D., assignor.)
McIntire, Erastus W., Salt Lake City, Utah. Collapsible back saw. 1,500,406; July 8.
McIntyre, Sydney S., Sedro Woolley, Wash. Locomotive. 1,500,330; July 8.
McKay, Chester, Glen Brook, Conn. Game indicator. 1,500,196; July 8.
McKenney, Charles D., assignor to The Seward Trunk and Bag Company, Petersburg, Va. Luggage holder. 1,500,511; July 8.
McKinney, Samuel L., Peoria, Ill., assignor to Elevator Locks Co. Safety appliance for elevator cars. 1,501,024; July 8.
McLain Co., The. (See McLain, Frank H., assignor.)
McLain, Frank H., assignor to The McLain Co., Portland, Me. Automatic wood-turning lathe. 1,500,250; July 8.
McLavey, John P., Iowa Falls, Iowa. Mileage register. 1,500,407; July 8.
McMullen, John E., Council Bluffs, Iowa. Rail joint. 1,500,140; July 8.
Medley, James, Ironwood, Mich. Automobile accessory. 1,501,015; July 15.
Meinhardt, Jacob A., Chicago, Ill. Mop frame. 1,500,634; July 8.
Mehlhaf, William, Sutton, Nebr. Automobile signal. 1,500,144; July 8.
Melton, Perry O., and M. C. Lasell, Aberdeen, S. Dak. Attachment for automobile wheels. 1,500,409; July 8.
Memco Engineering & Manufacturing Co., Inc. (See Kimbrell, Marvin R., assignor.)
Mercer, Henry H., Claremont, N. H., assignor to Sullivan Machinery Company. Stoneworking machine. 1,500,598; July 8.
Mercer, Henry H., Claremont, N. H., assignor to Sullivan Machinery Company. Lubricator. 1,500,599; July 8.
Merkel, John, jr., Evansville, Ind. Toothbrush. 1,500,410; July 8.
Merrill, Edwin C., Pittsburgh, Pa. Gas burner. 1,500,413; July 8.
Mestas, Anastasio, Mexico, Mexico. Bed construction. 1,500,956; July 8.
Metal Auto Parts Company. (See Thompson, B. E., and Green, assignors.)
Metzner, Albert W. (See Sherman, J. Q., and Metzner.)
Michalski, Joseph J., Buffalo, N. Y. Theft detector for automobiles. 1,500,635; July 8.
Midgley, Thomas, Hampden, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Calender. 1,500,679; July 8.
Miller, Henry, Kansas City, Mo. Heating attachment for stove or furnace pipes. 1,500,838; July 8.
Miller, B. S. (See Bowles, Leonard G., assignor.)
Miller, Edward, Columbus, Ohio, assignor to C. J. Root, Terre Haute, Ind. Glass-feeding mechanism. 1,500,879; July 8.
Miller, Fred A., assignor of one-half to B. E. Tate, St. Louis, Mo. Rivet holding and setting tool. 1,500,253; July 8.
Miller, Guttorm, Glens Falls, N. Y. Tunneling machine. 1,500,411; July 8.
Miller, J. Henry, et al. (See Whitted, John B., assignor.)
Miller, Joseph, Fostoria, Ohio. Automobile stand. 1,500,880; July 8.
Miller, Thomas W., assignor to The Faultless Rubber Company, Ashland, Ohio. Tennis ball and manufacturing the same. 1,501,009; July 8.
Milligan, Abb L., Atlanta, Ga. Insecticide container and distributor. 1,500,514; July 8.
Miner, W. H., Inc. (See Anderson, Harley E., assignor.)
Miner, W. H., Inc. (See Brenne, Arild M., assignor.)
Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Minniear, George D., et al. (See Bolton, P. W., and Minniear, assignors.)
Minniear, William N. (See Bolton, P. W., and Minniear.)
Misklmen, Judson H., Glendive, Mont. Vehicle wheel rim. 1,500,412; July 8.
Mitchell, Allister S., assignor to California Cotton Mills Company, Oakland, Calif. Padding machine. 1,500,413; July 8.
Mocine, Harry F. (See Heslewood, W. R., and Mocine.)
Moir, Donald, and H. Buchanan, Rosario de Santa Fe, Argentina. Means for the manufacture centrifugally of pipes, columns, and other hollow articles. 1,500,414; July 8.
Monroe, Frank C., Enderlin, N. Dak. Lamp. 1,500,197; July 8.
Monroe, William V. (See McCracken, A., and Monroe.)
Montgomery, John. (See Dover, George W., assignor.)
Montour Aluminum Soldering Corporation. (See Page, George E., assignor.)
Moody, Walter S., Pittsfield, Mass., assignor to General Electric Company. Incased electrical apparatus. 1,500,837; July 8.
Morgan, George U., London, England. Liquid-fuel burner. 1,500,880; July 8.
Moriarty, Herbert B., Memphis, Tenn. Cap or crown puller. 1,500,881; July 8.
Moriarty, Herbert B., Memphis, Tenn. Cap or crown puller. 1,500,882; July 8.
Morris, George T., St. Louis, Mo. Connecting rod. 1,500,515; July 8.
Morrison, Edward C., Fayetteville, N. Y. Car-journal-polishing device. 1,500,198; July 8.
Morrison, Frank B., assignor to The Power Manufacturing Company, Marion, Ohio. Internal-combustion engine. 1,500,464; July 8.
Morrow, Frank C., Wellston, Ohio. Shaking screen. 1,500,415; July 8.
Morton, Fred S., Worcester, Mass. Ball-bearing head. 1,500,516; July 8.
Morton, Harry U., Chicago, Ill., assignor to Morton Manufacturing Company. Car-vestibule diaphragm. 1,500,591; July 8.
Morton Manufacturing Company. (See Morton, Harry U., assignor.)
Mosley, Frank E., Shettleston, Scotland. Apparatus for controlling the operation of talking machines or machines in timed relation to a cinematographic machine. 1,500,254; July 8.
Mouser, William F., Lodge, Mo. Rail chair and coupler. 1,500,517; July 8.
Mowry, Lloyd N., and E. Lovig, St. Petersburg, Fla. Pocket check and pass book carrier. 1,500,713; July 8.
Mudra, Bohumil R., Chicago, Ill. Machine for cleaning balls. 1,500,681; July 8.
Mueller, Adolph, trustee. (See Mueller, P., and Schuermann, assignors.
Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Float-valve-operating mechanism. 1,500417; July 8.
Mueller, Philip, and A. C. Schuermann, assignors to A. Mueller, trustee, Decatur, Ill. Waste stopper and operating mechanism. 1,500,416; July 8.
Mullen, Frank E., Lexington, Miss. Insect trap. 1,500,518; July 8.
Müller, Carl A., Witzenhausen, Germany. Safety lock. 1,500,883; July 8.
Mumm, Frank J. (See Colbyson, H. M., and Mumm.)
Munning, A. P., & Co., New York. (See Hall, Wesley F., assignor.)
Münz, Ferdinand, Fechenheim-on-the-Main, Germany, assignor to Leopold Cassella & Co. Gesellschaft mit beschränkter Haftung. Production of effect threads with animal fibers. 1,500,255; July 8.
Murdoch Manufacturing and Supply Company, The. (See Bart, Thomas E., assignor.)
Murnin, John A., Pittsburgh, Kans. Advertising device. 1,500,884; July 8.
Muro, Raul D., and A. Lima y Boyz, Habana, Cuba. Compound for treating hair. 1,500,519; July 8.
Myers, Lewis C., Freeport, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,500,839; July 8.
Nagel, Theodore, Brooklyn, N. Y. Treating coal. 1,500,256; July 8.
Nakanishi, Yobie, Los Angeles, Calif. Garment press. 1,500,714; July 8.
Nalle, Charles R., Wichita Falls, Tex. Adjustable caster. 1,500,465; July 8.
National Malleable and Steel Castings Company. (See Schmidt, Ernest H., assignor.)
Neander, Oscar L., Aurora, Nebr. Spout lock. 1,500,520; July 8.
Nelson, Gust A., Sedro Woolley, Wash. Vulcanizer. 1,500,885; July 8.
Nelson, Tennie, Kilbourne, Wis. Chimney brush. 1,500,886; July 8.
Nero, Arvid H., New Britain, assignor to The Arrow Electric Company, Hartford, Conn. Electric switch. 1,500,887; July 8.
Nero, Arvid H., New Britain, Conn., assignor to The Arrow Electric Company, Hartford, Conn. Electric switch. 1,500,888; July 8.
Nield, Joseph, Salisbury, South Rhodesia, South Africa. Apparatus for extracting oil, fats, and waxes and for conditioning maize and other grain. 1,500,957; July 8.
Nicholas, Peter Z., Charlestown, Mass. Direction signal. 1,500,521; July 8.
Nickerson, Franklin G. (See Norwood, H. E., and Nickerson.)
Noble & Wood Machine Company, The. (See Werner, Walter, assignor.)
Noelting, William H., assignor to Faultless Caster Company, Evansville, Ind. Caster socket. 1,500,840; July 8.
Norwood, Harry E., New York, and F. G. Nickerson, Brooklyn, assignors to Perfect Window Regulator Company, New York, N. Y. Electrically-operated raising and lowering mechanism for windows. 1,500,765; July 8.
Nutt, William H., Newburyport, Mass. Shoe heel. Des. 65,133; July 8.
Obert, Leon D., Underwood, Minn. Grain separator. 1,500,522; July 8.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction side bearing. 1,500,145; July 8.

O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,500,146; July 8.
O'Connor, John F., Chicago, Ill., assignor, by mesne, assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,500,147; July 8.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,500,148; July 8.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction bearing. 1,500,149; July 8.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Resilient shackle. 1,500,150; July 8.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Resilient connecter for mine cars. 1,500,151; July 8.
Olsen, George A., assignor to Accounting Devices Company, Chicago, Ill. Loose-leaf binder. 1,500,682; July 8.
Olsen, George A. (See Lloyd, A. J., and Olsen.)
Opel, Walter, assignor to the Firm Georgi & Co., Leipzig, Germany. Picture frame. 1,500,257; July 8.
Ostemau, Carl G., assignor to S. A. Woods Machine Company, Boston, Mass. Bearing. 1,500,523; July 8.
O'Sullivan, Otho, Willimantic, Conn. Thread guide for spinning machines. 1,500,258; July 8.
Otterson, William A., Boston, Mass. Apparatus for forming hollow concrete walls. 1,500,683; July 8.
Otto, Arthur J., assignor to Johnson Service Company, Milwaukee, Wis. Thermostat. 1,500,259; July 8.
Otto, Arthur J. and C. A., assignors to Johnson Service Company, Milwaukee, Wis. Thermostat. 1,500,260; July 8.
Otto, Carl A. (See Otto, Arthur J. and C. A.)
Overmyer, Charles G., Hartford City, Ind. Glass caster. 1,500,199; July 8.
Overstreet, John T., Uvalde, Tex. Sealing means for receptacles. 1,500,200; July 8.
Ozerowicz, Alexander, Romulus, assignor of one-third to J. Antonuitis and one-third to K. Salavejus, Detroit, Mich. Toy. 1,500,201; July 8.
Packard Motor Car Company. (See Church, Harold D., assignor.)
Packard Motor Car Company. (See Hill, Lewis C., assignor.)
Packard Motor Car Company. (See Hunt, Ormond E., assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Page, George E., Rochester, assignor to Montour Aluminum Soldering Corporation, Montour Falls, N. Y. Sheet-metal-spinning machine. 1,500,261; July 8.
Page, Samuel H., Stratford, assignor to The American Fabrics Company, Bridgeport, Conn. Lace. Des. 65,134; July 8.
Page, Stanley H., San Francisco, and J. B. Struble, Oakland, Calif. Temperature-controlling means for motors. 1,500,418; July 8.
Paine, Roscoe B., Waterville, Me. Slot closer. 1,500,419; July 8.
Palm, Fechteler & Co. (See De Ville, Walter, assignor.)
Palmenberg's, J. R., Sons, Inc. (See Candlish, William C., assignor.)
Papoulias, Angelo, Steubenville, Ohio. Change-making device. 1,500,262; July 8.
Paraffine Companies. (See Rosener, L. S., and Doane, assignors.)
Parodi, Angelo C., Jersey City Heights, N. J. Egg boiler. 1,500,958; July 8.
Parsons, Stuart W., assignor to The Stanley Works, New Britain, Conn. Stop hinge. 1,501,013; July 15.
Paske, Delmar, Newfane, N. Y. Aerial standard. 1,500,841; July 8.
Patrick, Henry N., Mineola, Tex. Buckle for cotton bales. 1,500,684; July 8.
Paulson, Jarl O., Fargo, N. Dak. Table lamp. 1,500,842; July 8.
Pearsons, Arthur W. (See Wagner, William F., assignor.)
Pease, William E., et al. (See Evers, William H., assignor.)
Peerless Husker Company. (See Hoy, Clarence A., assignor.)
Perczel, Aladár, Ujpest, Hungary. Apparatus for the treatment of solid substances in a gaseous atmosphere. 1,500,715; July 8.
Perfect Window Regulator Company. (See Norwood, H. E., and Nickerson, assignors.)
Perrault, Joseph E., assignor to Hood Rubber Company, Watertown, Mass. Sole-punching machine. 1,500,263; July 8.
Perzeszty, Joseph, New York, N. Y. Window-locking arrangement. 1,500,636; July 8.
Peters, Edward F., et al. (See Rosewarne, Richard E., assignor.)
Peters, William, et al. (See Rosewarne, Richard E., assignor.)
Peterson, Edward G., et al. (See Sundstrand, Oscar J., assignor.)
Peterson, George M., Sturgeon Bay, Wis. Piston vise. 1,500,264; July 8.
Pettersson, Fritz A., assignor to Aktiebolaget Gjuterimaskiner, Halmstad, Sweden. Cooking stove. 1,500,843; July 8.
Petty, Earl, Winfield, Kans., assignor to The De Laval Separator Company, New York, N. Y. Purifying mineral oil. 1,500,202; July 8.
Pfeiffer, Eli J., Union Grove, Wis. Foot accelerator. 1,500,889; July 8.
Phenix Cheese Company. (See Hunter, Lewis B., assignor.)
Phenix Cheese Company. (See Wyner, Felix, assignor.)
Phillips, H. P., et al. (See Larson, Christian H., assignor.)
Phillips, William E., Jacksonville, Fla. Armrest. 1,500,524; July 8.
Pierini, Humbert, Greenville, Miss. Trap. 1,500,525; July 8.
Pillar, Oscar, assignor to Vacuum Groove Piston Ring Corporation, Oakland, Calif. Groove-cutting machine. 1,500,637; July 8.
Pittsburgh Transformer Company. (See Bingay, Robert V., assignor.)
Pittsburgh Transformer Company. (See Horelick, Samuel, assignor.)
Pittsburgh Transformer Company. (See McClintock, Lewis G., assignor.)
Plauson, Hermann, Hamburg, Germany. Oil-soluble dyestuff. 1,500,844; July 8.
Plauson, Hermann, Hamburg, Germany. Process and apparatus for the manufacture of dispersoids. 1,500,845; July 8.
Plumstead, Joseph E., Wilmington, Del., assignor to The Jessup & Moore Paper Co., Philadelphia, Pa. Extracting liquid from porous material containing the same. 1,500,265; July 8.
Plumstead, Joseph E., Wilmington, Del., assignor to The Jessup & Moore Paper Co., Philadelphia, Pa. Reclamation of low-melting-point salts from black liquor. 1,500,890; July 8.
Polizzo, Carmin, assignor of one-half to R. Jordan, Paterson, N. J. Loose reed for looms. 1,500,466; July 8.
Pollak, James L., assignor to U. S. Tool Manufacturing Company, Chicago, Ill. Shade holder. 1,500,320; July 8.
Pond, William H., assignor to Theodore W. Foster & Bro. Co., Providence, R. I. Lacquering machine. 1,500,467; July 8.
Popendick, William, Decatur, Mich. Auto wheel. 1,500,716; July 8.
Porter, Frank K., Clairton, Pa. Coke-oven interlocking and signaling mechanism. 1,500,526; July 8.
Posner, Abraham, Brooklyn, N. Y. Shoe heel. 1,500,421; July 8.
Power Manufacturing Company, The. (See Morrison, Frank B., assignor.)
Power Specialty Company. (See Rover, Richard H., assignor.)
Powers, Fannie I. (See Witty, George, assignor.)
Powers, John N., Washington, D. C. Flexible coupling. 1,500,959; July 8.
Prenzel, Adam H., Halifax, Pa. Making shoes. 1,500,527; July 8.
Pressure Proof Piston Ring Company. (See Marshall, Lewis C., assignor.)
Prest-O-Lite Company, The. (See Benner, Raymond C., assignor.)
Prest-O-Lite Company, The. (See Benner, R. C., and French, assignors.)
Preston, Albert F., deceased, Boston, by J. Abbott, Winchester, and A. B. White, Brookline, Mass., administrators. Cutting mechanism. 1,500,638; July 8.
Preston, William, Spokane, Wash. Animal trap. 1,500,332; July 8.
Price Charles E., Austen, W. Va. Track fastening. 1,500,203; July 8.
Price, James T., Lincoln, Ill. Sewing-machine lamp bracket. 1,500,846; July 8.
Primm, James D., sr., Athens, Ill. Hut for swine. 1,500,266; July 8.
Proctor & Schwartz, Incorporated. (See Buckley, Joseph L., assignor.)
Prosperity Co. Inc., The. (See Braun, Philip N., assignor.)
Putnam, Alden L., Detroit, Mich., assignor, by mesne assignments, to Detroit Pressed Steel Company, Wilmington, Del. Reversible disk wheel. 1,500,333; July 8.
Pym, Charles F., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for working uppers over lasts. 1,500,152; July 8.
Quehl, Cathryn E., administratrix. (See Quehl, William R.)
Quehl, William R., deceased, St. Louis, Mo.; C. E. Quehl, administratrix. Step ladder. 1,500,891; July 8.
Quinn, William J., Pottsville, Pa. Brake. 1,500,717; July 8.
Quint, Everett A. (See Lawson, J., and Quint.)
Radford, George, Oakland Beach, R. I., assignor to Richmond Lace Works, New York, N. Y. Lace. Des. 65,135; July 8.
Radford, George, Oakland Beach, R. I., assignor to Richmond Lace Works, New York, N. Y. Lace. Des. 65,136; July 8.
Radford, George, Oakland Beach, R. I., assignor to Richmond Lace Works, New York, N. Y. Lace. Des. 65,137; July 8.

Radford, George, Oakland Beach, R. I., assignor to Richmond Lace Works, New York, N. Y. Lace. Des. 65,138; July 8.
Rall, Max, and R. Maier, assignors to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Electric switch for heavy electric currents. 1,500,847; July 8.
Rand, James H., North Tonawanda, N. Y. Index. 1,500,718; July 8.
Rand, James H., North Tonawanda, N. Y. Card index. 1,500,719; July 8.
Rankin, William A., and L. E. Hardin, Chicago, Ill., assignors to Edison Electric Appliance Company, Inc. Turnover toaster. 1,500,848; July 8.
Ransome Machinery Company (1920) Limited. (See Ionides, Philip D., assignor.)
Rathbun, Fay F., Jamestown, N. Y. Variable electric plate condenser. 1,500,528; July 8.
Rawdon, Edward W., Akron, Ohio. Locomotive driving box. 1,500,720; July 8.
Readey, John M., St. Louis, Mo. Brake-handle mechanism. 1,500,766; July 8.
Reardon, Bernard S. (See Reardon, Daniel B. and B. S.)
Reardon, Daniel B., Council Bluffs, Iowa, assignor to B. S. Reardon, Sioux Falls, S. Dak. Road-surfacing machine. 1,500,529; July 8.
Redding, Stanley K., Bluffton, and O. V. Lantis, Markle, Ind. Buckle. 1,500,267; July 8.
Reed, Bessie E., Kansas City, Mo. Belt-fastening device. 1,500,153; July 8.
Reed, Frederic P., East Orange, N. J., assignor to Waterford Art Papers, Inc., Waterford, N. Y. Drying apparatus. 1,500,592; July 8.
Reeve, Bertram, Chatham, Ontario, Canada. Nonset automatic electrical stop for phonographs and other like instruments. 1,500,334; July 8.
Regan, Edward C., New Haven, Conn. Power-press guard. 1,500,960; July 8.
Reiber, Edwin H., West Webster, N. Y. Embossing machine. 1,500,961; July 8.
Reich, Harold A., assignor to R. Reich & Son, New York, N. Y. Cutting fur skins and product thereof. 1,500,468; July 8.
Reich, R., & Son. (See Reich, Harold A., assignor.)
Reimann, Otto, Pferdsdorf, Germany. Dyeing or impregnating the wood in living trees. 1,500,469; July 8.
Rekar, John J., Los Angeles, Calif. Electric lamp. 1,500,639; July 8.
Renner, Frank J., Madison, Wis. Radiografonola. 1,500,892; July 8.
Replogle, James B., Detroit, Mich., assignor to Delco-Light Company, Dayton, Ohio. Thermostat device. 1,500,268; July 8.
Republic Knitting Mills, Inc. (See Brantman, Maurice W., assignor.)
Rewerts, Charles, et al. (See Bradburn, Curtis E., assignor.)
Reynolds, Frank J., Rockville Center, Long Island, N. Y. Card-holding device. 1,500,269; July 8.
Reznik, Jacob C., Brooklyn, N. Y. Cretonne. Des. 65,139; July 8.
Rice, Louis W., New York, N. Y. Device for holding perforated game counters. 1,500,767; July 8.
Richard, Anthony H., Alexandria, La. Tie-rod tightener and puller for concrete forms. 1,500,204; July 8.
Richard, Charles D., New Brighton, assignor to Western Electric Company, Incorporated, New York, N. Y. Crossbar line switch. 1,500,593; July 8.
Richardson Company, The. (See Keller, Charles L., assignor.)
Richmond Lace Works. (See Radford, George, assignor.)
Richmond Lace Works. (See Seel, Hans, assignor.)
Rickett, S. S., et al. (See Robinson, James K., assignor.)
Riddle, Edward N., Co., The. (See Crowell, Frank S., assignor.)
Rike, Frederick F. (See Anderson, R. C., and Rike.)
Riley, Richard J., Jennings, Mo. Clothesline prop. 1,500,530; July 8.
Riley, Wayne L., Flushing, Mich. Key retainer. 1,500,335; July 8.
Ringler, William A., Philadelphia, Pa., assignor to Globe Wernicke Co., Cincinnati, Ohio. Ledger for machine posting. 1,500,768; July 8.
Ritchie, David A., Centralia, Ill. Automobile headlight attachment. 1,500,640; July 8.
Riverside and Dan River Cotton Mills, Inc. (See Chase, H. M., and Roberston, assignors.)
Roberts, John, Bowling Green, Ky. Radiator wrench. 1,500,893; July 8.
Roberts, Montague H., Englewood, N. J., assignor to Franklin Railway Supply Company. Power reverse gear. 1,500,685; July 8.
Robertson, C. C., et al. (See Robinson, James K., assignor.)
Robertson, George W. (See Chase, H. M., and Robertson.)
Robertson, George W., W. T. Hogg, Danville, Va., E. T. Garsed, Charlotte, N. C., and W. G. Benefield, deceased, by J. D. Harrison, administrator, Danville, Va. Warp-dyeing machine. 1,500,894; July 8.
Robinson, Albert P., Seattle, Wash. Fireplace damper. 1,500,154; July 8.
Robinson Hardware Company. (See Congable, Henry F., assignor.)
Robinson, James K., assignor of one-fourth to S. S. Rickett and one-fourth to C. C. Robertson, Jacksonville, Fla. Bushing remover. 1,500,422; July 8.
Rödel, Friedrich G. B., Lutzen, Germany. Ball bearing for screw gearing. 1,500,270; July 8.
Roe, William C., Pittsburgh, Pa. Phonographic attachment. 1,500,470; July 8.
Rogers, Carl L. (See Davies, F. A., and Rogers.)
Rogers, Cephas B., Danbury, Conn. Ceiling fixture for electric lights. Des. 65,140; July 8.
Rogers, Cephas B., Danbury, Conn. Electric-light bracket. Des. 65,141; July 8.
Rogers, John F., Cleveland Heights, P. H. Douglas, East Cleveland, and C. W. Benjamin, Lakewood, assignors to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Rolling-mill manipulator. 1,500,336; July 8.
Rohrbach, Adolf, Charlottenburg, Germany. Fitting for duralumin constructions. 1,500,595; July 8.
Romine, William M., and W. J. Clark, Wichita, Kans. Dental flask. 1,500,155; July 8.
Root, Chapman J. (See Miller, Edward, assignor.)
Rose, James R., Edgeworth, assignor to Carbo-Oxygen Company, Pittsburgh, Pa. Gaseous fuel and producing same. 1,500,594; July 8.
Rosener, Leland S., San Francisco, and F. I. Doane, Berkeley, assignors to The Paraffine Companies, Inc., San Francisco, Calif. Pipe-wrapping machine. 1,500,769; July 8.
Rosewarne, Richard E., Covington, Ky., assignor of one-half to E. F. Peters and W. Peters, Cincinnati, Ohio. Cutter head for cigarette machines. 1,500,721; July 8.
Ross, Chester H., administrator. (See Abraham, Clinton D.)
Ross, Thomas H., Brooklyn, assignor, by mesne assignments, to Arcas Brass and Iron Company, Inc., New York, N. Y. Can opener. 1,500,596; July 8.
Roth, Emil, Cleveland, Ohio, and E. P. Elzy, assignors to The Aetna Life Insurance Company, Hartford, Conn. Punch-press guard mechanism. 1,500,337; July 8.
Roth, Louis, assignor to Sterling Bronze Company, New York, N. Y. Handle. Des. 65,142; July 8.
Roush, Ralph R., Columbus, Ohio. Toothbrush. 1,500,722; July 8.
Rover, Richard H., Dansville, assignor to Power Specialty Company, New York, N. Y. Support for corrugated heating elements. 1,500,895; July 8.
Roy, Robert E., Santa Rosa, Calif. Tractor. 1,500,723; July 8.
Royal Typewriter Company. (See Dowd, Bernard J., assignor.)
Royal Typewriter Company. (See Myers, Lewis C., assignor.)
Ruberoid Company, The. (See Abraham, Herbert, assignor.)
Rudolph, Walter J., assignor to Imperial Brass Manufacturing Company, Chicago, Ill. Tire protector. 1,500,849; July 8.
Rumbaugh, Argyll L., Dillon, Mont. Weeder. 1,500,271; July 8.
Rush, Donald B., Villa Park, Ill., assignor to Robert W. Hunt Company. Grading machine for granular material. 1,500,850; July 8.
Ryan, John F., Huntington, W. Va. Changeable exhibitor. 1,500,896; July 8.
Ryan, Roger W., Oconomowoc, Wis., assignor to Carnation Milk Products Company, Seattle, Wash. Recovering lactose or milk sugar from milk or whey. 1,500,770; July 8.
Ryersen, Nils. (See Shackleton, A., and Ryersen.)
Ryerson, Crane, Inc. (See Crane, Frank R., jr., assignor.)
Ryman, Noal G., et al. (See Bolton, P. W., and Minnear, assignors.)
Ryon, Eppa H., Waltham, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft-detecting mechanism. 1,500,205; July 8.
Sabourin, Guy O., West Brighton, assignor to Chicago Pneumatic Tool Company, New York, N. Y. Electrical connecter. 1,500,641; July 8.
Saco-Lowell Shops. (See Curley, Robert S., assignor.)
Salavejus, Kazimer, et al. (See Ozerowicz, Alexander, assignor.)
Saldinger, Harry, Chelsea, Mass. Time and cost calculator. 1,500,642; July 8.
Sanborn, Robert G., and F. Haslam, assignors to E. A. Chase Granite Company, Northfield, Vt. Ornamenting stone. 1,500,272; July 8.
Sands, Edwin T. (See Birkin, C. W., and Sands.)
Sanford, Andrew J., assignor to A. H. Heisey & Co., Newark, Ohio. Bottle. Des. 65,143; July 8.
Sanford, Andrew J., assignor to A. H. Heisey & Co., Newark, Ohio. Bottle. Des. 65,144; July 8.
Sanitary Scale Company. (See Ludlow, George M., assignor.)
Sargeant, Leonard, Fairmont, W. Va. Tramroad. 1,500,724; July 8.
Sargent & Company. (See Voight, Henry G., assignor.)
Sargent, Howard R., Schenectady, N. Y., assignor to General Electric Company. Lighting fixture. 1,501,029; July 8.
Satern, John J., Rothsay, Minn. Belt-throwing device. 1,500,156; July 8.
Sattler, Herman J., sr., Quakertown, Pa. Let-off. 1,500,273; July 8.
Scalbom, Oscar L., Glenview, Ill. Cutter holder. 1,500,643; July 8.
Scalbom, Oscar L., Glenview, Ill. Cutter holder. 1,500,644; July 8.

Scarborough, George G., Girdletree, Md. Heating stove. 1,500,725; July 8.
Scarff, Frederick W., London, England. Gun mounting. 1,500,726; July 8.
Scarling, Nicholas D., Richmond, Va. Window cleaner. 1,500,274; July 8.
Schaefer, Bernhard, Cincinnati, Ohio. Smoker's stand. Des. 65,145; July 8.
Schelter, John C., Rochester, N. Y. Last. 1,500,471; July 8.
Scherner, John, Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Tire wrapping. 1,500,472; July 8.
Schick, Gottfried, Tampa, Kans. Fanning mill. 1,500,275; July 8.
Schlueter, Max L., Chicago, Ill. Floor-sanding machine. 1,500,771; July 8.
Schmidt, Ernest H., Cleveland Heights, assignor, by mesne assignments, to National Malleable and Steel Castings Company, Cleveland, Ohio. Coupler yoke. 1,500,157; July 8.
Schmoll, Frank, Clear Lake, Iowa. Lawn-mower sharpener. 1,500,898; July 8.
Schneible, Joseph, Chicago, Ill. Compounding vehicle or base. 1,500,276; July 8.
Schuermann, Anton C. (See Mueller, P., and Schuermann.)
Schuetz, Ben F. (See Spurrier, William W., assignor.)
Schumacher, James E., York, England. Steam-hydraulic and other fluid-pressure engine. 1,500,206; July 8.
Schwartz, Gerhardt F., St. Louis, Mo. Automatic cut-off for gas appliances. 1,500,772; July 8.
Schweinert, Maximilian C., New York, N. Y., and H. P. Kraft, Ridgewood, N. J. Quick-acting pump coupling. 1,500,531; July 8.
Schweinert, Maximilian C., New York, N. Y., and H. P. Kraft, Ridgewood, N. J. Quick-acting pump coupling. 1,500,645; July 8.
Scoles, Arthur W., Tulsa, Okla. Composition for removing paint and varnish. 1,500,899; July 8.
Scott, Carl F., Yonkers, N. Y., assignor to General Electric Company. System of motor control. 1,500,851; July 8.
Seaman, George. (See Ireland, Robert H., assignor.)
Security Engineers Incorporated. (See Sévigné, Henri A., assignor.)
Seel, Hans, Hopkinton, R. I., assignor to Richmond Lace Works, New York, N. Y. Lace. Des. 65,146; July 8.
Selbrede, William C., Billings, Mont. Rim tool. 1,500,900; July 8.
Selker, Harry, Cleveland, Ohio. Shock absorber. 1,500,277; July 8.
Senkel, Frederick W. A., Baltimore, Md. Soldering iron. 1,500,278; July 8.
Sennett, John H. (See Ellis, F. I., and Sennett.)
Sergardi, Fabio, East Orange, N. J., assignor to Willys Corporation, New York, N. Y. Motor vehicle. 1,500,646; July 8.
Severson, Thomas, deceased; J. W. Walker, Duluth, Minn., administrator. Bunghole spud. 1,500,158; July 8.
Sévigné, Henri A., Winthrop, assignor to Security Engineers Incorporated, Lowell, Mass. Locked adjustable device. 1,500,901; July 8.
Seward Trunk and Bag Company, The. (See McKenney, Charles D., assignor.)
Sewell, John W., Alton, Ill. Crank-shaft and connection-rod bearing. 1,500,902; July 8.
Shackleton, Alfred, and N. Ryersen, Chicago, Ill. Carburetor. 1,500,647; July 8.
Shalkop, Isaac C., Philadelphia, Pa., assignor to The De Luxe Brush Company, Wilmington, Del. Dispensing device. 1,500,159; July 8.
Shapiro & Aronson, Inc. (See Klein, Max, assignor.)
Shaw, John K., Minneapolis, assignor to C. F. Dahlberg, St. Paul, Minn. Fiber board having ornamental surfaces. 1,500,207; July 8.
Shaw, John K., Minneapolis, assignor to C. F. Dahlberg, St. Paul, Minn. Process of and apparatus for making fiber board. 1,500,208; July 8.
Shaw, John K., Minneapolis, Minn. Felting and recessing machine. 1,500,209; July 8.
Shelton, Claude A., Mount Airy, N. C. Tire adapted for vehicle wheels. 1,500,532; July 8.
Shephard, Clarence A., Bridgeport, Conn. Spark-plug cleaner. 1,500,852; July 8.
Sherman, E. P., et al. (See Clark, Sherman D., assignor.)
Sherman, John Q., Dayton, Ohio. Manifolding register. 1,500,728; July 8.
Sherman, John Q., and A. W. Metzner, Dayton, Ohio; said Metzner assignor to said Sherman. Flat-bed manifolding typewriter. 1,500,727; July 8.
Sherman, John Q., and A. W. Metzner, Dayton, Ohio; said Metzner assignor to said Sherman. Manifolding typewriter. 1,500,729; July 8.
Sherry, John C., Seattle, Wash. Handhole closure. 1,500,423; July 8.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt-buckle frame. Des. 65,147; July 8.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt slide. Des. 65,148; July 8.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt slide. Des. 65,149; July 8.
Shimizu, Tokuta, Los Angeles, Calif. Automobile fender. 1,500,730; July 8.
Shipley, Thomas, York, Pa. Method of and means for separating oil from the refrigerant in refrigerating systems. 1,500,279; July 8.
Shipley, Thomas, York, Pa. Means for separating oil from the refrigerant in refrigerating systems. 1,500,280; July 8.
Shipley, Thomas, York, Pa. Ice-can lifter. 1,500,903; July 8.
Shipley, Thomas, York, Pa. Ice-can lifter. 1,500,904; July 8.
Short, William I., Clayton, Mo. Piston. 1,500,853; July 8.
Shuman, Frederick W., South Bend, Ind. Seat. 1,500,338; July 8.
Simmons, Samuel. (See McElvar, C., and Simmons.)
Simonson, Leo B., New York, N. Y. Hair-drier-heater ignition device. 1,500,648; July 8.
Simonson, Leo B., New York, N. Y. Manicuring table. 1,500,649; July 8.
Skelly, Bernard H., Bridgeport, Conn. Traffic signal for automobiles. 1,500,210; July 8.
Sladek, Charles J., Chicago, Ill. Figure wheeled toy. 1,500,897; July 8.
Slezinsky, Frank L., Kingsville, Tex. Orchard heater. 1,500,962; July 8.
Small, Frank E., assignor to N. M. Small, Jamaica, Long Island, N. Y. Toothbrush shield attachment. 1,501,020; July 8.
Small, Nancy M. (See Small, Frank E., assignor.)
Smiley, Samuel, jr., assignor to The Globe-Wernicke Company, Cincinnati, Ohio. Loose-sheet binder. 1,500,339; July 8.
Smith, Amos H., Brooklyn, assignor to American Bank Note Company, New York, N. Y. Printing machine. 1,500,424; July 8.
Smith, Archie Y., Rocklyn, Wash. Roadside weed burner. 1,500,340; July 8.
Smith, Douglas B., San Francisco, Calif. Transmission refining band. 1,500,341; July 8.
Smith, Henry L., et al. (See Sundstrand, Oscar J., assignor.)
Smith, Henry L., Paterson, N. J. Vehicle bumper. 1,500,650; July 8.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,500,773; July 8.
Smith, Milton H., Detroit, Mich. Valve construction. 1,500,342; July 8.
Smith, Stella. (See Thurman, W., and Smith.)
Smith, William R., Buffalo, N. Y. Glass-making apparatus. 1,500,651; July 8.
Snodgrass, Leslie M., Milwaukee, Wis. Key-retaining device. 1,500,774; July 8.
Société Chimique des Usines du Rhône. (See Bouvier, M. E., and Blanc, assignors.)
Sonner, Carl, New York, assignor to P. Berdar, Queens, N. Y. Valve. 1,500,775; July 8.
Southard, Thomas W., Kansas City, Mo. Poultry feed trough. 1,500,343; July 8.
Southwick, William S., Clinton, assignor to Wickwire Spencer Steel Corporation, Worcester, Mass. Wire-filling cutter for wire-fabric looms. 1,500,652; July 8.
Speegle, William A., assignor of one-eighth to W. E. Wilson, Morganton, N. C. Combined drill and grinding machine. 1,500,963; July 8.
Speidel, Charles F., assignor to Eastman Kodak Company, Rochester, N. Y. View finder. 1,500,344; July 8.
Spiro, Walter J., White Plains, N. Y. Engine starter. 1,500,653; July 8.
Spiro, Walter J., White Plains, N. Y. Windshield cleaner. 1,500,654; July 8.
Sponseller, Niles A. (See Cosgrove, T., jr., and Sponseller.)
Spooner, Henry W., Brooklyn, N. Y. Conveyer system. 1,500,776; July 8.
Springfield Motor Sweeper Company, The. (See Greiner, C. F., and Aitken, assignors.)
Springstead, Franklin S., Rochester, N. Y. Shock absorber. 1,500,655; July 8.
Spurrier, William W., St. Louis, assignor of thirty-eight per cent to B. F. Schuetz, Jefferson City, Mo. Sliding lock. 1,500,345; July 8.
Stafford Company, The. (See Jackson, Simeon S., assignor.)
Standard Manufacturing Company. (See Wilmoth, Frank, assignor.)
Standard Thermometer Company. (See Adair, Thomas D., jr., assignor.)
Stanley Works, The. (See Parsons, Stuart W., assignor.)
Starks, Lyman O., Burlington, Iowa. Sacker. 1,500,964; July 8.
Starnes, Rufus E., Mount Holly, N. C. Nipper cam for whitin combers. 1,500,281; July 8.
Starr, Fred, Oakland, Calif. Child's occupant-propelled vehicle. 1,500,854; July 8.
Starrett, Henry F., assignor to Starrett Manufacturing Company, Chicago, Ill. Panel board and panel-box construction. 1,500,211; July 8.
Starrett Manufacturing Company. (See Starrett, Henry F., assignor.)
Statler, Arthur W., Denver, Colo. Brake-band lining. 1,500,212; July 8.

Stauffen, Frederick C., Baltimore, Md., assignor to Union Shipbuilding Company. Hauling-out system for scrapping vessels and apparatus for the same. 1,500,282; July 8.

Steinmetz Electric Motor Car Corporation. (See Stoppenbach, D. C., assignor.)

Sterling Bronze Company. (See Roth, Louis, assignor.)

Stevenson, Paul R., Columbus, Ohio. Permanent test and practice form. 1,500,777; July 8.

Stewart-Warner Speedometer Corporation. (See Wheeler, Leonard H., assignor.)

Stinson, Hugh S., Minneapolis, Minn. Carbonating apparatus. 1,500,283; July 8.

Stockfleth, John, Crockett, Calif. Concrete piling. 1,500,346; July 8.

Stolberg, Otto H., San Francisco, Calif. Permutation lock. 1,500,656; July 8.

Stolberg, Otto H., San Fmacisco, Calif. Permutation lock. 1,500,657; July 8.

Stoppenbach, Donald C., assignor to Steinmetz Electric Motor Car Corporation, New York, N. Y. Motor-vehicle construction. 1,500,160; July 8.

Stover, Paul A., Racine, Wis. Automobile signal lamp. Des. 65,150; July 8.

Streng, Frank S., Strattonville, Pa. Transmission gearing. 1,500,965; July 8.

Strmic, John M., Chicago, Ill. Feed gauge for printing presses. 1,500,658; July 8.

Strouse-Baer Company. (See Baer, Abram K., assignor.)

Struble, Jacob B. (See Page, S. H., and Struble.)

Stubbs, James W., Steubenville, Ohio. Bar-piling apparatus. 1,500,533; July 8.

Stubbs, William L., Norfolk, Va. Hoist for motor vehicles. 1,500,284; July 8.

Stubbers, Joseph, assignor to The Incandescent Light & Stove Company, Cincinnati, Ohio. Filling can. 1,500,347; July 8.

Sturgeon, Robert A. (See Gwynne, A. L., and Sturgeon.)

Suddard, Thomas W., assignor to The Hamilton Manufacturing Company, Two Rivers, Wis. Roller. 1,500,659; July 8.

Sullivan, Herbert W., London, England. Telegraph cable. 1,500,660; July 8.

Sullivan, Joseph M., Detroit, Mich. Valve. 1,500,686; July 8.

Sullivan Machinery Company. (See Allison, David S., assignor.)

Sullivan Machinery Company. (See Ball, Albert, assignor.)

Sullivan Machinery Company. (See Mercer, Henry H., assignor.)

Suloff, Noah H., et al. (See Evers, William H., assignor.)

Sumner, William C. (See Amsler, Stefan, assignor.)

Sundstrand, Oscar J., Rockford, assignor of one-half to H. L. Smith, Chicago, and one-half to E. G. Peterson, Rockford, Ill. Pneumatic lifting jack. 1,500,661; July 8.

Supinger, Etta E., Richmond, Va. Pneumatic loading and unloading apparatus. 1,500,966; July 8.

Sutton-Abramsen Engineering Company. (See Wise, George A., assignor.)

Swafford, Mortimer H. (See Wagoner, George H., assignor.)

Swift, Edwin H., Brooklyn, N. Y. Induction-tube furnace blast blower. 1,500,534; July 8.

Sykes, Gerald B., Cleckheaton, England. Sparking plug for internal-combustion engines. 1,500,161; July 8.

Tabulating Machine Company, The. (See Lake, Clair D., assignor.)

Tackabery, Claud M., assignor of one-half to J. W. Baker, Portland, Oreg. Fuel feed for furnaces. 1,500,348; July 8.

Taggart, Claude, Martinsville, Ill. Clover harvester. 1,500,535; July 8.

Tarwater, John G., Warrenton, N. C. Valve-operating means. 1,500,778; July 8.

Tate, Benjamin E. (See Miller, Fred. A., assignor.)

Tate, James E., Elberton, Ga. Boll-weevil destroyer. 1,500,162; July 8.

Tate, James E., Elberton, Ga. Skillet. 1,500,163; July 8.

Taubel, Edward C., Norristown, Pa. Knitted fabric. 1,500,164; July 8.

Taylor, Archie, Scotch Plains, N. J. Valve lifter. 1,500,536; July 8.

Taylor, Herbert B., Westfield, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Power-transmitting mechanism. 1,500,687; July 8.

Taylor, William A., Detroit, Mich. Fly-screen slide. 1,500,779; July 8.

Taylor, William O. (See Howie, K., and Taylor.)

Terkelsen, Andrew. (See Derry, Jasper, assignor.)

Terlizzi, Thomas D., Worcester, Mass. Folding bumper for automobiles. 1,500,285; July 8.

Terriault, Joseph A. O., Ottawa, Ontario, Canada. Water heater. 1,500,286; July 8.

Thew Shovel Company, The. (See Weber, Charles A., assignor.)

Thimmeway Titles, Inc. (See Hood, Harrison H., assignor.)

Thomas, Edgar, Jarrow-on-Tyne, England. Gas-mixing device. 1,500,905; July 8.

Thompson, Bert E., and T. A. Green, assignors to Metal Auto Parts Company, Indianapolis, Ind. Metal bending and shaping machine. 1,500,906; July 8.

Thompson, Nathaniel A., Kansas City, Kans. Waterproofing for cloth. 1,500,537; July 8.

Thomsen, Fred F., Omaha, Nebr. Direction signal for vehicles. 1,500,967; July 8.

Thomson, Edward H. (See Conover, Kenneth W., assignor.)

Thorens, Hermann, Sainte-Croix, Switzerland. Automatic lighter. 1,500,780; July 8.

Thorpe, Townsend, Wilmington, Del. Safety razor. 1,500,165; July 8.

Thurman, Wesley, and S. Smith, Virginia, Minn. Windshield attachment. 1,500,425; July 8.

Tin Decorating Company of Baltimore, The. (See Herman, Henry, assignor.)

Tisch, George C. L., assignor to Tisch Machine Die Works, Elizabeth, N. J. Pusher for knitting machines. 1,500,968; July 8.

Tisch Machine Die Works. (See Tisch, George C. L., assignor.)

Topham, Laurence E., Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Inseam-sewing machine. 1,500,688; July 8.

Torresson, Albert, Woodhaven, and C. H. Anderson, Pearl River, N. Y. Auxiliary furnace front. 1,500,473; July 8.

Tove, Riven, South Norwalk, Conn. Corset stay. 1,500,474; July 8.

Townsend, Sewell H., Bucklin, Mo. Combination pencil case and stylus. 1,500,426; July 8.

Trève, Maurice, Paris, France. Fastening for electric insulators. 1,500,689; July 8.

Tucker, Stephen C., assignor of one-third to G. W. Farmer, Atlanta, Ga. Clamp. 1,500,907; July 8.

Turner, Charles G., Atlanta, Ga. Oven and display device. 1,500,855; July 8.

Turner, Ernest J. (See Howard, B. H., and Turner.)

Turner, Francis E., Crescent City, Calif. Safety device for engine cranking. 1,500,781; July 8.

Tyson, Frederick S., Lock Haven, Pa. Fastener. 1,500,475; July 8.

Underwood Typewriter Company. (See Helmond, William F., assignor.)

Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)

Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)

Union Shipbuilding Company. (See Stauffen, Frederick C., assignor.)

Unit Player Action Co., The. (See Hulder, Joseph P., assignor.)

United Engineering and Foundry Company. (See Biggert, Florence C., jr., assignor.)

United Shoe Machinery Corporation. (See Ballard, Milton H., assignor.)

United Shoe Machinery Corporation. (See Cavanagh, James, assignor.)

United Shoe Machinery Corporation. (See Dyer, Newell V., assignor.)

United Shoe Machinery Corporation. (See Eppler, Andrew, assignor.)

United Shoe Machinery Corporation. (See Fowler, Alfred B., assignor.)

United Shoe Machinery Corporation. (See Pym, Charles F., assignor.)

United Shoe Machinery Corporation. (See Topham, Laurence E., assignor.)

United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)

United States Fastener Company. (See Holmes, George A., assignor.)

U. S. Tool Manufacturing Company. (See Pollak, James I., assignor.)

Universal Gypsum Company. (See Haggerty, Joseph F., assignor.)

Vacuum Groove Piston Ring Corporation. (See Pillar, Oscar, assignor.)

Valkenburgh, Johannes F., The Hague, Netherlands. Instrument for dividing and multiplying angles. 1,500,427; July 8.

Van Derson, Curtis A., Modesto, Calif. Valve. 1,500,908; July 8.

Vanderveld, Anthony, Grand Rapids, Mich. Antispinning device for cloth-measuring machines. 1,500,349; July 8.

Van Ranst, Cornelius W., Detroit, Mich. Valve-operating mechanism. 1,500,166; July 8.

Vansickle, Fred M., Lewiston, Idaho. Vehicle wheel. 1,500,350; July 8.

Vassar, F. E. (See Hollenbeck, Albert H., assignor.)

Veglard, Harry E., Rochester, N. Y. Sailing game. 1,500,782; July 8.

Venditti, Gaston, Paris, France. Thread-tacking machine. 1,500,969; July 8.

Venus Hat Co. (See Diamond, Henry, assignor.)

Vesely, Stanley J., Cedar Rapids, Iowa. Shock absorber. 1,500,351; July 8.

Vester, Alfred, Sons, Inc. (See McFadden, Glenn E., assignor.)

Victorsohn, Morris, Brooklyn, N. Y. Hand lever for motor resetters. 1,500,909; July 8.

Villiamo, Mark A., New Castle, Pa. Catchup-making machine. 1,500,690; July 8.

Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,500,662; July 8.

Vineyard, R. E. (See Glueck, Charles, assignor.)

Voight, Henry G., New Britain, assignor to Sargent & Company, New Haven, Conn. Lock. 1,500,167; July 8.

Voight, Henry G., assignor to Sargent & Company, New Haven, Conn. Lock. 1,500,168; July 8.

Vosburg, Alan E., and R. B. Whitney, Detroit, Mich., assignors to A. V. Hannifin, Chicago, Ill. Boring bar and the like. 1,500,691; July 8.

Vreeland, Frederick K., Montclair, N. J. Interference prevention in radioreception. 1,500,476; July 8.

Waddington, Donald H. (See Whitted, John B., assignor.)

Wagner, William F., assignor of thirty-five per cent to A. W. Pearsons, San Diego, Calif. Timer. 1,500,970; July 8.

Wagoner, George H., assignor of one-half to M. H. Swafford, Chicago, Ill. Scrubbing machine. 1,500,892; July 8.

Waldo, Algermont H., St. Paul, Minn. Rug. Des. 65,151; July 8.

Waldo, Algermont H., St. Paul, Minn. Rug. Des. 65,153; July 8.

Waldo, Algermont H., St. Paul, Minn. Rug. Des. July 8.

Wales, Ralph W., Auburndale, Mass. Storage battery. 1,500,287; July 8.

Walker, Charles I., Los Angeles, Calif. Door-locking mechanism. 1,500,169; July 8.

Walker, James, Nettleton, Pa. Coal-mining machine. 1,500,352; July 8.

Walker, James W., administrator. (See Severson, Thomas.)

Wallace, William, Oldham, England. Friction clutch. 1,500,971; July 8.

Walsh, Timothy D., Los Angeles, Calif. Vibrating screen. 1,500,856; July 8.

Walton, Thomas, London, England. Rotary lithographic printing machine. 1,500,430; July 8.

Ward, Montague W. (See Gannon, J. E., and Ward.)

Warncke, Henry E., Norwalk, assignor to Fairfield Battery Company, South Norwalk, Conn. Dry battery. 1,500,477; July 8.

Wasia, Martha J., and L. L. Carr, Dickens, Nebr. Hand bag. Des. 65,154; July 8.

Wasson, Robert B., Cranford, N. J. Piston-ring joint. 1,500,693; July 8.

Waterford Art Papers, Inc. (See Reed, Frederic P., assignor.)

Waterloo Saddlery Company. (See Grings, Casper H., assignor.)

Wathey, Arthur, Cleveland, Ohio. Stoker cylinder. 1,500,972; July 8.

Wearham, Gordon A., London, England. Means for releasably suspending a mass and for like purposes. 1,500,973; July 8.

Weaver, Ira A., assignor to Weaver Manufacturing Company, Springfield, Ill. Anvil block. 1,500,213; July 8.

Weaver Manufacturing Company. (See Weaver, Ira A., assignor.)

Weber, Charles A., assignor to The Thew Shovel Company, Lorain, Ohio. Crane mechanism. 1,500,783; July 8.

Weber, Jacob, New York, N. Y. Window. 1,500,288; July 8.

Weber, Josef, Essen, Germany. Process for the production of an alkali-metal sulphate and hydrochloric acid. 1,500,289; July 8.

Webster, Fred L., Adams, N. Y. Machine for drying fruit and vegetables. 1,500,974; July 8.

Weitling, William W., College Point, N. Y. Centrifugal casting. 1,500,428; July 8.

Wellman-Seaver Morgan Company. (See Rogers, J. F., Douglas, and Benjamin, assignors.)

Werner, Walter, assignor to The Noble & Wood Machine Co., Hoosick Falls, N. Y. Paper-making machinery. 1,500,170; July 8.

Wasson, Clyde A., Atlanta, Ga. Vehicle direction indicator. 1,500,910; July 8.

West, Lewis S., Rochester, N. Y. Refrigerator-car construction. 1,500,171; July 8.

West Virginia Pulp and Paper Company. (See Drewsen, Viggo, assignor.)

Westberg, Gustavus E. (See Chadwick, W. E., and Creighton, assignors.)

Western Electric Company. (See Richard, Charles D., assignor.)

Western Electric Company, incorporated. (See Taylor, Herbert B., assignor.)

Weyerhaeuser Forest Products. (See Knowlton, Harry N., assignor.)

Wheeler, Leonard H., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Visible-flow fuel-feeding device for automobile engines. 1,500,429; July 8.

Whidden, Austin C., Los Angeles, Calif. Variable fluid-supplying device. 1,500,694; July 8.

Whipple, Raymond T., San Francisco, Calif. Automatic brake-rod take-up. 1,500,695; July 8.

Whitaker, Henry H., Titusville, Fla. Railway-rail construction. 1,500,911; July 8.

White, Alfred B., et al., administrators. (See Preston, Albert F.)

White, Harry F., Denver, Colo. Foot warmer. 1,500,696; July 8.

White, Henry H., Muskogee, Okla. Power-delivering attachment for motor vehicles. 1,500,172; July 8.

Whitney, Robert B. (See Vosburg, A. E., and Whitney.)

Whitted, John B., Roland Park, Baltimore, assignor of twenty-four and eight-tenths per cent to J. H. Miller and twenty-four and eight-tenths per cent to D. H. Waddington, Baltimore, Md. Vacuum-operated mechanism. 1,500,975; July 8.

Wiborg, Abner H., Buffalo, N. Y. Pump. 1,500,290; July 8.

Wickwire Spencer Steel Corporation. (See Southwick, William S., assignor.)

Widger, Frank V., Chicago, Ill. Reversing gearing. 1,500,697; July 8.

Wiehl, Alfred, Brooklyn, N. Y. Phonograph record and making the same. 1,500,698; July 8.

Wiese, Emil A., West Hoboken, and O. A. Wiese, Union Hill, N. J. Theft-alarm carrier. 1,500,976; July 8.

Wiese, Oscar A. (See Wiese, Emil A. and O. A.)

Wigzell, Hubert, Marathon, Tex. Float valve. 1,500,784; July 8.

Wildman Mfg. Co. (See Howie, K., and Taylor, assignors.)

Wiley, Samuel, Metuchen, N. J. Projector. 1,500,214; July 8.

Willard, Theodore A., Cleveland Heights, Ohio. Separator. 1,500,353; July 8.

Williams, Lewis G., Godrergraig, Wales. Lamp for vehicle headlights and the like. 1,500,912; July 8.

Williams, Lloyd M., and P. J. Williams, San Francisco, Calif. Accelerator. 1,500,354; July 8.

Williams, Percy J. (See Williams, Lloyd M. and P. J.)

Williams, William E., assignor to American Steel Foundries, Chicago, Ill. Wheel rim. 1,500,291; July 8.

Williams, William E., assignor to American Steel Foundries, Chicago, Ill. Metal rim and disk wheel. 1,500,292; July 8.

Willis, Sherman, Portsmouth, Ohio, assignor, by mesne assignments, to P. R. Glass Company, Boston, Mass. French-binding-folding machine. 1,500,215; July 8.

Willys Corporation. (See Sergardi, Fabio, assignor.)

Wilmoth, Frank, Midlothian, assignor, by mesne assignments, to Standard Manufacturing Company, Dallas, Tex. Boll-weevil catcher. 1,500,538; July 8.

Wilson, Walter E. (See Speegle, William A., assignor.)

Winans, Henry E., Alton, Ill. Firearm. 1,500,293; July 8.

Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Truck. 1,500,173; July 8.

Wise, George A., assignor to Sutton-Abramsen Engineering Company, Pittsburgh, Pa. Bar-straightening machine. 1,500,174; July 8.

Witty, George, New York, assignor of one-half to F. I. Powers, Brooklyn, N. Y. Strong or safety box. 1,500,977; July 8.

Witwer, Andrew S., Joliet, Ill. Separable fastener. 1,500,699; July 8.

Wolf, Albert, Berlin, Germany. Fire-extinguishing device. 1,500,431; July 8.

Womack, Samuel W., Quanah, Tex. Cooler and humidifier. 1,500,978; July 8.

Wood, Ernest, Yorkton, Saskatchewan, Canada. Water gauge. 1,500,294; July 8.

Woodruff, Robert L., Winder, Ga. Insect-destroying machine. 1,500,857; July 8.

Wood Shovel and Tool Company, The. (See Brandenburg, Francis C., assignor.)

Woods, Charles S., Indianapolis, Ind. Stretcher. 1,500,858; July 8.

Woods, S. A., Machine Company. (See Osteman, Carl G., assignor.)

Wright, Charles V., Tamaqua, Pa. Lifting jack. 1,500,859; July 8.

Wyner, Felix, New York, N. Y., assignor to Phenix Cheese Company. Folding mechanism for packaging machine. 1,500,478; July 8.

Yeager, Roy V., Des Moines, Iowa. Force-feed lubricating device. 1,500,355; July 8.

Yo, Seigo, Tokyo, Japan, assignor to General Electric Company. Electric control system. 1,500,860; July 8.

Young, Charles, New York, N. Y. Combined display and shipping container. 1,501,016; July 8.

Young, J. L., et al. (See Larson, Christian H., assignor.)

Zacharias, Frederick, and E. Manheimer, New York, N. Y. Means for supporting the upper stories of a building. 1,500,216; July 8.

Zbinden, Eugen, Winterthur, Switzerland, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Cylinder and head construction. 1,500,861; July 8.

Zeigler, Alfred A. (See Kallenbach, W. H., and Bertsch, assignors.)

Zeman, Edward, Woodside, N. Y. Switch lock. 1,500,479; July 8.

Zeumer, Arthur G., Markranstadt, Germany. Machine for removing bristles from skins or hides. 1,500,356; July 8.

Zichman, August, New York, N. Y. Spring fork for motor cycles and the like. 1,500,480; July 8.

Zilk, Roy D. (See Enax, O., and Zilk.)

Zophy, Clement, West Allis, Wis. Cement-block machine. 1,500,295; July 8.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 8TH DAY OF JULY, 1924.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accelerator. L. M. and P. J. Williams. 1,500,354; July 8.
Adding machine. T. E. Cherry. 1,500,606; July 8.
Address-plate holder. C. Chisholm. 1,500,438; July 8.
Advertising device. J. A. Murnin. 1,500,884; July 8.
Aerial standard. D. Paske. 1,500,841; July 8.
Aeroplane. G. and U. Antoni. 1,500,358; July 8.
Air, Apparatus for conditioning. C. B. Ingersoll. 1,500,624; July 8.
Aircraft, Brake for. R. Ellsdorf. 1,500,184; July 8.
Aircraft-wing construction. J. P. Glasby, jr. 1,500,810; July 8.
Air lifts, Control system for. W. H. Elbelt and C. H. Brooks. 1,500,703; July 8.
Airplane-wing spar. V. E. Clark. 1,500,235; June 8.
Alarm: *See*—
Fire alarm.
Album, Loose-leaf. J. M. Alter. 1,500,098; July 8.
Alkali-metal sulphate and hydrochloric acid, Production of an. J. Weber. 1,500,289; July 8.
Alloys, Manufacture of lead. W. and H. Mathesius. 1,500,954; July 8.
Aluminum chloride, Distillation with. A. M. McAfee. 1,501,014; July 8.
Amusement apparatus. H. S. Anderson. 1,500,788; July 8.
Anæsthetizing apparatus. J. A. Heidbrink. 1,500,614–15; July 8.
Anchor, Rail. C. Blake. 1,500,224; July 8.
Angles, Instrument for dividing and multiplying. J. F. Valkenburgh. 1,500,427; July 8.
Animal cover. W. E. Hamlin. 1,500,316; July 8.
Animal trap. W. Preston. 1,500,332; July 8.
Annealing leer. H. L. Dixon. 1,500,609; July 8.
Antitoxins, Producing. R. Deutschmann and W. Kotzenberg. 1,500,985; July 8.
Anvil. C. M. Curry. 1,500,926; July 8.
Anvil block. I. A. Weaver. 1,500,213; July 8.
Armature and coil winding machine. P. E. Chapman. 1,500,181; July 8.
Armrest. W. E. Phillips. 1,500,524; July 8.
Article carrier and display device. J. Brockley. 1,500,544; July 8.
Auto wheel. W. Popendick. 1,500,716; July 8.
Automobile accessory. J. Medley. 1,501,015; July 8.
Automobile air wheel. J. Hayes. 1,500,317; July 8.
Automobile camping top, Automatic adjustable. L. B. Cassell. 1,500,573; July 8.
Automobile direction signal. W. M. Collins. 1,500,440; July 8.
Automobile engines, Visible-flow fuel-feeding device for. L. H. Wheeler. 1,400,429; July 8.
Automobile fender. T. Shimizu. 1,500,730; July 8.
Automobile lock. H. Mayer. 1,500,836; July 8.
Automobile pedal. S. I. Fekete and S. G. Baits. 1,500,305; July 8.
Automobile signal. W. Mehlhaf. 1,500,144; July 8.
Automobile signal lamp. P. A. Stover. Des. 65,150; July 8.
Automobile stand. J. Miller. 1,500,680; July 8.
Automobile traffic signal. O. Enax and R. D. Zilk. 1,500,489; July 8.
Automobile traffic signal. B. H. Skelly. 1,500,210; July 8.
Automobile wheels, Attachment for. P. O. Melton and M. C. Lasell. 1,500,409; July 8.
Automobiles, Antiglare device for. E. B. Howell. 1,500,563; July 8.
Automobiles, Folding bumper for. T. D. Terlizzi. 1,500,285; July 8.
Automobiles, Gear-shift lock for. A. R. Long. 1,500,948; July 8.
Automobiles, Theft detector for. J. J. Michalski. 1,500,635; July 8.
Axle. W. M. Britton. 1,500,436; July 8.
Balance machine. H. Heymann. 1,500,454; July 8.
Ball. A. J. Eldon. Des. 65,111; July 8.
Ball-bearing head. F. S. Morton. 1,500,516; July 8.
Balls, Machine for cleaning. B. R. Mudra. 1,500,684; July 8.
Bank. P. A. Holmes. 1,500,929; July 8.
Banner, Convention. D. W. Chandler, jr. Des. 65,100; July 8.
Bar-piling apparatus. J. W. Stubbs. 1,500,533; July 8.
Barrel construction. R. J. Bell. 1,500,917; July 8.
Bar-straightening machine. G. A. Wise. 1,500,174; July 8.

Basin, Ear. F. A. Davies and C. L. Rogers. 1,500,927; July 8.
Bathtub. H. Gorman. 1,500,557; July 8.
Bathtub legs, Fastener for. E. A. Hibler and L. Brown. 1,500,131; July 8.
Battery: *See*—
Dry battery. Storage battery.
Battery boxes, Carrier for miners'. C. McElvar and S. Simmons. 1,500,510; July 8.
Battery posts and threads, Method and means for replacing. J. C. Ball. 1,500,605; July 8.
Bearing. C. G. Osteman. 1,500,523; July 8.
Bearing, Antifriction. J. F. O'Connor. 1,500,149; July 8.
Bearing, Antifriction side. J. F. O'Connor. 1,500,145; July 8.
Bearing for the guidance and lateral support of gas holders. R. W. Broadhead. 1,500,796; July 8.
Bed, Automobile. F. W. Horton. 1,500,872; July 8.
Bed construction. A. Mestas. 1,500,956; July 8.
Belt-fastening device. B. E. Reed. 1,500,153; July 8.
Belt-shifting mechanism. R. R. Cummins and R. W. Kremer. 1,500,238; July 8.
Belt slide. M. Mabon. Des. 65,128; July 8.
Belt slide. L. W. Shields. Des. 65,148–9; July 8.
Belt-throwing device. J. J. Satern. 1,500,156; July 8.
Bench: *See*—
Shoe-polishing bench.
Bias strips, Method and apparatus for cutting. M. A. Marquette. 1,500,632; July 8.
Binder, Loose-leaf. A. J. Lloyd and G. A. Olsen. 1,500,630; July 8.
Binder, Loose-leaf. G. A. Olsen. 1,500,682; July 8.
Binder, Loose-sheet. S. Smiley, jr. 1,500,339; July 8.
Binding-folding machine, French-. S. Willis. 1,500,215; July 8.
Bleaching fibrous material. V. Drewsen. 1,500,378; July 8.
Block: *See*—
Anvil block. Building block.
Board: *See*—
Ironing board. Plaster wall board.
Boiler: *See*—
Egg boiler. Steam boiler.
Boiler baffle and constructing same. J. H. Hinman. 1,500,815; July 8.
Boll-weevil catcher. F. Wilmoth. 1,500,538; July 8.
Boll-weevil destroyer. J. E. Tate. 1,500,162; July 8.
Boring bar and the like. A. E. Vosburg and R. B. Whitney. 1,500,691; July 8.
Boring machine, Gang. O. F. Carpenter. 1,500,231; July 8.
Bottle. A. J. Sanford. Des. 65,143–4; July 8.
Bottle attachment, Milk-. F. Mangner. 1,500,251; July 8.
Bottle filling and sealing machine. A. Calleson. 1,500,364; July 8.
Bottles, Making short-neck. H. O. Brawner. 1,500,484; July 8.
Bowl or similar article. W. Geib. Des. 65,113; July 8.
Box: *See*—
Dynamite box. Strong or safety box.
Locomotive driving box.
Box-hinging machine. H. Hermani. 1,500,617; July 8.
Bracket: *See*—
Lamp bracket.
Brake: *See*—
Hand brake.
Brake. W. J. Quinn. 1,500,717; July 8.
Brake and transmission band. A. J. Kirn. 1,500,396; July 8.
Brake-band lining. A. W. Statler. 1,500,212; July 8.
Brake-handle mechanism. J. M. Readey. 1,500,766; July 8.
Brake-rod take-up, Automatic. R. T. Whipple. 1,500,695; July 8.
Bread making. L. E. Buffington. 1,500,545; July 8.
Bread-slicing machine. H. E. Bjorlin. 1,500,434; July 8.
Brick, Checker. J. Hogbin and W. Lehman. 1,500,455; July 8.
Brick kilns, Collapsible arch form for. G. E. Luce. 1,500,949; July 8.
Brine for electrolysis, Purifying. H. H. Hanson, J. T. Leecock, and C. A. Blodgett. 1,500,126; July 8.
Bristles from skins or hides, Machine for removing. A. G. Zeumer. 1,500,356; July 8.

Broom, Garden. H. F. Congable. 1,500,441; July 8.
Brush, Chimney. T. Nelson. 1,500,886; July 8.
Buckle. S. D. Clark. 1,500,439; July 8.
Buckle. S. K. Redding and O. V. Lantis. 1,500,267; July 8.
Buckle, Belt. S. Buchsbaum. 1,500,362; July 8.
Buckle frame, Belt-. L. W. Shields. Des. 65,147; July 8.
Buckle frame, Belt-. M. Mabon. Des. 65,126–7; July 8.
Buckle frame, Belt-. W. Dieterich. Des. 65,110; July 8.
Buckle for cotton bales. H. M. Patrick. 1,500,684; July 8.
Buckle, Three-piece. S. Buchsbaum. 1,500,363; July 8.
Building block. J. Fuhrmann. 1,500,808; July 8.
Building, Means for supporting the upper stories of. F. Zacharias and E. Manheimer. 1,500,216; July 8.
Bumper mounting. R. B. Fageol. 1,500,380; July 8.
Bundling table. T. J. Maloney. 1,500,835; July 8.
Burner: *See*—
Fluid-fuel burner. Oil burner.
Gas burner. Weed burner.
Liquid-fuel burner.
Burner control, Suction. J. H. Hunt. 1,500,321; July 8.
Bushing remover. J. K. Robinson. 1,500,422; July 8.
Cabinet, Collapsible clothes. J. H. Hyams. 1,500,677; July 8.
Casting machine, Centrifugal. W. T. Janney. 1,500,707–8; July 8.
Calendar, Perpetual. D. R. Adams. 1,500,913; July 8.
Calendar. T. Midgley. 1,500,679; July 8.
Cam for Whitin combers, Nipper. R. E. Starnes. 1,500,281; July 8.
Camera bellows. C. E. Hutchings. 1,500,391; July 8.
Cannon, Infantry. T. Lafitte. 1,500,711; July 8.
Can: *See*—
Filling can. Oil can.
Can opener. T. H. Ross. 1,500,596; July 8.
Cap or crown puller. H. B. Moriarty. 1,500,881–2; July 8.
Car-journal-polishing device. E. C. Morrison. 1,500,198; July 8.
Car, Railway. C. J. Ellis. 1,500,118; July 8.
Car-unloading device. F. W. Cowie. 1,500,673; July 8.
Car-vestibule diaphragm. H. U. Morton. 1,500,591; July 8.
Cars, Brake rigging for railway. H. E. Anderson. 1,500,217; July 8.
Cars, Draft attachment for railway. G. B. Dorey. 1,500,578; July 8.
Cars, Resilient connecter for mine. J. F. O'Connor. 1,500,151; July 8.
Carbonating apparatus. H. S. Stinson. 1,500,283; July 8.
Carburetor. A. Shackleton and N. Ryersen. 1,500,647; July 8.
Card-holding device. F. J. Reynolds. 1,500,269; July 8.
Carrier: *See*—
Egg carrier. Theft-alarm carrier.
Casing elevator. G. Krell. 1,500,459; July 8.
Casket, Burial. M. J. MacDonald. 1,500,146; July 8.
Caster, Adjustable. C. R. Nalle. 1,500,465; July 8.
Caster socket. W. H. Noelting. 1,500,840; July 8.
Casting, Centrifugal. W. W. Weltling. 1,500,428; July 8.
Catalyst. M. E. Bouvier and E. Blanc. 1,500,794; July 8.
Catchup-making machine. M. A. Villiamo. 1,500,690; July 8.
Cellulose-ether composition. S. J. Carroll. 1,500,366; July 8.
Cement-block machine. C. Zophy. 1,500,295; July 8.
Centrifugal spinneret. J. P. Hooper. 1,500,931; July 8.
Chair and baby crib, Combination. L. B. Henry. 1,500,318; July 8.
Chain fastener. P. Jolin. 1,500,875; July 8.
Chandelier. M. Klein. Des. 65,122; July 8.
Change-making device. A. Papoulias. 1,500,262; July 8.
Character-holding device. H. H. Hood. 1,500,561; July 8.
Check-notching device. W. H. McFall. 1,500,950; July 8.
Cheese cutter. W. Bilodeau. 1,500,179; July 8.
Christmas tree, Artificial. W. Dieperink-Langereis. Des. 65,109; July 8.
Churn dasher. J. W. Lancaster. 1,500,326; July 8.
Cigar moistener. A. C. Herthel. 1,500,704; July 8.
Cigarette holder. C. A. Chantillis. 1,500,802; July 8.
Cigarette machines, Cutter head for. R. E. Rosewarne. 1,500,721; July 8.
Clamp: *See*—
Guy-line clamp.
Clamp. J. H. Bramhorst. 1,500,795; July 8.
Clamp. S. C. Tucker. 1,500,907; July 8.
Cleaner: *See*—
Spark-plug cleaner. Windshield cleaner.
Window cleaner.
Clock dial, Time-. H. B. Blanké. 1,500,701; July 8.
Cloth-measuring machines, Antispinning device for. A. Vanderveld. 1,500,349; July 8.
Clothesline prop. R. J. Riley. 1,500,530; July 8.
Clutch, Friction. W. Wallace. 1,500,971; July 8.
Coal-mining machine. J. Walker. 1,500,352; July 8.
Coal, Treating. T. Nagel. 1,500,256; July 8.
Coil system. R. H. Langley. 1,500,827; July 8.
Coin-controlled apparatus. J. N. Burno. 1,500,230; July 8.
Coin-controlled apparatus. M. O. S. Madsen. 1,500,462; July 8.
Coke-oven interlocking and signaling mechanism. F. K. Porter. 1,500,526; July 8.
Combination shovel. C. E. Hummelgard. 1,500,132; July 8.
Compass, Beam. H. J. Hurd. 1,500,623; July 8.
Concentrator. A. H. Hollenbeck. 1,500,192; July 8.
Concrete building construction. W. J. Dvorak. 1,500,445; July 8.
Concrete-building form. P. J. Hueber. 1,500,564; July 8.
Concrete construction, Metal falsework for. D. J. G. Fontaine. 1,500,121; July 8.
Concrete piling. J. Stockfleth. 1,500,346; July 8.
Concrete-roofing-tile machine. E. R. Jahna. 1,500,497; July 8.
Concrete walls, Apparatus for forming hollow. W. A. Otterson. 1,500,683; July 8.
Condenser, Variable electric plate. F. F. Rathbun. 1,500,528; July 8.
Connecting joint. W. T. Barnhill. 1,500,569; July 8.
Connecting rod. G. T. Morris. 1,500,515; July 8.
Container. B. F. Cummings. 1,500,301; July 8.
Conveyer system. H. W. Spooner. 1,500,776; July 8.
Cooler: *See*—
Milk cooler.
Cooling and humidifier. S. W. Womack. 1,500,978; July 8.
Cooling and dispensing device. F. L. Look. Des. 65,124; July 8.
Coop. S. S. Barker. 1,500,792; July 8.
Cord fabric, Manufacture of. M. Castricum. 1,500,232; July 8.
Corn-husking machine. E. S. Blauser. 1,500,542; July 8.
Corset. H. A. Colley. 1,500,109; July 8.
Corset stay. R. Tove. 1,500,474; July 8.

Sole-punching machine. J. E. Perrault. 1,500,263; July 8.
Spark plug. W. L. Barron. 1,500,916; July 8.
Spark-plug cleaner. C. A. Shephard. 1,500,852; July 8.
Spark plug, Double-insulated. A. J. Champion. 1,500,021; July 8.
Speculum and dilator. J. T. Breneman. 1,500,227; July 8.
Speed-regulated motor. G. R. Kunkle. 1,500,826; July 8.
Sphygmomanometer. L. H. Levy. 1,500,629; July 8.
Spindle stop-motion attachment for spinning machine. E. C. Cushman. 1,500,982; July 8.
Spinneret. J. P. Hooper. 1,500,934; July 8.
Spinning machines, Thread guide for. O. O'Sullivan. 1,500,258; July 8.
Spoon or similar article. T. B. Lashar. Des. 65,123; July 8.
Spout lock. O. L. Neander. 1,500,520; July 8.
Spout, Pouring. J. A. McGhee. 1,500,951; July 8.
Spring pin. F. W. Burpee. 1,500,667; July 8.
Spring roller. E. Haysiett. 1,500,585; July 8.
Spud, Bunghole. T. Severson. 1,500,158; July 8.
Stand: *See*—
Automobile stand.
Steam boiler. G. Cook. 1,500,182; July 8.

Stepladder. W. R. Quehl. 1,500,891; July 8.
Stepladder, Knockdown. G. F. Hotopp. 1,500,937; July 8.
Stoker cylinder. A. Wathey. 1,500,972; July 8.
Stoneworking machine. A. Ball. 1,500,597; July 8.
Stoneworking machine. H. H. Mercer. 1,500,598; July 8.
Stool. C. M. Larsen. 1,501,005; July 8.
Storage battery. V. C. Goodridge. 1,500,448; July 8.
Storage battery. R. W. Wales. 1,500,287; July 8.
Storage-battery grid. R. C. Benner. 1,500,219; July 8.
Storage cell or battery. R. C. Benner and H. F. French. 1,500,222; July 8.
Storage cell or battery and electrode therefor. R. C. Benner. 1,500,221; July 8.
Stove, Cooking. F. A. Pettersson. 1,500,843; July 8.
Stove, Heating. G. G. Scarborough. 1,500,725; July 8.
Stove or furnace pipes, Heating attachment for. H. Müller. 1,500,838; July 8.
Stove top. I. L. Frankem. 1,500,866; July 8.
Stretcher. C. S. Woods. 1,500,858; July 8.
String fastener. W. Klamroth. 1,500,134; July 8.
Strong or safety box. G. Witty. 1,500,977; July 8.
Submarine construction. S. L. G. Knox. 1,500,997; July 8.
Submarine mine and sinker. A. L. Gwynne and R. A. Sturgeon. 1,500,812; July 8.
Submarine sound transmitter. J. H. Hammond, jr. 1,500,243; July 8.
Suspending a mass and for like purposes, Means for releasably. G. A. Wearham. 1,500,973; July 8.
Sweeper, Street. C. F. Greiner and A. W. Aitken. 1,500,558; July 8.
Swimmer's foot aid. A. B. Johnson. 1,500,942; July 8.
Switch: *See*—
Crossbar line switch. Electromagnetic switch.
Electric switch.
Switch-lock. E. Zeman. 1,500,479; July 8.
Table: *See*—
Bundling table. Manicuring table.
Tabulating machines. Hammer control for. C. D. Lake. 1,501,004; July 8.
Tachometer drive. W. G. Eager. 1,500,579; July 8.
Talking-machine repeater. W. H. Huth. 1,500,495; July 8.
Talking machines or machines in timed relation to a cinematographic machine, Apparatus for controlling the operation of. F. E. Mosley. 1,500,254; July 8.
Target, Illuminated. W. J. Barrett. 1,500,482; July 8.
Teapot. A. Gramlich. Des. 65,116; July 8.
Telegraph cable. H. W. Sullivan. 1,500,660; July 8.
Telegraph translator and circuits therefor. A. D. Cardwell. 1,500,486; July 8.
Telephonic receiver. R. H. Marriott. 1,500,331; July 8.
Temperature-controlling means for motors. S. H. Page and J. B. Struble. 1,500,418; July 8.
Temperature controlling system. J. E. Gannin and M. W. Ward. 1,500,382; July 8.
Tennis ball and manufacturing the same. T. W. Miller. 1,501,009; July 8.
Tension ring. C. A. Henley. 1,500,616; July 8.
Test and practice form, Permanent. P. R. Stevenson. 1,500,777; July 8.
Theatrical device. L. Levy. 1,500,507; July 8.
Theft-alarm carrier. E. A. and O. A. Wiese. 1,500,976; July 8.
Thermostat. L. P. Hynes. 1,500,566; July 8.
Thermostat. A. J. Otto. 1,500,259; July 8.
Thermostat. A. J. and C. A. Otto. 1,500,260; July 8.
Thermostat device. J. B. Replogle. 1,500,268; July 8.
Thimble. G. F. Lenk. 1,500,504; July 8.
Thread-forming apparatus. J. P. Hooper. 1,500,933; July 8.
Thread guide. H. N. Lessard. 1,500,947; July 8.
Thread-tacking machine. G. Venditti. 1,500,969; July 8.
Threads, Apparatus for forming and twisting. J. P. Hooper. 1,500,930; July 8.
Threads, Apparatus for producing. J. P. Hooper. 1,500,932; July 8.
Threads with animal fibers, Production of effect. F. Münz. 1,500,255; July 8.
Throttle device, Transportable. J. C. Carlton. 1,500,365; July 8.
Tie: *See*—
Railway tie.
Tie-rod tightener and puller for concrete forms. A. H. Richard. 1,500,204; July 8.
Tightener for clothesslines. C. S. Cudmore. 1,500,549; July 8.
Time and cost calculator. H. Saldinger. 1,500,642; July 8.
Timer. A. W. Kaufman. 1,500,821; July 8.
Timer. W. F. Wagner. 1,500,970; July 8.
Tire adapter for vehicle wheels. C. A. Shelton. 1,500,532; July 8.
Tire and tool case, Automobile. C. R. Ishburn. 1,500,874; July 8.
Tire carrier and rim remover. T. Cosgrove, jr., and N. A. Sponseller. 1,500,371; July 8.
Tire protector. W. J. Rudolph. 1,500,849; July 8.
Tire rack. C. H. Larson. 1,400,460; July 8.
Tire, Sectional cushion. A. A. Glidden. 1,500,307; July 8.
Tire wrapping. J. Scherner. 1,500,472; July 8.
Tires, Making rubber. W. H. Allen. 1,500,786; July 8.
Toaster, Turnover. W. A. Rankin and L. E. Hardin. 1,500,848; July 8.
Tool. N. C. Hall. 1,500,315; July 8.
Toothbrush. J. Merkel, jr. 1,500,410; July 8.
Toothbrush. R. R. Roush. 1,500,722; July 8.
Toothbrush shield attachment. F. E. Small. 1,501,020; July 8.
Torpedoes, Depth mechanism for automobile. W. Dieter. 1,500,114; July 8.
Toy. C. Hinson. 1,500,869; July 8.
Toy. A. Ozerowicz. 1,500,201; July 8.
Toy, Figure. L. Marx. 1,500,590; July 8.
Toy, Figure wheeled. C. J. Sladek. 1,500,897; July 8.
Track fastening. C. E. Price. 1,500,203; July 8.
Traction grip. A. McCracken and W. V. Monroe. 1,500,249; July 8.
Tractor. A. C. Mason. 1,501,025; July 8.
Tractor. R. E. Roy. 1,500,723; July 8.
Tractor and cotton-picking machine, Combined. B. Johnson. 1,500,324; July 8.
Tramroad. L. Sargeant. 1,500,724; July 8.
Transformer-cooling means. R. V. Bingay. 1,500,793; July 8.
Transformers, Cooling apparatus for. L. G. McClintock. 1,500,764; July 8.
Transmission relining band. D. B. Smith. 1,500,341; July 8.
Transmission system, Multiplex. L. Espenschied. 1,500,552; July 8.
Trap: *See*—
Animal trap. Insect trap.
Trap. H. Pierini. 1,500,525; July 8.
Tray manufacture. W. E. Hall. 1,500,125; July 8.
Trees, Dyeing or impregnating the wood in living. O. Reimann. 1,500,469; July 8.
Trough, Poultry feed. T. W. Southard. 1,500,343; July 8.
Trousers. B. J. Bodnar. 1,500,570; July 8.
Trousers attachment. A. W. Crawford. 1,500,804; July 8.
Truck. E. E. Winkley. 1,500,173; July 8.
Truck and towing apparatus, Wrecking. G. D. Bornschein. 1,500,225; July 8.
Truck, Industrial. C. E. Cochran. 1,500,236; July 8.
Truck, Shopping or marketing. G. T. Clayton. 1,500,108; July 8.
Tube-cutting apparatus. J. D. Harris. 1,500,127; July 8.
Tunneling machine. G. Miller. 1,500,411; July 8.
Turbine rotor. A. S. Anderson. 1,500,787; July 8.
Twister. J. S. Bachman. 1,500,296; July 8.
Typewriter, Flat-bed manifolding. J. Q. Sherman and A. W. Metzner. 1,500,727; July 8.
Typewriter, Manifolding. J. Q. Sherman and A. W. Metzner. 1,500,729; July 8.
Typewriting machine. B. J. Dowd. 1,500,116; July 8.
Typewriting machine. W. F. Helmond. 1,500,190; July 8.
Typewriting machine. A. G. F. Kurowski. 1,500,137; July 8.
Typewriting machine. L. C. Myers. 1,500,839; July 8.
Typewriting machine. J. A. B. Smith. 1,500,773; July 8.
Uppers over lasts, Machine for working. C. F. Pym. 1,500,152; July 8.
Vacuum-operated mechanism. J. B. Whitted. 1,500,975; July 8.
Valve. J. L. Jones. 1,500,820; July 8.
Valve. C. Sonner. 1,500,775; July 8.
Valve. J. M. Sullivan. 1,500,686; July 8.
Valve. C. A. Van Derson. 1,500,908; July 8.
Valve, Attachable. W. R. Clark. 1,500,300; July 8.
Valve, Automatic safety. O. C. Larson. 1,500,587; July 8.
Valve construction. M. H. Smith. 1,500,342; July 8.
Valve-control mechanism for containers. H. R. Cunningham. 1,500,669; July 8.
Valve, Float. H. Wigzell. 1,500,784; July 8.
Valve, Gas. G. L. Grader. 1,500,868; July 8.
Valve gear. H. Junkers. 1,500,457; July 8.
Valve lifter. A. Taylor. 1,500,536; July 8.
Valve mechanism. C. Gibford. 1,501,022; July 8.
Valve mechanism, Silencer for gas-engine. G. H. Charnock. 1,500,605; July 8.
Valve-operating device. F. D. Leslie. 1,500,628; July 8.
Valve-operating means. J. G. Tarwater. 1,500,778; July 8.
Valve-operating mechanism. C. W. Van Ranst. 1,500,166; July 8.
Valve-operating mechanism, Float-. P. Mueller. 1,500,417; July 8.
Valve, Outlet. P. W. Bolton and W. N. Minniear. 1,500,918; July 8.
Valve, Safety. P. G. Darling. 1,500,674; July 8.
Valve tappet. J. E. Foss. 1,500,865; July 8.
Vapor and air intensifier and carburetor attachment. F. F. W. Doering. 1,500,443; July 8.
Vase or similar article. W. Geib. Des. 65,112; July 8.
Vault protection system. J. J. Duffie. 1,500,805; July 8.
Vehicle bumper. H. L. Smith. 1,500,650; July 8.
Vehicle, Child's occupant-propelled. F. Starr. 1,500,854; July 8.
Vehicle construction, Motor-. D. C. Stoppenbach. 1,500,160; July 8.

Vehicle direction indicator. C. A. Wesson. 1,500,910; July 8.
Vehicle doors, Spindle locking device for. L. W. Gates. 1,500,490; July 8.
Vehicle, Dumping. H. M. Colbyson and F. J. Mumm. 1,500,803; July 8.
Vehicle, Foot-propelled. A. Giufri. 1,500,809; July 8.
Vehicle, Motor. O. F. Carlson. 1,500,801; July 8.
Vehicle, Motor. F. Sergardi. 1,500,646; July 8.
Vehicle or base, Compounding. J. Schneible. 1,500,276; July 8.
Vehicle signal. C. A. Kuhn. 1,500,998; July 8.
Vehicle wheel. F. M. Vansickle. 1,500,350; July 8.
Vehicle wheel construction, Motor-. A. Hendricks. 1,500,387; July 8.
Vehicles, Auxiliary freight carrier for. G. C. Kennedy. 1,500,394–5; July 8.
Vehicles, Brake for motor. J. B. Klein. 1,500,397; July 8.
Vehicles, Direction signal for. F. F. Thomsen. 1,500,967; July 8.
Vehicles, Hoist for motor. W. L. Stubbs. 1,500,284; July 8.
Vehicles, Identification device for. R. Alfisi. 1,500,980; July 8.
Vehicles, Luggage carrier for. W. A. King. 1,500,945; July 8.
Vehicles, Power-delivering attachment for motor. H. H. White. 1,500,172; July 8.
Vehicles, Radiator cap for motor. O. E. Hunt. 1,500,622; July 8.
Vehicles, Rain protector for. G. W. Dover. 1,500,302; July 8.
Vehicles, Spring bumper for motor. E. G. Dann. 1,500,375; July 8.
Vehicles, Steering gear for motor road. A. A. Holle. 1,500,320; July 8.
Vehicles, Theft warning signal or wheel lock for. W. E. Chadwick and J. A. Creighton. 1,500,924; July 8.
Vehicles, Traffic signal for motor. H. L. Brewster. 1,500,601; July 8.
Ventilator. A. Chupa. 1,500,368; July 8.
Ventilator or fan, Automatically-controlled. C. Holzendorf. 1,500,492; July 8.
Vessels and apparatus for the same, Hauling-out system for scrapping. F. C. Stauffen. 1,500,282; July 8.
Vibrating screen. T. D. Walsh. 1,500,856; July 8.
View finder. C. F. Speidel. 1,500,344; July 8.
Vise, Piston. G. M. Peterson. 1,500,264; July 8.
Vision, Testing. F. P. Lewis. 1,500,247–8; July 8.
Vulcanizer. G. A. Nelson. 1,500,885; July 8.
Vulcanizing. E. Blaker. 1,500,700; July 8.
Wall construction. D. W. Dodson. 1,500,377; July 8.
Wall construction. C. E. Huffman. 1,500,493; July 8.
Warning signal, Mechanical. L. C. Lester. 1,500,328; July 8.
Warp-dyeing machine. G. W. Robertson, W. T. Hogg, E. T. Garsed, and W. G. Benefield. 1,500,894; July 8.
Warp-treating apparatus. Long-chain-. H. M. Chase and G. W. Robertson. 1,500,298; July 8.
Waste stopper and operating mechanism. P. Mueller and A. C. Schuermann. 1,500,416; July 8.
Water gauge. E. Wood. 1,500,294; July 8.
Water heater. J. A. O. Terriault. 1,500,286; July 8.
Water heater for stand boilers. L. S. Lawson. 1,500,327; July 8.
Waterproofing for cloth. N. A. Thompson. 1,500,537; July 8.
Wave-resisting structure. W. H. Evers. 1,500,119–20; July 8.
Weed burner, Roadside. A. Y. Smith. 1,500,340; July 8.
Weeder. A. L. Rumbaugh. 1,500,271; July 8.
Weft-detecting mechanism. E. H. Ryan. 1,500,205; July 8.
Weftless cord fabric, Manufacture of. M. Castricum. 1,500,234; July 8.
Weighing moving material. M. Castricum. 1,500,233; July 8.
Well-cleaning device. C. Larsen. 1,500,400; July 8.
Well screen and making same. M. E. Layne. 1,500,828; July 8.
Well-screen-forming device. M. E. Layne. 1,500,830; July 8.
Well screens, Forming. M. E. Layne. 1,500,829; July 8.
Wheel: *See*—
Auto wheel. Disk wheel.
Automobile air wheel. Vehicle wheel.
Wheel. T. G. Dade. 1,500,113; July 8.
Wheel rim. W. E. Williams. 1,500,291; July 8.
Wheel-rim jack, Vehicle. E. Hartung. 1,500,813; July 8.
Wheel rim, Vehicle. J. H. Miskimen. 1,500,412; July 8.
Wheels, Cutting material for buffing. W. F. Hall. 1,500,990; July 8.
Wheels, Production of. A. S. Hyde. 1,500,496; July 8.
Whistle, Exhaust. R. C. Anderson and F. F. Rike. 1,500,100; July 8.
Winding frame. X. Brügger. 1,500,602; July 8.
Window. J. Weber. 1,500,288; July 8.
Window cleaner. N. D. Scarling. 1,500,274; July 8.
Window lock. J. G. Beranger. 1,500,540; July 8.
Window-locking arrangement. J. Perzeszty. 1,500,636; July 8.
Window-sash stop and lock. W. Heringer. 1,500,130; July 8.
Window sashes, etc., Lock for. H. Hopf. 1,500,562; July 8.
Windows, doors, and the like, Frame construction for. J. F. Auld. 1,500,359; July 8.
Windows, Electrically-operated raising and lowering mechanism for. H. E. Norwood and T. G. Nickerson. 1,500,765; July 8.
Windshield attachment. W. Thurman and S. Smith. 1,500,425; July 8.
Windshield cleaner. W. J. Spiro. 1,500,654; July 8.
Wire cable, Machine for manufacturing. A. G. Hoovens. 1,500,936; July 8.
Wire clamp for fence stretchers, Fence. W. L. Goldston. 1,500,309; July 8.
Wire-filling cutter for wire-fabric looms. W. S. Southwick. 1,500,652; July 8.
Wire tie for reenforcing rods and bars. R. G. Ludwik. 1,500,832; July 8.
Wire upon spools, Machine for winding. A. G. Hoovens. 1,500,935; July 8.
Wires, Manufacture of electric. H. B. Burley. 1,500,546; July 8.
Wrapping machine. J. Derry. 1,500,984; July 8.
Wrapping machine. A. E. Maspons. 1,500,143; July 8
Wrench: *See*—
Pipe wrench. Radiator wrench.
Wrench. F. C. Hacheney. 1,500,310–4; July 8.
X-ray plates and the like, Means for examining. E. T. Glover. 1,500,867; July 8.
Yoke, Coupler. E. H. Schmidt. 1,500,157; July 8.

CLASSIFICATION OF PATENTS

ISSUED JULY 8, 1924.

NOTE.—First number=class, second number=subclass, third number=patent number.

2— 27: 1,500,109
79: 1,500,370
106: 1,500,981
126: 1,500,804
151: 1,500,575
192: 1,500,577
231: 1,500,570
264: 1,500,474
4— 67: 1,500,628
154: 1,500,991
186: 1,500,131
203: 1,500,416
5— 118: 1,500,872
294: 1,500,956
7— 16: 1,500,852
8— 2: 1,500,378
13: 1,500,255
19: 1,500,298
1,500,299
1,500,894
9— 17: 1,500,665
20: 1,500,823
21: 1,500,942
12— 4: 1,500,152
55: 1,500,215
136: 1,500,106
1,500,471
142: 1,500,527
15— 8: 1,500,692
21: 1,500,681
25: 1,500,410
84: 1,500,558
126: 1,500,274
163: 1,500,886
167: 1,500,722
229: 1,500,634
248: 1,501,020
255: 1,500,654
265: 1,500,989
16— 19: 1,500,465
38: 1,500,840
39: 1,500,199
191: 1,501,013
17— 25: 1,500,811
18— 2: 1,500,679
8: 1,500,930
1,500,931
1,500,932
1,500,933
1,500,934
18: 1,500,885
33: 1,500,155
48.4: 1,500,698
53: 1,500,700
55: 1,500,621
69: 1,500,546
19— 90: 1,500,111
116: 1,500,281
20— 1.01: 1,500,188
2: 1,500,266
21: 1,500,171
40.5: 1,500,425
42: 1,500,288
48: 1,500,636
99: 1,500,841
22— 1: 1,500,738

Roper, Geo. D., Corporation, Rockford, Ill. Roper Complete Oven Control. For Gas and Electric Ranges. 7,483; July 15.

Summerour & Son, Vernon, Tex. Figure the Difference. For Cottonseed. 7,484; July 15.

Summerour & Son, Vernon, Tex. Frost—When it comes too soon. For Cottonseed. 7,485; July 15.

Summerour & Son, Vernon, Tex. Why It Makes More For Cottonseed. 7,486; July 15.

Whitman, Stephen F., & Son, Inc., Philadelphia, Pa. Whitman's Chocolate Covered Fruits and Nuts. For Chocolate-Covered Fruits and Nuts. 7,487; July 15.

ALPHABETICAL LIST OF LABELS.

Apichampagne. For Apichampagne, a Nonalcoholic, Carbonated Apple-Juice Beverage. Piel Bros. 27,602; July 15.
Aztec Breakfast Food. For a Breakfast Food. W. A. Gray. 27,583; July 15.
Aztec Pancake Meal. For a Pancake Meal. W. A. Gray. 27,582; July 15.
Betty Anne. For Bread. Waxide Paper Company. 27,617; July 15.
Caledonia. For Lemons. Placentia Mutual Orange Association. 27,605; July 15.
Champion Radio "B" Battery. For Dry-Cell-Battery Containers. Champion Carbon Mfg. Co. 27,574; July 15.
Chex Foot Toilet Water. For Toilet Waters. H. C. Stein. 27,611; July 15.
Christmas Tinsel. For Holiday Decorations (large size). United States Foil Co. 27,615; July 15.
Congratulations. For Candy. Nunnally Company. 27,596; July 15.
Eline's Into-the-woods Chocolate. For Chocolate. Eline's Incorporated. 27,576; July 15.
Eline's Vanilla Sweet Chocolate. For Chocolate. Eline's Incorporated. 27,575; July 15.
Fellowship. For Oranges and Grapefruit. South Lake Apopka Citrus Growers Association. 27,610; July 15.
Golden Eagle. For Evaporated Milk. Patterson-Warren Co. 27,599; July 15.
Green Mountain Birch Beer. For Birch Beer, a Nonalcoholic Birch-Beer Beverage. Piel Bros. 27,600; July 15.
Hairslik. For a Preparation for the hair. Big E. Laboratories. 27,573; July 15.
Kismet Chewing Gum. For Chewing Gum. National Pepsin Gum Co. 27,593; July 15.
Marycream. For Candies. Mary Fraser Candies, Incorporated. 27,592; July 15.
Nell Brinkley Bob Curler. For Bob Curlers. Hayes-Meserole Mfg. Co. 27,584; July 15.
Old Virginia Style Brunswick Style Stew. For Old Virginia Style Brunswick Style Stew. Sturdivant Packing Company. 27,612; July 15.
$1000.00 Guaranteed Furniture Polish. For Furniture Polish. B. Heller & Company. 27,586; July 15.
Orsinger's. For Cakes. L. V. Orsinger. 27,597; July 15.
Pabco-Toy Aeroplane Whirl. For a toy. Paraffine Companies. 27,598; July 15.
Paddle Your Own Canoe. For Candy. C. F. Hickok Co. 27,587; July 15.
Parfum Lilas de France. For Perfume. Ritz Perfume Co. 27,609; July 15.
Piel's Apple Ale. For Apple Ale, a Nonalcoholic, Carbonated Apple-Juice Beverage. Piel Bros. 27,603; July 15.
Piel's Sweet Cider. For Sweet Cider, a Nonalcoholic Sweet Cider. Piel Bros. 27,601; July 15.
Porcelain Veneer Porseal Dental Laboratory. For Dental Goods, Crowns, and Merchandise. C. Bechtold. 27,572; July 15.
Pullman. For Bread. Waxide Paper Company. 27,616; July 15.
Sandwich. For Bread. Waxide Paper Company. 27,618; July 15.
Savory Steam Double Boiler. For Double Boilers. Republic Metalware Company. 27,608; July 15.
Shamrock. For Lemons. Placentia Mutual Orange Association. 27,604; July 15.
Skeezix—Skeezix comes to school alone. For Writing Tablets. F. O. King. 27,588; July 15.
Skeezix—Skeezix got some cookie dough. For Writing Tablets. F. O. King. 27,591; July 15.
Skeezix—Skeezix knows both crooked S. For Writing Tablets. F. O. King. 27,589; July 15.
Skeezix—Take no chances, safety first. For Writing Tablets. F. O. King. 27,590; July 15.
Sperry Olympic. For Cereals. Portland Flour Mills Co. 27,606; July 15.
Taylor's Home Made Corn Cakes. For Corn-Cake Bars. J. R. Taylor. 27,613; July 15.
Terrier. For Citrous Fruits. Randolph Marketing Company. 27,607; July 15.
The House That Jack Built. For a Container for Confections. United States Foil Co. 27,614; July 15.
Timewear. For Hosiery. Nicholson-Feinberg, Inc. 27,595; July 15.
Uncle Wiggily's Stationery. For Stationery. Fred A Wish, Inc. 27,620; July 15.
White Rose. For Celery. Nelson & Company. 27,594; July 15.
Whole Wheat. For Bread. Waxide Paper Company. 27,619; July 15.
Willson Dustite Respirator. For Respirators. Willson Goggles, Inc. 27,578; July 15.
Yosemite (Cathedral Rock Scene). For Figs. I. S Goldman. 27,581; July 15.
Yosemite (El Capitan Scene.) For Figs. I. S. Goldman. 27,580; July 15.
Yosemite (Mission Scene). For Figs. I. S Goldman. 27,579; July 15.
Zanzibar-Brand. For Spices—to wit, Pure Ground White Pepper for Foods and Food Products. B. Heller & Company. 27,585; July 15.
Zoo Shoe. For Shoe Cartons. Fargo Hallowell Shoe Co 27,577; July 15.

ALPHABETICAL LIST OF PRINTS.

A New Note in Hosiery. For Hosiery. Cadet Knitting Company. 7,478; July 15.
Bromo-Seltzer Needle Book. For Bromo-Seltzer. Luther E. Martin Company. 7,482; July 15.
Figure the Difference. For Cottonseed. Summerour & Son. 7,484; July 15.
Frost—When it comes too soon. For Cottonseed. Summerour & Son. 7,485; July 15.
Les Poudres de Coty. For Powders. Coty, Inc. 7,480; July 15.
On Time Since 1881. For First-Mortgage Gold Bonds. Cochran & McClner Company. 7,479; July 15.
$1000.00 Guaranteed Rat and Mice Killer. For Insecticide for Killing Rats and Mice. B. Heller & Company. 7,481; July 15.
Roper Complete Oven Control. For Gas and Electric Ranges. Geo. D. Roper Corporation. 7,483; July 15.
Stop a Minute and Study that Label! For Athletic Underwear. B. V. D. Company. 7,477; July 15.
Whitman's Chocolate Covered Fruits and Nuts. For Chocolate-Covered Fruits and Nuts. Stephen F. Whitman & Son, Inc. 7,487; July 15.
Why It Makes More. For Cottonseed. Summerour & Son. 7,486; July 15.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 15TH DAY OF JULY, 1924.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abbot, Charles G., Washington, D. C., assignor to General Electric Company. Gyroscopic navigation instrument. 1,501,886; July 15.
Abrahams, Max, New York, N. Y. Acoustic horn. 1,501,032; July 15.
Acken, Thomas L. (See Eckrode, C. E., Acken, and Weiland.)
Ahlers, Robert H., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Armature-constructing fixture. 1,501,510; July 15.
Aktiebolaget Abjörn Anderson. (See Fredriksson, N., Härstedt, and Lindberg, assignors.)
Aktiebolaget Ljungströms Angturbin. (See Ljungström, Fredrik, assignor.)
Aktiebolaget Vapormckumulator. (See Ruths, Johannes K., assignor.)
Albert, Walter P., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone exchange system. 1,501,033; July 15.
Alexander, Bony H., assignor of seven-twentieths to J. P. Rogers and five-twentieths to L. E. Barr, Lexington, Miss. Tractor. 1,501,639; July 15.
Alexander, David A., Rochester, N. Y. Alarm device. 1,501,260; July 15.
Alexander, Robert E., Tulsa, Okla. Jack frame for oil wells. 1,501,034; July 15.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Wireless signaling system. 1,501,830; July 15.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Wireless signaling system. 1,501,831; July 15.
Allin, Edwin F., Oklahoma City, Okla. Hair clippers. 1,501,737; July 15.
Aman, Josephine. (See Hartenstein, Willy, assignor.)
Amend, Jacob E., assignor of one-half to H. B. Richardson, Lovell, Wyo. Motor-vehicle battery box. 1,501,832; July 15.
American Machine & Foundry Company. (See Millring, Edwin R., assignor.)
American Optical Company. (See Wrighton, William J., assignor.)
American Radiator Company. (See Howell, Frank B., assignor.)
American Steel Foundries. (See Williams, William E., assignor.)
American Steel and Wire Company of New Jersey, The. (See Boley, Ernst, assignor.)
American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)
American Telephone and Telegraph Company. (See Thompson, George K., assignor.)
American Wiremold Company, The. (See Frederickson, Otto A., assignor.)
Ansel, Joseph S., Brooklyn, N. Y. Collapsible bathtub. 1,501,833; July 15.
Andersen, Andrew C. (See Edgar, F. M., and Andersen.)
Anderson, Carl J., assignor, by mesne assignments, to Extenso Rock Corporation, Ann Arbor, Mich. Display holder. 1,501,087; July 15.
Anderson, Edgar W., assignor to Invincible Metal Furniture Company, Manitowoc, Wis. Lock mechanism. 1,501,640; July 15.
Anderson, Herman L., Minneapolis, Minn. Trestle for supporting a scaffold. 1,501,088; July 15.
Anderson, John F., Oakland, Calif. Salting machine. 1,501,297; July 15.
Andrews Crane Corporation. (See Andrews, Donald S., assignor.)
Andrews, Donald S., assignor to Andrews Crane Corporation, Cleveland, Ohio. Hoisting and conveying device. 1,501,035; July 15.
Andrews, Joseph F., Memphis, Tenn. Fountain brush. 1,501,089; July 15.
Anthony, Alois, Baltimore, Md. Woodworking machine. 1,501,429; July 15.
Armitage, Cyrus W., Canby, Minn. Ladder bracket. 1,501,298; July 15.
Armstrong, James A., et al. (See Eacrett, Alfred L., assignor.)
Armstrong, William, Drinkwater, Saskatchewan, Canada. Flying machine. 1,501,299; July 15.
Atwood, Eugene, assignor to The Atwood Machine Company, Stonington, Conn. Spindle-driving mechanism. 1,501,579; July 15.
Atwood Machine Company, The. (See Atwood, Eugene, assignor.)
Austin Manufacturing Co. (See Beatty, W. T., Davis, and Wilson, assignors.)
Automatic Electric Company. (See Lomax, Clarence E., assignor.)
Automatic Electric Company. (See Ray, Arthur J., assignor.)
Automatic Straight Air Brake Company. (See Neal, Spencer G., assignor.)
Autopoint Manufacturing Company. (See Keeran, Charles R., assignor.)
Avery, Anne A., Hollywood, Calif. Statuette. Des. 65,155; July 15.
Bachelder, David S., Decatur, Ill. Brace for fenders. 1,501,834; July 15.
Bacon, William J., et al. (See Inge, Arthur M., assignor.)
Baird, Samuel, London, England. Box and container for for cigars, cigarettes, and the like. 1,501,696; July 15.
Baker, William F., Wayne, Pa. Game board. 1,501,641; July 15.
Baker, William J., Newport, Ky. Device for forming metallic objects. 1,501,388; July 15.
Baker, William J., Newport, Ky. Machine for forming metallic strips. 1,501,389; July 15.
Barman, Louis M., Holborn, London, assignor to Roneo Limited, London, England. Addressing machine or like printing machines. 1,501,697; July 15.
Barr, Hugh M. and G. Edgar, Pensacola, Fla. Steam blower. 1,501,090; July 15.
Barr, L. E., et al. (See Alexander, Bony H., assignor.)
Bartholomew, John R., Berkeley, Calif., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automotive brake. 1,501,159; July 15.
Bash, Charles, Brookline, Mass., assignor of one-half to Herrick, Denver, Colo. Toothbrush container. 1,501,835; July 15.
Bass, E. & J., Inc. (See Souter, Alwin F., assignor.)
Bassett, Melda E., Los Angeles, Calif. Toilet article. 1,501,547; July 15.
Bate, John W., Racine, Wis. Adjustable step jack. 1,501,548; July 15.
Baumann, Milton C., and H. M. Rinehart, assignors to Dayton-Wright Company, Dayton, Ohio. Aeroplane structure. 1,501,549; July 15.
Baumann, Milton C., assignor to Dayton-Wright Company, Dayton, Ohio. Standard stick control. 1,501,550; July 15.
Baxter, John B., assignor to Covert Manufacturing Co., Troy, N. Y. Spring-tongue snap hook. 1,501,738; July 15.
Bay, John S., Denver, Colo. Bridge signal. 1,501,301; July 15.
Bayles, Albert J., Melrose Park, Ill. Back rest. 1,501,300; July 15.
Beagle, Victor E., Alexandria, Va. Curb-box and cock support. 1,501,511; July 15.
Beam, Robert, Kalamazoo, assignor to H. M. Lowe, Battle Creek, Mich. Crutch. 1,501,580; July 15.
Beatty, William T., Flossmoor, Ill. Combination grader-maintainer blade for road machines. 1,501,262; July 15.
Beatty, William T., Flossmoor, F. S. Davis, Homewood, and F. D. Wilson, Harvey; said Davis and Wilson assignors to Austin Manufacturing Co., Chicago, Ill. Road maintainer. 1,501,261; July 15.
Beauchamp, Clark W., Somers, Mont. Chain lock. 1,501,302; July 15.
Beautebox, Inc. (See Fritzsche, George H., assignor.)
Beckert, Albert R., Lynn, Mass., assignor to General Electric Company. Indicating instrument. 1,501,698; July 15.
Beiger, John W., Mishawaka, Ind., assignor to Beiger Veneer Company, Kelso, Wash. Machine for cutting veneer. 1,501,551; July 15.
Beiger Veneer Company. (See Beiger, John W., assignor.)
Beitz, William H., Lomira, Wis. Valve facer. 1,501,836; July 15.
Bejach, L. D., et al. (See Inge, Arthur M., assignor.)
Bell, George A., Belmont, N. H. Timepiece holder for steering wheels. 1,501,474; July 15.
Bellalbero, Mario, New York, N. Y. Brick scraper. 1,501,195; July 15.
Bellingall, R. R., et al. (See Hiller, Stanley, assignor.)
Benedek, Alfred, New York, N. Y. Bath mat. 1,501,739; July 15.
Benjamin, Clarence F., Milford, Conn. Mechanic's instrument. 1,501,837; July 15.

Benjamin, Dana H., Cleveland, assignor to H. C. Benjamin, Cleveland Heights, Ohio. Centrifugal extractor. 1,501,642; July 15.
Benjamin, E. V., Company, The. (See Case, William, assignor.)
Benjamin Electric Manufacturing Company. (See Benjamin, R. B., and Warner, assignors.)
Benjamin, Henrietta C. (See Benjamin, Dana H., assignor.)
Benjamin, Reuben B., Chicago, and C. E. Warner, Berwyn, assignors to Benjamin Electric Manufacturing Company, Chicago, Ill. Plug cluster. Des. 65,156; July 15.
Benner, Raymond C., Bayside, and H. H. Thompson, Flushing, assignors, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Water-activated reserve cell. 1,501,091; July 15.
Bennett, Philander L., Chicago, Ill. Shale retort. 1,501,881; July 15.
Benois, Edouard P., Paris, France, assignor to Coty, Inc., New York, N. Y. Bottle. Des. 65,157; July 15.
Bent, Henry B., Harrisburg, assignor to Bethlehem Steel Company, Bethlehem, Pa. Railway rail. 1,501,092; July 15.
Bergman, William G., Point Place, Ohio. Gas and air reversing valve. 1,501,552; July 15.
Bernard, Oscar C., El Paso, Tex. Coin handler. 1,501,430; July 15.
Berry, Thomas R., Lead, S. Dak. Valve. 1,501,303; July 15.
Berry, Titus E. (See Burtnett, E. R., and Berry.)
Best, Clarence L., assignor to C. L. Best Gas Traction Company, San Leandro, Calif. Clutch-control mechanism. 1,501,740; July 15.
Best, C. L., Gas Traction Company. (See Best, Clarence L., assignor.)
Best, Frank E., Seattle, Wash. Parachute and means for launching same. 1,501,431; July 15.
Bethlehem Steel Company. (See Bent, Henry B., assignor.)
Bethlehem Steel Company. (See Coffey, John J., assignor.)
Bettcher Stamping & Manufacturing Company, The. (See Peters, C. H., and Bump, assignors.)
Biehn, Hobart G. (See Neumeyer, Horace F., assignor.)
Biggs, Robert M., Wakefield, Mass. Kitchen utensil. 1,501,741; July 15.
Bigler, Oscar A., Wyoming, Ohio, assignor to The Philip Carey Manufacturing Company. Building material. 1,501,512; July 15.
Blabon, George W., Company, The. (See Tamberlin, John, assignor.)
Blancard & Co. (See Mountford, Thomas, assignor.)
Bleakley, Purling A., Los Angeles, Calif. Painting, cleaning, sand-blasting, and general-utility air brush. 1,501,432; July 15.
Bliffert, Walter J., Milwaukee, Wis. Manifold gasket. 1,501,196; July 15.
Bliss, Elmer F., Alpians, N. Y., assignor to General Electric Company. System of electric distribution. 1,501,699; July 15.
Bliss, E. W., Company. (See Strout, Robert W., assignor.)
Blower, Joseph W., Columbus, Ohio. Coal-cutting machine. 1,501,093; July 15.
Blume, George F., Philadelphia, Pa. Bathroom unit. 1,501,197; July 15.
Blumenthal, Maurice, and E. G. Gardner, Brooklyn, N. Y. Concrete pile and means for and method of producing same. 1,501,643; July 15.
Blumenthal, Sidney, & Co. (See Gowans, James, assignor.)
Boberg, Teofron, assignor to Techno-Chemical Laboratories, Limited, Clapham Park, London, England. Drying process and apparatus. 1,501,514; July 15.
Boberg, Teofron, Clapham Park, London, assignor to Techno-Chemical Laboratories Limited, London, England. Drying process and apparatus therefor. 1,501,513; July 15.
Bochter, Carl, Gunzburg, Germany. Preparing raw linen for bleaching operations. 1,501,553; July 15.
Boddie, Clarence A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulator system. 1,501,264; July 15.
Boddie, Clarence A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Speed-regulator system. 1,501,263; July 15.
Boddie, Clarence A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Speed-regulator system. 1,501,265; July 15.
Boehm, Reinhold, Berlin-Johannisthal, assignor to A. Morgan, Berlin, Germany. Motor vehicle. 1,501,304; July 15.
Bogard, Frank T., assignor to R. H. Marchant, Oakland, Calif. Toilet flush valve. 1,501,433; July 15.
Bogdanffy, Alexander, Brooklyn, N. Y. Feeding attachment for crown-cork-making machines. 1,501,700; July 15.
Bohl, Hugo E., Bayonne, N. J., assignor to Radiant Lighting Fixture Co., Inc. Backplate for lighting fixtures. Des. 65,159; July 15.
Bohl, Hugo E., Bayonne, N. J., assignor to Radiant Lighting Fixture Co., Inc. Chandelier. Des. 65,160; July 15.
Bohl, Hugo E., Bayonne, N. J., assignor to Radiant Lighting Fixture Co., Inc. Husk for lighting fixtures. Des. 65,158; July 15.
Boisvert, Joseph L., Bourbonnais, Ill. Poultry house. 1,501,742; July 15.
Boley, Ernst, Cleveland, Ohio, assignor to The American Steel and Wire Company of New Jersey. Drawing wire continuously. 1,501,305; July 15.
Bolton, Frank A., London, England. Container for holding and delivering powder. 1,501,390; July 15.
Bond Foundry and Machine Company. (See B. Owen, James, assignor.)
Booth, William N., Detroit, Mich. Demountable-rim-securing device for vehicle wheels. 1,501,581; July 15.
Boren, Gustave M., Chicago, Ill. Connecter for electric wires. 1,501,160; July 15.
Bornhauser, Otto E., and J. E. Herman, Sandusky, Ohio. Mold for making building blocks. 1,501,644; July 15.
Bosshard, John J. (See Reich, E., and Bosshard.)
Bostian, Homer C., assignor of one-fourth to J. N. Marshall, one-fourth to W. J. Sheehy, and one-fourth to E. W. Joyce, East Rochester, N. Y. Rail-drilling apparatus. 1,501,516; July 15.
Bowen, James, assignor to Bond Foundry and Machine Company, Mannheim, Pa. Caster wheel. 1,501,743; July 15.
Boyle, Michael J., Chicago, Ill. Poppet valve. 1,501,036; July 15.
Boynton, Alexander, San Antonio, Tex. Bailer. 1,501,306; July 15.
Boyuls, Cecil H., Louisville, Ky. Garment former. 1,501,307; July 15.
Brace, Porter H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Arc-welding electrode. 1,501,266; July 15.
Brander, George, et al. (See Robbins, Patrick, assignor.)
Branson, John W., Wallace, Va. Brooder stove. 1,501,434; July 15.
Braucher, Edward F., Denver, Colo. Advertising disk for automobile wheels. 1,501,094; July 15.
Brawner, Henry P., Baltimore, Md. Sifter top for containers. 1,501,037; July 15.
Breneman, Harry C., assignor to The Capitol Shade Roller Company, Cincinnati, Ohio. Paper shade roller and forming. 1,501,391; July 15.
Breslauer, Joseph, and C. Goudet, assignors to the Firm: Société d'Etudes Chimiques pour l'Industrie, Geneva, Switzerland. Fertilizer and the manufacture of same. 1,501,645; July 15.
Bridge, Arthur F., assignor of one-fourth to M. R. Thompson and one-fourth to F. S. Wade, Los Angeles, Calif. Gas holder. 1,501,267; July 15.
Bridge, Arthur F., assignor of one-fourth to M. R. Thompson and one-fourth to F. S. Wade, Los Angeles, Calif. Gas holder. 1,501,268; July 15.
Brigham, Nelson E., South Hadley Falls, Mass., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Pump. 1,501,435; July 15.
Brilhart, Samuel B., New York, N. Y. Car truck. 1,501,744; July 15.
Brock, George F., Hancock, Mich. Hammer. 1,501,095; July 15.
Brock, Norman L., et al. (See Rudkin, Edwin C., assignor.)
Brockman, Daniel C., assignor of one-half to J. L. Whiteley, Phippsburg, Colo. Vehicle direction indicator. 1,501,198; July 15.
Brooks, Stephen H., assignor to The Oil Conservation Engineering Company, Cleveland, Ohio. Pressure and vacuum release valve. 1,501,038; July 15.
Brooks, Walter J. (See Rauch, Frederick M., assignor.)
Brown and Sharpe Manufacturing Company. (See Townsend, Herbert E., assignor.)
Brown, Stanley, Garden City, assignor to The Griscom-Russell Company, New York, N. Y. Evaporator coil. 1,501,646; July 15.
Brubaker, William A., Akron, Ohio. Cushion Tire. Re15,872; July 15.
Brush, Howard R., Chicago, Ill. Extensible automobile construction. 1,501,701; July 15.
Bruman, Otto F. (See Graetzer, O., and Bruman.)
Brunell, Homer A. (See Burtnett, E. R., assignor.)
Brunn, William H., Waterloo, Iowa. Puzzle. 1,501,554; July 15.
Budd, Edward G., Manufacturing Company. (See Meadowcroft, Joseph W., assignor.)
Builders Iron Foundry. (See Connet, Frederick N., assignor.)
Bump, Edward D. (See Peters, C. H., and Bump.)
Bunting Brass & Bronze Company, The. (See Donaldson, Augustus F., assignor.)
Burke Electric Company. (See Burke, James, assignor.)
Burke, James, Erie, Pa., assignor to Burke Electric Company. Dynamo-electric machine. 1,501,878; July 15.
Burnett, Alexander S., Reddish, and T. Collins, assignors of one-half to Francis Shaw and Company, Limited, Manchester, England. Clutch-controlled gearing. 1,501,199; July 15.
Burney, Frank, jr., Thomasville, Ga. Artificial arm. 1,501,308; July 15.
Burrows, Charles H. (See Nelson, D., and Burrows.)
Burtnett, Everett R., assignor of one-half to H. A. Brunell, Los Angeles, Calif. Internal-combustion engine. 1,501,393; July 15.

Burtnett, Everett R., and T. E. Berry, Los Angeles, Calif.; said Burtnett assignor to said Berry. Valve gear for internal-combustion engines. 1,501,392; July 15.
Burton, Charles S., Oak Park, Ill. Container for music rolls and the like. 1,501,309; July 15.
Buscher, Hermann, Langerfeld, near Barmen, Germany, assignor to M. Henkels, New York, N. Y. Lace-braiding machine. 1,501,394; July 15.
Buzza, George E., Minneapolis, Minn. Support for mottoes and the like. 1,501,555; July 15.
Calco Chemical Company. (See Crossley, Moses L., assignor.)
Campbell, A. S., Company. (See Campbell, Alphonso S., assignor.)
Campbell, Alphonso S., West Medford, assignor, by mesne assignments, to A. S. Campbell Company, Boston, Mass. Window for vehicles. 1,501,702; July 15.
Campbell, Alphonso S., West Medford, assignor to A. S. Campbell Company, Boston, Mass. Curtain window. 1,501,703; July 15.
Campbell, George W., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Hood for typewriting machines. Des. 65,161; July 15.
Campbell, Thaddeus C., Rutherford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Shaft coupling. 1,501,647; July 15.
Campion, Jane, Chico, Calif. Hen-marking device. 1,501,200; July 15.
Canning, John E., deceased, Denver, Colo.; S. C. Warner, administrator, assignor to The Dental Specialty Company. Dental mandrel. 1,501,269; July 15.
Capitol Shade Roller Company, The. (See Breneman, Harry C., assignor.)
Carey, Philip, Manufacturing Company, The. (See Bigler, Oscar A., assignor.)
Carr, Edward G., Oakland, Calif. Apparatus for compacting concrete. 1,501,039; July 15.
Carroll, Francis, Yonkers, N. Y. Metallic pencil. 1,501,745; July 15.
Carter, Martin W., Toccoa, Ga. Washing machine. 1,501,746; July 15.
Case, William, St. Louis, Mo., assignor to The E. V. Benjamin Company, Inc., New Orleans, La. Hemming machine. 1,501,747; July 15.
Cates, Laurence A., Grand Island, Nebr. Ventilating fan. 1,501,201; July 15.
Cavicchi, Roland, Quincy, Mass. Clothesline hanger. 1,501,096; July 15.
Chambers, Cornelius Shirley, England. Liquid-delivery tap. 1,501,310; July 15.
Chapman, Ray K., and E. G. Messer, Elma, Wash. Suspended cable carrier. 1,501,748; July 15.
Chase, Aurin M., Syracuse, N. Y. Endless track for tractors. 1,501,097; July 15.
Chemical Foundation, Inc., The. (See Eberlein, Wilhelm, assignor.)
Chemical Foundation, Inc., The. (See Hassler, Franz, assignor.)
Cheshire, Edward, Berlin Township, Waukegan County, Wis., assignor to Miehle Printing Press & Manufacturing Co., Chicago, Ill. Sheet separator. 1,501,582; July 15.
Childs, Wallace, Kansas City, Mo. Spring wheel. 1,501,583; July 15.
Chizewer, Charles, Chicago, Ill. Knife sharpener. 1,501,749; July 15.
Chryst, William A., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition system. 1,501,517; July 15.
Chryst, William A., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition-system control. 1,501,518; July 15.
Chryst, William A., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Engine-starting device. 1,501,519; July 15.
Chryst, William A., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Starting and generating system. 1,501,520; July 15.
Chryst, William A., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition system. 1,501,521; July 15.
Chryst, William A. (See Hunt, J. H., and Chryst.)
Chryst, William A. (See Kettering, C. F., and Chryst.)
Chubb, Lewis W., Edgewood Park, Pa., assignor to Westinghouse Electric and Manufacturing Company. Condenser-type interrupter. 1,501,270; July 15.
Cincinnati Car Company, The. (See Elliott, Thomas, assignor.)
Clark, Edgar H. (See Lundell, A. E., and Clark.)
Clark, Ezra E., Newtonville, Mass. Locking mechanism for dry-pipe valves. 1,501,098; July 15.
Clark, Omar E., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Hoisting mechanism. 1,501,099; July 15.
Clark, Virginius E., assignor to Dayton-Wright Company, Dayton, Ohio. Aircraft observation window. 1,501,522; July 15.
Clark, Virginius E., assignor to Dayton-Wright Company, Dayton, Ohio. Airplane. 1,501,523; July 15.
Clarke, Oliver H., Washington, D. C., assignor, by mesne assignments, to Clymer Manufacturing Company, Denver, Colo. Spot or search light assembly. 1,501,704; July 15.
Claude, Georges, assignor to Societe l'Air Liquide (Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude), Paris, France. Synthesis of ammonia. 1,501,436; July 15.
Clymer Manufacturing Company. (See Clarke, Oliver H., assignor.)
Coble, Walter. (See Langston, William C., assignor.)
Cochran, Guy, et al. (See Floyd, Victor C., assignor.)
Coffey, John J., Bethlehem, Pa., assignor to Bethlehem Steel Company. Stamp holder. 1,501,100; July 15.
Cohen, Anchel, Pittsburgh, Pa. Safety device for window cleaners. 1,501,438; July 15.
Colby, Myrtle, Calexico, Calif. Hairpin. 1,501,750; July 15.
Collins, Frank, assignor to Sunset Lighting Fixture Company, Inc., New York, N. Y. Lamp bracket. Des. 65,162; July 15.
Collins, Frank, assignor to Sunset Lighting Fixture Company, Inc., New York, N. Y. Lamp base. Des. 65,163; July 15.
Collins, Frank, assignor to Sunset Lighting Fixture Company, Inc., New York, N. Y. Lamp bracket. Des. 65,164; July 15.
Collins, Frank, assignor to Sunset Lighting Fixture Company, Inc., New York, N. Y. Lamp base. Des. 65,165; July 15.
Collins, Frank, assignor to Sunset Lighting Fixture Company, Inc., New York, N. Y. Lamp bracket. Des. 65,166; July 15.
Collins, Frank, assignor to Sunset Lighting Fixture Company, Inc., New York, N. Y. Lamp base. Des. 65,167; July 15.
Collins, Frank, assignor to Sunset Lighting Fixture Company, Inc., New York, N. Y. Lamp bracket. Des. 65,168; July 15.
Collins Safety Razors. (See Hasselquist, Hugo S., assignor.)
Collins, Thomas. (See Burnett, A. S., and Collins.)
Colson, August R., Cincinnati, Ohio. Vehicle. 1,501,271; July 15.
Columbia Phonograph Company. (See Yerkes, Hulbert A., assignor.)
Connell, William B., Dallas, Tex. Automobile spring suspension. 1,501,475; July 15.
Connet, Frederick N., assignor to Builders Iron Foundry, Providence, R. I. Electrical signaling apparatus. 1,501,437; July 15.
Connor, Benjamin J. (See Crannell, Charles W., assignor.)
Conway, Roy D., Chatham, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,501,648; July 15.
Cook, Coleman F., Cincinnati, Ohio. Filing system. 1,501,439; July 15.
Cook, Samuel, Stamford, Conn. Oil burner for furnaces. 1,501,838; July 15.
Cooke, Hereward L., Princeton, N. J. Means for distorting images of pictures or natural objects. 1,501,161; July 15.
Cooper, William, New Orleans, La., assignor of one-half to J. A. Marck, New York, N. Y. Brake. 1,501,[illegible] July 15.
Coplan, Archibald H., Ottawa, Ontario, Canada. Steel and producing same. 1,501,202; July 15.
Corby, Henry J., and R. H. Thompson, Dayton, Ohio; said Corby assignor to said Thompson. Tire rim. 1,501,272; July 15.
Corning Glass Works. (See Said, J. M., and Gray, assignors.)
Coty, Inc. (See Benois, Edouard P., assignor.)
Cousins, Philip J., Brooklyn, N. Y. Adjustable lighting fixture. 1,501,524; July 15.
Covert Manufacturing Co. (See Baxter, John B., assignor.)
Cowan, Charles O., Palo Alto, Calif. Wall sheathing. 1,501,476; July 15.
Cox, James W., Wilmette, Ill. Ejector valve. 1,501,040; July 15.
Cox, Sirrel T., assignor to E. A. Wolff Omaha, Nebr. Stop for window sash. 1,501,584; July 15.
Coysh, Reginald S., Calgary, Alberta, Canada. Typewriter attachment. 1,501,312; July 15.
Crannell, Charles W., assignor of one-half to B. J. Connor, Chappel, Nebr. Metal-working tool. 1,501,751; July 15.
Crapo, Frederick M., assignor to Indiana Steel & Wire Company, Muncie, Ind. Protected metal and making it. 1,501,887; July 15.
Crase, Charles D., Jonesdale, Wis. License plate. 1,501,839; July 15.
Crittenden, Kenneth, Highland Park, Mich. Current regulator. 1,501,395; July 15.
Crnogoy, Jan, St. Louis, Mo. Collar fastener. 1,501,273; July 15.
Crossley, Moses L., Somerville, assignor to Calco Chemical Company, Boundbrook, N. J. 6, 8-dimethyl-2-phenylquinoline-4-carboxylic acid and making same. 1,501,274; July 15.
Crossley, Moses L., Somerville, assignor to Calco Chemical Company, Boundbrook, N. J. Ester of 6, 8-dimethyl-2-phenylquinoline-4-carboxylic acid and producing the same. 1,501,275; July 15.
Crossley, Orrin W., Oklahoma City, Okla. Cooker. 1,501,203; July 15.

Croswhite, Cecile E., Kansas City, Mo. Vanity case. 1,501,525; July 15.
Crotty, Jere E., Chicago, Ill. Cigarette-making device. 1,501,313; July 15.
Crumley, Le Roy A., New York, N. Y., assignor to The Ferro-Art Lighting Fixture Co., Inc. Lighting fixture. Des. 65,169; July 15.
Crumley, Le Roy A., New York, N. Y., assignor to The Ferro-Art Lighting Fixture Co., Inc. Lighting-fixture arm or similar article. Des. 65,170; July 15.
Crumley, Le Roy A., New York, N. Y., assignor to The Rogers Silver Plate Co. Backplate for lighting fixtures. Des. 65,171; July 15.
Cruver, Curtis L., Chicago, Ill. Game device. 1,501,276; July 15.
Cullen, Ernest E., New Baltimore, assignor of one-half to G. E. Vernier, Fair Haven, Mich. Wrench attachment for hammers. 1,501,585; July 15.
Cullen, Ernest E., New Baltimore, assignor of one-half to G. E. Vernier, Fair Haven, Mich. Triple-jawed wrench attachment for hammers. 1,501,586; July 15.
Cullen, Ernest E., assignor of one-half to R. H. Reiter, New Baltimore, Mich. Saw-blade holder. 1,501,752; July 15.
Cumfer, Harry A., Chicago, Ill., assignor to Guyton & Cumfer Mfg. Co. Knife and holder. 1,501,162; July 15.
Cummings, George C., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Transformer. 1,501,649; July 15.
Cummins, Edmund R. (See Hart, Alice M., assignor.)
Cunningham, Harry J., and C. G. A. Rosén, assignors to Tung Foon Company, San Francisco, Calif. Counterset. 1,501,477; July 15.
Cunningham, Samuel P., Beaumont, Tex. Oiling device for internal-combustion motors. 1,501,277; July 15.
Curtis, Arthur R., Cleveland, Ohio. Extractor drive mechanism. 1,501,163; July 15.
Curtis, James J., New York, N. Y. Quoin. 1,501,753; July 15.
Cutler, Henry H., Brookline, Mass. Internal-combustion engine. 1,501,041; July 15.
Cutter, George, Company. (See Townsend, John R., assignor.)
Cutting, Henry C. (See English, W. P., and Cutting.)
Cytron, Julius, Tulsa, Okla. Tape dispensing and moistening device. 1,501,754; July 15.
D. & W. Specialty Company. (See Demmer, Paul E., assignor.)
Dailey, Robert L., McRae, Ark. Crate. 1,501,314; July 15.
Daily, Roy L., et al. (See Hiller, Stanley, assignor.)
Dana, Hans P., Tacoma, Wash. Combination cabinet and table. 1,501,440; July 15.
Dankworth, James E., Ballinger, Tex. Dispensing apparatus. 1,501,755; July 15.
Danly, Robert C., assignor to Ludwig & Ludwig, Inc., Chicago, Ill. Drum and cymbal beater. 1,501,278; July 15.
Darlington, Philip J., Boston, Mass. Means for storing standard measuring devices. 1,501,164; July 15.
Darnell, Roy C. (See Short, C. R., and Darnell.)
Darrah, William A., Chicago, Ill. Making bread. 1,501,527; July 15.
Darrow, Burgess, Huntington Park, Calif., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Rim. 1,501,478; July 15.
Davis, Frank S. (See Beatty, W. T., Davis, and Wilson.)
Davis, Joseph, assignor to The Insel Company, Newark, N. J. Display case. 1,501,528; July 15.
Davis, Roy P. M., Mount Union, Pa. Method and apparatus for making brick. 1,501,479; July 15.
Dawley, James C. (See Ripsch, C. W., and Dawley.)
Day, Philander B., Vinita, Okla. Road drag. 1,501,880; July 15.
Dayton Engineering Laboratories Company, The. (See Ahlers, Robert H., assignor.)
Dayton Engineering Laboratories Company, The. (See Chryst, William A., assignor.)
Dayton Engineering Laboratories Company, The. (See Hunt, John H., assignor.)
Dayton Engineering Laboratories Company, The. (See Hunt, J. H., and Chryst, assignors.)
Dayton Engineering Laboratories Company, The. (See Hunt, J. H., and Fitzsimmons, assignors.)
Dayton Engineering Laboratories Company, The. (See Hunt, J. H., and Wallace, assignors.)
Dayton Engineering Laboratories Company, The. (See Kettering, Charles F., assignor.)
Dayton Engineering Laboratories Company, The. (See Schwarz, Elmer H., assignor.)
Dayton Engineering Laboratories Company, The. (See Woolson, Lionel M., assignor.)
Dayton-Wright Company. (See Baumann, Milton C., assignor.)
Dayton-Wright Company. (See Baumann, M. C., and Rinehart, assignors.)
Dayton-Wright Company. (See Clark, Virginius E., assignor.)
Dayton-Wright Company. (See Driggs, Ivan H., assignor.)
Dayton-Wright Company. (See Geyer, Harvey D., assignor.)
Dayton-Wright Company. (See Herbig, Elwood H., assignor.)
Dayton-Wright Company. (See Lewis, Robert P., assignor.)
Decorative Fixture Company. (See Wolfe, Arthur J., assignor.)
Decoux, Robert, Ceney, Belgium. Change-speed apparatus. 1,501,705; July 15.
Deguide, Camille, Enghien, France. Manufacture of barium cyanide. 1,501,840; July 15.
Deiller, Eugene M., Irvington, N. J. Tobacco stripping and booking machine. 1,501,441. July 15.
De Laske & Thropp Circular Woven Tire Company, The. (See Thropp, John E., assignor.)
Delco-Light Company. (See Hunt, John H., assignor.)
Delco-Light Company. (See Kellholtz, Lester S., assignor.)
Delco-Light Company. (See Kettering, Charles F., assignor.
Delco-Light Company. (See Kettering, C. F., and Chryst, assignors.)
Delco-Light Company. (See Lee, Ralph L., assignor.)
Delco-Light Company. (See McCuen, Charles L., assignor.)
Delco-Light Company. (See Midgley, Thomas, jr., assignor.)
Dement, Percy W. C., Kilbirnie, Wellington, New Zealand. Means for securing locks. 1,501,315; July 15.
Dement, Percy W. C., Kilbirnie, Wellington, New Zealand. Device for preventing the turning or withdrawal of cylinder locks. 1,501,316; July 15.
De Mier, Fred. Picher, Okla. Classifying apparatu 1,501,204; July 15.
Demmer, Paul E., assignor to D. & W. Specialty Company, San Jose, Calif. Breaker mechanism for distributors 1,501,442; July 15.
Dental Specialty Company, The. (See Canning, John E., assignor.)
Denver Rock Drill Manufacturing Company, The. (See Clark, Omar E., assignor.)
D'Etreillis, Jeanne, New York, N. Y. Corset cover. Des. 65,172; July 15.
D'Etreillis, Jeanne, New York, N. Y. Corset cover. Des. 65,173; July 15.
D'Etreillis, Jeanne, New York, N. Y. Corset cover. Des. 65,174; July 15.

D'Etreillis, Jeanne, New York, N. Y. Nightdress. Des. 65,177; July 15.
D'Etreillis, Jeanne, New York, N. Y. Corset cover. Des. 65,178; July 15.
D'Etreillis, Jeanne, New York, N. Y. Jacket. Des. 65,179; July 15.
D'Etreillis, Jeanne, New York, N. Y. Chemise. Des. 65,180; July 15.
Dictograph Products Corporation. (See Koch, Henry, assignor.)
Dictograph Products Corporation. (See Wohlers, Friedrich H. N., assignor.)
Dienstbach, Charles F., and J. W. Knemmerle, St. Louis, Mo. Sanding device for automobiles. 1,501,650; July 15.
Dischler, John, Adams, Wis. Spring vehicle wheel. 1,501,757; July 15.
Dixon, William O., Dexter, Mo. Dump bed and body. 1,501,205; July 15.
Donaldson, Augustus F., assignor to The Bunting Brass & Bronze Company, Toledo, Ohio. Broaching machine. 1,501,317; July 15.
Donnelly, Edward F., Malden, Mass. Flush valve. 1,501,318; July 15.
Dooley, Joseph R., assignor of one-half to C. W. Vink, Mobile, Ala. Railroad-rail brace. 1,501,319; July 15.
Doran, Daniel A., Yonkers, N. Y. Mail elevator. 1,501,529; July 15.
Doremus, Charles A., assignor to Titanium Pigment Company, Inc., New York, N. Y. Titanic-oxide concentrate and producing the same. 1,501,587; July 15.
Dority, Frederick F. (See Peacock, J., McClellan, and Dority.)
Dornier, Claudius, Friedrichshafen-on-the-Bodensee, assignor to the Firm Dornier Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Carriage for flying machines. 1,501,396; July 15.
Dornier, Claudius, assignor to the Firm Dornier, Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Aircraft carriage. 1,501,397; July 15.
Dornier Metallbauten Gesellschaft mit beschränkter Haftung. (See Dornier, Claudius, assignor.)
Dow Chemical Company, The. (See Van Winkle, William A., assignor.)
Dow, Fred T., Bangor, Me. Making peat briquettes. 1,501,101; July 15.
Downs, James C., Niagara Falls, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Electrolytic process and cell. 1,501,756; July 15.
Drachenberg, Carl L., Houston, Tex. Refrigerator. 1,501,320; July 15.
Drees, Michael A., Milwaukee, Wis. Circulating pump. 1,501,758; July 15.
Dreyfus, Henry, London, England. Plastic containing cellulose acetate. 1,501,206; July 15.
Dreyfus, Henry, London, England. Manufacture of cellulose derivatives. 1,501,207; July 15.
Driggs, Ivan H., assignor to Dayton-Wright Company, Dayton, Ohio. Airplane. 1,501,530; July 15.

Drummond, Aubrey J., New York, N. Y., assignor to Kuhne Identification Systems, Inc. Taking finger-prints. 1,501,841; July 15.
Drying Systems, Inc. (See Harrison, Burt S., assignor.)
Dube, August W., Lexington, Tex. Process of and apparatus for making concrete walls. 1,501,707; July 15.
Ducasse, Louis H., Alexandria, South Africa. Tube scraper. 1,501,759; July 15.
Duckham, Arthur M., London, England. Fixation of nitrogen. 1,501,760; July 15.
Duda, Franz, Vienna, Austria. Camera for photographing quickly-moving objects. 1,501,842; July 15.
Duncan, Lindsay, and C. P. Upton, San Francisco, Calif. Illuminated sign. 1,501,102; July 15.
Dunning, Isaac W., and H. C. Shipley, Wapanucka, Okla.; said Shipley assignor of his interest to L. McHee. Combination road and farm drag. 1,501,892; July 15.
Duplessis, René E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon shoes. 1,501,042; July 15.
Duratex Corporation. (See Wilson, John A., assignor.)
Duriron Company, The. (See Jacobsen, Oystein, assignor.)
Durnell, Cecil M., and R. Welsh, Utica, Ky. Window-shade bracket. 1,501,843; July 15.
Duxbury, John A., Balidon, England. Metal-cutting machinery. 1,501,043; July 15.
Dwoirin, Max, Chicago, Ill. Plait-holder. 1,501,044; July 15.
DX Instrument Company. (See Hipple, Solomon R., assignor.)
Dye, Joseph W., Long Beach, Calif. Handle. 1,501,480; July 15.
Dyer, Ernest L., Beverley Hills, and A. R. Heise, Redondo, Calif. Separating mixtures of liquids. Re15,871; July 15.
Eacrett, Alfred L., Hollywood, assignor of one-third to J. A. Armstrong, and one-third to H. M. O'Malley, Los Angeles, Calif. Score-registering device for golf and the like. 1,501,398; July 15.
Earl, George. (See Wallin, Joel L., assignor.)
Earnshaw, William B., assignor to General Motors Research Corporation, Dayton, Ohio. Internal-combustion engine. 1,501,531; July 15.
Eberlein, Wilhelm, Ahrensburg, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Decolorizing medium for oils, fats, and other liquids, and making same. 1,501,321; July 15.
Eckrode, Clement E., New Brunswick, T. L. Acken, Newark, and A. Welland, East Orange, assignors to Pneumatic Appliances Corporation, New Brunswick, N. J. Shock absorber. 1,501,844; July 15.
Eclipse Machine Company. (See McGrath, William L., assignor.)
Eclipse Machine Company. (See Van Ness, Henry E., assignor.)
Edgar, Frank M., and A. C. Andersen, assignors to Ternstedt Mfg. Co., Detroit, Mich. Antirattling device. 1,501,322; July 15.
Edgar, George. (See Barr, H. M., and Edgar.)
Edwards, William A., Chicago, Ill. Fuel converter. 1,501,323; July 15.
Egler, Nickolas F., Chicago, Ill. Furnace. 1,501,532; July 15.
Eisele, Logan, Nashville, Tenn. Container for hypodermic needles. 1,501,324; July 15.
Elliott, Lloyd L., et al. (See Hughes, Cora E., assignor.)
Elliott, Thomas, assignor to The Cincinnati Car Company, Cincinnati, Ohio. Railway car. 1,501,325; July 15.
Ellis, Herbert R., assignor of one-half to S. Tansill, Fredericksburg, Va. Chair attachment for tables. 1,501,443; July 15.
Ellison, Joseph D., Pittsburgh, Pa. Measuring instrument. 1,501,588; July 15.
Elwood, Grace E. (See Hoover, Charles W., assignor.)
Elyria Iron and Steel Company, The. (See Johnston, Gustave V., assignor.)
English, Walter P., and H. C. Cutting, San Francisco, Calif. Hydraulic brake. 1,501,444; July 15.
Erzig, Nicholas J., Chicago, Ill. Coffee urn. 1,501,165; July 15.
Espenschied, Lloyd, Hollis, N. Y., assignor to American Telephone and Telegraph Company. Conjugate signaling circuits. 1,501,103; July 15.
Espenschied, Lloyd, Hollis, N. Y., assignor to American Telephone and Telegraph Company. Multiplex radio system. 1,501,104; July 15.
Evenson, Lyth F., deceased, Silverton, Oreg.; N. Evenson, executrix. Adjustable feed for fountain pens. 1,501,761; July 15.
Evenson, Nora, executrix. (See Evenson, Lyth F.)
Ewing, Frank D., assignor of one-half to O. W. Gibson, Cedar Rapids, and one-half to W. A. Norton, Marshalltown, Iowa. Gasoline vender. 1,501,556; July 15.
Extenso Rock Corporation. (See Anderson, Carl J., assignor.)
Farnham, Frank E., assignor to The Jewelers Supply Company, Incorporated, Providence, R. I. Safety catch for brooches and the like. 1,501,845; July 15.
Farquharson, Irving W., Media, Pa. Flour sifter. 1,501,166; July 15.
Fauser, Gustave M., assignor to Tingue Manufacturing Company, New York, N. Y. Textile fabric. Des. 65,181; July 15
Feasel, Louis, Sturgis, Mich. Adjustable chair. 1,501,533; July 15.
Federal Manufacturing Company. (See Ollinger, Thomas, assignor.)
Feist, Henry G., Plantsville, Conn. Valve lifter. 1,501,326; July 15.
Ferguson, Harry, Belfast, Ireland. Agricultural implement. 1,501,651; July 15.
Ferguson, Harry, Belfast, Ireland. Agricultural implement. 1,501,652; July 15.
Ferguson, Robert G., Lakewood, N. J. Combination shower bath. 1,501,762; July 15.
Ferguson, Stanley R., Abernethy, Saskatchewan, Canada. Door lock. 1,501,208; July 15.
Ferris, Howard J., assignor to Hunt-Helm-Ferris & Company, Harvard, Ill. Brake for coaster wagons. 1,501,589; July 15.
Ferro-Art Lighting Fixture Co., The. (See Crumley, Le Roy A., assignor.)
Fessenden, Reginald A., Brookline, Mass., assignor to Submarine Signal Company, Portland, Me. Submarine signaling. 1,501,105; July 15.
Fiberloid Corporation, The. (See Macdonald, George B., assignor.)
Fine, Bernard M., Philadelphia, Pa., assignor to Samuel M. Langston Company, Camden, N. J. Cut-off mechanism. 1,501,653; July 15.
Fischer, Philip A., New York, N. Y. Adjustable cap. 1,501,654; July 15.
Fisher, Ernest I., George, Iowa. Tire chain. 1,501,763; July 15.
Fitzsimmons, John T. (See Hunt, J. H., and Fitzsimmons.)
Flagg, Edward B., West Hartford, Conn. Closure for boxes. 1,501,209; July 15.
Flatt, David I., Colorado Springs, Colo. Pulp and juice squeezer. 1,501,210; July 15.
Flint, Warren E., Palisades Park, N. J. Coating device for metallic strips. 1,501,764; July 15.
Floyd, George G., Riverside, Ill. Razor-blade sharpener. 1,501,045; July 15.
Floyd, Victor C., Huntington Park, assignor of one-half to W. Gindorff, and one-tenth to G. Cochran, Los Angeles, Calif. Temporary support for telephone wires. 1,501,590; July 15.
Ferin, Alexander, Edmonton, Alberta, Canada. Peep sight for shotguns. 1,501,211; July 15.
Forkel, Otto, Berlin-Weissensee, Germany. Reversible machine. 1,501,534; July 15.
Fox, John H., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for surfacing plate glass. 1,501,327; July 15.
Frankel, Adolph, New York, N. Y. Machine for attaching snap fasteners. 1,501,445; July 15.
Frazier, Charles E., assignor to The Guiberson Corporation, Dallas, Tex. Packer. 1,501,481; July 15.
Frederick, C. Sidney. (See Lindell, Samuel J., assignor.)
Frederickson, Otto A., Wethersfield, assignor to The American Wiremold Company, Hartford, Conn., Braiding-machine yarn carrier. 1,501,846; July 15.
Fredriksson, Nils, Stockholm, H. A. E. Hårstedt, and K. G. Lindberg, assignors to Aktiebolaget Abjörn Anderson, Svedala, Sweden. Roofing-tile press. 1,501,535; July 15.
Freese, Herman A., Pasadena, Calif. Arch support. 1,501,765; July 15.
French, John W., New Rochelle, N. Y. Firearm. 1,501,446; July 15.
Fried. Krupp Aktiengesellschaft. (See Schön, L., and Tobien, assignors.)
Friedman, Louis, Muncie, Ind., and D. Wallace, Tulsa, Okla. Flowing device for wells. 1,501,536; July 15.
Fritzsche, George H., Brooklyn, assignor to Beautebox, Inc., New York, N. Y. Box partition. 1,501,537; July 15.
Froberger, Laurent A., Lynn, Mass., assignor to General Electric Company, Controller finger. 1,501,108; July 15.
Fronsoe, Joseph J., and J. Rogalski, Milwaukee, Wis. Concrete-form clamp. 1,501,212; July 15.
Fuller, Geo. H., & Son Company. (See Hanisch, Otto C., assignor.)
Furlan, John G., assignor to Furlan Nut Machinery Corporation, New York, N. Y. Rotating nut swaging and expanding machine. 1,501,766; July 15.
Furlan Nut Machinery Corporation. (See Furlan, John G., assignor.)
Gage, Anna L., Minneapolis, Minn. Headband for use in connection with bathing caps. 1,501,591; July 15.
Gage, Fred W. (See Neale, John B., assignor.)
Gaillemin, Ernest, Vincennes, France. Universal contact box for wires. 1,501,106; July 15.
Gardner, Ernest G. (See Blumenthal, M., and Gardner.)
Gardner, Richard H., Chicago, Ill. Builder's hardware and making same. 1,501,538; July 15.
Garrison, Vance C., Bemidji, Minn. Sliding-jaw wrench. 1,501,214; July 15.
Garrison, Vance C., Nebish, assignor to R. H. Schumaker, Bemidji, Minn. Animal trap. 1,501,213; July 15.
Gartman, George W. (See Morris, H., Howard, and Gartman.)
Gathmann, Emil and M., Baltimore, Md. Shrink-head casting for ingot molds. 1,501,655; July 15.
Gathmann, Mark. (See Gathmann, Emil and M.)

Gaw-O'Hara Envelope Co. (See Olgay, Albert, assignor.)
Gaylord, Lisle H. (See White, J. W., and Gaylord.)
Geer, Albert P., New London, Conn. Thrust bearing. 1,501,447; July 15.
Geib, William, assignor to International Silver Company, Meriden, Conn. Candlestick or similar article. Des. 65,182; July 15.
General Electric Company. (See Abbot, Charles G., assignor.)
General Electric Company. (See Alexanderson, Ernst F. W., assignor.)
General Electric Company. (See Beckert, Albert R., assignor.)
General Electric Company. (See Bliss, Elmer F., assignor.)
General Electric Company. (See Froberger, Laurent A., assignor.)
General Electric Company. (See Hepperlen, John A., assignor.)
General Electric Company. (See Hoxie, Charles A., assignor.)
General Electric Company. (See Hund, August, assignor.)
General Electric Company. (See Rice, Chester W., assignor.)
General Electric Company. (See Runner, Claude C., assignor.)
General Electric Company. (See Tobey, Harry W., assignor.)
General Electric Company. (See Traver, Oliver C., assignor.)
General Electric Company. (See Walle, Ludwig S., assignor.)
General Electric Company. (See White, William C., assignor.)
General Fire Extinguisher Company. (See Loepsinger, Albert J., assignor.)
General Motors Corporation. (See Houghton, Thomas E., assignor.)
General Motors Corporation. (See Short, C. R., and Taub, assignors.)
General Motors Corporation. (See Wardenburg, Frederic A., assignor.)
General Motors Corporation. (See White, J. W., and Gaylord, assignors.)
General Motors Research Corporation. (See Earnshaw, William B., assignor.)
General Motors Research Corporation. (See Hunt, John H., assignor.)
General Motors Research Corporation. (See Kettering, Charles F., assignor.)
General Motors Research Corporation. (See Midgley, Thomas, jr., assignor.)
General Motors Research Corporation. (See Short, C. R., and Darneil, assignors.)
Gesellschaft für Drahtlose Telegraphie m. b. h. Hellesches. (See Osnos, Mendel, assignor.)
Geyer, Harvey D., assignor to Dayton-Wright Company, Dayton, Ohio. Valve. 1,501,592; July 15.
Geyer, Harvey D., and J. W. Lee, assignors to The Inland Manufacturing Company, Dayton, Ohio. Coiled rim and making it. 1,501,593; July 15.
Gibbons, Harold L., Halifax, Nova Scotia, Canada. Hand-operated gear shift. 1,501,767; July 15.
Gibbs, Benedict T., jr., Chicago Heights, assignor to Morden Frog & Crossing Works, Chicago, Ill. Guard rail for switches. 1,501,215; July 15.
Gibson, Otis W., et al. (See Ewing, Frank D., assignor.)
Gilda, Julius E., Philadelphia, Pa. Material container. 1,501,656; July 15.
Gindorff, William, et al. (See Floyd, Victor C., assignor.)
Gluck, Edward V., Richmond Hill, N. Y., assignor to Soapine Company Incorporated. Soap dispensing. 1,501,657; July 15.
Goizueta y López de Zubiria, Wenceslao, Milagro, Spain. Conveying and excavating machine. 1,501,706; July 15.
Gollobin, Harry A., New York, N. Y. Removable bridge for teeth. 1,501,539; July 15.
Gollobin, Harry A., New York, N. Y. Removable bridge for teeth. 1,501,540; July 15.
Good, David H., Kansas City, Mo. Antiskid device. 1,501,594; July 15.
Goodman Bros. & Hinlein. (See List, John A., assignor.)
Goodrich, B. F., Company, The. (See Kmentt, Waldemar D., assignor.)
Goodrum, Charles L., assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic control for charging secondary batteries. 1,501,046; July 15.
Goodyear Tire & Rubber Company, The. (See Darrow, Burgess, assignor.)
Gorrell, William O., Plainview, Minn. Tackle box. 1,501,448; July 15.
Goudet, Charles. (See Breslauer J., and Goudet.)
Gouverneur, Minor F. H., assignor to Locke Insulator Corporation, Baltimore, Md. Connecting insulator parts. 1,501,107; July 15.
Gowans, James, Leonia, N. J., assignor to Sidney Blumenthal & Co. Inc., New York, N. Y. Pile fabric. Des. 65,183; July 15.
Gowans, Harry C., assignor to the Hamilton Manufacturing Co., Two Rivers, Wis. Cabinet. 1,501,658; July 15.
Graetzer, Otto, Zollikon, and O. F. Bruman, Zurich, Switzerland. Electric heater for faucets. 1,501,768; July 15.
Gray, David E. (See Said, J. M., and Gray.)
Greeley, John, Lake Park, Iowa. Seed-corn drier. 1,501,328; July 15.
Greve, Friedrich H., La Salle, Ill. Quick-acting wrench. 1,501,329; July 15.
Griffin, Joseph C., and W. Jean, Los Angeles, Calif. Bumper. 1,501,595; July 15.
Grigsby-Grunow-Hinds Co. (See Grunow, W. C., and Wiegand, assignors.)
Griscom-Russell Company. (See Brown, Stanley, assignor.)
Grueby, William H., New York, N. Y. Tile and terra-cotta block. 1,501,709; July 15.
Grunow, William C., and A. J. Wiegand, assignors to Grigsby-Grunow-Hinds Co., Chicago, Ill. Visor holding and feeding mechanism for sewing machines. 1,501,710; July 15.
Gudge, Benjamin J., and P. G. Guest, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company. Electrical contact element. 1,501,330; July 15.
Guernsey, Charles O. (See Mead, F., and Guernsey.)
Guest, Paul G. (See Gudge, B. J., and Guest.)
Guiberson Corporation, The. (See Frazier, Charles E., assignor.)
Guinzburg, Victor, assignor to I. B. Kleinert Rubber Company, New York, N. Y. Anklet. Des. 65,184; July 15.
Gulick, David E., San Francisco, Calif. Flushing device. 1,501,331; July 15.
Güttner, Max, Schmolln, Germany. Rotary blower and rotary engine. 1,501,596; July 15.
Guyton & Cumfer Mfg. Co. (See Cumfer, Harry A., assignor.)
Haas, Louis, assignor to Société Chimique de la Grande Paroisse, Paris, France. Green dyestuffs dyeing in reducing baths and their process of manufacture. 1,501,769; July 15.
Haddad, Michael M., Pontiac, Mich. Candy mold. 1,501,659; July 15.
Haines, Leonard M., assignor to William Hall & Company, Limited, Studley, England. Needle case. Des. 65,185; July 15.
Hall, Benjamin J., Eastcote, England. Machine for sensitizing papers and other fabrics. 1,501,332; July 15.
Hall, Charles C., Kalamazoo, Mich. Packing. 1,501,541; July 15.
Hall, Charles C., Kalamazoo, Mich. Packing. 1,501,542; July 15.
Hall, Charles E. V., Sheffield, England. Sieving screening and separating device. 1,501,047; July 15.
Hall, Everett J., Passaic, N. J., assignor to Metals Disintegrating Company, Inc., New York, N. Y. Metal-disintegrating apparatus. 1,501,449; July 15.
Hall, William, & Company. (See Haines, Leonard M., assignor.)
Hailing, Charles O., Milan, Minn. Rim breaking, contracting, and expanding device. 1,501,597; July 15.
Hamilton Beach Mfg. Co. (See Nielsen, Emanuel, assignor.)
Hamilton Manufacturing Co., The. (See Gowran, Harry C., assignor.)
Hamilton, William L., Glasgow, Scotland. Ropeway and the like. 1,501,333; July 15.
Hamister, Victor C., Cleveland, Ohio, assignor, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Calcining carbon and products thereof. 1,501,108; July 15.
Hammarlund, Lloyd A., assignor to Hammarlund Mfg. Company, Inc., New York, N. Y. Variable condenser. 1,501,543; July 15.
Hammarlund Mfg. Company. (See Hammarlund, Lloyd A., assignor.)
Hampson, Charles G., New York, N. Y. Machine for stippling. 1,501,048; July 15.
Hanisch, Otto C., South Attleboro, Mass., assignor to Geo. H. Fuller & Son Company, Pawtucket, R. I. Display box. 1,501,770; July 15.
Hanley, Frank W., Pittsburgh, Pa. Antiskid device. 1,501,771; July 15.
Hannan, Jerome W., Wayne, and C. A. Notman, Detroit, Mich. Emergency tire. 1,501,399; July 15.
Hanson, Herman, Newark, Ill. Cotton picker. 1,501,334; July 15.
Hanson, John M., Los Angeles, Calif. Can punch. 1,501,598; July 15.
Hardey, Ernest L. (See Maxon, Oscar, assignor.)
Hardman, James H., Pendleton, Salford, England. Charging valve or door for furnaces, gas producers, retorts, and similar structures. 1,501,216; July 15.
Harford, Emory H., Piper City, Ill. Antikicking device for animals. 1,501,772; July 15.
Harlow, John B., Upper Montclair, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Switching system. 1,501,109; July 15.
Harper, Alexander, Bristol, Conn. Plating stainless steel and articles produced thereby. 1,501,049; July 15.
Harris, Elizabeth G., Los Angeles, Calif. Automobile elevator. 1,501,599; July 15.
Harris, James S., Morgantown, Ind. Bolt-holder tool. 1,501,050; July 15.
Harris, Moses H., New York, N. Y. Screen. Des. 65,186; July 15.
Harrison, Bert S., assignor to Drying Systems, Inc., Chicago, Ill. Air washer. 1,501,110; July 15.
Harrison, William H. (See Shaw, J., and Harrison.)

Harstedt, Herman A. E. (See Fredriksson, N., Harstedt, and Lindberg.)
Hart, Alice M., London, England, assignor, by mesne assignments, to E. R. Cummins, Worcester, Mass. Production of carbon. 1,501,111; July 15.
Hartenstein, Willy, Nuremberg, Germany, assignor to J. Aman, Rutherford, N. J. Potato planter. 1,501,335; July 15.
Hartford, Edward V., deceased, Deal, N. J.; H. P. Hartford, administratrix. Means for operating the brakes on vehicles. 1,501,600; July 15.
Hartford, Henrietta P., administratrix. (See Hartford, Edward V.)
Hartwig, John D., Olean, N. Y. Saw set and jointer. 1,501,112; July 15.
Hasselquist, Hugo S., Oak Park, assignor, by mesne assignments, to Collins Safety Razors, Chicago, Ill. Razor. 1,501,450; July 15.
Hassler, Franz, Hamburg, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Tanning. 1,501,336; July 15.
Hatfield, Paul L., assignor to Peoria Drill and Seeder Co., Peoria, Ill. Draft-operated lifting device for seeding machines. 1,501,279; July 15.
Headley, Benjamin T., and P. H. Thompson, assignors to Millville Machine Company, Millville, N. J. Vial-necking machine. 1,501,773; July 15.
Hebert, Edmond A., et al. (See Rudkin, Edwin C., assignor.)
Heeter, Charles M., Butler, Pa. Release coupling. 1,501,217; July 15.
Heeter, Frank W., and T. E., Toledo, Ohio. Folding machine. 1,501,774; July 15.
Heeter, Terry E. (See Heeter, Frank W. and T. E.)
Heinz, Julius A., Pesotum, Ill. Base for casket emblems. 1,501,400; July 15.
Heise, Arthur R. (See Dyer, E. L., and Heise.)
Heising, Raymond A., Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Distant control system. 1,501,711; July 15.
Heller, Harry, New York, N. Y. Presser foot. 1,501,557; July 15.
Helmer, Louis, New York, N. Y. Method of and apparatus for conditioning air. 1,501,660; July 15.
Hemingray Glass Company. (See Holmes, Minot K., assignor.)
Hendrick, Frank C., et al. (See Kline, Harry L., assignor.)
Henkels, Max. (See Buscher, Hermann, assignor.)
Henry, Augustus M., Brooklyn, N. Y. Rotary casting. 1,501,337; July 15.
Henry, Augustus M., Brooklyn, N. Y. Rotary casting. 1,501,338; July 15.
Hepperlen, John A., East Orange, N. J., assignor to General Electric Company. Apparatus for and system of motor control. 1,501,661; July 15.
Herbig, Elwood H., assignor to Dayton-Wright Company, Dayton, Ohio. Tail skid. 1,501,601; July 15.
Herman, John E. (See Bornhauser, O. E., and Herman.)
Herrick, Charles. (See Bash, Charles, assignor.)
Hill Compressor & Pump Company, The. (See Hill, Ebenezer, assignor.)
Hill, Ebenezer, South Norwalk, Conn., assignor to The Hill Compressor & Pump Company, New York, N. Y. Rotary pump-sealing means. 1,501,051; July 15.
Hill Pump Valve Company, The. (See Reich, E., and Bosshard, assignors.)
Hiller, Stanley, San Jose, assignor to R. L. Daily, San Francisco, R. R. Bellingall, Oakland, and S. Hiller, San Jose, Calif. Manufacture of high-grade flours from fish and like materials. 1,501,775; July 15.
Hiller, Stanley, et al. (See Hiller, Stanley, assignor.)
Hinshaw, John C. W., assignor to Mercury Manufacturing Company, Chicago, Ill. Trailer truck. 1,501,280; July 15.
Hipple, Solomon R., Williamsport, assignor to DX Instrument Company, Harrisburg, Pa. Rheostat. 1,501,339; July 15.
Hirschler, Horace L., San Francisco, Calif. Control mechanism. 1,501,340; July 15.
Hoard, Halbert L., Fort Atkinson, Wis. Massage device. 1,501,341; July 15.
Hoard, Halbert L., Fort Atkinson, Wis. Massage device. 1,501,342; July 15.
Hoblit, Karl A. (See Soulek, A. A., and Hoblit.)
Hodes, David H., New York, N. Y. Wearing apparel. 1,501,113; July 15.
Hoffman, John E., Casper, Wyo. Wrecking tool. 1,501,776; July 15.
Hollingsworth, Helen E., Minneapolis, Minn. Doll. 1,501,777; July 15.
Holmes, Minot K., assignor to Hemingray Glass Company, Muncie, Ind. Leer feeder. 1,501,602; July 15.
Holmquist, John A., Woodlawn, Pa. Machine for making wire reels. 1,501,343; July 15.
Holybee, Charles F., Hotchkiss, Colo. Ditcher. 1,501,167; July 15.
Hoopes, William P., Buffalo, N. Y. Cushion wheel. 1,501,778; July 15.
Hoovens, Amasa G., Goshen, Ind. Machine for manufacturing wire cable. 1,501,603; July 15.
Hoover, Charles W., San Francisco, assignor to G. E. Elwood, Oakland, Calif. Hydraulic brake. 1,501,451; July 15.
Horwitt, Paul H., assignor to Independent Paper Mills Inc., Brooklyn, N. Y. Sheet of folded material. 1,501,662; July 15.
Hospital Supply Company and Watters Laboratories Consolidated. (See Watters, Leon L., assignor.)
Houghton, Thomas E., Flint, assignor to General Motors Corporation, Detroit, Mich. Chock block for automobiles. 1,501,883; July 15.
Howard, Armour. (See Morris, H., Howard, and Gartman.)
Howard, Bloomfield H., Washington, D. C., and E. J. Turner, Pittsburgh, Pa. Feeder for ingot molds. 1,501,452; July 15.
Howarth, Harry A. S. (See Kingsbury, A., and Howarth.)
Howarth, Harry A. S., Pittsburgh, assignor to A. Kingsbury, Philadelphia, Pa. Bearing. 1,501,401; July 15.
Howe, William G., Des Moines, Iowa. Corn-popping machine. 1,501,114; July 15.
Howel, Clayton J., assignor to Orange Crush Co., Chicago, Ill. Bottle. Des. 65,187; July 15.
Howell, Frank B., Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill. Boiler. 1,501,847; July 15.
Hoxie, Charles A., Schenectady, N. Y., assignor to General Electric Company. Measuring system. 1,501,663; July 15.
Hubbard, Edward L., assignor of one-half to C. C. Payne, Oakland, Calif. Playing club. 1,501,344; July 15.
Hughes, Cora E., assignor of one-third to T. M. Ingman and one-third to L. L. Elliott, Los Angeles, Calif. Light deflector for headlights. 1,501,779; July 15.
Hughes, Harry, Saxonville, Mass. Pile-fabric loom. 1,501,483; July 15.
Hughes, Howard R., Houston, Tex. Lubricator. 1,501,482; July 15.
Hulbert, Ansel C., San Carlos, Calif. Electric steam radiator. Des. 65,188; July 15.
Hulse, Edison G., assignor to Kelly-Springfield Tire Company, Cumberland, Md. Vehicle tire. Des. 65,189; July 15.
Hulse, Edison G., assignor to Kelly-Springfield Tire Company, Cumberland, Md. Vehicle tire. Des. 65,190; July 15.
Humer, Frank, Detroit, Mich., assignor, by mesne assignments, to Lincoln Motor Company. Means for adjusting windows of motor cars. 1,501,453; July 15.
Hund, August, Schenectady, N. Y., assignor to General Electric Company. Wireless signaling system. 1,501,664; July 15.
Hunt-Helm-Ferris & Company. (See Ferris, Howard J., assignor.)
Hunt, James W., Memphis, Tenn. Adjusting device for radiotuners and the like. 1,501,454; July 15.
Hunt, John H., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition system. 1,501,484; July 15.
Hunt, John H., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition system. 1,501,485; July 15.
Hunt, John H., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Ignition system. 1,501,487; July 15.
Hunt, John H., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Motor and ignition generator. 1,501,488; July 15.
Hunt, John H., assignor to General Motors Research Corporation, Dayton, Ohio. Electric motor. 1,501,558; July 15.
Hunt, John H., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Ignition system. 1,501,848; July 15.
Hunt, John H., and W. A. Chryst, assignors to The Dayton Engineering Laboratories Company, Dayton, Ohio. Ignition apparatus. 1,501,486; July 15.
Hunt, John H., and J. T. Fitzsimmons, assignors to The Dayton Engineering Laboratories Company, Dayton, Ohio. Regulator for ignition systems. 1,501,489; July 15.
Hunt, John H., and H. Wallace, assignors to The Dayton Engineering Laboratories Company, Dayton, Ohio. Fuel burner. 1,501,490; July 15.
Hunter, Philip V., Purley, England. Protective arrangement for electric distribution and transmission systems. 1,501,115; July 15.
Huron Industries, Inc. (See Lundberg, John L., assignor.)
Huston, Sidney H., Houston, Tex. Well-boring apparatus. 1,501,345; July 15.
Hyatt, Samuel W., Columbus, Ohio. Spotlight. 1,501,411; July 15.
Ide, Harry H., La Grange, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Automatic calling device. 1,501,281; July 15.
Illinois Tool Works. (See Olson, Carl G., assignor.)
Imlach, John S., Ottawa, Ontario, Canada. Pipe-threading machine. 1,501,248; July 15.
Independent Paper Mills Inc. (See Horwitt, Paul H., assignor.)
Indiana Steel & Wire Company. (See Crapo, Frederick M., assignor.)
Inge, Arthur M., assignor of one-fourth to W. J. Bacon, one-fourth to L. D. Bejach, and one-fourth to T. McLain, Memphis, Tenn. Serving tray for automobiles. 1,501,116; July 15.

Ingersoll, Otis A., Martinsburgh, N. Y. Thrashing machine and parts thereof. 1,501,455; July 15.
Ingham, Walter E., Newington, and A. G., Whitehead, Hartford, Conn., assignors to Pratt & Whitney Company, New York, N. Y. Lathe. 1,501,346; July 15.
Ingman, Thomas M., et al. (See Hughes, Cora E., assignor.)
Ingram, Harry, Brooklyn, N. Y. Pressure-control system for sterilizing and processing apparatus 1,501,412; July 15.
Inland Manufacturing Company, The. (See Glyer, E. D., and Lee, assignors.)
Insel Company, The. (See Davis, Joseph, assignor.)
International Silver Company. (See Gelb, William, assignor.)
Invisible Metal Furniture Company. (See Anderson, Edgar W., assignor.)
Irvine, Malcolm M., Glasgow, Scotland. Cutting disk. 1,501,780; July 15.
Isenhour, Luther J., Indianapolis, Ind. Corn-popping machine. 1,501,168; July 15.
J. & C. G. Bolinders Mekaniska Verkstads Aktiebolag. (See Liflander, Johan O., assignor.)
Jackson, Hardy, Higher Broughton, Manchester, England. Electric-arc lamp. 1,501,219; July 15.
Jacobs, George, Detroit, Mich. Variable condenser. 1,501,402; July 15.
Jacobsen, Oystein, Dayton, Ohio, assignor to The Duriron Company, Inc. Valve. 1,501,347; July 15.
James, William H., Marshfield, Mo. Staple for wire-fence concrete posts. 1,501,665; July 15.
Jean, Walter. (See Griffin, J. C., and Jean.)
Jenkins, William L., sr., Niles, Ohio. Machine for opening packs or piles of metal plates. 1,501,781; July 15.
Jennings, Minnie, Spartanburg, S. C. Broom. Des. 65,191; July 15.
Jewelers Supply Company, The. (See Farnham, Frank E., assignor.)
Jirasek, John, Detroit, Mich. Mechanical baking oven. 1,501,456; July 15.
Jockmus, Charles H. (See Malby, S. G., and Spaulding, assignors.)
Johnson, Arthur A., Washington, D. C., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,501,666; July 15.
Johnson, Charles G., Worcester, Mass. Tap and cutter. 1,501,117; July 15.
Johnson, Charles G., Worcester, Mass. Die and cutter. 1,501,118; July 15.
Johnson, Frank H., assignor to Petroleum Heat and Power Company, Boston, Mass. Oil burner. 1,501,849; July 15.
Johnson, Kenneth S., Jersey City, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., Electrical network. 1,501,667; July 15.
Johnson, Merton E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole-fitting machine. 1,501,052; July 15.
Johnston, Gustave Y., Chicago, Ill., assignor, by mesne assignments, to The Elyria Iron and Steel Company. Apparatus for electrically butt-welding tubing. 1,501,782; July 15.
Jones, Ada R., Bozeman, Mont. Toy dog. Des. 65,195; July 15.
Jones, Walter. (See Nicholas, P. J., and Jones.)
Jorgensen, Bernhardt, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for shaping uppers over lasts. 1,501,053; July 15.
Joyce, Asa W., Newark, N. J. Disazo coloring matter. 1,501,348; July 15.
Joyce-Cridland Company, The. (See Ripsch, C. W., and Dawley, assignors.)
Joyce, Emily W., et al. (See Bostian, Homer C., assignor.)
Jung, George H., jr., Cincinnati, Ohio. Arch support. 1,501,349; July 15.
Kaestner, Joseph, Burlington, Iowa. Vehicle spring. 1,501,457; July 15.
Kamenec, Stephen, Derry, Pa. Match box. 1,501,119; July 15.
Karapetoff, Vladimir, Ithaca, N. Y. Parallel double tongs. 1,501,458; July 15.
Karitzky, John, Garwood, assignor to H. B. Newhall, Plainfield, N. J. Nail fastener. 1,501,054; July 15.
Karrer, Eduard H., Milwaukee, Wis. Traction apparatus. 1,501,120; July 15.
Karstens, Harry H. (See Karstens, Hugo J. and H. H.)
Karstens, Hugo J., Wheaton, and H. H. Karstens, Chicago, Ill. Combined form and reenforcement for cement. 1,501,850; July 15.
Katz & Ogush, Inc. (See Ogush, Benjamin, assignor.)
Kaup, Edgar O., assignor to Western Blower Company, Seattle, Wash. Air washer. 1,501,559; July 15.
Kean, Otis, and A. R. Wilson, New York, N. Y., assignors to Paperbrella Corporation. Umbrella. 1,501,560; July 15.
Keeran, Charles R., assignor, by mesne assignments, to Autopoint Manufacturing Company, Chicago, Ill. Pencil. 1,501,121; July 15.
Keilholtz, Lester S., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Power device. 1,501,851; July 15.
Keller, Charles L., assignor to The Scherzer Rolling Lift Bridge Co., Chicago, Ill. Car unloader. 1,501,879; July 15.
Keller, Frederick A. (See Wright, F. H., and Keller.)
Keller, Leo, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,501,668; July 15.
Kellogg Switchboard and Supply Co. (See Ide, Harry H., assignor.)
Kelly-Springfield Tire Company. (See Hulse, Edison G., assignor.)
Kelsall, George A., Belleville, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Inductance device and operating the same. 1,501,669; July 15.
Kettering, Charles F., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Spark plug. 1,501,491; July 15.
Kettering, Charles F., assignor, by mesne assignments, to General Motors Research Corporation, Dayton, Ohio. Engine construction 1,501,561; July 15.
Kettering, Charles F., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Engine-starting system. 1,501,852; July 15.
Kettering, Charles F., and W. A. Chryst, assignors, by mesne assignments, to Delco-Light Company, Dayton, Ohio. System of electrical generation. 1,501,853; July 15.
Keuffel, Adolf W., Montclair, N. J., assignor to Keuffel & Esser Company, Hoboken, N. J. Making drawing instruments. 1,501,169; July 15.
Keuffel & Esser Company. (See Keuffel, Adolf W., assignor.)
Kilimnik, Philip, New York, N. Y. Razor-blade holder. 1,501,783; July 15.
Kimber, Walter J., Ottawa, Ontario, Canada. Bricklayer's tool. 1,501,403; July 15.
Kingman, Russell B., Orange, N. J. Knit abrasive fabric and article made therefrom. 1,501,784; July 15.
Kingsbury, Albert. (See Howarth, Harry A. S., assignor.)
Kingsbury, Albert, Greenwich, Conn., and H. A. S. Howarth, Philadelphia, Pa.; said Howarth assignor to said Kingsbury. Air-sealing means. 1,501,404; July 15.
Kinyoun, Hollie B. (See Stake, F. C., Kinyoun, and Reynolds.)
Kipperman, Mendel, Davenport, Iowa. Advertising automobile body. 1,501,405; July 15.
Kissock, Alan, Los Angeles, Calif. Recovering tin. 1,501,413; July 15.
Kissock, Alan, Los Angeles, Calif. Producing molybdates. 1,501,414; July 15.
Klar, Katherine C., Hartford, Conn. Pillow. Des. 65,192; July 15.
Kleinert, I. B., Rubber Company. (See Guinzburg, Victor, assignor.)
Kline, Harry L., assignor of five-twentieths to F. C. Hendrick and four-twentieths to O. G. Larson, Portland, Oreg. Engine. 1,501,459; July 15.
Klocke, Anton A., and J. Wurzer, Dedham, Iowa. Straw spreader. 1,501,460; July 15.
Klohe, Joseph, New York, N. Y. Miter tool. 1,501,854; July 15.
Kmentt, Waldemar D., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Metal-insert-feeding machine. 1,501,492; July 15.
Knight, Joseph C., et al. (See Rudkin, Edwin C., assignor.)
Knight, Stephen. (See Rasmussen, Peter, assignor.)
Koch, Henry, Jamaica, N. Y., assignor to Dictograph Products Corporation. Winding machine. 1,501,670; July 15.
Kohler, Conrad, Zurich, Switzerland. Turbine-driven land vehicle. 1,501,604; July 15.
Koplin, Leonard C., assignor to The Thomas Phillips Company, Akron, Ohio. Impregnating paper. 1,501,493; July 15.
Korb, Frederick W., Cleveland, Ohio. Measuring tool. 1,501,170; July 15.
Kost, Stephen A., Buffalo, N. Y. Disintegrator. 1,501,282; July 15.
Koteles, Steven, Claremont, Va. Clasp. 1,501,785; July 15.
Kraft, Henry P., Ridgewood, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Dust cap. 1,501,350; July 15.
Kreissig, Ernst, Verdingen, Germany. Spring. 1,501,220; July 15.
Krischer's Manufacturing Co. (See Rosenblum, Charles, assignor.)
Kuechler, Charles, Prescott, Wis. Pump jack. 1,501,221; July 15.
Kuemmerle, Joseph W. (See Dienstbach, C. F., and Kuemmerle.)
Kueler, Theodore, and F. L. Van Rossum, Appleton, Wis. Convertible vehicle body. 1,501,786; July 15.
Kuhne Identification Systems, Inc. (See Drummond, Aubrey J., assignor.)
Kurnick, Abraham, Brooklyn, assignor of one-half to L. Kurnick, New York, N. Y. Focus range finder for cameras or the like. 1,501,461; July 15.
Kurnick, Louis. (See Kurnick, Abraham, assignor.)
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,501,562; July 15.

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,501,671; July 15.
Kyte, Flora V., administratrix. (See Schorr, Ernest.)
Lacy, Howard, Surbiton, England. Electromagnet. 1,501,787; July 15.
Lafferty, James G., Cornopolis, Pa. Apparatus for separation of air into its constituents. 1,501,415; July 15.
Laflin, James M., Boise, Idaho. Socket wrench. 1,501,788; July 15.
Laguesse, Fernand, Herstal, Belgium. Internal-combustion engine. 1,501,855; July 15.
Lamp, Sampson C., Dawes, W. Va. Screw driver. 1,501,222; July 15.
Lane, Albert D., Oakland, Calif. Cooling apparatus. 1,501,416; July 15.
Lane, George, Poughkeepsie, N. Y. Lifting jack. 1,501,605; July 15.
Langston, Samuel M., Company. (See Fine, Bernard M., assignor.)
Langston, William C., Oak Park, assignor of one-half to W. I. Coble, Chicago, Ill. Gas-fired hot-air furnace. 1,501,283; July 15.
Lanigan, Alvin B. (See Prush, J., and Lanigan.)
Larsh, Everett P., Dayton, Ohio. Short circuiter. 1,501,284; July 15.
Larson, Oscar G., et al. (See Kline, Harry L., assignor.)
Larsson, Anders E., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Thread-grinding machine. 1,501,544; July 15.
Law, William, Manchester, England. Windscreen for motor vehicles. 1,501,406; July 15.
Lawrence, Edward E., Jamaica, assignor to Loose Wiles Biscuit Company, Long Island City, N. Y. Mechanism for conveying and stacking food products. 1,501,285; July 15.
Lawrence, John H., New York, assignor to T. E. Murray, Brooklyn, N. Y. Wall for boiler furnaces. 1,501,563; July 15.
Lawton, Thomas, New York, N. Y. Obesity-reducing band. 1,501,672; July 15.
Leader Specialty Co. (See Mick, Claud J., assignor.)
LeClair, Louis J., Maidenhead, England. Ullage rod. 1,501,407; July 15.
Lee, John W. (See Geyer, H. D., and Lee.)
Lee, Ralph L., assignor to Delco-Light Company, Dayton, Ohio. Determining the efficiency of laundry machines. 1,501,856; July 15.
Leitner, Henry, London, England. Metal air propeller and the like. 1,501,606; July 15.
Leitz, Ernst, Optische Werke. (See Metz, Carl, assignor.)
Leveridge, Athos D., Whitestone, N. Y. Precious-stone setting. Des. 65,193; July 15.
Lewis, Frank S., Denver, Colo. Arch support. 1,501,607; July 15.
Lewis, Robert P., assignor to Dayton-Wright Company, Dayton, Ohio. Landing skid for amphibian aircraft. 1,501,608; July 15.
Liflander, Johan O., assignor to J. & C. G. Bolinders Mekaniska Verkstads Aktiebolag, Stockholm, Sweden. Machine for grinding saw teeth and the like. 1,501,564; July 15.
Lincoln Motor Company. (See Humer, Frank, assignor.)
Lindberg, Karl G. (See Fredriksson, N., Harstedt, and Lindberg.)
Lindell, Samuel J., Mandeville, assignor to C. S. Frederick, Covington, La. Boiler attachment. 1,501,789; July 15.
Linden, Herbert J., Johnstown, Pa. Vehicle unloading truck. 1,501,609; July 15.
Lindström, Knut L., and S. A. E. Sterner, Djursholm, Sweden. Pulsator for milking machines. 1,501,408; July 15.
Lippert, John P., East Cleveland, Ohio. Attachment for internal-combustion engines. 1,501,565; July 15.
Linsky, Norman, New York, N. Y., assignor to Sun Rise Lamp Mfg. Co., Inc. Frame for lamp shades, lanterns, or similar articles. Des. 65,196; July 15.
List, John A., assignor to Goodman Bros. & Hinlein, Philadelphia, Pa. Braid-knitting machine. 1,501,857; July 15.
Little, Orton C., Menasha, Wis. Leg rest for furniture. 1,501,122; July 15.
Ljungström, Fredrik Brevik, Lidingon, assignor to Aktiebolaget Ljungströms Angturbin, Stockholm, Sweden. Toothed wheel with resilient teeth. 1,501,123; July 15.
Lloyd, Ross, Schomberg, Ontario, Canada. Water-heating system for stoves. 1,501,223; July 15.
Locke Insulator Corporation. (See Gonverneur, Minor F. H., assignor.)
Lockett, William, Philadelphia, Pa. Butter cutter. 1,501,673; July 15.
Loepsinger, Albert J., Providence, R. I., assignor to General Fire Extinguisher Company, New York, N. Y. Valve for automatic sprinkler systems. 1,501,125; July 15.
Löffler, Stephan, Charlottenburg, near Berlin, Germany. Device for indicating the level of liquid in high-pressure vessels. 1,501,124; July 15.
Lofton, Herbert M., Chattanooga, Tenn. Pulverizer and mulcher. 1,501,055; July 15.
Logan, Darrell D., Dallas, Tex. Bathing cap. 1,501,409; July 15.
Logan, Frank A., Edgewood, Md. Gas-mask canister. 1,501,286; July 15.
Lomax, Clarence E., assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,501,287; July 15.
Long, Maurice B., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Selective circuits. 1,501,674; July 15.
Loose Wiles Biscuit Company. (See Lawrence, Edward E., assignor.)
Lowe, H. M. (See Beam, Robert, assignor.)
Luce, Claude C. (See Sawyer, Samuel M., assignor.)
Lucius, Christian V. (See Waters, R. A., and Lucius.)
Ludwig & Ludwig, Inc. (See Danly, Robert C., assignor.)
Lum, George R., assignor to Western Electric Company, Incorporated, New York, N. Y. Casing for a telephone transmitter. Des. 65,194; July 15.
Lund, Lee W., Duluth, Minn. Starting means for electric motors. 1,501,410; July 15.
Lund, Thomas, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon heels. 1,501,171; July 15.
Lundberg, John L., assignor to Huron Industries, Inc., Alpena, Mich. Lining for cement-drying kilns. 1,501,566; July 15.
Lundell, Allen E., and E. H. Clark, assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,501,675; July 15.
Lundell, Alben E., Chicago, Ill., and J. J. Wynne, Roselle Park, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,501,676; July 15.
Lyndon, Lamar, New York, N. Y. Containing cell for electric batteries. 1,501,351; July 15.
Lyndon, Lamar, New York, N. Y. Containing cell for electric batteries. 1,501,352; July 15.
Lysons, Noel H., Montreal, Quebec, Canada, assignor to Western Electric Company, Incorporated, New York, N. Y. Polarized relay. 1,501,126; July 15.
Macartney, Kenneth H. (See Owen, H. E. L., and Macartney.)
MacDonald, Alexander E., Worcester, Mass. Sanitary pipe fitting. 1,501,225; July 15.
Macdonald, George B., New York, N. Y., assignor to The Fiberloid Corporation, Indian Orchard, Springfield, Mass. Shipping container. 1,501,462; July 15.
Mailloux, Joseph C. (See Moreau, Ovila D., assignor.)
Malbaff, Edward A., Flagler, Colo. Multiple balanced pump jack. 1,501,226; July 15.
Malby, Seth G., Woodmont, and N. W. Spaulding, Ansonia, assignors to C. H. Jockmus, Ansonia, Conn. Multiple lamp socket. 1,501,611; July 15.
Manna, Thomas, Jersey City, N. J. Valve-lifting tool. 1,501,417; July 15.
Marchant, Rodney H. (See Bogard, Frank T., assignor.)
Marck, Joseph A. (See Cooper, William, assignor.)
Marks, Daniel G., Los Angeles, Calif. Pipe-cleaning device. 1,501,354; July 15.
Marquis James B., New York, N. Y. Bench block and drill holder. 1,501,860; July 15.
Marsh, Lewis F., Spokane, Wash. Insulated container. 1,501,227; July 15.
Marshall, Charles L., London, England. Gas-expanded vulcanized-rubber substance and making the same. 1,501,791; July 15.
Marshall, Jerome N., et al. (See Bostian, Homer C., assignor.)
Marshall & Stearns Company. (See Smith, Arthur M., assignor.)
Martin, William E., Stamford, England. Spring clip for tines for side-delivery rakes and swath turners. 1,501,612; July 15.
Martin, William J., Buffalo, N. Y. Car-door-locking device. 1,501,228; July 15.
Mason, Davis & Company. (See Rowe, E. C., and Mohr, assignors.)
Matejewski, Mike, Norris, Ill. Animal trap. 1,501,463; July 15.
Mathews, Sylvester K., Albany, N. Y. Pencil sharpener. 1,501,792; July 15.
Matsuo, Kikuye. (See Matsuo, Manji, assignor.)
Matsuo, Manji, assignor to K. Matsuo San Francisco, Calif. Baking machine. 1,501,494; July 15.
Mattson, Jacob, Duluth, Minn. Grain door. 1,501,128; July 15.
Maxon, Oscar, assignor of one-half to E. L. Hardey, Cadiz, Ky. Acetylene-gas generator. 1,501,793; July 15.
Maynes Corporation. (See Maynes, Hyla F., assignor.)
Maynes, Hyla F., Gaines, Pa., assignor to Maynes Corporation, Dover, Del. Amusement ride. 1,501,613; July 15.
McBee, Lee. (See Dunning, I. W., and Shipley, assignors.)
McCaffrey, James H., Buffalo, N. Y. Folding rule. 1,501,713; July 15.
McCaffrey, James H., Buffalo, N. Y. Rule. 1,501,712; July 15.
McClay, C. Gilbert, and B. Rudis, Chicago, Ill. Motor vehicle. 1,501,790; July 15.
McClellan, Edwin. (See Peacock, J., McClellan, and Dority.)
McCuen, Charles L., Evanston, Ill., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Expansion valve for refrigerating machines and the like. 1,501,858; July 15.

McCuen, Charles L., Chicago, Ill., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Refrigerating apparatus. 1,501,859; July 15.
McDonald, John A., Westboro, Ontario, Canada. Agricultural implement. 1,501,224; July 15.
McDowell, James C., Punta Rassa, Fla. Gear controller. 1,501,353; July 15.
McGill, Homer T., Stuttgart, Ark. Apparatus for polishing grain. 1,501,610; July 15.
McGrath, William L., assignor to Eclipse Machine Company, Elmira, N. Y. Engine starter. 1,501,056; July 15.
McGrath, William L., assignor to Eclipse Machine Company, Elmira, N. Y. Engine starter. 1,501,172; July 15.
McKiernan-Terry Drill Company. (See Sturtevant, Thomas E., assignor.)
McLain, Robert M. (See Reilly, E. A., and McLain.)
McLain, Tyler, et al. (See Inge, Arthur M., assignor.)
McLearn, Russell L., Wilkinsburg, Pa. Hairpin. 1,501,127; July 15.
McMahon, Harry F., Toronto, Ontario, Canada. Camera. 1,501,677; July 15.
McNetton, Anna C., Norwalk, Conn. Bedpan. 1,501,678; July 15.
McVicar, Everett W., Marlboro, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Manufacture of soles for shoes. 1,501,057; July 15.
Mead, Francis, Chicago, Ill., and C. O. Guernsey, Wabash, Ind. Railway cushion wheel. 1,501,861; July 15.
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Shield for electric welding machines. 1,501,658; July 15.
Medford Iron Works. (See Trowbridge, Edwin G., assignor.)
Meiselbach, August D., assignor to M. Meiselbach, Shelby, Ohio. Method and means for building tubular frames. 1,501,129; July 15.
Meiselbach, Margaret. (See Meiselbach, August D., assignor.)
Mercury Manufacturing Company. (See Hinshaw, John C. W., assignor.)
Meriwether, Coleman, Louisville, Ky., assignor to P. C. Reilly, Indianapolis, Ind. Apparatus for handling concrete pipes. 1,501,888; July 15.
Mertz, Ray, assignor to The Miller Rubber Company, Akron, Ohio. Reenforced horn. 1,501,794; July 15.
Messer, Ernest G. (See Chapman, R. K., and Messer.)
Metals Disintegrating Company. (See Hall, Everett J., assignor.)
Metropolitan Trust Company, trustee. (See Parker, Everett E., assignor.)
Metz, Carl, assignor to Ernst Leitz, Optische Werke, Wetzlar, Germany. Stereoscopic double microscope. 1,501,059; July 15.
Meyer, Herman H., jr., New York, N. Y. Means for supporting lamps. 1,501,418; July 15.
Mick, Claud J., assignor to Leader Specialty Co., Inc., Indianapolis, Ind. Internal wrench. 1,501,889; July 15.
Midgley, Thomas, jr., assignor, by mesne assignments, to General Motors Research Corporation, Dayton, Ohio. Joining metals. 1,501,567; July 15.
Midgley, Thomas, jr., assignor to General Motors Research Corporation, Dayton, Ohio. Aniline injector. 1,501,568; July 15.
Midgley, Thomas, jr., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Cooling device for valves and the like. 1,501,862; July 15.
Miehle Printing Press & Manufacturing Co. (See Cheshire, Edward, assignor.)
Miller Company, The. (See Wolter, Herman H., assignor.)
Miller Company, The. (See Wolter, H. H., and Norton, assignors.)
Miller, John A., Homewood, Ill. Pleasure-railway structure. 1,501,060; July 15.
Miller, John A., Homewood, Ill. Pleasure-railway construction. 1,501,061; July 15.
Miller, John R., Van Nuys, Calif. Vehicle hitch. 1,501,355; July 15.
Miller Rubber Company, The. (See Mertz, Ray, assignor.)
Miller Rubber Company, The. (See Whisler, Chauncy P., assignor.)
Miller, Thomas S., South Orange, N. J. Adjustable thrust bearing. 1,501,614; July 15.
Millring, Edwin R., Belleville, N. J., assignor to American Machine & Foundry Company. Treating molten-metal coating baths and bath produced thereby. 1,501,356; July 15.
Millville Machine Company. (See Headley, B. T., and Thompson, assignors.)
Mitchell, Arthur K., Bronxville, assignor to St. Joseph Lead Company, New York, N. Y. Underground mining machine. 1,501,795; July 15.
Mittendorff, Max, Wyomissing, assignor to The Narrow Fabric Co., West Reading, Pa. Trimming braid for garments and similar articles. Des. 65,197; July 15.
Moeglen, Désiré M. (See Ramsay, M. U., and Moeglen.)
Mohr, Adolph. (See Rowe, E. C., and Mohr.)
Moore, Oscar W., Chicago, Ill. Temperature indicator. 1,501,173; July 15.
Moore, Robert A., New York, N. Y. Rotary internal-combustion engine. 1,501,357; July 15.
Morden Frog and Crossing Works. (See Gibbs, Benedict T., jr., assignor.)
Moreau, Ovila D., Manville, assignor of one-half to J. C. Mailloux, Woonsocket, R. I. Heddle frame. 1,501,796; July 15.
Morgan, Alfred. (See Boehm, Reinhold, assignor.)
Morley, Charles D., St. Louis, Mo. Concrete structure. 1,501,288; July 15.
Morrill, Charles H., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Manufacturing footwear. 1,501,062; July 15.
Morris, Henry, A. Howard, and G. W. Gartman, Chunchula, Ala. Stop signal for railway crossings. 1,501,797; July 15.
Morrison, Simon, Brooklyn, N. Y. Vanity case. 1,501,130; July 15.
Morrison, Simon, Brooklyn, N. Y. Latch for vanity cases. 1,501,798; July 15.
Mortimer, Louis A., assignor to Western Electric Company, Incorporated, New York, N. Y. Switching system. 1,501,174; July 15.
Moses, Richard W., assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Shears. 1,501,714; July 15.
Moser, Ernest, New York, N. Y. Removable cleanable meat holder or plate for slicing machines. 1,501,289; July 15.
Mosman, Franklin A., Cambridge, Mass. Window-screen construction. 1,501,131; July 15.
Mountford, Thomas, assignor to Blancard & Co., Inc., Newark, N. J. Making ring mountings. 1,501,358; July 15.
Muhleisen, Henry W., assignor to W. S. Rush & Co., Los Angeles, Calif. Brake shoe. 1,501,359; July 15.
Murphy, Paul B., Nyack, assignor to Western Electric Company, New York, N. Y. Signaling system. 1,501,132; July 15.
Murray, Donald, London, England, assignor to The Western Union Telegraph Company, New York, N. Y. Printing telegraph. 1,501,679; July 15.
Murray, Fred T., Cameron, S. C. Tire rim. 1,501,360; July 15.
Murray, Thomas E. (See Lawrence, John H., assignor.)
Myers, Eugene V., East Orange, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Dust cap for tire valves. 1,501,361; July 15.
Myers, Eugene V., East Orange, N. J., assignor to Schrader's Son, Incorporated, Brooklyn, N. Y. Dust cap. 1,501,362; July 15.
Nann, Arthur H., Muncie, Ind. Cowl cover. 1,501,175; July 15.
Narrow Fabric Co., The. (See Mittendorff, Max, assignor.)
National Blank Book Company. (See Schade, John, assignor.)
National Carbon Company. (See Benner, R. C., and Thompson, assignors.)
National Carbon Company. (See Hamister, Victor C., assignor.)
National Carbon Company. (See Wright, F. H., and Keller, assignors.)
Neal, Spencer G., New York, N. Y., assignor to Automatic Straight Air Brake Company, Wilmington, Del. Angle cock. 1,501,063; July 15.
Neale, John B., assignor of one-half to F. W. Gage, Battle Creek, Mich. Overlay for half-tone printing. 1,501,615; July 15.
Nelson, De Witt, and C. H. Burrows, Minneapolis, Minn. Resilient wheel and tire structure. 1,501,176; July 15.
Nelson, Harold P., North Bergen, N. J. Panel for a chair back. Des. 65,198; July 15.
Neumeyer, Horace F., Macungie, assignor to H. G. Blehn, Quakertown, Pa. Hydrant. 1,501,799; July 15.
Newhall, Henry B. (See Karlitzky, John, assignor.)
Newman, Edward D., New York, N. Y. Automobile tire. Des. 65,199; July 15.
Nicholas, Peter J., and W. Jones, Dover, Me. Animal trap. 1,501,882; July 15.
Nieberding, Frank A., Cleveland, Ohio. Combined fluid-fuel and solid-fuel heating apparatus. 1,501,680; July 15.
Nielsen, Emanuel, assignor to Hamilton-Beach Mfg. Co., Racine, Wis. Supporting means for rotatable grinders and the like. 1,501,681; July 15.
Nielsen, Jens P., Chicago, Ill. Brush and holder attachment for erasers. 1,501,863; July 15.
Niles-Bement-Pond Company. (See Randolph, Clifford F., assignor.)
Nitrum Aktiengesellschaft. (See Siebert, Werner, assignor.)
Noble, Richard G., Riverside, Calif. Automobile engine brake. 1,501,363; July 15.
Noffsinger, George E., Elkhart, Ind. Combination wheel puller, tool grinder, and power device. 1,501,682; July 15.
Norre, Charles. (See Roline, C. G., and Norre.)
Norton, Guy P. (See Wolter, H. H., and Norton.)
Norton, W. A., et al. (See Ewing, Frank D., assignor.)
Notman, Clarence A. (See Hannan, J. W., and Notman.)
Novotone, Alfred, Gibbon, Nebr. Wire-winding machine. 1,501,800; July 15.
Nurnberg, Charles, Brooklyn, N. Y. Thermometer and casing therefor. 1,501,801; July 15.

Nyberg, Roder W., Picher, Okla. Cylinder head. 1,501,715; July 15.
Oakley, John, Springfield, Mass. Broach. 1,501,716; July 15.
Ogush, Benjamin, assignor to Katz & Ogush, Inc., New York, N. Y. Finger ring. 1,501,616; July 15.
Oil Conservation Engineering Company, The. (See Brooks, Stephen H., assignor.)
Olgay, Albert, Glen Ellyn, assignor to Gaw-O'Hara Envelope Co., Chicago, Ill. Envelope-fastener strip. 1,501,717; July 15.
Olinger, Thomas, assignor, by mesne assignments, to Federal Manufacturing Company, Holland, Mich. Pulley. 1,501,290; July 15.
Olschewski, Leo, Irvington, N. J. Sprinkler. 1,501,718; July 15.
Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Producing abrasive elements. 1,501,229; July 15.
Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Machine for producing abrasive helicoids. 1,501,230; July 15.
O'Malley, Howard M., et al. (See Eacrett, Alfred L., assignor.)
Oppenheim, Austin N., Baltimore, Md. Athletic union garment. 1,501,802; July 15.
Orange Crush Co. (See Howel, Clayton J., assignor.)
Ortell, Bertha, St. Paul, Minn. Clothes-washing machine. 1,501,133; July 15.
Orth, William S., Dunkirk, Ohio. Calendar. 1,501,803; July 15.
Osborn, Clayton E., Davenport, Iowa. Suit box. 1,501,134; July 15.
Osnos, Mendel, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hellesches, Berlin, Germany. Frequency-multiplier system. 1,501,569; July 15.
Oswald, Arthur A., Bradley Beach, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Remote control system. 1,501,683; July 15.
Oswald, Arthur A., Bradley Beach, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Remote control system. 1,501,684; July 15.
Ovington, Earle L., Santa Barbara, Calif. Building construction. 1,501,364; July 15.
Owen, Henry E. L., and K. H. Macartney, Port Arthur, Ontario, Canada. Tent. 1,501,365; July 15.
Oxford, Edwin J., and J. Petr, Chambers, Nebr. Emergency jack. 1,501,719; July 15.
Ozwirk, Bernhard, Cleveland, Ohio. Basin-cover appliance. 1,501,177; July 15.
P & M Company, The. (See Warr, Harold G., assignor.)
Page, Howard L., Chicago, Ill. Sound amplifier for phonographs. 1,501,720; July 15.
Pagé, Victor W., New York, N. Y. Oil-sump screen. 1,501,804; July 15.
Pagé, Victor W., New York, N. Y. Supplementary cooling hood for motors. 1,501,805; July 15.
Paiste, H. T., Company. (See Paiste, Henry T., assignor.)
Paiste, Henry T., assignor to H. T. Paiste Company, Philadelphia, Pa. Fuse plug. 1,501,864; July 15.
Panconst, George E., New York, N. Y. Printing machine. 1,501,617; July 15.
Paperbrella Corporation. (See Kean, O., and Wilson, assignors.)
Parker, Everett E., Chicago, Ill., assignor, by mesne assignments, to Metropolitan Trust Company, trustee, New York, N. Y. Pressing machine. 1,501,685; July 15.
Parry, Irene A., Seattle, Wash. Bread raiser. 1,501,231; July 15.
Parsons, Arthur J., Mobile, Ala. Sawdust grate bar. 1,501,618; July 15.
Patterson, Charles S., Lewiston, Me. Tag-stringing device. 1,501,178; July 15.
Patterson, Edgar W., Norwalk, Calif. Hydraulic apparatus for handling well tubing. 1,501,464; July 15.
Paulsen, Gustav A., assignor to Joseph E. Smyth Company, Chicago, Ill. Feed mechanism for book-sewing machines. 1,501,686; July 15.
Payne, C. C. (See Hubbard, Edward L., assignor.)
Peacock, James, E. McClellan, and F. F. Dority, Ottawa, Ontario, Canada. Felt washer. 1,501,179; July 15.
Peck, William A., New Haven, Conn. Tool holder. 1,501,465; July 15.
Peoria Drill and Seeder Co. (See Hatfield, Paul L., assignor.)
Perkins, Fred L., San Bernardino, Calif. Locomotive smoke deflector. 1,501,570; July 15.
Peter, Ralph C., Minneapolis, Minn. Oil-spout cleaner. 1,501,806; July 15.
Peters, Clifford H., Lakewood, and E. D. Bump, assignors to The Bettcher Stamping & Manufacturing Company, Cleveland, Ohio. Tilting chair. 1,501,180; July 15.
Peters, Clifford H., Lakewood, and E. D. Bump, assignors to The Bettcher Stamping & Manufacturing Company, Cleveland, Ohio. Chair. 1,501,181; July 15.
Peterson, Charles V., Braham, Minn. Conveyer. 1,501,721; July 15.
Peterson, Chris M., Minneapolis, Minn. Process and apparatus for treating milk. 1,501,182; July 15.
Peterson, Frank, Pocahontas, Iowa. Animal-ringing tool. 1,501,366; July 15.
Petinot, Napoleon, New York, N. Y. Making chromium steel and chromium iron. 1,501,183; July 15.
Petinot, Napoleon, assignor to United States Ferro-Alloy Corporation, New York, N. Y. Manufacturing alloy steels in electric furnaces. 1,501,184; July 15.
Petr, James. (See Oxford, E. J., and Petr.)
Petroleum Heat and Power Company. (See Johnson, Frank H., assignor.)
Petschel, Oswald, Brooklyn, N. Y. Hat-supporting hook. 1,501,807; July 15.
Philippi, Theodore F., East St. Louis, Ill. Clutch. 1,501,232; July 15.
Phillips, Thomas, Company, The. (See Koplin, Leonard C., assignor.)
Phillips, William W., Calgary, Alberta, Canada. Railway crossing and alarm signal. 1,501,367; July 15.
Picht, Frederick W., Seattle, Wash., assignor to Wright & Smith Machine Works. Cannery exhauster and cooker. 1,501,135; July 15.
Pickell, William C., Highland Park, Mich. Wrapping-paper-roll holder and tearing device. 1,501,619; July 15.
Pierson, Clyde C. (See Shaw, Frank B., assignor.)
Piffard-Francis, Nina H., New Rochelle, N. Y. Collapsible window grille. 1,501,545; July 15.
Pinsuti, Giuseppe F., New York, N. Y. Necktie. 1,501,687; July 15.
Pittsburgh Plate Glass Company. (See Fox, John H., assignor.)
Pittsburgh Plate Glass Company. (See Soderberg, Jacob, assignor.)
Plummer, Harold, Oakland, Calif. Automatic time and coin controlled switch. 1,501,495; July 15.
Pneumatic Appliances Corporation. (See Eckrode, C. E., Acken, and Weiland, assignors.)
Podszus, Emil, Friedrichshagen, near Berlin, Germany. Producing boron carbide. 1,501,419; July 15.
Polet, Léopold, Gennevilliers, France. Automatic apparatus for changing the weft bobbin in looms. 1,501,722; July 15.
Porter, Claud, De Smet, S. Dak. Two-point-connecter light plug. 1,501,466; July 15.
Portman, Frederick, Vernon, British Columbia, Canada. Game. 1,501,185; July 15.
Powell, James W., Anaconda, Mont. Spark plug. 1,501,368; July 15.
Pratt & Whitney Company. (See Ingham, W. E., and Whitehead, assignors.)
Pratt & Whitney Company. (See Larsson, Anders E., assignor.)
Pratt & Whitney Company. (See Trundle, George T., jr., assignor.)
Prush, Joseph, and A. B. Lanigan, Brooklyn, N. Y. Choke detector. 1,501,808; July 15.
Psilander, Charles A., assignor to William Wharton Jr. & Co., Incorporated, Easton, Pa. Method and means for making compromise angle bars. 1,501,186; July 15.
Radiant Lighting Fixture Co. (See Bohl, Hugo E., assignor.)
Rairden, James S., Waterford, Calif. Fly swatter. 1,501,467; July 15.
Ramondo, Ettore, Turin, Italy. Electric tempering. 1,501,369; July 15.
Ramsay, Marcel U., and D. M. Moeglen, Bois-Colombes, France. Automatic machine for profiling tools. 1,501,496; July 15.
Ramsey, Vernie K., Santa Rosa, Calif. Smoking pipe. 1,501,370; July 15.
Rand, James H., North Tonawanda, N. Y. Index folder. 1,501,234; July 15.
Rand, James H., North Tonawanda, N. Y. Index device. 1,501,233; July 15.
Randolph, Clifford F., Plainfield, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Lathe-controlling mechanism. 1,501,723; July 15.
Raper, Charles E. (See Raper, Edward H. and C. E.)
Raper, Edward H., Mapleton, Iowa, and C. E. Raper, Sheridan, Wyo. Ventilating water-closets. 1,501,291; July 15.
Rasmussen, Peter, assignor of one-half to S. Knight, Denver, Colo. Apparatus for cooling and chilling hot chocolate and other confection-covered cakes. 1,501,724; July 15.
Rauch, Frederick M., assignor of one-half to W. J. Brooks, Washington, D. C. Garment hanger. 1,501,468; July 15.
Ray, Arthur J., assignor to Automatic Electric Company, Chicago, Ill. Telephone trunk circuits. 1,501,235; July 15.
Rayfield, Charles L., Chicago, Ill. Flexible coupling. 1,501,187; July 15.
Record, John W., Bowdon, England. Electrical measuring instrument. 1,501,189; July 15.
Reddick, John C., Toronto, Ontario, Canada. Typewriter. 1,501,188; July 15.
Redmon, Claude F., L. K. Redmon, C. G. Redmon, and J. T. Redmon, assignors of one-fifth to W. H. Whiteley, Paris, Ky. Powder blower. 1,501,136; July 15.
Redmon, Claude G. (See Redmon, Claude F., L. K., C. G., and J. T.)
Redmon, John T. (See Redmon, Claude F., L. K., C. G., and J. T.)
Redmon, Lillard K. (See Redmon, Claude F., L. K., C. G., and J. T.)

Reed, Dudley, Canton, Ohio. Flushing tank. 1,501,620; July 15.

Reger, Adam J., Philadelphia, Pa. Musical instrument. 1,501,725; July 15.

Reich, Ernest, and J. J. Bosshard, assignors to The Hill Pump Valve Company, Chicago, Ill. Castellating nuts. 1,501,571; July 15.

Reilly, Eugene A., and R. M. McLain, Fort Worth, Tex. Apparatus for cracking and refining oil. 1,501,371; July 15.

Reilly, Peter C. (See Meriwether, Coleman, assignor.)

Reiner, Robert H. (See Culkeu, Ernest E., assignor.)

Reitmair, Otto, Lang Enzersdorf, near Vienna, Austria. Increasing the fineness of ground carbonate containing minerals. 1,501,865; July 15.

Rex, Howard B., Henryetta, Okla. Tire-repair stand. 1,501,469; July 15.

Reynolds, John P. (See Stake, F. C., Kinyoun, and Reynolds.)

Rezer, Emil, Gungbunzlau, Czechoslovakia. Implement raising and lowering means. 1,501,137; July 15.

Rich, Charles C., assignor of one-twentieth to C. Winternever, Mount Vernon, N. Y. Slab for use in pasting battery grids. 1,501,809; July 15.

Rice, Chester W., Schenectady, N. Y., assignor to General Electric Company. Signaling system. 1,501,726; July 15.

Richardson, Harry B. (See Amend, Jacob E., assignor.)

Rinehart, Howard M. (See Baumann, M. C., and Rinehart.)

Ripsch, Charles W., and J. C. Dawley, assignors to The Joyce-Cridland Company, Dayton, Ohio. Positive stop for lifting jacks. 1,501,190; July 15.

Robbins, Patrick, assignor of two-thirds to J. Williamson and G. Brander, Dundee, Forfar, Scotland. Trolley pole and the like. 1,501,236; July 15.

Roblus, Charles H., assignor to Charles Wickstead & Company (1920) Limited, Kettering, Northamptonshire, England. Machine for spreading bread with butter or the like. 1,501,727; July 15.

Robinson, Henry, Hoboken, near Antwerp, Belgium. Magnetic circuit of electrical motors and dynamos. 1,501,372; July 15.

Robinson, Henry, Lindenburst, N. Y. Slicing machine. 1,501,810; July 15.

Roe, William C., Pittsburgh, Pa. Automatic stopping mechanism for phonographs. 1,501,890; July 15.

Roesch, George B., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Coil-bending device. 1,501,064; July 15.

Roessler & Hasslacher Chemical Company, The. (See Downs, James C., assignor.)

Rogalski, John. (See Fronsoe, J. J., and Rogalski.)

Rogers, J. Preston, et al. (See Alexander, Bony H., assignor.)

Rogers Silver Plate Co., The. (See Crumley, Le Roy A., assignor.)

Roline, Carl G., and C. Norre, Chicago, Ill. Folding machine. 1,501,237; July 15.

Roneo Limited. (See Barman, Louis M., assignor.)

Ronk, Frank O., Detroit, Mich. Pavement and constructing the same. 1,501,373; July 15.

Ronning, Adolph. (See Ronning, Andrean G. and A.)

Ronning, Andrean G. and A., Minneapolis, Minn. Ditching machine. 1,501,621; July 15.

Rosen, Carl G. A. (See Cunningham, H. J., and Rosen.)

Rosenbaum, Lottie G., New Rochelle, N. Y. Girdle. 1,501,728; July 15.

Rosenblatt, Isidor, New York, N. Y. Lighting-fixture bracket or an article of similar nature. Des. 65,200; July 15.

Rosenblum, Charles, Brooklyn, assignor to Krischer's Manufacturing Co., Inc., New York, N. Y. Buckle. Des. 65,201; July 15.

Ross, Isaac, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-breasting machine. 1,501,238; July 15.

Rotax Co. (See Schatz, William A., assignor.)

Rottgardt, Karl, Dahlem, near Berlin, Germany. Manufacture and operation of vacuum tubes. 1,501,240; July 15.

Rounds, Horace M., Tacoma, Wash. Line coupling. 1,501,138; July 15.

Rowe, Edgar C., and A. Mohr, assignors to Mason, Davis & Company, Chicago, Ill. Weighing scale. 1,501,866; July 15.

Ruau, Félix, assignor to United Cigarette Machine Co., Inc., Lynchburg, Va. Tobacco-feeding apparatus for cigarette machines. 1,501,622; July 15.

Rudis, Ben. (See McClay, C. G., and Rudis.)

Rudkin, Edwin C., Brockton, assignor to N. L. Brock, West Bridgewater, J. C. Knight, Brockton, and E. A. Hebert, Holbrook, Mass. Punching die. 1,501,241; July 15.

Runner, Claude C., Schenectady, N. Y., assignor to General Electric Company. Pressure-operating device. 1,501,239; July 15.

Rush, W. S., & Co. (See Muhleisen, Henry W., assignor.)

Rushmore, Samuel W., Plainfield, N. J. Cooling system. 1,501,065; July 15.

Rutherford, Eugene W., New Haven, assignor to The Shoe Hardware Company, Waterbury, Conn. Clasp for rubber aprons. 1,501,066; July 15.

Ruths, Johannes K., Djursholm, assignor to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Steam-accumulator apparatus for steam plants. 1,501,623; July 15.

Sabin, Herbert B., Cleveland, Ohio. Hand truck. 1,501,242; July 15.

Sadler, F. H., Company, The. (See Sadler, Louis E., assignor.)

Sadler, Louis E., assignor to The F. H. Sadler Company, Attleboro, Mass. Bracelet catch. 1,501,867; July 15.

Sadorus, Warren, Sadorus, Ill. Corn-popping machine. 1,501,624; July 15.

Saffert, George J., New Ulm, Minn. Molding method and apparatus. 1,501,625; July 15.

Sager, J. H., Company. (See Sager, James H., assignor.)

Sager, James H., assignor to J. H. Sager Company, Rochester, N. Y. Bumper for vehicles. 1,501,191; July 15.

Said, Jesse M., and D. E. Gray, assignors to Corning Glass Works, Corning, N. Y. Glassworking apparatus. 1,501,868; July 15.

St. Jacques, Delphis E., Springfield, Mass. Adjustable pipe and nut wrench. 1,501,689; July 15.

St. Joseph Lead Company. (See Mitchell, Arthur K., assignor.)

Savard, Francois N., Avon, Mass. Device for softening shoes. 1,501,139; July 15.

Sawyer, Samuel M., assignor of one-fourth to C. C. Luce, Los Angeles, Calif. Spring locking device. 1,501,374; July 15.

Schade, John, assignor to National Blank Book Company, Holyoke, Mass. Loose-leaf binder. 1,501,243; July 15.

Schaffert, Adolf H., assignor to Yawman & Erbe Manufacturing Co., Rochester, N. Y. Filing guide card. 1,501,067; July 15.

Schatz, William A., Astoria, assignor to Rotax Co., Inc., New York, N. Y. Liquid cooling and dispensing apparatus. 1,501,068; July 15.

Scherzer Rolling Lift Bridge Co. (See Keller, Charles L., assignor.)

Schley, Charles, Garfield, N. J. Cigar-perforating device. 1,501,811; July 15.

Schön, Ludwig, and F. Tobien, Essen, assignors to Friedr Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Electrical translating device. 1,501,869; July 15.

Schorr, Ernest, deceased. Detroit, Mich.: F. V. Kyte, administratrix, assignor to Schorr Motor Vehicle Company. Vehicle spring suspension. 1,501,891; July 15.

Schorr Motor Vehicle Company. (See Schorr, Ernest, assignor.)

Schrader's, A., Son, Incorporated. (See Kraft, Henry P., assignor.)

Schrader's, A., Son, Incorporated. (See Myers, Eugene V., assignor.)

Schranz, Charles A., assignor to W. Wood, trading as R. D. Wood and Company, Philadelphia, Pa. Gas producer. 1,501,870; July 15.

Schulz, Otto W., Denver, Colo. Collapsible fruit box and holder therefor. 1,501,812; July 15.

Schumacher, John, sr., Los Angeles, Calif. Gauge board for breaking wall board and the like. 1,501,813; July 15.

Schumaker, Raymond H. (See Garrison, Vance C., assignor.)

Schwab, John, Chicago, Ill. Automobile tire rack. 1,501,470; July 15.

Schwarz, Elmer H., Fort Lee, N. J., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Connecting mechanism. 1,501,497; July 15.

Schwob, Oliver O., Moundsville, W. Va. Grain cradle. 1,501,375; July 15.

Scofield, Frank W., Woodland, Mich. Masonry [illegible] guide. 1,501,814; July 15.

Scott, Floyd L., Houston, Tex. Trimmer attachment for lawn mowers. 1,501,244; July 15.

Scrive, Paul, Paris, France. Drying apparatus for pulverulent material. 1,501,140; July 15.

Scriven, Edward O., assignor to Western Electric Company, Incorporated, New York, N. Y. Oscillation generator. 1,501,729; July 15.

Segar, Bertram A., New York, N. Y., assignor to The Segar Studios Inc. Lighting-fixture part or similar article. Des. 65,202; July 15.

Segar Studios Inc., The. (See Segar, Bertram A., assignor.)

Seppmann, Alfred B., Lake Crystal, Minn. Piston-bushing extractor and replacer. 1,501,815; July 15.

Seppmann, Alfred B., Lake Crystal, Minn. Tool for inserting and removing valve pins. 1,501,816; July 15.

Severns, William, Chicago, Ill. Sander and polisher. 1,501,192; July 15.

Sévigné, Frederick J., Milford, N. H. Machine for marking round articles. 1,501,817; July 15.

Shannon, John R., Lowell, Ariz. Feed-water-heating system for locomotives. 1,501,193; July 15.

Shaw, Francis, and Company. (See Burnett, A. S., and Collins, assignors.)

Shaw, Frank B., Caledonia, assignor of one-half to C. C. Pierson, Wayland, Mich. Air pump. 1,501,546; July 15.

Shaw, James, and W. H. Harrison, Paterson, assignors of one-third to J. L. Wentz, Passaic, N. J. Safety-shuttle-control attachment for textile looms. 1,501,572; July 15.

Sheehy, William J., et al. (See Bostian, Homer C., assignor.)

Sherman, Phillip, Toledo, Ohio. Headlight bulb. 1,501,245; July 15.

Shipley, Henry C. (See Dunning, I. W., and Shipley.)

Shoe Hardware Company, The. (See Rutherford, Eugene W., assignor.)

Short, Charles R., Dayton, Ohio, and R. C. Darnell, Detroit, Mich., assignors to General Motors Research Corporation, Dayton, Ohio. Priming cock. 1,501,526; July 15.

Short, Charles R., Dayton, Ohio, and A. Taub, assignors to General Motors Corporation, Detroit, Mich. Internal-combustion engine. 1,501,884; July 15.

Siebert, Werner, Laufenburg, Aaryau, assignor to Nitrum Aktiengesellschaft, Zurich, Switzerland. Electrode for high-tension arc furnaces. 1,501,420; July 15.

Siegel, Philip, Guttenberg, N. J. Grinding wheel. 1,501,730; July 15.

Siekmann, Herman A. G., West Hoboken, N. J. Internal-combustion engine. 1,501,626; July 15.

Silverman, David R. (See Silverman, Nathaniel L., assignor.)

Silverman, Jacob J., administrator. (See Silverman, Nathaniel L.)

Silverman, Nathaniel L., deceased, by J. J. Silverman, administrator, assignor to D. R. Silverman, Boston, Mass. Safety pin. 1,501,627; July 15.

Skach, Frank, Chicago, Ill. Oven. 1,501,628; July 15.

Skinner, Larkin J., Fletcher, Okla. Primer and air intake for gas engines. 1,501,376; July 15.

Smilack, Abraham. (See Tefft, Frederick A., assignor.)

Smith, A. L., Iron Works, The. (See Smith, Arthur L., assignor.)

Smith, Arthur L., assignor to The A. L. Smith Iron Works, Chelsea, Mass. Column cap. 1,501,194; July 15.

Smith, Arthur M., assignor to Marshall & Stearns Company, San Francisco, Calif. Riser. 1,501,498; July 15.

Smith, Harry A., Mondovi, Wash. Washing attachment for tubs. 1,501,471; July 15.

Smith, John C., Memphis, Tenn. Holder. 1,501,629; July 15.

Smith, John H., Detroit, Mich. Punctureproof tire. 1,501,069; July 15.

Smith, Seward, Oakland, Calif. Egg-turning device. 1,501,292; July 15.

Smith, Walter S., Columbus, Ohio. Scale. 1,501,141; July 15.

Smyth, Joseph E., Company. (See Paulsen, Gustav A., assignor.)

Snook, Homer C., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum pump. 1,501,071; July 15.

Snook, Homer C., South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum pump. 1,501,071; July 15.

Soapitor Company. (See Gluck, Edward V., assignor.)

Société Chimique de la Grande Paroisse. (See Haas, Louis, assignor.)

Société d'Etudes Chimiques pour l'Industrie. (See Breslauer, J., and Goudet, assignors.)

Societe l'Air Liquide (Societe Anonyme pour l'Etudé et l'Exploitation des Procedes Georges Claude.) (See Claude, Georges, assignor.)

Soderberg, Jacob, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Making glass-mold plungers. 1,501,246; July 15.

Soulek, Andrew A., and K. A. Hoblit, Lincoln, Nebr. Aerial advertiser. 1,501,818; July 15.

Souter, Alwin F., Hackensack, N. J., assignor to E. & J. Bass, Inc. Salt shaker or similar article. Des. 65,203; July 15.

Spaulding, Nathaniel W. (See Malby, S. G., and Spaulding.)

Speicher, Matz A. (See Weimer, R. E., and Speicher.)

Sperry, John A., Munnsville, N. Y. Molding jacket. 1,501,731; July 15.

Sprague, Frank N., Holyoke, Colo. Automobile spring construction. 1,501,819; July 15.

Staack, Richard, Lead Coating Works. (See Staack, Richard, assignor.)

Staack, Richard, North Bergen, N. J., assignor to Richard Staack Lead Coating Works. Coating metals, flux therefor, etc. 1,501,293; July 15.

Stafford, Archie C., Watertown, N. Y. Stickpin. 1,501,142; July 15.

Stake, Fred C., H. B. Kinyoun, and J. P. Reynolds, Crook, Colo. Valve-spring compressor. 1,501,143; July 15.

Stanbon, Harry R., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Preparation of shoe parts. 1,501,072; July 15.

Stench, Alexander, Boston, Mass. Auto fender. 1,501,820; July 15.

Stead, Aquila M., Cordele, Ga. Funnel strainer. 1,501,073; July 15.

Stearn, Franklin A., Paterson, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,501,871; July 15.

Steinberger, Louis, Brooklyn, N. Y. Column-strain insulator. 1,501,688; July 15.

Steinberger, Louis, Brooklyn, N. Y. Column-strain insulator. 1,501,732; July 15.

Steingruber, George, Atlanta, Ga. Interchangeable demountable rim. 1,501,821; July 15.

Sterner, Simon A. E. (See Lindström, K. I., and Sterner.)

Stimpson, Edwin B., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Riveting machine. 1,501,421; July 15.

Stimpson, Edwin B., Company. (See Stimpson, Edwin B., assignor.)

Stockholms Superfosfat Fabriks Aktiebolag. (See Thorin, Erik G., assignor.)

Stokely, Ray L., Floral Park, Long Island, assignor to Western Electric Company, Incorporated, New York, N. Y. Machine-switching telephone-exchange system. 1,501,074; July 15.

Stoll, Fred S., assignor to W. W. Wilson, Los Angeles, Calif. Rotary rock drill. 1,501,630; July 15.

Stone, Louis E., Ashland, Ky. Air-cleaning device for automotive motors. 1,501,144; July 15.

Stott, William J., Worcester, Mass. Pocket. 1,501,247; July 15.

Stout, Frank F. (See Stout, Wilson D. and F. F.)

Stout, Wilson D. and F. F., Los Angeles, Calif. Vehicle signal. 1,501,377; July 15.

Strauss, Joseph B., Chicago, Ill. Observation apparatus. 1,501,145; July 15.

Strong, Ernest G., assignor to The Timken Roller Bearing Company, Canton, Ohio. Device for burnishing surfaces of rolls for roller bearings. 1,501,690; July 15.

Strong, William J. H., Chicago, Ill. Controlling propellers. 1,501,248; July 15.

Strother, John T., Nocnm, Va. Air brake for automobiles. 1,501,146; July 15.

Strout, Robert W., assignor to E. W. Bliss Company, Brooklyn, N. Y. Key clutch. 1,501,422; July 15.

Sturtevant, Thomas E., assignor to McKiernan-Terry Drill Company, Dover, N. J. Drill. 1,501,075; July 15.

Submarine Signal Company. (See Fessenden, Reginald A., assignor.)

Sulentic, Nicholas, Waterloo, Iowa. Manipulating device for springs. 1,501,249; July 15.

Sun Rise Lamp Mfg. Co. (See Lipsky, Norman, assignor.)

Sunset Lighting Fixture Company. (See Collins, Frank, assignor.)

Swift, George W., jr., assignor to George W. Swift, Jr., Inc., Bordentown, N. J. Web-folding machine. 1,501,499; July 15.

Swift, George W., jr., assignor to George W. Swift, Jr., Inc., Bordentown, N. J. Mechanism for making impressions upon traveling sheets or webs. 1,501,500; July 15.

Swift, George W., jr., assignor to George W. Swift, Jr., Inc., Bordentown, N. J. Web-punching mechanism. 1,501,501; July 15.

Swift, George W., Jr., Inc. (See Swift, George W., jr., assignor.)

Swift, James P., Millstone, Ky. Switch frog. 1,501,822; July 15.

Tallsman, Samuel, San Bernardino, Calif. Animal trap. 1,501,378; July 15.

Tamberlin, John, assignor to The George W. Blabon Company, Philadelphia, Pa. Inlaid-linoleum machinery. 1,501,423; July 15.

Tansill, Stuart (See Ellis, Herbert R., assignor.)

Taub, Alex. (See Short, C. R., and Taub.)

Taylor, Harvey B., Philadelphia, Pa. Fluid-pressure control system. 1,501,147; July 15.

Taylor, Isaiah H., Baltimore, Md. Porch-floor protector. 1,501,373; July 15.

Taylor, Israel B., Buffalo, N. Y. Gas burner. 1,501,631; July 15.

Tebo, William A., Anthony, R. I. Hand-threading shuttle. 1,501,424; July 15.

Techno-Chemical Laboratories Limited. (See Boberg, Teofron, assignor.)

Techno-Chemical Laboratories Limited. (See Testrup, Nils, assignor.)

Tefft, Frederick A., assignor to A. Smilack, Toledo, Ohio. Extensible switch box. 1,501,250; July 15.

Terhorst, George C. and G. W., Pittsburgh, Pa. Electrical switch. 1,501,148; July 15.

Terhorst, George W. (See Terhorst, George C. and G. W.)

Ternstedt Mfg. Co. (See Edgar, F. M., and Andersen, assignors.)

Teruya, Jenshiro, Coney Island, Brooklyn, N. Y. Amusement apparatus. 1,501,823; July 15.

Testrup, Nils, London, assignor to The Techno-Chemical Laboratories Limited, Clapham Park, London, England. Method and apparatus for evaporating liquids. 1,501,515; July 15.

Tefer, Leland D., Livingstonville, N. Y. Stone gatherer. 1,501,379; July 15.

Tetzlaff, Benjamin A. (See Vitek, Charles, assignor.)

Thatcher, Charles J., New York, N. Y. Producing paramidophenol and its compounds. 1,501,472; July 15.

Thomas, Christopher A., East Macon, assignor of one-third to E. Warren, Macon, Ga. Toilet for passenger cars. 1,501,150; July 15.

Thompson, Frederick H., Chicago, Ill. Locking means for carriage bolts. 1,501,149; July 15.

Thompson, George K., Maplewood, N. J., assignor to American Telephone and Telegraph Company. Desk stand for hand telephones. Des. 65,204; July 15.

Thompson, Harry H. (See Benner, R. C., and Thompson.)

Thompson, Moreton R., et al. (See Bridge, Arthur F., assignor.)

Thompson, Parke H. (See Headley, B. T., and Thompson.

Thompson, Robert H. (See Corby, H. J., and Thompson.)

Thompson, Sylvester V., San Diego, Calif. Hydraulic jack. 1,501,151; July 15.

Thorin, Erik G., Mansbo, Avesta, assignor to Stockholms Superfosfat Fabriks Aktiebolag, Stockholm, Sweden. Manufacturing acetaldehyde from acetylene. 1,501,502; July 15.

Thorsell, Lars W., Waterbury, Conn. Paper ornament. 1,501,231; July 15.

Thropp, John E., assignor to The De Laski & Thropp Circular Woven Tire Company, Trenton, N. J. Fabric-laying attachment for tire-making machines. 1,501,574; July 15.

Timken Roller Bearing Company, The. (See Strong, Ernest G., assignor.)

Tincher, Chester A., Seattle, Wash. Syrup-spout closure. 1,501,473; July 15.

Tingue Manufacturing Company. (See Fauser, Gustave M., assignor.)

Titanium Pigment Company. (See Doremus, Charles A., assignor.)

Tobey, Harry W., Pittsfield, Mass., assignor to General Electric Company. Apparatus for resistance line welding. 1,501,872; July 15.

Tobien, Felix. (See Schön, L., and Tobien.)

Townsend, Herbert E., East Providence, assignor to Brown and Sharpe Manufacturing Company, Providence, R. I. Footstock. 1,501,076; July 15.

Townsend, John R., South Bend, Ind., assignor to George Cutter Company. Lighting standard. Des. 65,205; July 15.

Traver, Oliver C., Schenectady, N. Y., assignor to General Electric Company. Relay. 1,501,733; July 15.

Trick, Edgar H., San Antonio, Tex. Shoe cleaner. 1,501,152; July 15.

Trowbridge, Edwin G., assignor to Medford Iron Works, Medford, Ore. Quartz mill. 1,501,503; July 15.

Truax, Harlow E., Bremerton, Wash. Motor-meter lens. 1,501,504; July 15.

Trundle, George T., jr., Cleveland, Ohio, assignor, by mesne assignments, to Pratt & Whitney Company, New York, N. Y. Thread-milling machine. 1,501,252; July 15.

Tung Foon Company. (See Cunningham, H. J., and Rosen, assignors.)

Turner, Ernest J. (See Howard, B. H., and Turner.)

Tutelman, Carl, Philadelphia, Pa. Shirt. 1,501,380; July 15.

Tween, Oscar H., Chicago, Ill. Cue tenoning and trimming machine. 1,501,632; July 15.

Tyer, John J., Greensboro, N. C. Making boxes. 1,501,294; July 15.

Tyler, Thaddeus F., Haverhill, Mass. Heel-drying apparatus. 1,501,633; July 15.

Tyrer, Daniel, Stockton-upon-Tees, England. Manufacture of red oxide of iron. 1,501,873; July 15.

Underwood Typewriter Company. (See Campbell, George W., assignor.)

Underwood Typewriter Company. (See Johnson, Arthur A., assignor.)

Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)

Underwood Typewriter Company. (See Waldheim, John, assignor.)

United Cigarette Machine Co. (See Ruau, Félix, assignor.)

United Engineering and Foundry Company. (See Moses, Richard W., assignor.)

United Shoe Machinery Corporation. (See Duplessis, René E., assignor.)

United Shoe Machinery Corporation. (See Johnson, Merton E., assignor.)

United Shoe Machinery Corporation. (See Jorgensen, Bernhardt, assignor.)

United Shoe Machinery Corporation. (See Lund, Thomas, assignor.)

United Shoe Machinery Corporation. (See McVicar, Everett W., assignor.)

United Shoe Machinery Corporation. (See Morrill, Charles H., assignor.)

United Shoe Machinery Corporation. (See Ross, Isaac, assignor.)

United Shoe Machinery Corporation. (See Stanbon, Harry R., assignor.)

United States Ferro-Alloy Corporation. (See Petinot, Napoleon, assignor.)

Upton, Curtis P. (See Duncan, L., and Upton.)

Upton, Henry J., Medford, assignor to Vaughn-Upton Company, Boston, Mass. Thermometer case. 1,501,824; July 15.

Utendörfer, Wilhelm, Cologne, Germany. Coloring iron and steel black. 1,501,425; July 15.

Van Billiard, Morris H., Bethlehem, Pa. Threadless bolt. 1,501,634; July 15.

Van Dusen, Elizabeth, Los Angeles, Calif. Corset. 1,501,381; July 15.

Van Emon, Ray C., Porterville, Calif. Device for tightening auto wheels. 1,501,253; July 15.

Van Inwagen, Charles L., jr., Rutherford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Conveyer. 1,501,077; July 15.

Van Ness, Henry E., assignor to Eclipse Machine Company, Elmira, N. Y. Engine-starter pinion. 1,501,153; July 15.

Van Rossum, Frank L. (See Kugler, T., and Van Rossum.)

Vaughan, Henry M., Newton, Iowa. Washing machine. 1,501,254; July 15.

Vaughn-Upton Company. (See Upton, Henry J., assignor.)

Van Winkle, William A., assignor to The Dow Chemical Company, Midland, Mich. Making novocaine. 1,501,635; July 15.

Vennes, Harald J., Westmount, Quebec, Canada, assignor to Western Electric Company, Incorporated, New York, N. Y. Selective transmission of electric waves. 1,501,691; July 15.

Vernier, George E. (See Cullen, Ernest E., assignor.)

Vestal, George R., Owensboro, Ky. Penholder. 1,501, July 15.

Vink, Cornelius W. (See Dooley, Joseph R., assignor.)

Vitek, Charles, Maywood, Ill., assignor, by mesne assignments, to B. A. Tetziaff, Green Bay, Wis. Electrical ground-connection clamp. 1,501,636; July 15.

Voss, Johann H. H., New York, N. Y. High-speed compressor. 1,501,078; July 15.

Wade, Franklin S., et al. (See Bridge, Arthur F., assignor.)

Wagner, Frank, Vancouver, British Columbia, Canada. Automobile fender. 1,501,154; July 15.

Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Carbon paper. 1,501,575; July 15.

Wallace, David. (See Friedman, L., and Wallace.)

Wallace, Hugh. (See Hunt, J. H., and Wallace.)

Walle, Ludwig S., Schenectady, N. Y., assignor to General Electric Company. Electric-switch-controlling mechanism. 1,501,734; July 15.

Wallin, Joel L., assignor to G. Earl, St. Paul, Minn. Shoe-rest cabinet. 1,501,637; July 15.

Walliser, Carl O. and R. E., assignors to H. F. Walliser Company, Chicago, Ill. Bullion-fringe loom. 1,501,426; July 15.

Walliser, H. F., Company. (See Walliser, Carl O. and R. E., assignors.)

Walliser, Robert E. (See Walliser, Carl O. and R. E.)

Walters, Percy, Yonkers, N. Y. Ignition means for internal-combustion engines. 1,501,505; July 15.

Ward, Henry L., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrode. 1,501,692; July 15.

Wardenburg, Frederic A., Wilmington, Del., assignor to General Motors Corporation, Detroit, Mich. Apparatus for refrigeration. 1,501,874; July 15.

Warner, Chester E. (See Benjamin, R. B., and Warner.)

Warner, S. C., administrator. (See Canning, John E.)

Warr, Harold G., Park Ridge, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,501,255; July 15.

Warren, Ebb. (See Thomas, Christopher A., assignor.)

Waterbury Farrel Foundry and Machine Company, The. (See Wilcox, Richard L., assignor.)

Waters, Roberts A., and C. V. Lucius, Canton, Ohio. Brake-relining machine. 1,501,079; July 15.

Watkins, Eldon R., Kingman, Kans. Automatic whistle-actuating mechanism for locomotives. 1,501,506; July 15.

Watters, Leon L., assignor to Hospital Supply Company and Watters Laboratories Consolidated, New York, N. Y. Bedpan cleanser and sterilizer. 1,501,826; July 15.

Weeks Manufacturing Company. (See Winning, Robert K., assignor.)

Weiland, Alfred. (See Eckrode, C. E., Acken, and Weiland.)

Weimer, Robert E., and M. A. Speicher, assignors to Weimer-Warren Company, Colliers, W. Va. Rheostat. 1,501,638; July 15.

Weimer-Warren Company. (See Weimer, R. E., and Speicher, assignor.)

Welsh, Robert. (See Durnell, C. M., and Welsh.)

Wentz, Jere L. (See Shaw, J., and Harrison, assignors.)

Western Blower Company. (See Kaup, Edgar O., assignor.)

Western Electric Company. (See Albert, Walter P., assignor.)

Western Electric Company. (See Campbell, Thaddeus C., assignor.)

Western Electric Company. (See Conway, Roy D., assignor.)

Western Electric Company. (See Goodrum, Charles L., assignor.)

Western Electric Company. (See Harlow, John B., assignor.)

Western Electric Company. (See Heising, Raymond A., assignor.)

Western Electric Company. (See Johnson, Kenneth S., assignor.)

Western Electric Company. (See Keller, Leo, assignor.)

Western Electric Company. (See Kelsall, George A., assignor.)

Western Electric Company. (See Long, Maurice B., assignor.)

Western Electric Company. (See Lum, George R., assignor.)

Western Electric Company. (See Lundell, A. E., and Clark, assignors.)

Western Electric Company. (See Lysons, Noel H., assignors.)

Western Electric Company. (See Murphy, Paul B., assignor.)

Western Electric Company. (See Oswald, Arthur A., assignor.)

Western Electric Company. (See Snook, Homer C., assignor.)

Western Electric Company. (See Stearn, Franklin A., assignor.)

Western Electric Company. (See Stokely, Ray L., assignor.)

Western Electric Company. (See Van Inwagen, Charles L., jr., assignor.)

Western Electric Company. (See Ward, Henry L., assignor.)

Western Electric Company. (See Whiting, Donald F., assignor.)

Western Electric Company. (See Wilbur, Ray S., assignor.)

Western Electric Company, Incorporated. (See Cummings, George C., assignor.)

Western Electric Company, Incorporated. (See Lundell, A. E., and Wynne, assignors.)

Western Electric Company, Inc. (See Mortimer, Louis A., assignor.)

Western Electric Company, Incorporated. (See Scriven, Edward O., assignor.)

Western Electric Company, Incorporated. (See Vennes, Harald, assignor.)

Western Union Telegraph Company, The. (See Murray, Donald, assignor.)

Westinghouse Air Brake Company. (See Bartholomew, John R., assignor.)

Westinghouse Air Brake Company. (See Woernley, Harry F., assignor.)

Westinghouse Electric & Manufacturing Company. (See Boddie, Clarence A., assignor.)

Westinghouse Electric & Manufacturing Company. (See Brace, Porter H., assignor.)

Westinghouse Electric and Manufacturing Company. (See Chubb, Lewis W., assignor.)

Westinghouse Electric & Manufacturing Company. (See Gudge, B. J., and Guest, assignors.)

Westinghouse Lamp Company. (See Roesch, George B., assignor.)

Wetherbee, Carolyn E., Gardner, Mass. Stiffener for caps. 1,501,507; July 15.

Wharton, William, Jr., & Co. (See Psilander, Charles A., assignor.)

Wheary-Burge Trunk Company. (See Wheary, George H., assignor.)

Wheary, George H., assignor to Wheary-Burge Trunk Company, Racine, Wis. Curtain and laundry bag. 1,501,256; July 15.

Wheary, George H., assignor to Wheary-Burge Trunk Company, Racine, Wis. Trunk-shoe-box retaining means. 1,501,257; July 15.

Whisler, Chauncy P., Kenmore, assignor to The Miller Rubber Company, Akron, Ohio. Soft-headed mallet. 1,501,827; July 15.

Whisler, William H., Houston, Tex. Shock absorber. 1,501,382; July 15.

White, Daly O., Portland, Me. Motor fuel. 1,501,383; July 15.

White, John W., and L. H. Gaylord, assignors to General Motors Corporation, Detroit, Mich. Brake mechanism for motor vehicles. 1,501,885; July 15.

White, William C. Schenectady, N. Y., assignor to General Electric Company. Wireless signaling system. 1,501,735; July 15.

Whitehead, Alexander G. (See Ingham, W. E., and Whitehead.)

Whiteley, James L. (See Brockman, Daniel C., assignor.)

Whiteley, Wade H. (See Redmon, Claude F., L. K., C. G., and J. T., assignors.)

Whiting, Bradford H., Chicago, assignor to Whiting Corporation, Harvey, Ill. Rope guard for crane trolleys. 1,501,736; July 15.

Whiting Corporation. (See Whiting, Bradford H., assignor.)

Whiting, Donald F., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical testing system. 1,501,576; July 15.

Wickham, Morris W., Buffalo, N. Y. Nursing-bottle holder. 1,501,080; July 15.

Wicksteed, Charles, & Company (1920) Limited. (See Robins, Charles H., assignor.)

Wiegand, August J. (See Grunow, W. C., and Wiegand.)

Wilbur, Ray S., Lyndhurst, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone transmission system. 1,501,693; July 15.

Wilcox, Richard L., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Means and method for trimming blanks. 1,501,081; July 15.

Williams, William E., assignor to American Steel Foundries, Chicago, Ill. Demountable-rim disk wheel. 1,501,082; July 15.

Williamson, James, et al. (See Robbins, Patrick, assignor.)

Wills, James M., Ottawa, Ontario, Canada. Lifting jack. 1,501,155; July 15.

Wills, Joseph F., North Little Rock, Ark. Combination bait cup and trigger. 1,501,384; July 15.

Wilmot Engineering Company. (See Wilmot, George W., assignor.)

Wilmot, George W., assignor to Wilmot Engineering Company, Hazleton, Pa. Coal jig. 1,501,577; July 15.

Wilson, Albert R. (See Kean, O., and Wilson.)

Wilson, Fred D. (See Beatty, W. T., Davis, and Wilson.)

Wilson, John A., Elizabeth, assignor to Duratex Corporation, Newark, N. J. Flexible covering material and making same. 1,501,156; July 15.

Wilson, Samuel, Brooklyn, N. Y. Composition for the destruction of insects, fungi, and the like and applying the same. 1,501,427; July 15.

Wilson, William E., Mount Rainier, Md. Focusing view finder. 1,501,295; July 15.

Wilson, William W. (See Stoll, Fred S., assignor.)

Winning, Robert K., assignor, by mesne assignments, to Weeks Manufacturing Company, Milwaukee, Wis. Liquid-feeding device. 1,501,683; July 15.

Wintermeyer, Charles. (See Rich, Charles C., assignor.)

Wirth, Johannes, Hamburg, Germany. Indicator for barometer. Des. 65,206; July 15.

Wisoff, Julius, Brooklyn, N. Y. Retractor. 1,501,428; July 15.

Woernley, Harry F., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Electric coupling for cars. 1,501,157; July 15.

Wohlers, Friedrich H. N., Jamaica, N. Y., assignor to Dictograph Products Corporation. Signal system for telephones and the like. 1,501,694; July 15.

Wolfe, Arthur J., assignor to Decorative Fixture Company, Chicago, Ill. Display stand. 1,501,258; July 15.

Wolff, Ernest A. (See Cox, Sirrel T., assignor.)

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Lantern. Des. 65,207; July 15.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Canopy for lighting fixtures. Des. 65,208; July 15.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Lighting-fixture body. Des. 65,209; July 15.

Wolter, Herman H., Meriden, Conn., assignor to The Miller Company, New York, N. Y. Bobesche. Des. 65,210; July 15.

Wolter, Herman H., and G. P. Norton, Meriden, Conn., assignors to The Miller Company, New York, N. Y. Lamp base. Des. 65,211; July 15.

Wood, R. D., and Company. (See Schranz, Charles A.)

Wood, Walter. (See Schranz, Charles A., assignor.)

Woodson, Robert E., Webster Groves, Mo. Nut-cracking machine. 1,501,259; July 15.

Woolson, Lionel M., Dayton, Ohio, assignor, by mesne assignments, to The Dayton Engineering Laboratories Company. Electrical system for aircraft. 1,501,508; July 15.

Worthington Pump and Machinery Corporation. (See Brigham, Nelson E., assignor.)

Wreesmann, Ferdinand, Munich, Germany. Device for desiccating liquid substances. 1,501,875; July 15.

Wreesmann, Ferdinand, Munich, Germany. Method and device for evaporating the volatile constituents of solutions, emulsions, and suspensions. 1,501,876; July 15.

Wright, Bertram S., Sacramento, Calif. Nonglare lens. 1,501,385; July 15.

Wright, Coral H., Joseph, Idaho. Grass divider for mowers. 1,501,386; July 15.

Wright, Edgar R., Glenrock, Wyo. Oil burner. 1,501,509; July 15.

Wright, Frank H., and F. A. Keller, assignors, by mesne assignments, to National Carbon Company, Inc., New York, N. Y. Dry-cell battery and assembling the same. 1,501,084; July 15.

Wright, George H., Spokane, Wash. Seed planter. 1,501,828; July 15.

Wright, Herbert E., Melrose, assignor to Wright-Ziegler Company, Boston, Mass. Metal container. 1,501,829; July 15.

Wrighton, William J., assignor to American Optical Company, Southbridge, Mass. Lens mounting. 1,501,085; July 15.

Wright & Smith Machine Works. (See Picht, Frederick W., assignor.)

Wright-Ziegler Company. (See Wright, Herbert E., assignor.)

Wurdack, William, St. Louis, Mo. Screw-driver machine. 1,501,695; July 15.

Wurzer, Joseph. (See Klocke, A. A., and Wurzer.)

Wynne, James J. (See Lundell, A. E., and Wynne.)

Yardell, Charles A., Utica, N. Y. Hydraulic distributing valve. 1,501,158; July 15.

Yawman & Erbe Manufacturing Co. (See Schaffert, Adolf H., assignor.)

Yerkes, Hulbert A., Forest Hills, N. Y., assignor, by mesne assignments, to Columbia Phonograph Company, Inc. Phonograph cabinet. Des. 65,212; July 15.

Zenke, Henry C., Richmond Hill, N. Y. Pig. 1,501,387; July 15.

Zepka, Ludwig R., Cleveland, Ohio. Theft signal. 1,501,296; July 15.

Zepp, Levigne M., Baltimore, Md. Mixing machine. 1,501,578; July 15.

Zimmerman, Joseph, Dayton, Ohio. Gasoline-cleaning composition. 1,501,086; July 15.

Zoul, Charles V., Santa Monica, Calif. De-emulsifying liquids. 1,501,877; July 15.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 15TH DAY OF JULY, 1924.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasive elements, Producing. C. G. Olson. 1,501,229; July 15.
Abrasive helicoids, Machine for producing. C. G. Olson. 1,501,230; July 15.
Acetaldehyde from acetylene, Manufacturing. E. G. Thorin. 1,501,502; July 15.
Acid and making same, 6, 8-Dimethyl-2-phenylquinoline-4-carboxylic. M. L. Crossley. 1,501,274; July 15.
Acid and producing same, Ester of 6,8-dimethyl-2-phenylquinoline-4-carboxylic. M. L. Crossley. 1,501,275; July 15.
Addressing machine or like printing machine. L. M. Barman. 1,501,697; July 15.
Adjustable chair. L. Feasel. 1,501,533; July 15.
Aerial advertiser. A. A. Soulek and K. A. Hoblit. 1,501,818; July 15.
Aeroplane structure. M. C. Baumann and H. M. Rinehart. 1,501,549; July 15.
Agricultural implement. H. Ferguson. 1,501,651–2; July 15.
Agricultural implement. J. A. McDonald. 1,501,224; July 15.
Air-cleaning device for automotive motors. L. E. Stone. 1,501,144; July 15.
Aircraft carriage. C. Dornier. 1,501,397; July 15.
Aircraft, Electrical system for. L. M. Woolson. 1,501,508; July 15.
Aircraft, Landing skid for amphibian. R. P. Lewis. 1,501,608; July 15.
Aircraft observation window. V. E. Clark. 1,501,522; July 15.
Air into its constituents, Apparatus for separation of. J. G. Lafferty. 1,501,415; July 15.
Air, Method of and apparatus for conditioning. L. Helmer. 1,501,660; July 15.
Air-sealing means. A. Kingsbury and H. A. S. Howarth. 1,501,404; July 15.
Air washer. B. S. Harrison. 1,501,110; July 15.
Air washer. E. O. Kaup. 1,501,559; July 15.
Airplane. V. E. Clark. 1,501,523; July 15.
Airplane. I. H. Driggs. 1,501,530; July 15.
Alarm device. D. A. Alexander. 1,501,260. July 15.
Ammonia synthesis. G. Claude. 1,501,436; July 15.
Amusement apparatus. J. Teruya. 1,501,823. July 15.
Amusement ride. H. F. Maynes. 1,501,613. July 15.
Animal-ringing tool. F. Peterson. 1,501,386; July 15.
Animal trap. V. C. Garrison. 1,501,213; July 15.
Animal trap. M. Matejewski. 1,501,463; July 15.
Animal trap. P. J. Nicholas and W. Jones. 1,501,882; July 15.
Animal trap. S. Talisman. 1,501,378; July 15.
Anklet. V. Guinzburg. Des. 65,184; July 15.
Antikicking device for animals. E. H. Harford. 1,501,772; July 15.
Antirattling device. F. M. Edgar and A. C. Andersen. 1,501,322; July 15.
Antiskid device. D. H. Good. 1,501,594; July 15.
Antiskid device. E. W. Hanley. 1,501,771; July 15.
Apparel, Wearing. D. H. Hodes. 1,501,113; July 15.
Arch support. H. A. Freese. 1,501,765; July 15.

Oven. F. Skach. 1,501,628; July 15.
Oven, Mechanical baking. J. Jirasek. 1,501,456; July 15.
Overlay for half-tone printing. J. B. Neale. 1,501,615; July 15.
Oxide of iron, Manufacture of red. D. Tyrer. 1,501,873; July 15.
Packer. C. E. Frazier. 1,501,481; July 15.
Packing. C. C. Hall. 1,501,541-2; July 15.
Paper, Carbon. J. Waldheim. 1,501,575; July 15.
Paper, Impregnating. L. C. Koplin. 1,501,493; July 15.
Paper-ornament. L. W. Thorsell. 1,501,251; July 15.
Paper-roll holder and tearing device, Wrapping-. W. C. Pickell. 1,501,619; July 15.
Paper shade roller and forming. H. C. Brenneman. 1,501,391; July 15.
Papers and other fabrics, Machine for sensitizing. B. J. Hall. 1,501,332; July 15.
Parachute and means for launching same. F. E. Best. 1,501,421; July 15.
Paramidophenol and its compounds, Producing. C. J. Thatcher. 1,501,472; July 15.
Pasting battery grids, Slab for use in. C. C. Rich. 1,501,809; July 15.
Pavement and constructing the same. F. O. Ronk. 1,501,373; July 15.
Pencil. C. R. Keeran. 1,501,121; July 15.
Pencil, Metallic. F. Carroll. 1,501,745; July 15.
Penholder. G. R. Yestal. 1,501,825; July 15.
Pens, Adjustable feed for fountain. L. F. Evenson. 1,501,761; July 15.
Phonograph cabinet. H. A. Yerkes. Des. 65,212; July 15.
Phonographs, Automatic stopping mechanism for. W. C. Roe. 1,501,890; July 15.
Phonographs, Sound amplifier for. H. L. Page. 1,501,720; July 15
Picker: *See*—
Cotton picker.
Pig. H. C. Zenke. 1,501,387; July 15.
Pile fabric. J. Gowans. Des. 65,183; July 15.
Pillow. K. C. Kiar. Des. 65,192; July 15.
Pin: *See*—
Safety pin.
Pipe: *See*—
Smoking pipe.
Pipe and nut wrench, Adjustable. D. E. St. Jacques. 1,501,689; July 15.
Pipe-cleaning device. D. G. Marks. 1,501,354; July 15.
Pipe-threading machine. J. S. Imlach. 1,501,218; July 15.
Piston-bushing extractor and replacer. A. B. Sappmann. 1,501,815; July 15.
Plait holder. M. Dworin. 1,501,044; July 15.
Planter, Potato. W. Hartenstein. 1,501,335; July 15.
Plastic containing cellulose acetate. H. Dreyfus. 1,501,206; July 15.
Plating stainless steel and articles produced thereby. A. Harper. 1,501,049; July 15.
Plug cluster. R. B. Benjamin and C. E. Warner. Des. 65,156; July 15.
Pocket. W. J. Stott. 1,501,247; July 15.
Poultry house. J. L. Boisvert. 1,501,742; July 15.
Powder blower. C. F., L. K., C. G., and J. T. Redmon. 1,501,136; July 15.
Powder, Container for holding and delivering. F. A. Bolton. 1,501,390; July 15.
Power device. L. S. Keilholtz. 1,501,851; July 15.
Precious-stone setting. A. D. Leveridge. Des. 65,193; July 15.
Presser foot. H. Heller. 1,501,557; July 15.
Pressing machine. E. E. Parker. 1,501,685; July 15.
Pressure-operating device. C. C. Runner. 1,501,239; July 15.
Printing machine. G. E. Pancoast. 1,501,617; July 15.
Profiling tools, Automatic machine for. M. U. Ramsay and D. M. Moeglen. 1,501,496; July 15.
Propeller and the like, Metal air. H. Leitner. 1,501,606; July 15.
Propellers, Controlling. W. J. H. Strong. 1,501,248; July 15.
Pulley. T. Olinger. 1,501,290; July 15.
Pulverizer and mulcher. H. M. Lofton. 1,501,055; July 15.
Pulverulent materials, Drying apparatus for. P. Scrive. 1,501,140; July 15.
Pump. N. E. Brigham. 1,501,435; July 15.
Pump, Air. F. B. Shaw. 1,501,546; July 15.
Pump, Circulating. M. A. Drees. 1,501,758; July 15.
Pump jack. C. Kuechler. 1,501,221; July 15.
Pump jack, Multiple balanced. E. A. Mulhaff. 1,501,226; July 15.
Pump-sealing means, Rotary. E. Hill. 1,501,051; July 15.
Pump, Vacuum. H. C. Snook. 1,501,070-1; July 15.
Punch, Can. J. M. Hanson. 1,501,598; July 15.
Punching die. E. C. Rudkin. 1,501,241; July 15.
Puzzle. W. H. Brunn. 1,501,554; July 15.
Quartz mill. E. G. Trowbridge. 1,501,503; July 15.
Quick-acting wrench. F. H. Greve. 1,501,329; July 15.
Quoin. J. J. Curtis. 1,501,753; July 15.
Rack: *See*—
Tire rack.
Radiator, Electric steam. A. C. Hulbert. Des. 65,188; July 15.
Radio system, Multiplex. L. Espenschied. 1,501,104; July 15.
Radiotuners and the like, Adjusting device for. J. W. Hunt. 1,501,454; July 15.
Rail anchor. H. G. Warr. 1,501,255; July 15.
Rail-drilling apparatus. H. C. Bostian. 1,501,516; July 15.
Railway construction, Pleasure-. J. A. Miller. 1,501,061; July 15.
Railway crossing and alarm signal. W. W. Phillips. 1,501,367; July 15.
Railway cushion wheel. F. Mead and C. O. Guernsey. 1,501,861; July 15.
Railway rail. H. B. Bent. 1,501,092; July 15.
Railway-rail brace. J. R. Dooley. 1,501,319; July 15.

Railway structure, Pleasure-. J. A. Miller. 1,501,060; July 15.
Rakes and swath turners, Spring clip for tines for side-delivery. W. E. Martin. 1,501,612; July 15.
Razor. H. S. Hasselquist. 1,501,450; July 15.
Razor-blade holder. P. Kilimnik. 1,501,783; July 15.
Reels, Machine for making wire. J. A. Holmquist. 1,501,343; July 15.
Refrigerating apparatus. C. L. McCuen. 1,501,859; July 15.
Refrigeration, Apparatus for. F. A. Wardenburg. 1,501,874; July 15.
Refrigerator. C. L. Drachenberg. 1,501,320; July 15.
Regulator: *See*—
Current regulator.
Regulator system. C. A. Boddie. 1,501,264; July 15.
Relay. O. C. Traver. 1,501,733; July 15.
Relay, Polarized. N. H. Lysons. 1,501,126; July 15.
Release coupling. C. M. Heeter. 1,501,217; July 15.
Remote control system. A. A. Oswald. 1,501,683-4; July 15.
Retort, Shale. P. L. Bennett. 1,501,881; July 15.
Retractor. J. Wisoff. 1,501,428; July 15.
Reversible machine. O. Forkel. 1,501,534; July 15.
Rheostat. S. R. Hipple. 1,501,339; July 15.
Rheostat. R. E. Welmer and M. A. Speicher. 1,501,638; July 15.
Rim. B. Darrow. 1,501,478; July 15.
Rim breaking, contracting, and expanding device. C. O. Halling. 1,501,597; July 15.
Rim and making it, Coiled. H. D. Geyer and J. W. Lee. 1,501,593; July 15.
Rim, Interchangeable demountable. G. Steingruber. 1,501,821; July 15.
Ring: *See*—
Finger ring.
Ring mountings, Making. T. Mountford. 1,501,358; July 15.
Riser. A. M. Smith. 1,501,498; July 15.
Riveting machine. E. B. Stimpson. 1,501,421; July 15.
Road machines, Combination grader-maintainer blade for. W. T. Beatty. 1,501,262; July 15.
Road maintainer. W. T. Beatty, F. S. Davis, and F. D. Wilson. 1,501,261; July 15.
Rock drill, Rotary. F. S. Stoll. 1,501,630; July 15.
Ropeway and the like. W. L. Hamilton. 1,501,333; July 15.
Rotary blower and rotary engines. M. Güttner. 1,501,596; July 15.
Rubber aprons, Clasp for. E. W. Rutherford. 1,501,066; July 15.
Rubber substance and making the same, Gas-expanded vulcanized-. C. L. Marshall. 1,501,791; July 15.
Rule. J. H. McCaffrey. 1,501,712; July 15.
Rule, Folding. J. H. McCaffrey. 1,501,713; July 15.
Safety pin. N. L. Silverman. 1,501,627; July 15.
Salt shaker or similar article. A. F. Souter. Des. 65,203; July 15.
Salting machine. J. F. Anderson. 1,501,297; July 15.
Sander and polisher. W. Severns. 1,501,192; July 15.
Sanitary pipe fitting. A. E. MacDonald. 1,501,225; July 15.
Saw-blade holder. E. E. Cullen. 1,501,752; July 15.
Saw set and jointer. J. D. Hartwig. 1,501,112; July 15.
Saw teeth, Machine for grinding. J. O. Liffander. 1,501,564; July 15.
Scale. W. S. Smith. 1,501,141; July 15.
Scale, Weighing. E. C. Rowe and A. Mohr. 1,501,866; July 15.
Score-registering device for golf and the like. A. L. Eacrett. 1,501,398; July 15.
Scraper, Brick. M. Bellalbero. 1,501,195; July 15.
Scraper, Tube. L. H. A. Ducasse. 1,501,759; July 15.
Screen: *See*—
Oil-sump screen.
Screen. M. H. Harris. Des. 65,186; July 15.
Screw driver. S. C. Lamp. 1,501,222; July 15.
Screw-driver machine. W. Wurdack. 1,501,695; July 15.
Seed-corn drier. J. Greeley. 1,501,328; July 15.
Seed planter. G. H. Wright. 1,501,828; July 15.
Seeding machines, Draft-operated lifting device for. P. L. Hatfield. 1,501,279; July 15.
Separator: *See*—
Sheet separator.
Sewing machines, Feed mechanism for book-. G. A. Paulsen. 1,501,686; July 15.
Sewing machines, Visor holding and feeding mechanism for. W. C. Grunow and A. J. Wiegand. 1,501,710; July 15.
Sewing tray for automobiles. A. M. Inge. 1,501,116; July 15.
Shade bracket, Window-. C. M. Durnell and R. Welsh. 1,501,843; July 15.
Shaft coupling. T. C. Campbell. 1,501,647; July 15.
Sharpener, Knife. C. Chizewer. 1,501,749; July 15.
Sharpener, Pencil. S. K. Mathews. 1,501,792; July 15.
Sharpener, Razor-blade. G. G. Floyd. 1,501,045; July 15.
Shears. R. W. Moses. 1,501,714; July 15.
Sheet separator. E. Cheshire. 1,501,582; July 15.
Shipping container. G. B. Macdonald. 1,501,462; July 15.
Shirt. C. Tutelman. 1,501,380; July 15.
Shuttle, Hand-threading. W. A. Tebo. 1,501,424; July 15.
Shock absorber. C. E. Eckrode, T. L. Acken, and A. Weiland. 1,501,844; July 15.
Shock absorber. W. H. Whisler. 1,501,382; July 15.
Shoe cleaner. E. H. Trick. 1,501,152; July 15.
Shoe parts, Preparation of. H. R. Stanbon. 1,501,072; July 15.
Shoes, Device for softening. F. N. Savard. 1,501,139; July 15.
Shoes, Machine for operating upon. R. E. Duplessis. 1,501,042; July 15.
Short circuiter. E. P. Larsh. 1,501,284; July 15.
Shotguns, Peep sight for. A. Forin. 1,501,211; July 15.
Shower bath, Combination. R. G. Ferguson. 1,501,762; July 15.
Sieving screening and separating devices. C. E. V. Hall. 1,501,047; July 15.
Sifter, Flour. I. W. Farquharson. 1,501,166; July 15.
Sign, Illuminated. L. Duncan and C. P. Upton. 1,501,102; July 15.
Signal: *See*—
Bridge signal. Vehicle signal.
Theft signal.
Signaling apparatus, Electrical. F. N. Connet. 1,501,437; July 15.
Signal for railway crossings, Stop. H. Morris, A. Howard, and G. W. Gartman. 1,501,797; July 15.
Signaling circuits, Conjugate. L. Espenschied. 1,501,103; July 15.
Signaling system. P. B. Murphy. 1,501,132; July 15.
Signaling system. C. W. Rice. 1,501,726; July 15.
Sirup-spout closure. C. A. Tincher. 1,501,473; July 15.
Slicing machine. H. Robinson. 1,501,810; July 15.
Slicing machine, Removable cleanable meat holder or plate for. E. Moser. 1,501,289; July 15.
Sliding-jaw wrench. V. C. Garrison. 1,501,214; July 15.
Smoking pipe. V. K. Ramsey. 1,501,370; July 15.
Snap fasteners, Machine for attaching. A. Frankel. 1,501,445; July 15.
Snap hook, Spring-tongue. J. B. Baxter. 1,501,738; July 15.
Soap dispensing. E. V. Gluck. 1,501,657; July 15.
Socket wrench. J. M. Lallin. 1,501,788; July 15.
Sole-fitting machine. M. E. Johnson. 1,501,052; July 15.
Soles for shoes, Manufacture of. E. W. McVicar. 1,501,057; July 15.
Spark plug. C. F. Kettering. 1,501,491; July 15.
Spark plug. J. W. Powell. 1,501,368; July 15.
Speed-regulator system. C. A. Boddie. 1,501,263; July 15.
Speed-regulator system. C. A. Boddie. 1,501,265; July 15.
Spindle-driving mechanism. E. Atwood. 1,501,579; July 15.
Spot or searchlight assembly. O. H. Clarke. 1,501,704; July 15.
Spotlight. S. W. Hyatt. 1,501,411; July 15.
Spring: *See*—
Vehicle spring.
Spring. E. Kreissig. 1,501,220; July 15.
Spring locking device. S. M. Sawyer. 1,501,374; July 15.
Spring wheel. W. Childs. 1,501,583; July 15.
Springs, Manipulating device for. N. Sulentic. 1,501,249; July 15.
Sprinkler. L. Olschewski. 1,501,718; July 15.
Squeezer, Pulp and juice. D. I. Flatt. 1,501,210; July 15.
Stamp holder. J. J. Coffey. 1,501,100; July 15.
Stand: *See*—
Display stand. Tire-repair stand.
Standard stick control. M. C. Baumann. 1,501,550; July 15.
Staple for wire-fence concrete posts. W. H. James. 1,501,665; July 15.
Starting and generating system. W. A. Chryst. 1,501,520; July 15.
Statuette. A. A. Avery. Des. 65,155; July 15.
Steam-accumulator apparatus for steam plants. J. K. Ruths. 1,501,623; July 15.
Steam blower. H. M. Barr and G. Edgar. 1,501,090; July 15.
Steel and producing same. A. H. Coplan. 1,501,302; July 15.
Steels in electric furnaces, Manufacturing alloy. N. Petinot. 1,501,184; July 15.
Steering wheels, Timepiece holder for. G. A. Bell. 1,501,474; July 15.
Step jack, Adjustable. J. W. Bate. 1,501,548; July 15.
Sterilizing and processing apparatus, Pressure control for. H. Ingram. 1,501,412; July 15.
Stickpin. A. C. Stafford. 1,501,142; July 15.
Stippling machine. C. G. Hampson. 1,501,048; July 15.
Stone gatherer. L. D. Teter. 1,501,379; July 15.
Stove, Brooder. J. W. Branson. 1,501,434; July 15.
Strainer, Funnel. A. M. Stead. 1,501,073; July 15.
Straw spreader. A. Klocke and J. Wurzer. 1,501,460; July 15.
Signaling, Submarine. R. A. Fessenden. 1,501,105; July 15.
Suit box. C. E. Osburn. 1,501,134; July 15.
Switch: *See*—
Electrical switch.
Time and coin-controlled switch.
Switch box, Extensible. F. A. Tefft. 1,501,250; July 15.
Switch frog. J. P. Swift. 1,501,822; July 15.

Switches, Guardrail for. B. T. Gibbs, jr. 1,501,215; July 15.
Switching system. J. B. Harlow. 1,501,109; July 15.
Switching system. L. A. Mortimer. 1,501,174; July 15.
Tables, Chair attachment for. H. R. Ellis. 1,501,443; July 15.
Tackle box. W. O. Gorrell. 1,501,448; July 15.
Tag-stringing device. C. S. Patterson. 1,501,178; July 15.
Tail skid. E. H. Herbig. 1,501,601; July 15.
Tank: *See*—
Flushing tank.
Tanning. F. Hassler. 1,501,336; July 15.
Tap and cutter. C. G. Johnson. 1,501,117; July 15.
Tap, Liquid-delivery. C. Chambers. 1,501,310; July 15.

Tire, Emergency. J. W. Hannan and C. A. Notman. 1,501,399; July 15.
Tire-making machines, Fabric-laying attachment for. J. E. Thropp. 1,501,574; July 15.
Tire, Punctureproof. J. H. Smith. 1,501,069; July 15.
Tire rack, Automobile. J. Schwab. 1,501,470; July 15.
Tire-repair stand. H. B. Rex. 1,501,469; July 15.
Tire rim. H. J. Corby and R. H. Thompson. 1,501,272; July 15.
Tire rim. F. T. Murray. 1,401,360; July 15.
Tire valves, Dust cap for. E. V. Myers. 1,501,361; July 15.
Tire, Vehicle. E. G. Hulse. Des. 65,189–90; July 15.
Titanic-oxide concentrate and producing the same. C. A. Doremus. 1,501,587; July 15.
Tobacco stripping and booking machine. E. M. Deiller. 1,501,441; July 15.
Toilet article. M. E. Bassett. 1,501,547; July 15.
Toilet for passenger cars. C. A. Thomas. 1,501,150; July 15.
Tongs, Parallel double. V. Karapetoff. 1,501,458; July 15.
Tool holder. W. A. Peck. 1,501,465; July 15.
Toothbrush container. C. Bash. 1,501,835; July 15.
Top for containers, Sifter. H. P. Brawner. 1,501,037; July 15.
Toy dog. A. R. Jones. Des. 65,195; July 15.
Traction apparatus. E. H. Karrer. 1,501,120; July 15.
Tractor. B. H. Alexander. 1,501,639; July 15.
Tractors, Endless track for. A. M. Chase. 1,501,097; July 15.
Transformer. G. C. Cummings. 1,501,649; July 15.
Trap: *See*—
Animal trap.
Trestle for supporting a scaffold. H. L. Anderson. 1,501,088; July 15.
Trimming blanks, Means and method for. R. L. Wilcox. 1,501,081; July 15.
Trolley pole and the like. P. Robbins. 1,501,236; July 15.
Trolleys, Rope guard for crane. B. F. Whiting. 1,501,736; July 15.
Truck, Car. S. B. Brilhart. 1,501,744; July 15.
Truck, Hand. H. B. Sabin. 1,501,242; July 15.
Truck, Trailer. J. C. W. Hinshaw. 1,501,280; July 15.
Trunk-shoe-bag retaining means. G. H. Wheary. 1,501,257; July 15.
Type interrupter, Condenser-. L. W. Chubb. 1,501,270; July 15.
Typewriter. J. C. Reddick. 1,501,188; July 15.
Typewriter attachment. R. S. Coysh. 1,501,312; July 15.
Typewriting machine. A. A. Johnson. 1,501,666; July 15.
Typewriting machine. A. G. F. Kurowski. 1,501,562; July 15.
Typewriting machine. A. G. F. Kurowski. 1,501,671; July 15.
Typewriting machines, Hood for. G. W. Campbell. Des. 65,161; July 15.
Tubs, Washing attachment for. H. A. Smith. 1,501,471; July 15.
Tubular frames, Method and means for building. A. D. Meiselbach. 1,501,129; July 15.
Ullage rod. L. J. Le Clair. 1,501,407; July 15.
Umbrella. O. Kean and A. R. Wilson. 1,501,560; July 15.
Uppers over lasts, Machine for shaping. B. Jorgensen. 1,501,053; July 15.
Vacuum tubes, Manufacture and operation of. K. Rottgardt. 1,501,240; July 15.
Valve. T. R. Berry. 1,501,303; July 15.
Valve. H. D. Geyer. 1,501,592; July 15.
Valve. O. Jacobsen. 1,501,347; July 15.
Valve, Ejector. J. W. Cox. 1,501,040; July 15.
Valve facer. W. H. Beltz. 1,501,836; July 15.
Valve, Flush. E. F. Donnelly. 1,501,318; July 15.
Valve for automatic sprinkler systems. A. J. Loepsinger. 1,501,125; July 15.
Valve for refrigerating machines and the like, Expansion. C. L. McCuen. 1,501,858; July 15.
Valve, Gas and air reversing. W. G. Bergman. 1,501,552; July 15.
Valve, Hydraulic distributing. C. A. Nardell. 1,501,158; July 15.
Valve lifter. H. G. Feist. 1,501,326; July 15.
Valve-lifting tool. T. Manna. 1,501,417; July 15.
Valve or door for furnaces, gas producers, retorts, and similar structures, Charging. J. H. Hardman. 1,501,216; July 5.
Valve pins, Tool for inserting and removing. A. B. Seppmann. 1,501,816; July 15.
Valve, Poppet. M. J. Boyle. 1,501,006; July 15.
Valve, Pressure and vacuum release. S. H. Brooks. 1,501,038; July 15.
Valve-spring compressor. F. C. Stake, H. B. Kinyoun, and J. P. Reynolds. 1,501,143; July 15.
Valve, Toilet flush. F. T. Bogard. 1,501,433; July 15.
Valves and the like, Cooling device for. T. Midgley, jr. 1,501,862; July 15.
Valves, Locking mechanism for dry-pipe. E. E. Clark. 1,501,098; July 15.
Vanity case. C. E. Croswhite. 1,501,525; July 15.
Vanity case. S. Morrison. 1,501,130; July 15.
Vehicle. A. R. Colson. 1,501,271; July 15.
Vehicle body, Convertible. T. Kugler and F. L. Van Rossum. 1,501,786; July 15.
Vehicle bumper. J. H. Sager. 1,501,191; July 15.
Vehicle direction indicator. D. C. Brockman. 1,501,198; July 15.
Vehicle hitch. J. R. Miller. 1,501,355; July 15.
Vehicle, Motor. R. Boehm. 1,501,304; July 15.
Vehicle, Motor. C. G. McClay and B. Rudis. 1,501,790; July 15.
Vehicle signal. W. D. and F. F. Stout. 1,501,377; July 15.
Vehicle spring. J. Knestner. 1,501,457; July 15.
Vehicle spring suspension. E. Schorr. 1,501,891; July 15.
Vehicle, Turbine-driven land. C. Kohler. 1,501,604; July 15.
Vehicle unloading truck. H. J. Linden. 1,501,609; July 15.
Vehicle wheel, Spring. J. Dischler. 1,501,757; July 15.
Vehicles, Brake mechanism for motor. J. W. White and L. H. Gaylord. 1,501,885; July 15.
Vehicles, Means for operating the brakes on. E. V. Hartford. 1,501,600; July 15.
Vehicles, Window for. A. S. Campbell. 1,501,702; July 15.
Vehicles, Windscreen for motor. W. Law. 1,501,406; July 15.
Veneer, Machine for cutting. J. W. Beiger. 1,501,551; July 15.
Vial-necking machine. B. T. Headley and P. H. Thompson. 1,501,773; July 15.
Wagons, Brake for coaster. H. J. Ferris. 1,501,589; July 15.

Wall board, Gauge board for breaking. J. Schumacher, sr. 1,501,813; July 15.
Wall sheathing. C. O. Cowan. 1,501,476; July 15.
Washer: *See*—
Air washer. Felt washer.
Washing machine. M. W. Carter. 1,501,746; July 15.
Washing machines. H. M. Vaughan. 1,501,254; July 15.
Water-activated reserve cell. R. C. Benner and H. H. Thompson. 1,501,091; July 15.
Water-closets, Ventilating. E. H. and C. E. Raper. 1,501,291; July 15.
Water-heating system for stoves. R. Lloyd. 1,501,223; July 15.
Web-folding machine. G. W. Swift, jr. 1,501,499; July 15.
Web-punching mechanism. G. W. Swift, jr. 1,501,501; July 15.
Welding, Apparatus for resistance line. H. W. Tobey. 1,501,872; July 15.
Welding machines, Shield for electric. J. W. Meadowcroft. 1,501,058; July 15.
Welding tubing, Apparatus for electrically butt. G. V. Johnston. 1,501,782; July 15.
Well-boring apparatus. S. H. Huston. 1,501,345; July 15.
Well tubing, Hydraulic apparatus for handling. E. W. Patterson. 1,501,464; July 15.
Wells, Flowing device for. L. Friedman and D. Wallace. 1,501,536; July 15.
Wells, Jack frame for oil. R. E. Alexander. 1,501,034; July 15.
Wheel: *See*—
Caster wheel. Railway cushion wheel.
Cushion wheel. Spring wheel.
Disk wheel. Vehicle wheel.
Grinding wheel.
Wheel and tire structure, Resilient. D. Nelson and C. H. Burrows. 1,501,176; July 15.
Wheel puller, tool grinder, and power device, Combined. G. E. Noffsinger. 1,501,682; July 15.
Wheel with resilient teeth, Toothed. F. Ljungström. 1,501,123; July 15.
Wheels, Advertising disk for automobile. E. F. Braucher. 1,501,094; July 15.
Wheels, Demountable-rim-securing device for vehicle. W. N. Booth. 1,501,581; July 15.
Wheels, Device for tightening auto. R. C. Van Emon. 1,501,253; July 15.
Winding machine. H. Koch. 1,501,670; July 15.
Window cleaners, Safety device for. A. Cohen. 1,501,438; July 15.
Window, Curtain. A. S. Campbell. 1,501,703; July 15.
Window grille, Collapsible. N. H. Piffard-Francis. 1,501,545; July 15.
Window sash, Stop for. S. T. Cox. 1,501,584; July 15.
Window-screen construction. F. A. Mosman. 1,501,131; July 15.
Windows of motor cars, Means for adjusting. F. Humer. 1,501,453; July 15.
Wire cable, Machine for manufacturing. A. G. Hoovens. 1,501,603; July 15.
Wire continuously, Drawing. E. Boley. 1,501,305; July 15.
Wire-winding machine. A. Novotone. 1,501,800; July 15.
Wires, Connecter for electric. G. M. Boren. 1,501,160; July 15.
Wires, Universal contact box for. E. Gallemin. 1,501,106; July 15.
Wireless signaling system. E. F. W. Alexanderson. 1,501,830–1; July 15.
Wireless signaling system. A. Hund. 1,501,664; July 15.
Wireless signaling system. W. C. White. 1,501,735; July 15.
Woodworking machine. A. Anthony. 1,501 429; July 15.
Wrecking tool. J. E. Hoffman. 1,501,776; July 15.
Wrench: *See*—
Internal wrench. Sliding-jaw wrench.
Pipe and nut wrench. Socket wrench.
Quick-acting wrench.

CLASSIFICATION OF PATENTS

ISSUED JULY 15, 1924.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 3: 1,501,421
2— 11: 1,501,687
15: 1,501,247
43: 1,501,728
68: 1,501,409
1,501,591
73: 1,501,381
77: 1,501,380
78: 1,501,802
102: 1,501,113
197: 1,501,654
199: 1,501,507
3— 12: 1,501,308
4— 8: 1,501,150
28: 1,501,620
57: 1,501,318
72: 1,501,291
